Introduction

International journalism covers a large number of sectors that are relevant to society. In this case, TECH has designed a very complete course on politics and international law, with the aim of specializing competent journalists with the ability to convey the most relevant information worldwide to citizens.

Specialize in politics and international law and learn to report on what is happening in the world with total transparency and objectivity"

Politics is a fundamental part of society and, therefore, it is essential to have specialized journalists who are capable of conveying to citizens, in a clear, concise and objective manner, what is happening in this area, since having accurate information is essential to avoid being misled and to be able to make the right decisions. This Postgraduate Certificate analyses the basic pillars of politics and the influence that they have. In addition, it shows the phenomenon of globalization from a general perspective; the currents of thought and global restrictions such as security, the global market, environmental policies and the intensifying of migration.

But in this very complete course there is also space to cover international law, with a special focus on human rights, since, although it may seem impossible, there are still nations that do not recognize and protect the most basic fundamental rights. There is a dilemma of the trade-off between the limitation of freedoms or rights and both national and international security. Under pretexts such as terrorism or immigration, fundamental rights such as privacy or freedom of expression have been called into question in the name of security and protection of citizens.

In this context, this course also analyzes the foundations of international law and human rights from the different treaties that have taken place throughout history, the existing mechanisms to protect them and the different human rights systems that exist in the world.

In addition, specializing in international economics is also essential for professionals in this sector, as it will allow them to gain a better understanding of reality. For this reason, TECH has designed this complete Postgraduate Certificate that will give you the keys to develop your work with total professionalism.

In addition, this training has the advantage of being taken in a 100% online format, which will allow students not only to adjust their study time according to their needs, but also to be able to specialize from anywhere, as long as they have an Internet connection and a computer or mobile device.

This **Postgraduate Certificate in Politics and International Law** offers you the advantages of a high-level scientific, teaching, and technological specialization. These are some of its most notable features:

- Practical cases presented by experts in international journalism
- The graphic, schematic, and eminently practical contents with which they are created provide scientific and practical information on the disciplines that are essential for professional practice
- Latest developments in politics and international law
- Practical exercises where self-assessment can be used to improve learning
- A special emphasis on innovative methodologies in the field of the international journalism
- Algorithm-based interactive learning system for decision-making in situations focused on journalism and digital communication
- Theoretical lessons, questions to the expert, debate forums on controversial topics, and individual reflection assignments
- Content that is accessible from any fixed or portable device with an Internet connection

The most qualified journalists will be able to transmit the best information on what happens in the world"

"We provide you with the best training currently available in international journalism. You only have to bring your enthusiasm to study"

We offer you the best teaching methodology and a multitude of practical cases to simulate the real life situations that you could face throughout your career.

Know the latest trends in international journalism and be the best in this sector.

The teaching staff includes professionals from the field of journalism who bring their experience to this training program, as well as renowned specialists from leading societies and prestigious universities.

The multimedia content, developed with the latest educational technology, will provide the professional with situated and contextual learning, i.e., a simulated environment that will provide an immersive training program designed to train in real situations.

This program is designed around Problem Based Learning, where the student must try to solve different professional practice situations that arise during the course. For this, the professional will have the help of an innovative interactive video system made by recognized experts in Politics and International Law with extensive experience.

Methodology

This academic program offers students a different way of learning. Our methodology uses a cyclical learning approach: **Relearning**

This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the **New England Journal of Medicine have considered it to be one of the most effective.**

"Discover Re-learning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization".

At TECH we use the Case Method

Our program offers a revolutionary method of skills and knowledge development. Our goal is to strengthen skills in a changing, competitive, and highly demanding environment.

"With TECH you can experience a way of learning that is shaking the foundations of traditional universities around the world"

Our University is the first in the world to combine Harvard Business School case studies with a 100%-online learning system based on repetition.

The student will learn, through collaborative activities and real cases, how to solve complex situations in real business environments.

A learning method that is different and innovative.

This Journalism and Communication program from TECH Technological University prepares you to face all the challenges in this field, both nationally and internationally. We are committed to promoting your personal and professional growth, the best way to strive for success, that is why at TECH you will use Harvard *case studies*, with which we have a strategic agreement that allows us, to offer you material from the best university in the world.

"

We are the only online university that offers Harvard materials as teaching materials on its courses"

The case method has been the most widely used learning system among the world's leading business schools for as long as they have existed. The case method was developed in 1912 so that law students would not only learn the law based on theoretical content. It consisted of presenting students with real-life, complex situations for them to make informed decisions and value judgments on how to resolve them. In 1924, Harvard adopted it as a standard teaching method.

What should a professional do in a given situation? This is the question we face in the case method, an action-oriented learning method. Throughout the program, the studies will be presented with multiple real cases. They will have to combine all their knowledge and research, and argue and defend their ideas and decisions.

Relearning Methodology

Our university is the first in the world to combine the Harvard University *case studies method* with a 100% online learning system based on repetition, combining 8 different didactic elements in each lesson.

We enhance Harvard *case studies* with the best 100% online teaching method: Re-learning.

In 2019, we obtained the best learning results of all online universities in the world.

At TECH, you will learn using a cutting-edge methodology designed to train the executives of the future. This method, at the forefront of international teaching, is called Re-learning.

Our university is the only university in the world authorized to employ this successful method. In 2019, we managed to improve our students' overall satisfaction levels (teaching quality, quality of materials, course structure, objectives...) based on the best online university indicators.

01 learning from evidence

02 relearning from evidence

03 testing

04 learning from an expert

05 neurocognitive context dependent learning

06 Von-Restorff effect

07 case based learning through storytelling

08 competencies testing (retesting)

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically. This methodology has trained more than 650,000 university graduates with unprecedented success in fields as diverse as biochemistry, genetics, surgery, international law, management skills, sports science, philosophy, law, engineering, journalism, history, and financial markets and instruments. All this in a highly demanding environment, where the students have a strong socio-economic profile and an average age of 43.5 years.

Re-learning will allow you to learn with less effort and better performance, involving you more in your specialization, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation to success.

From the latest scientific evidence in the field of neuroscience, not only do we know how to organize information, ideas, images and memories, but we know that the place and context where we have learned something is fundamental for us to be able to remember it and store it in the hippocampus, to retain it in our long-term memory.

In this way, and in what is called neurocognitive context-dependent e-learning, the different elements in our program are connected to the context where the individual carries out their professional activity.
