Introduction

Sports Photojournalism is one of the most notorious areas of sports communication. As an indispensable complement to audiovisual or print media, a professional in this sector must manage the criteria of communicative impact common to journalism, but also master the particular characteristics of this type of work. This educational program will provide the graduate with the best specialization tools through a convenient 100% online format, designed by the best experts in this field.

“

*All the key elements of Sports Photojournalism
in a highly educational Postgraduate Certificate”*

Sometimes, with more or less justification, depending on the case, sports journalism is accused of collecting clichés that have been generated around sports over the years. We are always looking for originality, despite the information frenzy which we are involved on a daily basis. However, there are times when it is impossible to separate oneself from any of these tiresome repetitions.

And on countless occasions, 'a picture is worth a thousand words' Its something that has been demonstrated over time, when, at the beginning, news was accompanied by illustrations, to later recognize the capital importance of photography in the press. Here begins an exciting journey in which we will verify the photographic evolution, from paper to web, where everything is immediacy.

Needs, analysis, study and recognition of the work that a photojournalist does every day, from Monday to Sunday, to fulfill the need for information and images that sports journalism has always had.

In this way, TECH launches to the market an innovative, complete and exhaustive educational experience through which, in only 6 weeks of 100% online education, the graduate will be able to improve their professional practice in a guaranteed way. In addition to 150 hours of the best theoretical-practical and additional content, as well as the support of a teaching team specialized in the area, you will have exclusive access to 10 masterclasses developed by internationally renowned experts in Sports Journalism, thanks to which you will have the opportunity to implement in your communication practice the strategies that have elevated your career to the highest level.

This **Postgraduate Certificate in Sports Photojournalism** contains the most complete and up-to-date program on the market. The most important features include:

- ♦ The latest technology in online teaching software
- ♦ A highly visual teaching system, supported by graphic and schematic contents that are easy to assimilate and understand
- ♦ Practical cases presented by practising experts
- ♦ State-of-the-art interactive video systems.
- ♦ Teaching supported by telepractice
- ♦ Continuous updating and recycling systems
- ♦ Autonomous learning: full compatibility with other occupations
- ♦ Practical exercises for self-assessment and learning verification
- ♦ Support groups and educational synergies: questions to the expert, debate and knowledge forums.
- ♦ Communication with the teacher and individual reflection work
- ♦ Content that is accessible from any fixed or portable device with an Internet connection
- ♦ Supplementary documentation databases are permanently available, even after the program

Get certified in one of the most interesting fields of journalism with highest quality in the university market"

“

Several leading figures in the field of Sports Journalism have agreed to provide 100 minutes of master classes to share their experience and success strategies with the graduates of this program”

The program’s teaching staff includes professionals from the field who contribute their work experience to this educational program, as well as renowned specialists from leading societies and prestigious universities.

The multimedia content, developed with the latest educational technology, will provide the professional with situated and contextual learning, i.e., a simulated environment that will provide immersive education programmed to learn in real situations.

This program is designed around Problem-Based Learning, whereby the professional must try to solve the different professional practice situations that arise during the academic year. For this purpose, the students will be assisted by an innovative interactive video system created by renowned and experienced experts.

Learn all the aspects that successful political communication professionals must master.

With teachers who are experts in this area of work, this program is a unique opportunity for professional development.

02 Objectives

This Postgraduate Certificate in Sports Photojournalism is aimed at obtaining a degree of specialization that allows a journalism professional to develop their career in this field in an optimal way. For this purpose, we have developed the essential theoretical content that will provide students with the necessary knowledge and tools to transfer into practice, which will be developed intensively throughout the program.

“

Learn how to achieve powerful, journalistically accurate images with this intensive, high-impact educational program"

General Objectives

- ♦ Present photography as an important part of the journalistic discourse
- ♦ Demonstrate that, in one way or another, images support stories
- ♦ Recognize the core value of the photojournalist
- ♦ Establish an approach to the different aspects of sports photography

“

Our goal is simple: to offer you high-quality specialization, with the most developed teaching resources so that you achieve the best results with little effort”

Specific Objectives

- ♦ Provide students with knowledge about photography that most journalists do not have
- ♦ Implement a powerful base of image concepts to create a conceptual foundation for photography
- ♦ Help students learn why photographs are used in certain ways
- ♦ Rethink previous knowledge of photography
- ♦ Examine what the leaders in this field are currently doing
- ♦ Analyze what has been done up to the present day
- ♦ Raise awareness in favor of joint work between photographer and editor

03

Course Management

The Postgraduate Certificate in Sports Photojournalism is taught by professionals in the sector, with extensive experience in journalism and teaching, who will try to give you a real vision of the profession. For this reason, an educational program has been developed especially focused on professional development from a perspective fully adjusted to the reality of the sector.

“

*Learn from experts in the field and start moving
in a dynamic and interesting profession”*

International Guest Director

Born in Puerto Rico, Alvaro Martin received his degree from Harvard University and an his MBA from Harvard Business School.

 - 1.2.1. Shooting Modes
 - 1.2.1.1. Program
 - 1.2.1.2. Manual
 - 1.2.1.3. Shutter Priority
 - 1.2.1.4. Speed Priority
 - 1.2.2. Shutter Speed
 - 1.2.3. Diaphragm
 - 1.2.4. ISO
 - 1.2.5. Approach
 - 1.2.5.1. Manual
 - 1.2.5.2. Automatic.
 - 1.2.5.2.1. Fixed
 - 1.2.5.2.2. Continuous
 - 1.2.6. RAW or JPG
 - 1.2.7. Composition Rules
- 1.3. Cameras. Suitable Equipment and Software
 - 1.3.1. Mirror Reflex Cameras
 - 1.3.2. Mirrorless Cameras
 - 1.3.3. Required Characteristics
 - 1.3.4. Laptop or Tablet
 - 1.3.5. Selection Software
 - 1.3.6. Developing and Editing Software

- 1.4. Positioning of the Photographer on the Sports Field. Psychology when Interacting with Athletes
 - 1.4.1. Positioning and the Importance of the Type of Lens Used
 - 1.4.1.1. Soccer
 - 1.4.1.2. Basketball
 - 1.4.1.3. Indoor Sports
 - 1.4.1.4. Tennis
 - 1.4.1.5. Rugby
 - 1.4.1.6. Others
 - 1.4.2. Psychology
 - 1.4.2.1. Interviews
 - 1.4.2.2. Sports Field
- 1.5. Current References
 - 1.5.1. Analysis of Photojournalists Who Stand Out for Their Work
- 1.6. Major Photography Agencies
 - 1.6.1. Getty
 - 1.6.2. Reuters
 - 1.6.3. AP
 - 1.6.4. EFE
 - 1.6.5. Others
- 1.7. Photographic Awards
 - 1.7.1. The Importance of the Sports Category in Awards such as the *World Press Photo Awards*
 - 1.7.2. Other Awards
- 1.8. Historic Publications
 - 1.8.1. *Sport Illustrated*
 - 1.8.2. *El Gráfico*
 - 1.8.3. *France Football*
 - 1.8.4. *Sportweek*
 - 1.8.5. *Don Balón*
 - 1.8.6. Others
- 1.9. Analysis of Iconic Photographs
 - 1.9.1. Selection and Study of Photographs Recognized for Their Impact
- 1.10. The Future of Photojournalism
 - 1.10.1. Before Covid-19
 - 1.10.2. After Covid-19

05

Methodology

This academic program offers students a different way of learning. Our methodology uses a cyclical learning approach: **Relearning**.

This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the **New England Journal of Medicine** have considered it to be one of the most effective.

“

Discover Relearning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization”

Case Study to contextualize all content

Our program offers a revolutionary approach to developing skills and knowledge. Our goal is to strengthen skills in a changing, competitive, and highly demanding environment.

“

At TECH, you will experience a learning methodology that is shaking the foundations of traditional universities around the world”

You will have access to a learning system based on repetition, with natural and progressive teaching throughout the entire syllabus.

A learning method that is different and innovative

This TECH program is an intensive educational program, created from scratch, which presents the most demanding challenges and decisions in this field, both nationally and internationally. This methodology promotes personal and professional growth, representing a significant step towards success. The case method, a technique that lays the foundation for this content, ensures that the most current economic, social and professional reality is taken into account.

“*Our program prepares you to face new challenges in uncertain environments and achieve success in your career*”

The student will learn, through collaborative activities and real cases, how to solve complex situations in real business environments.

The case method has been the most widely used learning system among the world's leading business schools for as long as they have existed. The case method was developed in 1912 so that law students would not only learn the law based on theoretical content. It consisted of presenting students with real-life, complex situations for them to make informed decisions and value judgments on how to resolve them. In 1924, Harvard adopted it as a standard teaching method.

What should a professional do in a given situation? This is the question we face in the case method, an action-oriented learning method. Throughout the program, the studies will be presented with multiple real cases. They will have to combine all their knowledge and research, and argue and defend their ideas and decisions.

Relearning Methodology

TECH effectively combines the Case Study methodology with a 100% online learning system based on repetition, which combines 8 different teaching elements in each lesson.

We enhance the Case Study with the best 100% online teaching method: Relearning.

In 2019, we obtained the best learning results of all online universities in the world.

At TECH, you will learn using a cutting-edge methodology designed to train the executives of the future. This method, at the forefront of international teaching, is called Relearning.

Our university is the only one in the world authorized to employ this successful method. In 2019, we managed to improve our students' overall satisfaction levels (teaching quality, quality of materials, course structure, objectives...) based on the best online university indicators.

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

This methodology has trained more than 650,000 university graduates with unprecedented success in fields as diverse as biochemistry, genetics, surgery, international law, management skills, sports science, philosophy, law, engineering, journalism, history, and financial markets and instruments. All this in a highly demanding environment, where the students have a strong socio-economic profile and an average age of 43.5 years.

Relearning will allow you to learn with less effort and better performance, involving you more in your specialization, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation to success.

From the latest scientific evidence in the field of neuroscience, not only do we know how to organize information, ideas, images and memories, but we know that the place and context where we have learned something is fundamental for us to be able to remember it and store it in the hippocampus, to retain it in our long-term memory.

In this way, and in what is called neurocognitive context-dependent e-learning, the different elements in our program are connected to the context where the individual carries out their professional activity.

This program offers the best educational material, prepared with professionals in mind:

Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is highly specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

Classes

There is scientific evidence suggesting that observing third-party experts can be useful.

Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

Practising Skills and Abilities

They will carry out activities to develop specific skills and abilities in each subject area. Exercises and activities to acquire and develop the skills and abilities that a specialist needs to develop in the context of the globalization that we are experiencing.

Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

Case Studies

Students will complete a selection of the best case studies chosen specifically for this program. Cases that are presented, analyzed, and supervised by the best specialists in the world.

Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive educational system for presenting multimedia content was awarded by Microsoft as a "European Success Story".

Testing & Retesting

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises, so that they can see how they are achieving their goals.

06

Certificate

This Postgraduate Certificate in Sports Photojournalism guarantees students, in addition to the most rigorous and up-to-date education, access to a Postgraduate Certificate issued by TECH Global University

“

Successfully complete this program and receive your university qualification without having to travel or fill out laborious paperwork”

This private qualification will allow you to obtain a **Postgraduate Certificate in Sports Photojournalism** endorsed by **TECH Global University**, the world's largest online university.

TECH Global University is an official European University publicly recognized by the Government of Andorra ([official bulletin](#)). Andorra is part of the European Higher Education Area (EHEA) since 2003. The EHEA is an initiative promoted by the European Union that aims to organize the international training framework and harmonize the higher education systems of the member countries of this space. The project promotes common values, the implementation of collaborative tools and strengthening its quality assurance mechanisms to enhance collaboration and mobility among students, researchers and academics.

This **TECH Global University** private qualification is a European program of continuing education and professional updating that guarantees the acquisition of competencies in its area of knowledge, providing a high curricular value to the student who completes the program.
