Introduction

Information is power and at the same time it is freedom, no one can freely choose what to believe or what to think if they have access to only part of the information. Therefore, the goal of international journalism must be to provide truthful, objective and independent information so that the citizens of the world can build informed and free opinions. In this TECH Postgraduate Diploma, we want to offer the student the most complete training currently available in order to reach a higher level of specialization that allows them to compete with the best in the sector.

“

Citizens must be kept up to date with what is happening in the rest of the world and, for this, it is necessary to have qualified journalists who transmit information truthfully and objectively”

The program offers specialized preparation with innovative, useful and concrete contents, essential for working in the international field. It offers up-to-date and competitive training with respect to other programs currently offered, thus training professionals who are prepared and capable of working and thriving in the media, in agencies or as freelance journalists.

Specifically, the program delves into international politics, covering the major news areas around the world. The importance of the United States and its relationship with the great world powers, the current situation of the European Union or the processes that Latin America has undergone since the Spanish colonization are just some of the aspects that will be covered in this very complete Postgraduate Diploma. Also to be discussed is the most relevant information on the main events in Russia and the former USSR; Asia, with China at the forefront as one of the great economic powers worldwide; or Africa, a continent with a large number of raw materials that is the focus of attention of different powers, especially China and Russia.

War conflicts are one of the most important events in the field of international journalism. They are a growing phenomenon in today's world, motivated by numerous factors such as unresolved regional tensions, the dismantling of the rule of law, the usurpation or absence of institutions, illicit economic benefits or the lack of resources, often as a consequence of climate change.

Likewise, the rise of nationalism or violent extremism has made terrorism a widespread problem, both in countries involved in violent conflict or with high levels of political terror. It has also become a problem in economically developed states, but where lack of opportunities, social exclusion and the nation's involvement in an external conflict are the driving force of terrorist tendencies.

This makes it essential for the rest of the world to be informed about all these types of events, through truthful and objective news, which will provide a clear and concise vision of these facts. But for this to happen it is necessary to have highly qualified professionals and, therefore, TECH has designed this complete Postgraduate Diploma that will give the student the keys to be able to develop their work with total professionalism.

This **Postgraduate Diploma in International Journalism** contains the most complete and up-to-date academic program on the market. The most important features of the specialization are:

- ♦ Practical cases presented by experts in international journalism
- ♦ The graphic, schematic, and eminently practical contents with which they are created provide scientific and practical information on the disciplines that are essential for professional practice
- ♦ Latest developments in international journalism
- ♦ Practical exercises where self-assessment can be used to improve learning

“

A unique, key, and decisive training experience to boost your professional development”

05

Methodology

This training program offers a different way of learning. Our methodology uses a cyclical learning approach: **Relearning**.

This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the **New England Journal of Medicine** have considered it to be one of the most effective.

“

Discover Relearning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization"

At TECH we use the Case Method

Our program offers a revolutionary method of skills and knowledge development. Our goal is to strengthen skills in a changing, competitive, and highly demanding environment.

“

At TECH, you will experience a way of learning that is shaking the foundations of traditional universities around the world”

Our university is the first in the world to combine Harvard Business School case studies with a 100% online learning system based on repetition.

A learning method that is different and innovative.

This Journalism and Communication program from TECH Technological University prepares you to face all the challenges in this field, both nationally and internationally. We are committed to promoting your personal and professional growth, the best way to strive for success, that is why at TECH you will use Harvard case studies, with which we have a strategic agreement that allows us, to offer you material from the best university in the world.

“*We are the only online university that offers Harvard materials as teaching materials on its courses*”

The student will learn, through collaborative activities and real cases, how to solve complex situations in real business environments.

The case method has been the most widely used learning system among the world's leading business schools for as long as they have existed. The case method was developed in 1912 so that law students would not only learn the law based on theoretical content. It consisted of presenting students with real-life, complex situations for them to make informed decisions and value judgments on how to resolve them. In 1924, Harvard adopted it as a standard teaching method.

What should a professional do in a given situation? This is the question we face in the case method, an action-oriented learning method. Throughout the program, the studies will be presented with multiple real cases. They will have to combine all their knowledge and research, and argue and defend their ideas and decisions.

Relearning Methodology

Our university is the first in the world to combine the Harvard University case studies method with a 100% online learning system based on repetition, combining 8 different didactic elements in each lesson.

We enhance Harvard case studies with the best 100% online teaching method: Relearning.

In 2019, we obtained the best learning results of all online universities in the world.

At TECH, you will learn using a cutting-edge methodology designed to train the executives of the future. This method, at the forefront of international teaching, is called Relearning.

Our university is the only university in the world authorized to employ this successful method. In 2019, we managed to improve our students' overall satisfaction levels (teaching quality, quality of materials, course structure, objectives...) based on the best online university indicators.

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

This methodology has trained more than 650.000 university graduates with unprecedented success in fields as diverse as biochemistry, genetics, surgery, international law, management skills, sports science, philosophy, law, engineering, journalism, history, and financial markets and instruments. All this in a highly demanding environment, where the students have a strong socio-economic profile and an average age of 43.5 years.

Relearning will allow you to learn with less effort and better performance, involving you more in your specialization, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation to success.

From the latest scientific evidence in the field of neuroscience, not only do we know how to organize information, ideas, images and memories, but we know that the place and context where we have learned something is fundamental for us to be able to remember it and store it in the hippocampus, to retain it in our long-term memory.

In this way, and in what is called neurocognitive context-dependent e-learning, the different elements in our program are connected to the context where the individual carries out their professional activity.

This program offers the best educational material, prepared with professionals in mind:

Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is highly specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

Classes

There is scientific evidence suggesting that observing third-party experts can be useful. Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

Practising Skills and Abilities

They will carry out activities to develop specific competencies and skills in each thematic area. Exercises and activities to acquire and develop the skills and abilities that a specialist needs to develop in the context of the globalization we live in.

Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

Case Studies

They will complete a selection of the best case studies in the field used at Harvard. Cases that are presented, analyzed, and supervised by the best senior management specialists in the world.

Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive multimedia content presentation training Exclusive system was awarded by Microsoft as a "European Success Story".

Testing & Retesting

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises: so that they can see how they are achieving your goals.
