tech 06 | Introduction

Journalism studies are one of the most demanded in all universities, since this profession has a great influence on the population and has gained great prominence since its beginnings. Journalism encompasses different branches: social, cultural, economic, sports, international, events, conflicts, etc. This makes it necessary for professionals in this field to specialize in order to tell stories in the most appropriate way in each case.

Additionally, the transmission of information can be carried out through different media. Specifically, this Postgraduate Diploma aims to teach students in Specialized Journalism. To do so, it is necessary to acquire a series of skills that allow you to put into practice all that has been learned.

The syllabus addresses all the particularities of sports and cultural journalism (origins, evolution, genres, formats, etc.) so that the students have a general idea of these two areas of journalism, which is both complete and of high quality. In addition, emphasis is also placed on television journalism.

This program is the most complete and directed for the professional in the field of Journalism and communication to reach a higher level of performance, based on the fundamentals and the latest trends in Specialized Journalism.

This **Postgraduate Diploma in Specialized Journalism** contains the most complete and up-to-date program on the market. The most important features include:

- The development of case studies presented by experts in Specialized Journalism
- The graphic, schematic, and practical contents with which they are created provide scientific and practical information on the disciplines that are essential for professional practice
- The latest developments in Specialized journalism
- Practical exercises where the self-assessment process can be carried out to improve learning
- A special emphasis on innovative methodologies in the field of the Specialized journalism
- The interactive learning system based on algorithms for decision-making on the situations posed in Specialized Journalism
- Theoretical lessons, questions to the expert, debate forums on controversial topics, and individual reflection assignments
- Content that is accessible from any fixed or portable device with an Internet connection

Work with the best teaching professionals in this Postgraduate Diploma with curricular value of excellence"

This Postgraduate Diploma is perfect for you to learn how to reach the public and transmit information in a truthful and credible way"

Its teaching staff includes professionals belonging to the world of journalism, who bring to this program the experience of their work, as well as recognized specialists from prestigious reference societies and universities.

The multimedia content, developed with the latest educational technology, will provide the professional with situated and contextual learning, i.e., a simulated environment that will provide an immersive program designed to learn in real situations.

This program is designed around Problem-Based Learning, whereby the professionals must try to solve the different professional practice situations that arise throughout the program. To do so, the professionals will be assisted by an innovative interactive video system developed by renowned and experienced experts in the field of Specialized Journalism.

Don't miss the opportunity to increase your competence in the field of Journalism.

Learn the latest trends in Specialized Journalism and be the best in this field.

tech 10 | Objectives

 - 3.7.1. Introduction
 - 3.7.2. Specialized Journalism
 - 3.7.3. Specialized Programs
- 3.8. Television Production
 - 3.8.1. Introduction
 - 3.8.2. Television Production
 - 3.8.3. Pre-Production
 - 3.8.4. Filming
 - 3.8.5. Control of Realization
- 3.9. Treatment of Live and Deferred Information
 - 3.9.1. Introduction
 - 3.9.2. Treatment of Live Information
 - 3.9.3. Treatment of Deferred Information
- 3.10. Editing Techniques
 - 3.10.1. Introduction
 - 3.10.2. Television Editing Techniques
 - 3.10.3. Types of Editing

A unique, key, and decisive educational experience to boost your professional development"

tech 20 | Methodology

Case Study to contextualize all content

Our program offers a revolutionary approach to developing skills and knowledge. Our goal is to strengthen skills in a changing, competitive, and highly demanding environment.

At TECH, you will experience a learning methodology that is shaking the foundations of traditional universities around the world"

You will have access to a learning system based on repetition, with natural and progressive teaching throughout the entire syllabus.

The student will learn, through collaborative activities and real cases, how to solve complex situations in real business environments.

A learning method that is different and innovative

This TECH program is an intensive educational program, created from scratch, which presents the most demanding challenges and decisions in this field, both nationally and internationally. This methodology promotes personal and professional growth, representing a significant step towards success. The case method, a technique that lays the foundation for this content, ensures that the most current economic, social and professional reality is taken into account.

Our program prepares you to face new challenges in uncertain environments and achieve success in your career"

The case method has been the most widely used learning system among the world's leading business schools for as long as they have existed. The case method was developed in 1912 so that law students would not only learn the law based on theoretical content. It consisted of presenting students with real-life, complex situations for them to make informed decisions and value judgments on how to resolve them. In 1924, Harvard adopted it as a standard teaching method.

What should a professional do in a given situation? This is the question we face in the case method, an action-oriented learning method. Throughout the program, the studies will be presented with multiple real cases. They will have to combine all their knowledge and research, and argue and defend their ideas and decisions.

tech 22 | Methodology

Relearning Methodology

TECH effectively combines the Case Study methodology with a 100% online learning system based on repetition, which combines 8 different teaching elements in each lesson.

We enhance the Case Study with the best 100% online teaching method: Relearning.

In 2019, we obtained the best learning results of all online universities in the world.

At TECH, you will learn using a cutting-edge methodology designed to train the executives of the future. This method, at the forefront of international teaching, is called Relearning.

Our university is the only one in the world authorized to employ this successful method. In 2019, we managed to improve our students' overall satisfaction levels (teaching quality, quality of materials, course structure, objectives...) based on the best online university indicators.

Methodology | 23 tech

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

This methodology has trained more than 650,000 university graduates with unprecedented success in fields as diverse as biochemistry, genetics, surgery, international law, management skills, sports science, philosophy, law, engineering, journalism, history, and financial markets and instruments. All this in a highly demanding environment, where the students have a strong socio-economic profile and an average age of 43.5 years.

Relearning will allow you to learn with less effort and better performance, involving you more in your specialization, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation to success.

From the latest scientific evidence in the field of neuroscience, not only do we know how to organize information, ideas, images and memories, but we know that the place and context where we have learned something is fundamental for us to be able to remember it and store it in the hippocampus, to retain it in our long-term memory.

In this way, and in what is called neurocognitive context-dependent e-learning, the different elements in our program are connected to the context where the individual carries out their professional activity.

tech 24 | Methodology

This program offers the best educational material, prepared with professionals in mind:

Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is highly specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

Classes

There is scientific evidence suggesting that observing third-party experts can be useful.

Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

Practising Skills and Abilities

They will carry out activities to develop specific skills and abilities in each subject area. Exercises and activities to acquire and develop the skills and abilities that a specialist needs to develop in the context of the globalization that we are experiencing.

Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

20%

Case Studies

Students will complete a selection of the best case studies chosen specifically for this program. Cases that are presented, analyzed, and supervised by the best specialists in the world.

Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive educational system for presenting multimedia content was awarded by Microsoft as a "European Success Story".

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises, so that they can see how they are achieving their goals.
