tech 06 | Introduction

Cultural journalism has traditionally had a prominent presence in the media, but it has usually been a discipline far removed from academia. At other times, professionals who have had a journalistic career in the area have been learning through practice with very few educational proposals. Nowadays, such learning is essential in any sector.

This Postgraduate Certificate has an eminently professional orientation, and seeks to specialize cultural journalism professionals who are able to respond to market demands. Journalists specialized in specific fields are needed as a response to the growing segmentation of the public targeted by today's media. The field of cultural specialization is relevant because of the growing importance of the sector referred to cultural management and creation and, above all, because of the incorporation of culture into the digital sphere.

The objective of this program is to broaden the student's learning with a high level of deepening in the field of cultural journalism, which qualifies the student in the informative and dissemination functions in the professional environment, with special emphasis on the management and creation of cultural information.

And all this in a program of excellent academic level, created by specialized professionals with years of experience and, above all, in a 100% online way that will allow you to organize your study in a simple way, so you can combine it with the rest of your daily obligations.

This Postgraduate Certificate in Cultural Journalism: Information Management and Creation contains the most complete and up-to-date program on the market. The most important features include:

- The development of practical cases presented by experts in cultural journalism
- The graphic, schematic, and practical contents with which they are created provide scientific and practical information on the disciplines that are essential for professional practice
- News on the management and creation of cultural information
- Practical exercises where self-assessment can be used to improve learning
- An algorithm-based interactive learning system for decision-making in the situations that are presented to the student
- Special emphasis on innovative methodologies in the management and creation of cultural information
- Theoretical lessons, questions to the expert, debate forums on controversial topics, and individual reflection assignments
- Content that is accessible from any fixed or portable device with an Internet connection

This program will allow you to increase your ability to succeed. Reach a higher level of professionalism in communication through the latest educational technology 100% online"

Introduction | 07 tech

66

This Postgraduate Certificate is the best investment you can make in selecting a professional program to upgrade your knowledge in Cultural Journalism: Information Management and Creation"

It includes in its teaching staff professionals belonging to the field of cultural journalism, who pour into this program the experience of their work, as well as recognized specialists from reference societies and prestigious universities.

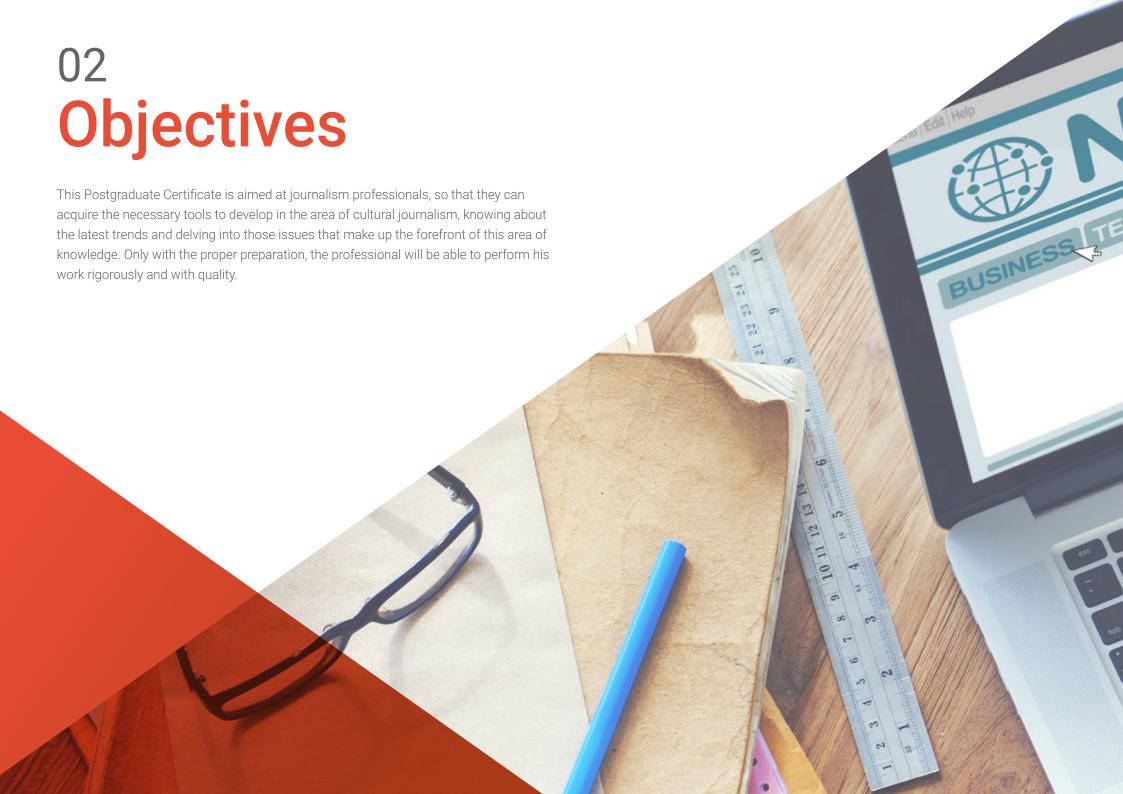

The multimedia content, developed with the latest educational technology, will provide the professional with situated and contextual learning, i.e., a simulated environment that will provide an immersive learning experience designed to prepare for real-life situations.

The design of this program focuses on Problem-Based Learning, by means of which the journalist will have to try to solve the different situations of professional practice that are presented to them. To do so, the specialist will have the help of an innovative interactive video system created by recognized experts in management and creation of cultural information, and with great experience.

Increase your confidence in decision making, reinforcing your knowledge through this Postgraduate Certificate.

Learn about the latest trends in the field of cultural journalism and improve the processes of writing and design of cultural information.

 - 3.7.1. Audience and the User
 - 3.7.2. The Media and the Content
 - 3.7.3. The Medium
 - 3.7.4. Time
 - 3.7.5 Disinformation
- 3.8. Web positioning: seo, sem, smo, smm and serm. Specialized Journalistic Contents
 - 3.8.1. SEO
 - 3.8.2. SEM
 - 3.8.3. SMO
 - 3.8.4. SMM
 - 3.8.5. SERM

The teaching materials of this program, elaborated by these specialists, have contents that are completely applicable to your professional experiences"

tech 18 | Methodology

Case Study to contextualize all content

Our program offers a revolutionary approach to developing skills and knowledge. Our goal is to strengthen skills in a changing, competitive, and highly demanding environment.

At TECH, you will experience a learning methodology that is shaking the foundations of traditional universities around the world"

You will have access to a learning system based on repetition, with natural and progressive teaching throughout the entire syllabus.

The student will learn, through collaborative activities and real cases, how to solve complex situations in real business environments.

A learning method that is different and innovative

This TECH program is an intensive educational program, created from scratch, which presents the most demanding challenges and decisions in this field, both nationally and internationally. This methodology promotes personal and professional growth, representing a significant step towards success. The case method, a technique that lays the foundation for this content, ensures that the most current economic, social and professional reality is taken into account.

Our program prepares you to face new challenges in uncertain environments and achieve success in your career"

The case method has been the most widely used learning system among the world's leading business schools for as long as they have existed. The case method was developed in 1912 so that law students would not only learn the law based on theoretical content. It consisted of presenting students with real-life, complex situations for them to make informed decisions and value judgments on how to resolve them. In 1924, Harvard adopted it as a standard teaching method.

What should a professional do in a given situation? This is the question we face in the case method, an action-oriented learning method. Throughout the program, the studies will be presented with multiple real cases. They will have to combine all their knowledge and research, and argue and defend their ideas and decisions.

tech 20 | Methodology

Relearning Methodology

TECH effectively combines the Case Study methodology with a 100% online learning system based on repetition, which combines 8 different teaching elements in each lesson.

We enhance the Case Study with the best 100% online teaching method: Relearning.

In 2019, we obtained the best learning results of all online universities in the world.

At TECH, you will learn using a cutting-edge methodology designed to train the executives of the future. This method, at the forefront of international teaching, is called Relearning.

Our university is the only one in the world authorized to employ this successful method. In 2019, we managed to improve our students' overall satisfaction levels (teaching quality, quality of materials, course structure, objectives...) based on the best online university indicators.

Methodology | 21 tech

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

This methodology has trained more than 650,000 university graduates with unprecedented success in fields as diverse as biochemistry, genetics, surgery, international law, management skills, sports science, philosophy, law, engineering, journalism, history, and financial markets and instruments. All this in a highly demanding environment, where the students have a strong socio-economic profile and an average age of 43.5 years.

Relearning will allow you to learn with less effort and better performance, involving you more in your specialization, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation to success.

From the latest scientific evidence in the field of neuroscience, not only do we know how to organize information, ideas, images and memories, but we know that the place and context where we have learned something is fundamental for us to be able to remember it and store it in the hippocampus, to retain it in our long-term memory.

In this way, and in what is called neurocognitive context-dependent e-learning, the different elements in our program are connected to the context where the individual carries out their professional activity.

tech 22 | Methodology

This program offers the best educational material, prepared with professionals in mind:

Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is highly specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

Classes

There is scientific evidence suggesting that observing third-party experts can be useful.

Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

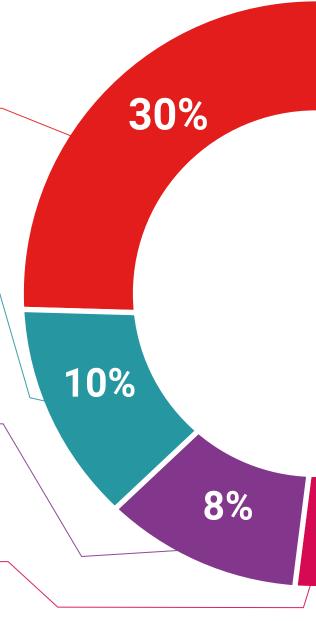

Practising Skills and Abilities

They will carry out activities to develop specific skills and abilities in each subject area. Exercises and activities to acquire and develop the skills and abilities that a specialist needs to develop in the context of the globalization that we are experiencing.

Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

20%

Case Studies

Students will complete a selection of the best case studies chosen specifically for this program. Cases that are presented, analyzed, and supervised by the best specialists in the world.

Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

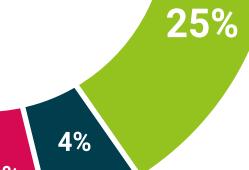

This exclusive educational system for presenting multimedia content was awarded by Microsoft as a "European Success Story".

 \bigcirc

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises, so that they can see how they are achieving their goals.
