Introduction

This Postgraduate Certificate in Sociology of International Relations provides professional journalists with the theoretical resources and analytical strategies necessary to perform specialized work in their daily practice, addressing two related disciplines: journalism and sociology, of relevant use in the field of international journalism. In this program, TECH offers the most complete training on the market for the student to specialize in this exciting field.

“

If you want to be the best in the field of international journalism, don't think twice and study with us. We offer the most complete training course currently available”

Leading experts in international journalism have pooled their knowledge to offer the most comprehensive program on Sociology of International Relations, a specialization with which students will be able to expand their skills and abilities, giving a boost to their profession.

The program includes the principles of sociology and debates on the object of study of this field of knowledge, and delves into contemporary social theory, providing theoretical foundations useful for the sociological analysis of contemporary societies.

It also analyzes power, with definitions and conceptual changes throughout history in the field of international relations. To this end, the existing power structure is conceptualized, taking into account particular regional situations that require historical analysis and contextualization, as is the case, for example, in post communist countries.

The sociology of the media is another important section, in which the sociocultural implications of the media are studied: the role of the media on social groups and individuals, the role of the media with respect to social problems and how they affect power relations between international political entities. There is also an important section devoted to the analysis of religious phenomena, migrations or structural problems of inequality.

In addition, this training has the advantage of being taken in a 100% online format, which will allow students not only to adjust their study time according to their needs, but also to be able to specialize from anywhere, as long as they have an Internet connection and a computer or mobile device.

This **Postgraduate Certificate in Sociology of International Relations** has the most complete and up to date academic program on the market. The most important features of the program include:

- ♦ Practical cases presented by experts in international journalism
- ♦ The graphic, schematic, and eminently practical contents with which they are created provide scientific and practical information on the disciplines that are essential for professional practice
- ♦ Practical exercises where the self assessment process can be carried out to improve learning
- ♦ A special emphasis on innovative methodologies in the field of the international journalism
- ♦ Algorithm based interactive learning system for decision making in situations focused on journalism and digital communication
- ♦ Theoretical lessons, questions to the expert, debate forums on controversial topics, and individual reflection assignments
- ♦ Access to content from any fixed or portable device with an Internet connection

A 100% online update that will allow you to combine your studies with the rest of your daily activities”

“

We provide you with the best training currently available in international journalism. You only have to bring your enthusiasm to study”

We offer you the best teaching methodology and a multitude of practical cases to simulate the real life situations that you could face throughout your career.

Know the latest trends in international journalism and be the best in this sector.

The teaching staff includes professionals from the field of journalism who bring their experience to this training program, as well as renowned specialists from leading societies and prestigious universities.

The multimedia content, developed with the latest educational technology, will provide the professional with situated and contextual learning, i.e., a simulated environment that will provide an immersive training program designed to train in real situations.

This program is designed around Problem Based Learning, where the student must try to solve different professional practice situations that arise during the course. For this, the professional will have the help of an innovative interactive video system made by recognized experts in Sociology of International Relations with extensive experience.

02 Objectives

This Postgraduate Certificate is aimed at professional journalists, so that they can acquire the necessary tools to develop in the field, learning about the latest trends and delving into the issues that are at the forefront of this branch of knowledge. Only with the proper preparation will a journalist be able to capture everything that happens in the international scene.

“

If your objective is to develop your career in the international field, we offer what you are looking for at TECH”

General Objectives

- ♦ Develop multidisciplinary training through sociology between the field of international relations and the media, as well as in historical or identity issues, which are key in contextualizing regional situations
- ♦ Examine the main approaches of Contemporary Social Theory and analyze the transformations and transitions of contemporary societies
- ♦ Provide the appropriate theoretical and analytical tools for an in depth understanding of social events in the global context
- ♦ Analyze the role of the media in global conflicts from different sociological perspectives

Develop your skills and become a versatile journalist who is at the forefront of the latest trends”

Specific Objectives

- ♦ Analyze the concept of sociology, the main channels of sociological thought and their relevant role for better journalistic work
- ♦ Reflect on the responsibility and commitment of journalism to society
- ♦ Raise awareness of the power of the media by reinforcing critical thinking and objectivity
- ♦ Develop specialized knowledge of the contemporary world, historical evolution and social theories
- ♦ Determine the characteristics and complexity of the problems which affect different societies and cultures
- ♦ Contextualize regional situations through adequate sociological analysis
- ♦ Understand the cultural dimensions of groups and societies in the development of cooperation relationships and conflict in the international context
- ♦ Examine the religious phenomenon and know the global situation of religion
- ♦ Develop specialized knowledge on social, gender and ethnic inequality
- ♦ Analyze the current situation in terms of migration and its social, political, economic and cultural consequences

03

Course Management

The design of this program has been created by a team of journalism professionals with years of professional and teaching experience. All of them, aware of the current need for quality training in the journalism sector, have joined their knowledge to provide students with the most complete specialization in the market, allowing them to develop in the field of international journalism.

“

The best way to learn is by studying with the best. And we offer you that opportunity”

- 1.10. Regional Situations
 - 1.10.1. Historical Contextualization and Regional Dynamics
 - 1.10.2. Post Communism in Eastern Countries

“*A unique, key, and decisive experience, to boost your professional development*”

05

Methodology

This training program offers a different way of learning. Our methodology uses a cyclical learning approach: **Relearning**.

This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the **New England Journal of Medicine** have considered it to be one of the most effective.

“

Discover Relearning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization"

At TECH we use the Case Method

Our program offers a revolutionary method of skills and knowledge development. Our goal is to strengthen skills in a changing, competitive, and highly demanding environment.

“

At TECH, you will experience a way of learning that is shaking the foundations of traditional universities around the world”

Our university is the first in the world to combine Harvard Business School case studies with a 100% online learning system based on repetition.

A learning method that is different and innovative.

This Journalism and Communication program from TECH Technological University prepares you to face all the challenges in this field, both nationally and internationally. We are committed to promoting your personal and professional growth, the best way to strive for success, that is why at TECH you will use Harvard case studies, with which we have a strategic agreement that allows us, to offer you material from the best university in the world.

“ *We are the only online university that offers Harvard materials as teaching materials on its courses”*

The student will learn, through collaborative activities and real cases, how to solve complex situations in real business environments.

The case method has been the most widely used learning system among the world's leading business schools for as long as they have existed. The case method was developed in 1912 so that law students would not only learn the law based on theoretical content. It consisted of presenting students with real-life, complex situations for them to make informed decisions and value judgments on how to resolve them. In 1924, Harvard adopted it as a standard teaching method.

What should a professional do in a given situation? This is the question we face in the case method, an action-oriented learning method. Throughout the program, the studies will be presented with multiple real cases. They will have to combine all their knowledge and research, and argue and defend their ideas and decisions.

Relearning Methodology

Our university is the first in the world to combine the Harvard University case studies method with a 100% online learning system based on repetition, combining 8 different didactic elements in each lesson.

We enhance Harvard case studies with the best 100% online teaching method: Relearning.

In 2019, we obtained the best learning results of all online universities in the world.

At TECH, you will learn using a cutting-edge methodology designed to train the executives of the future. This method, at the forefront of international teaching, is called Relearning.

Our university is the only university in the world authorized to employ this successful method. In 2019, we managed to improve our students' overall satisfaction levels (teaching quality, quality of materials, course structure, objectives...) based on the best online university indicators.

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

This methodology has trained more than 650.000 university graduates with unprecedented success in fields as diverse as biochemistry, genetics, surgery, international law, management skills, sports science, philosophy, law, engineering, journalism, history, and financial markets and instruments. All this in a highly demanding environment, where the students have a strong socio-economic profile and an average age of 43.5 years.

Relearning will allow you to learn with less effort and better performance, involving you more in your specialization, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation to success.

From the latest scientific evidence in the field of neuroscience, not only do we know how to organize information, ideas, images and memories, but we know that the place and context where we have learned something is fundamental for us to be able to remember it and store it in the hippocampus, to retain it in our long term memory.

In this way, and in what is called neurocognitive context-dependent e-learning, the different elements in our program are connected to the context where the individual carries out their professional activity.

This program offers the best educational material, prepared with professionals in mind:

Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is highly specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

Classes

There is scientific evidence suggesting that observing third-party experts can be useful. Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

Practising Skills and Abilities

They will carry out activities to develop specific competencies and skills in each thematic area. Exercises and activities to acquire and develop the skills and abilities that a specialist needs to develop in the context of the globalization we live in.

Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

Case Studies

They will complete a selection of the best case studies in the field used at Harvard. Cases that are presented, analyzed, and supervised by the best senior management specialists in the world.

Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive multimedia content presentation training Exclusive system was awarded by Microsoft as a "European Success Story".

Testing & Retesting

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises: so that they can see how they are achieving your goals.

06

Certificate

The Postgraduate Certificate in Sociology of International Relations guarantees, in addition to the most rigorous and up to date training, access to a Postgraduate Certificate issued by TECH Technological University.

“

Successfully complete this master's and receive your university degree without travel or laborious paperwork"

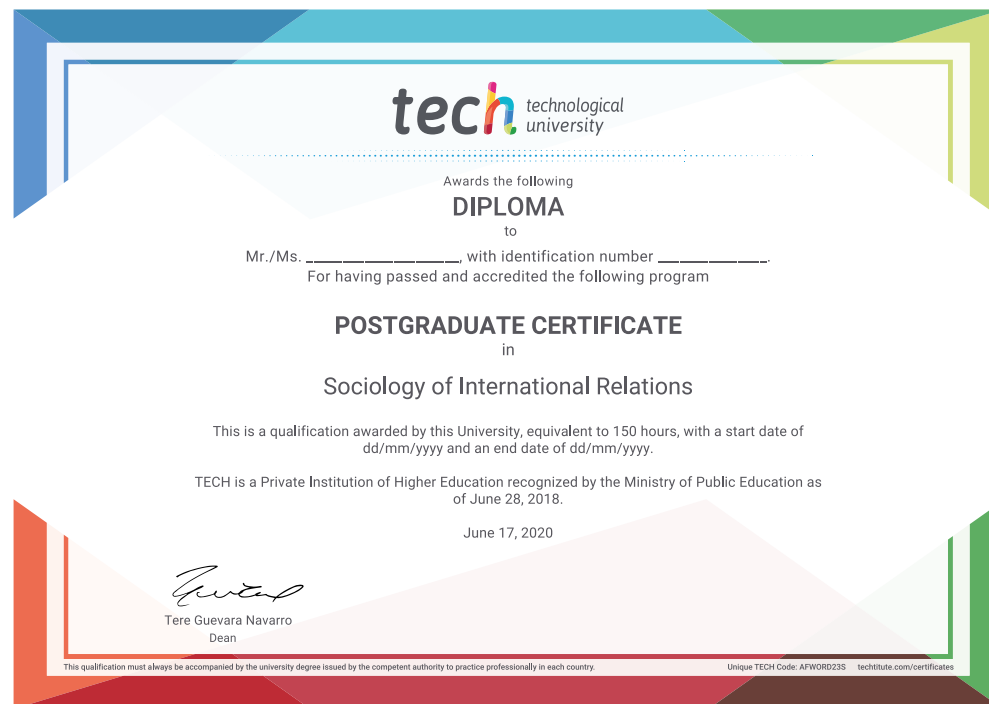

This Postgraduate Certificate in Sociology of International Relations has the most complete and up to date academic program on the market.

After the student has passed the assessments, they will receive their corresponding Postgraduate Certificate diploma issued by TECH Technological University via tracked delivery*.

The diploma issued by TECH Technological University will reflect the qualification obtained in the Postgraduate Certificate, and meets the requirements commonly demanded by labor exchanges, competitive examinations, and professional career evaluation committees.

Title: Postgraduate Certificate in Sociology of International Relations

Official N° of hours: 150 h.

*Apostille Convention. In the event that the student wishes to have their paper diploma issued with an apostille, TECH EDUCATION will make the necessary arrangements to obtain it, at an additional cost.
