# tech 06 | Introduction

The contents of this program are directed by professionals in the areas of communication who work in companies in the fashion and beauty sector. This teaching team pours their experience into this program and, therefore, their realistic and close vision of the professional reality, in a conscious and proactive way.

Throughout the syllabus, all the necessary aspects to measure the results of a campaign or a strategic plan applied at the media level will be discussed and analyzed. In this sense, the program will delve into those specific indicators that help to see the functioning of fashion from a global perspective and to understand in depth the results obtained.

A journey that will lead the journalist to recognize, among the whole range of possible metrics, those that are best suited to these sectors, offering results that are more in line with reality. Thus, the professional will also understand the most frequent errors in measuring results and the ways to avoid their occurrence.

All this, without neglecting the importance of measuring with high-impact tools such as Google Analytics and the importance of knowing how to make a complete report with the results extracted from it, which help the rest of the team understand the real result of the action.

Another key to the success of this program is the possibility of the student themselves deciding how they organize their learning: from the time, to the place and intensity of study. This ensures that this program is fully compatible with your personal and professional life. So that you never lose motivation.

In this sense, the program is 100% online, although you will be able to download the contents, to continue offline if you wish. You will also have access to illustrative videos, review audios, an online library with complementary material and the help and accompaniment of your tutor throughout the process.

This Postgraduate Certificate in Metrics for the Analysis of Fashion, Beauty and Luxury Communication contains the most complete and up-to-date program on the market. The most important features include:

- The development of case studies presented by experts in fashion, beauty and luxury journalism
- The graphic, schematic, and practical contents with which they are created provide scientific and practical information on the disciplines that are essential for professional practice
- Latest news in fashion, beauty and luxury journalism
- Practical exercises where the self-assessment process can be carried out to improve learning

- 1.2. Specific Indicators: Beyond the Benchmark
  - 1.2.1. What Is Fashion Made of?
  - 1.2.2. Specific Indicators of the Fashion Environment
  - 1.2.3. The Objective of Measurement and the Choice of Method
- 1.3. Detection of Measurement Errors
  - 1.3.1. Error Analysis: Inference and the Contrastive Method
  - 1.3.2. Type of Errors and Their Seriousness in Fashion Communication
  - 1.3.3. The Planning and the Budget in the Communicative Actions
- 1.4. Traditional Metrics for Communication Analysis
  - 1.4.1. Statistical Principles and Data Structure
  - 1.4.2. Research Methodology qualitative
  - 1.4.3. Types of Traditional Metrics: Structure and Function
- 1.5. Digital Metrics: Google Analytics
  - 1.5.1. Web Positioning in Fashion Brands
  - 1.5.2. What Are We Measuring in the Digital Environment?
  - 1.5.3. Types of Digital Metrics: Structure and Function
- 1.6. Creation and Adaptation of the Communicative Product
  - 1.6.1. The Value of the Communicative Product in the Fashion Industry
  - 1.6.2. The Interpretation of Data and the Effectiveness of Solutions
  - 1.6.3. Individual Perceptions Hidden in the Psychology of the Fashion Consumer

# Structure and Content | 19 tech

- 1.7. Impact of Measurement on Decision-Making
  - 1.7.1. Appropriate Questions and Hypothesis Formulation
  - 1.7.2. Benchmark and the Competitive Environment
  - 1.7.3. Change Management, Trust and Measuring Success in a Fashion Brand
- 1.8. Forecasting and Metrics as a Long-Term Strategy
  - 1.8.1. The Brand Behavior Pattern
  - 1.8.2. Frequency Map and Fashion Evolution Analysis
  - 1.8.3. Simulating Innovation Scenarios
- 1.9. The Analytical Report and Its Presentation
  - 1.9.1. Purpose of the Report: The Brand's Behavior Pattern
  - 1.9.2. Components of the Analytical Report on Fashion Communication
  - 1.9.3. Data Visualization
- 1.10. Express Evaluation for Crisis Situations
  - 1.10.1. Decisive Variables
  - 1.10.2. Short-Term Impact and Strategy Reframing
  - 1.10.3. The Untouchables: The Scale of Priorities of a Fashion Brand

# tech 22 | Methodology

#### Case Study to contextualize all content

Our program offers a revolutionary approach to developing skills and knowledge. Our goal is to strengthen skills in a changing, competitive, and highly demanding environment.

At TECH, you will experience a learning methodology that is shaking the foundations of traditional universities around the world"

You will have access to a learning system based on repetition, with natural and progressive teaching throughout the entire syllabus.

The student will learn, through collaborative activities and real cases, how to solve complex situations in real business environments.

### A learning method that is different and innovative

This TECH program is an intensive educational program, created from scratch, which presents the most demanding challenges and decisions in this field, both nationally and internationally. This methodology promotes personal and professional growth, representing a significant step towards success. The case method, a technique that lays the foundation for this content, ensures that the most current economic, social and professional reality is taken into account.

Our program prepares you to face new challenges in uncertain environments and achieve success in your career"

The case method has been the most widely used learning system among the world's leading business schools for as long as they have existed. The case method was developed in 1912 so that law students would not only learn the law based on theoretical content. It consisted of presenting students with real-life, complex situations for them to make informed decisions and value judgments on how to resolve them. In 1924, Harvard adopted it as a standard teaching method.

What should a professional do in a given situation? This is the question we face in the case method, an action-oriented learning method. Throughout the program, the studies will be presented with multiple real cases. They will have to combine all their knowledge and research, and argue and defend their ideas and decisions.

# tech 24 | Methodology

### Relearning Methodology

TECH effectively combines the Case Study methodology with a 100% online learning system based on repetition, which combines 8 different teaching elements in each lesson.

We enhance the Case Study with the best 100% online teaching method: Relearning.

In 2019, we obtained the best learning results of all online universities in the world.

At TECH, you will learn using a cutting-edge methodology designed to train the executives of the future. This method, at the forefront of international teaching, is called Relearning.

Our university is the only one in the world authorized to employ this successful method. In 2019, we managed to improve our students' overall satisfaction levels (teaching quality, quality of materials, course structure, objectives...) based on the best online university indicators.

# Methodology | 25 tech

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

This methodology has trained more than 650,000 university graduates with unprecedented success in fields as diverse as biochemistry, genetics, surgery, international law, management skills, sports science, philosophy, law, engineering, journalism, history, and financial markets and instruments. All this in a highly demanding environment, where the students have a strong socio-economic profile and an average age of 43.5 years.

Relearning will allow you to learn with less effort and better performance, involving you more in your specialization, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation to success.

From the latest scientific evidence in the field of neuroscience, not only do we know how to organize information, ideas, images and memories, but we know that the place and context where we have learned something is fundamental for us to be able to remember it and store it in the hippocampus, to retain it in our long-term memory.

In this way, and in what is called neurocognitive context-dependent e-learning, the different elements in our program are connected to the context where the individual carries out their professional activity.

This program offers the best educational material, prepared with professionals in mind:

#### **Study Material**

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is highly specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

#### Classes

There is scientific evidence suggesting that observing third-party experts can be useful.

Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

#### **Practising Skills and Abilities**

They will carry out activities to develop specific skills and abilities in each subject area. Exercises and activities to acquire and develop the skills and abilities that a specialist needs to develop in the context of the globalization that we are experiencing.

#### **Additional Reading**

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

20%

#### **Case Studies**

Students will complete a selection of the best case studies chosen specifically for this program. Cases that are presented, analyzed, and supervised by the best specialists in the world.

**Interactive Summaries** 

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive educational system for presenting multimedia content was awarded by Microsoft as a "European Success Story".

#### **Testing & Retesting**

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises, so that they can see how they are achieving their goals.
