# Introduction

Building and consolidating a brand's image and corporate Identity is a fundamental step in any company's business strategy. If this is not done correctly, organizations run the risk of being misperceived by their audience and not achieving their business objectives. Aware of this, TECH professionals have designed this program with the aim of preparing journalism professionals in all aspects related to building brand reputation. This program will be professionals' main asset when it comes to entering a job market that is increasingly demanding journalists and communicators who are experts in the field.

“

*We offer you the best teaching methodology, and a multitude of practical cases to simulate the real-life situations that you could face throughout your profession”*

The corporate brand and identity of a company are dimensions that require special care during their creation. Once defined and internalized by target audiences and publics, turning back becomes very difficult in every way. Therefore, knowing the factors to take into account when creating and shaping the brand and corporate identity is essential before launching a business. Audiences are unforgiving and any misstep in presenting the corporate identity concept can be lethal in the short term.

Therefore, corporate branding and identity have never been as important as they are today. The aesthetic aspect of it has given way to the conceptual aspect. In a society that is increasingly aware of the defence of diverse ethical values, companies today face the challenge of convincing audiences that are more and more capable and committed to a great number of causes. Getting the public to identify with the values promoted by the brand and its identity will be the communication professional's main challenge.

This Postgraduate Certificate seeks to teach communication and journalism professionals the basic notions that influence the creation of a brand and its corporate identity, its reputational approach and the subsequent measurement of results from which the objectives will be readjusted in real time.

Throughout its 250 hours, the creation and monitoring processes of branding and corporate identity will be analyzed as a field of study and application. This will be done by teachers with a remarkable professional career at the head of companies in various sectors or as specialized journalists.

The content is designed to promote the development of professional skills oriented to the creation and maintenance of the brand and identity of any company. In this way, students will acquire the ability to identify the concepts that could best define the brand and corporate identity of any company. A Postgraduate Certificate designed for you, focused on improving your career and preparing you to achieve excellence in the field.

Its 100% online format allows students to decide how to organize their studies.

This **Postgraduate Certificate in Corporate Brand and Identity** contains the most complete and up-to-date program on the market. The most important features include:

- ♦ The development of case studies presented by experts in Corporate Communication
- ♦ Its graphic, schematic and practical contents provide scientific and practical information on those disciplines that are essential for professional practice
- ♦ The latest information on Corporate Communication
- ♦ Practical exercises where self-assessment can be used to improve learning
- ♦ Its special emphasis on innovative methodologies in Journalism, Brand and Corporate Communication
- ♦ The interactive learning system based on algorithms for decision making on the situations posed in Journalism and Digital Communication
- ♦ Theoretical lessons, questions to the expert, debate forums on controversial topics, and individual reflection assignments
- ♦ Content that is accessible from any fixed or portable device with an Internet connection

*With this Postgraduate Certificate that TECH provides you with, you will be able to generate an effective brand image and corporate identity adapted to the needs of your target audience"*

“

*Journalists' careers have become considerably more diverse in the last few years. Today, one of the professional opportunities with plenty of job openings is in the field of corporate Identity”*

The program includes professionals belonging to the field of journalism and communication in its teaching staff, who bring their work experience to this course, along with recognized specialists from prestigious reference societies and universities.

The multimedia content, developed with the latest educational technology, will provide the professional with situated and contextual learning, i.e., a simulated environment that will provide an immersive program designed to learn in real situations.

This program is designed around Problem-Based Learning, whereby professionals must try to solve the different professional practice situations that arise throughout from program. To do so, professionals will be assisted by an innovative interactive video system created by renowned and experienced experts in the field of Corporate Brand and Identity

*TECH offers you the best program in Corporate Brand and Identity in the current market. You only have to bring your enthusiasm to study.*

*Become an outstanding journalist and learn how successfully a work in the communications offices of companies in all sectors.*

# 02

  - 2.4.3. Brand Management Tools
  - 2.4.4. Brand Assessment and Ranking

“

*A unique, key, and decisive experience to boost your professional development”*

04

# Methodology

This academic program offers students a different way of learning. Our methodology uses a cyclical learning approach: **Relearning**.

This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the **New England Journal of Medicine** have considered it to be one of the most effective.

“

*Discover Relearning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization"*

## Case Study to contextualize all content

Our program offers a revolutionary approach to developing skills and knowledge. Our goal is to strengthen skills in a changing, competitive, and highly demanding environment.

“

*At TECH, you will experience a learning methodology that is shaking the foundations of traditional universities around the world”*

*You will have access to a learning system based on repetition, with natural and progressive teaching throughout the entire syllabus.*

*The student will learn, through collaborative activities and real cases, how to solve complex situations in real business environments.*

### A learning method that is different and innovative

This TECH program is an intensive educational program, created from scratch, which presents the most demanding challenges and decisions in this field, both nationally and internationally. This methodology promotes personal and professional growth, representing a significant step towards success. The case method, a technique that lays the foundation for this content, ensures that the most current economic, social and professional reality is taken into account.

“*Our program prepares you to face new challenges in uncertain environments and achieve success in your career*”

The case method has been the most widely used learning system among the world's leading business schools for as long as they have existed. The case method was developed in 1912 so that law students would not only learn the law based on theoretical content. It consisted of presenting students with real-life, complex situations for them to make informed decisions and value judgments on how to resolve them. In 1924, Harvard adopted it as a standard teaching method.

What should a professional do in a given situation? This is the question we face in the case method, an action-oriented learning method. Throughout the program, the studies will be presented with multiple real cases. They will have to combine all their knowledge and research, and argue and defend their ideas and decisions.

## Relearning Methodology

TECH effectively combines the Case Study methodology with a 100% online learning system based on repetition, which combines 8 different teaching elements in each lesson.

We enhance the Case Study with the best 100% online teaching method: Relearning.

*In 2019, we obtained the best learning results of all online universities in the world.*

At TECH, you will learn using a cutting-edge methodology designed to train the executives of the future. This method, at the forefront of international teaching, is called Relearning.

Our university is the only one in the world authorized to employ this successful method. In 2019, we managed to improve our students' overall satisfaction levels (teaching quality, quality of materials, course structure, objectives...) based on the best online university indicators.

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

This methodology has trained more than 650,000 university graduates with unprecedented success in fields as diverse as biochemistry, genetics, surgery, international law, management skills, sports science, philosophy, law, engineering, journalism, history, and financial markets and instruments. All this in a highly demanding environment, where the students have a strong socio-economic profile and an average age of 43.5 years.

*Relearning will allow you to learn with less effort and better performance, involving you more in your specialization, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation to success.*

From the latest scientific evidence in the field of neuroscience, not only do we know how to organize information, ideas, images and memories, but we know that the place and context where we have learned something is fundamental for us to be able to remember it and store it in the hippocampus, to retain it in our long-term memory.

In this way, and in what is called neurocognitive context-dependent e-learning, the different elements in our program are connected to the context where the individual carries out their professional activity.

This program offers the best educational material, prepared with professionals in mind:

### Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is highly specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

### Classes

There is scientific evidence suggesting that observing third-party experts can be useful.

Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

### Practising Skills and Abilities

They will carry out activities to develop specific skills and abilities in each subject area. Exercises and activities to acquire and develop the skills and abilities that a specialist needs to develop in the context of the globalization that we are experiencing.

### Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

#### Case Studies

Students will complete a selection of the best case studies chosen specifically for this program. Cases that are presented, analyzed, and supervised by the best specialists in the world.

#### Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive educational system for presenting multimedia content was awarded by Microsoft as a "European Success Story".

#### Testing & Retesting

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises, so that they can see how they are achieving their goals.

05
