Introduction

The Postgraduate Diploma in notary, banking and primary sector is one of the least common in journalism, yet it is one of the areas in which this special training is essential to work with solvency in this complex field. That is why this program has compiled all the knowledge currently in demand, necessary for those professionals who want to delve deeper into economic journalism. This is a 100% online program, full of practical exercises, complementary readings, audiovisual resources and the Relearning methodology, based on experience and leaving behind the long hours of forced learning and memorization.

“

An outstanding Postgraduate Diploma that will provide you with the opportunity to work in a highly specialized field as a top professional”

Journalism is a profession that requires a multidisciplinary character, requires mastery of terminology and economic models, as well as the tools of communication in different media (written or audiovisual). Therefore, this Postgraduate Diploma aims to provide professionals in the field with a vision focused on the management of economic information, including fundamental aspects such as notary, banking and the primary sector.

In this way, this program will delve into the role of the notarial institution, its component of guaranteeing legal, preventive and economic security. We will also delve into the work carried out by the press office of a notarial association that handles economic data on a daily basis and works according to the economic model that is best known to society.

In addition, in this program we will study what is related to journalism that reports on fishing, which, within the primary sector, is one of the economic engines of many countries. This traditional and long-standing sector has a specialized language and is reflected daily in the different media, in some cases with publications and specialized television and radio programs.

Therefore, in this program, the journalist will find updated and necessary information that delves into such a demanding field as economics. The entire compendium of information will be presented through audiovisual resources, complementary readings and exercises based on real cases, which will allow you to understand the functions of the field in a practical and effective way.

This **Postgraduate Diploma in Economic Journalism in Notary, Banking and Primary Sector** contains the most complete and up-to-date program on the market. The most important features include:

- ♦ The development of practical cases presented by experts in Economics Journalism
- ♦ The graphic, schematic, and practical contents with which they are created, provide scientific and practical information on the disciplines that are essential for professional practice
- ♦ Practical exercises where self-assessment can be used to improve learning
- ♦ Its special emphasis on innovative methodologies
- ♦ Theoretical lessons, questions to the expert, debate forums on controversial topics, and individual reflection assignments
- ♦ Content that is accessible from any fixed or portable device with an Internet connection

Gain specific training in Economic Journalism, Notary, Banking and Primary Sector and give your career a boost towards excellence”

“*An intensive program supported by the best online teaching technology, which will allow you to learn with high efficiency*”

Faculty members of the Postgraduate Diploma in Economic Journalism in Notaries, Banking and Primary Sector have extensive experience in teaching at the university level, both in undergraduate and graduate programs. In addition, they offer to the program their vision as active professionals, which allows them to know, first hand, the deep transformation that the communication sector is undergoing.

The methodology of the programs offered at TECH Global University, in online format, allows to break the barriers imposed by work duties and the difficult conciliation with personal life. Attending face-to-face classes is practically impossible for those who are involved in the daily demands of work. That is why this Postgraduate Diploma is the quality answer to your need for expertise.

All this educational compendium makes this a program of specialization in Economic Journalism that compiles all the aspects that are relevant and essential to turn the Journalism professional into an authentic expert in the fields related to this type of information.

Acquire the practical tools and knowledge necessary to become a highly skilled specialized journalist.

With teachers who are experts in this area of work, this program is a unique opportunity for professional development.

02

 - 3.9.3. Calling the Media
 - 3.9.4. Measuring Impact
- 3.10. How to Create a Sponsored Content Campaign
 - 3.10.1. Messages to be Conveyed. Importance of the Narrative
 - 3.10.2. Selection the Target Audience

A complete program that will take you through the knowledge you need to compete among the best"

05

Methodology

This academic program offers students a different way of learning. Our methodology uses a cyclical learning approach: **Relearning**.

This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the **New England Journal of Medicine** have considered it to be one of the most effective.

“

Discover Relearning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization"

Case Study to contextualize all content

Our program offers a revolutionary approach to developing skills and knowledge. Our goal is to strengthen skills in a changing, competitive, and highly demanding environment.

“

At TECH, you will experience a learning methodology that is shaking the foundations of traditional universities around the world”

You will have access to a learning system based on repetition, with natural and progressive teaching throughout the entire syllabus.

The student will learn, through collaborative activities and real cases, how to solve complex situations in real business environments.

A learning method that is different and innovative

This TECH program is an intensive educational program, created from scratch, which presents the most demanding challenges and decisions in this field, both nationally and internationally. This methodology promotes personal and professional growth, representing a significant step towards success. The case method, a technique that lays the foundation for this content, ensures that the most current economic, social and professional reality is taken into account.

“*Our program prepares you to face new challenges in uncertain environments and achieve success in your career*”

The case method has been the most widely used learning system among the world's leading business schools for as long as they have existed. The case method was developed in 1912 so that law students would not only learn the law based on theoretical content. It consisted of presenting students with real-life, complex situations for them to make informed decisions and value judgments on how to resolve them. In 1924, Harvard adopted it as a standard teaching method.

What should a professional do in a given situation? This is the question we face in the case method, an action-oriented learning method. Throughout the program, the studies will be presented with multiple real cases. They will have to combine all their knowledge and research, and argue and defend their ideas and decisions.

Relearning Methodology

TECH effectively combines the Case Study methodology with a 100% online learning system based on repetition, which combines 8 different teaching elements in each lesson.

We enhance the Case Study with the best 100% online teaching method: Relearning.

In 2019, we obtained the best learning results of all online universities in the world.

At TECH, you will learn using a cutting-edge methodology designed to train the executives of the future. This method, at the forefront of international teaching, is called Relearning.

Our university is the only one in the world authorized to employ this successful method. In 2019, we managed to improve our students' overall satisfaction levels (teaching quality, quality of materials, course structure, objectives...) based on the best online university indicators.

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

This methodology has trained more than 650,000 university graduates with unprecedented success in fields as diverse as biochemistry, genetics, surgery, international law, management skills, sports science, philosophy, law, engineering, journalism, history, and financial markets and instruments. All this in a highly demanding environment, where the students have a strong socio-economic profile and an average age of 43.5 years.

Relearning will allow you to learn with less effort and better performance, involving you more in your specialization, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation to success.

From the latest scientific evidence in the field of neuroscience, not only do we know how to organize information, ideas, images and memories, but we know that the place and context where we have learned something is fundamental for us to be able to remember it and store it in the hippocampus, to retain it in our long-term memory.

In this way, and in what is called neurocognitive context-dependent e-learning, the different elements in our program are connected to the context where the individual carries out their professional activity.

This program offers the best educational material, prepared with professionals in mind:

Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is highly specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

Classes

There is scientific evidence suggesting that observing third-party experts can be useful.

Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

Practising Skills and Abilities

They will carry out activities to develop specific skills and abilities in each subject area. Exercises and activities to acquire and develop the skills and abilities that a specialist needs to develop in the context of the globalization that we are experiencing.

Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

Case Studies

Students will complete a selection of the best case studies chosen specifically for this program. Cases that are presented, analyzed, and supervised by the best specialists in the world.

Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive educational system for presenting multimedia content was awarded by Microsoft as a "European Success Story".

Testing & Retesting

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises, so that they can see how they are achieving their goals.

06

Certificate

The Postgraduate Diploma in Economic Journalism in Notary, Banking and Primary Sector and guarantees students, in addition to the most rigorous and up-to-date education, access to a Postgraduate Diploma issued by TECH Global University.
