tech 06 | Introduction

Update in Clinical Dermatology has been gaining prominence as the pathophysiological mechanisms of the processes affecting the skin and its adnexa have become better understood. Consequently, the means and ways of treating the diseases manifested in them have advanced considerably. In fact, in recent years it has become a recurrent discipline in different branches of care, being a common reason for consultation in both primary and specialized care.

Advances in the areas of dermatology and its clinical application require professionals with new and multiple competencies, increasingly stringent in the quality requirements for their performance. It is essential that the dermatology specialist be able to respond adequately to this evolution of scientific and technological knowledge by means of adequate medical training in the most current and impacting topics in this specialty.

For this reason, TECH has created this complete program that combines the most recognized current theory in the field of Update in Clinical Dermatology with a high intensity practical stay, in which the specialist will be involved in a real work team for 3 weeks. This is a great advance for any medical professional seeking to treat and apply to real patients the latest techniques and diagnostic advances given in the Update in Clinical Dermatology.

During the theoretical part of the course, students will be free to take the course load at their own pace, without the usual pressure of fixed classes or fixed schedules. In the practical part, a designated tutor will accompany the specialist at all times, being fundamental during the process to resolve doubts and offer a unique guide in all areas of dermatological interest. Thus, an academic program is formed, which represents a decisive advance in the improvement of any specialist or medical professional in Update in Clinical Dermatology.

This **Hybrid Professional Master's Degree in Update in Clinical Dermatology** contains the most complete and up-to-date scientific program on the market. The most important features include:

- Development of more than 100 clinical cases presented by medical professionals specialized in Clinical Dermatology Update
- The graphic, schematic, and practical contents with which they are created, provide scientific and practical information on the disciplines that are essential for professional practice
- Special emphasis on novel methods for the detection and treatment of various dermatological diseases
- Care for patients with dermatological pathologies and special characteristics: neonates, children, elderly or pregnant women
- Advanced treatments for conditions such as acne, rosacea, alopecia, etc.
- All of this will be complemented by theoretical lessons, questions to the expert, debate forums on controversial topics, and individual reflection assignments
- Content that is accessible from any fixed or portable device with an Internet connection
- In addition, you will be able to carry out a clinical internship in one of the best hospitals in the world

Add to your online study the realization of clinical practices with the highest standards of quality and technological level in an elite hospital center"

During 12 months of learning, you will acquire all the knowledge required to grow personally and professionally in the field of Update in Clinical Dermatology"

In this Hybrid Professional Master's Degree proposal, of a professionalizing nature and blended learning modality, the program is aimed at updating medical professionals who perform their functions in the Update in Clinical Dermatology unit, and who require a high level of qualification. The contents are based on the latest scientific evidence, and oriented in a didactic way to integrate theoretical knowledge into medical practice, and the theoretical-practical elements will facilitate the updating of knowledge and will allow decision making in patient management.

Thanks to their multimedia content developed with the latest educational technology, they will allow medical professional a situated and contextual learning, that is, a simulated environment that will provide an immersive learning programmed to train in real situations. This program is designed around Problem-Based Learning, whereby the professional must try to solve the different professional practice situations that arise throughout the program. For this purpose, the student will be assisted by an innovative interactive video system created by renowned experts.

Update your knowledge through the Hybrid Professional Master's Degree in Update in Clinical Dermatology, in a theoretical-practical way and adapted to your needs.

This Hybrid Professional Master's Degree allows you to practice in simulated environments, which provide immersive learning programmed to train in real situations.

tech 10 | Why Study this Hybrid Professional Master's Degree?

1. Updating from the latest technology available

The area of Update in Clinical Dermatology has experienced numerous advances in recent years such as the emergence of new therapies to treat atopic dermatitis or the use of Artificial Intelligence as a method for diagnosing skin pathologies. For this reason, TECH has created a program that will allow the student to know and apply all the updates in this field.

2. Learning from the experience of the best specialists

This Hybrid Professional Master's Degree has a teaching staff made up of specialists with extensive experience in the world of Update in Clinical Dermatology. Since they are in charge of developing the didactic resources of the program, the contents they will offer to the students will be completely applicable in their professional life.

3. Entering First-Class Clinical Environments

TECH carefully selects all available centers for Internship Programs. Thanks to this, the professional will have guaranteed access to a prestigious clinical environment in the area of Update in Clinical Dermatology. In this way, you will be able to see the day-to-day work of a demanding, rigorous and exhaustive sector, always applying the latest theses and scientific postulates in its work methodology.

Why Study this Hybrid Professional | 11 tech Master's Degree?

4. Combining the Best Theory with State-of-the-Art Practice

In the academic market, there are numerous programs focused exclusively on offering theoretical content that is poorly adapted to the profession and has no applicability to real work. In view of this, TECH has opted to create this learning model, which allows the student to combine excellent theory with a 3-week internship in a first class clinical center, in order to promote the acquisition of useful skills in daily practice.

5. Expanding the Boundaries of Knowledge

TECH offers the possibility of carrying out this Internship Program in centers of national importance. In this way, the specialist will be able to expand their frontiers and keep up to date with the best professionals, who practice in first class clinics and in different continents. A unique opportunity that only TECH could offer to its students.

tech 14 | Objectives

General Objective

• The overall objective of the Hybrid Professional Master's Degree in Update in Clinical Dermatology is to ensure that the professional updates the diagnostic and therapeutic procedures of the specialty in a theoretical and practical way, through a hospital stay designed with clinical and academic rigor, under the guidance of renowned professionals in a hospital center of the highest scientific quality and technological innovation. In this program, the professional will address the main interventions of the specialist, which will allow them to improve and enhance their skills in the medical care of his patients

This refresher program will generate a sense of security when practising medicine, which will help you grow both personally and professionally"

Module 1. General Aspects

- Describe the analytical tests as well as the appropriate complementary ones to be ordered to confirm clinical diagnoses
- Apply the appropriate therapeutic regimen according to the pathology, but also according to the patient's own characteristics

Module 2. Hereditary Diseases

- Establish the differences between the different types of inherited dermatological diseases
- Identify the routes of administration and the most commonly used medicines in common or frequent conditions

Module 3. Inflammatory Diseases

- Describe the main dermatological diseases of inflammatory origin
- Determine which skin manifestations are serious and require immediate attention

Module 4. Pilosebaceous Junction Pathology

- · Point out the main typical locations and distribution patterns of skin lesions
- Address new diagnostic techniques and the therapeutic approach to pilosebaceous junction pathologies

Module 5. Connective Tissue and Autoimmune Diseases

- Establish the differences between the different types of connective tissue diseases by analysing the main clinical manifestations
- Describe the main disorders of keratinisation and their distinguishing features

Module 6. Infectious Diseases

- Identify the signs and symptoms of neurocutaneous diseases and their consequences for the patient
- Recognise the keys to establishing a differential diagnosis for nosological entities that share cutaneous clinical features

Module 7. Oncologic Dermatology

- To incorporate the latest advances in diagnostic and therapeutic procedures in dermatological oncological processes
- Differentiate between papulosquamous, blistering and pustular pathologies

Module 8. Dermatology in Special Population Groups

- Describe the new diagnostic approaches in special population groups in the specialty
- Identify the pathochrony and natural history, associated extracutaneous symptoms and signs, and other distinctive clinical data to enable identification

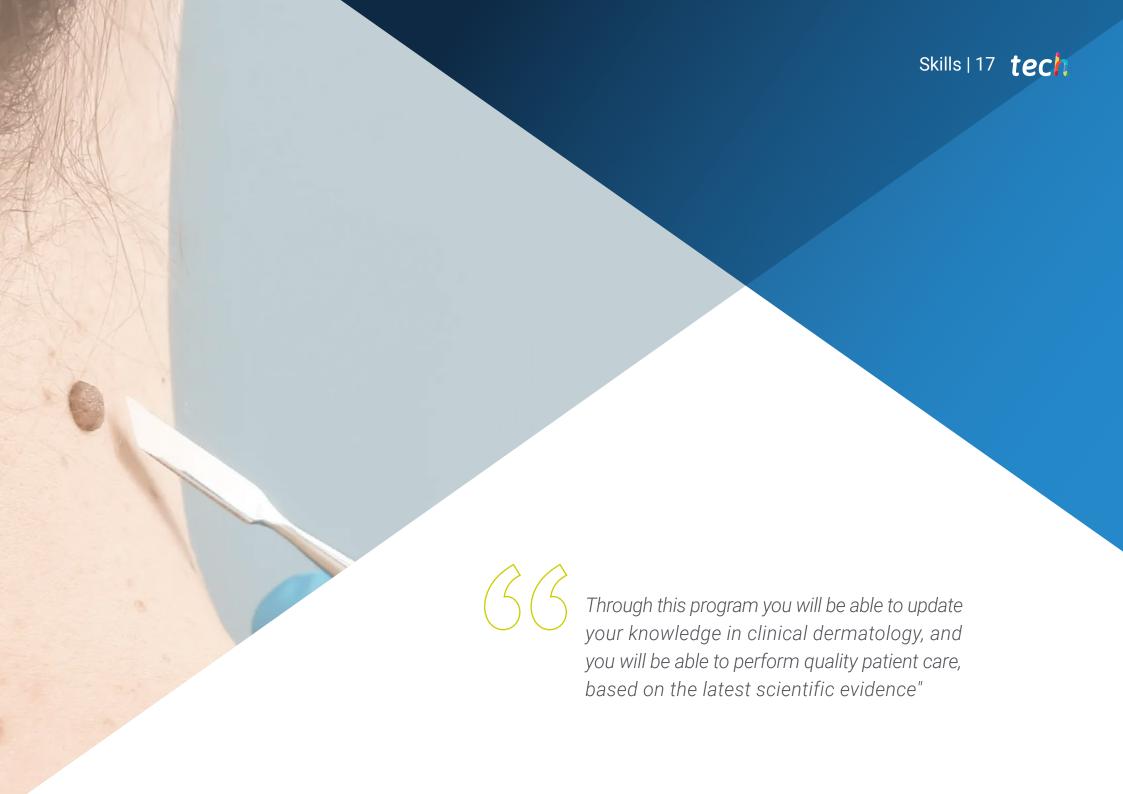

Module 9. Cutaneous Manifestations of Internal Diseases

- Establish medical care procedures for cutaneous manifestations of internal diseases
- · Identify the possible complications that may arise from them

Module 10. Other Areas of Interest in Dermatology

- Identify new developments in the field of nail pathology
- Review the evidence on clinical management of vascular malformations and haemangiomas
- Describe the advances in photodermatology and their therapeutic applications in skin pathologies

tech 18 | Skills

General Skills

- Practice the profession with respect for other health professionals, acquiring skills to work in teams
- Recognize the need to maintain your professional skills and keep them up to date, with special emphasis on autonomous and continuous learning of new information
- Develop the capacity for critical analysis and research in your professional field

You will determine, thanks to this program, the updated techniques for the treatment of various dermatological pathologies in special population groups"

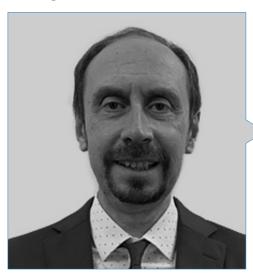

- · Review the latest advances in skin morphology
- Perform differential diagnoses in order to determine the correct diagnosis of the patient with a dermatological condition
- Select the most appropriate analytical examinations and complementary tests for each pathology
- Relate the appropriate therapeutic regimen to the pathology and to the patient's own characteristics
- Describe the appropriate routes of administration for each type of treatment
- Determine the most widely used drugs for the most commonly occurring skin conditions
- Differentiate between the different types of inherited dermatological diseases
- Identify diseases that can manifest themselves with skin lesions, associated extracutaneous signs and symptoms, and other distinguishing clinical features that enable their identification
- Define the main dermatological diseases of inflammatory origin
- Establish an appropriate treatment of choice in inflammatory dermatological diseases
- Classify and describe the pathologies of the pilosebaceous junction
- Determine the signs and symptoms of connective tissue diseases in order to differentiate between the different types
- Explain skin pathologies and their differentiating features in special population groups

- Analyze the principal characteristics of oncology processes in Skin
- Manage scientific databases for carrying out reviews and bibliographic searches of scientific studies
- Formulate, implement, and evaluate standards, action guidelines, and protocols specific to the field of Dermatology
- Conduct a critical and in-depth study on a topic of scientific interest in the field of dermatology
- Communicate result findings after having analyzed, evaluated, and synthesized the data

tech 22 | Course Management

Management

Dr. Gaston Roustan Gullón

- Head of the Dermatology Department at the University Hospital Puerta de Hierro Majadahonda
- Physician of the Dermatology Department at the University Hospital Puerta de Hierro Majadahonda
- Principal Investigator and collaborator in clinical trials and Dermatology projects
- Author of more than 25 articles published in scientific journals
- Speaker at more than 50 national and international dermatology congresses
- Teacher in university studies of Medicine
- Member and Head of Training of the Central Territorial Section of the Spanish Academy of Dermatology and Venereology (AEDV)
- Doctorate in Medicine from the Autonomous University Madric
- Member of the Spanish Academy of Dermatology and Venereology

The experts who offer this program have extensive experience in the area of Clinical Dermatology, so the knowledge they will provide you with will be applicable in your working life"

tech 26 | Educational Plan

Module 1. General Aspects

- 1.1. Structure and Function of the Skin
- 1.2. Primary Skin Lesions
- 1.3. Secondary Skin Lesions
- 1.4. Diagnostic Techniques
- 1.5. Dermatopathology
- 1.6. The Importance of Dermatologic Semiology in the Diagnosis of Skin Disease
- 1.7. The Skin and the Endocrine System
- 1.8. Skin Microbiology
- 1.9. Nutrition and Skin
- 1.10. Basis of Pharmacological Therapeutics in Dermatology
- 1.11. Corticotherapy in Dermatology
- 1.12. Ultrasonography of the Skin and Appendages

Module 2. Hereditary Diseases

- 2.1. Disorders of Keratinization: Ichthyosis
- 2.2. Disorders of Keratinization: Familial Benign Pemphigus
- 2.3. Keratinization Disorders: Darier's Disease
- 2.4. Neurocutaneous Diseases: Neurofibromatosis
- 2.5. Neurocutaneous Diseases: Tuberous Sclerosis
- 2.6. Neurocutaneous Diseases: Sturge-Weber Syndrome
- 2.7. Epidermolysis Bullosa

Module 3. Inflammatory Diseases

- 3.1. Papulosquamous Dermatoses: Psoriasis
- 3.2. Papulosquamous Dermatoses: Pityriasis Rubra Pilaris
- 3.3. Papulosquamous Dermatoses: Pityriasis Rosea
- 3.4. Papulosquamous Dermatoses: Acute Lichenoid Pityriasis and Varioliform Pityriasis
- 3.5. Atopic Dermatitis
- 3.6. Seborrheic Dermatitis
- 3.7. Contact Dermatitis
- 3.8. Blistering Diseases: Pemphigus
- 3.9. Blistering Diseases: Pemphigoid
- 3.10. Blistering Diseases: Dermatitis Herpetiformis
- 3.11. Blistering Diseases: Linear IgA Dermatosis
- 3.12. Pustular Rashes: Pemphigus IgA
- 3.13. Neonatal Pustular Eruption
- 3.14. Panniculitis
- 3.15. Pustular Eruption Caused by Drugs
- 3.16. Pigmentation Disorders
- 3.17. Vasculitis
- 3.18. Toxicodermia
- 3.19. Deposition Diseases
- 3.20. Granulomatous Diseases
- 3.21. Urticaria and Angioedema

Module 4. Pilosebaceous Junction Pathology

- 1.1. Pilosebaceous Junction Structure
- 4.2. Acne
- 4.3. Rosacea
- 4.4. Hidrosadenitis Suppurativa
- 4.5. Alopecia
- 4.6. Aesthetic Medicine in Skin Care and Pilosebaceous Junction Diseases

Module 5. Connective Tissue and Autoimmune Diseases

- 5.1. Skin and Connective Tissue
- 5.2. Rheumatoid Arthritis
- 5.3. Systemic Lupus Erythematosus
- 5.4. Scleroderma
- 5.5. Dermatomyositis
- 5.6. Sjögren's Syndrome
- 5.7. Ehlers-Danlos Syndrome

Module 6. Infectious Diseases

- 6.1. Exanthematous Viral Skin Infections
- 6.2. Non-Exanthematous Viral Skin Infections
- 6.3. Cutaneous Manifestations of COVID-19
- 6.4. Bacterial Skin Infections
- 6.5. Mycotic Skin Infections Dermatophytosis
- 6.6. Leprosy
- 6.7. Cutaneous Tuberculosis
- 6.8. Endemic Treponematosis
- 6.9. Sexually Transmitted Diseases
- 6.10. Parasitic

Module 7. Oncologic Dermatology

- 7.1. Benign Melanocytic Tumors
- 7.2. Benign Fibrohistiocytic Tumors
- 7.3. Malignant Tumors Merkel's Carcinoma
- 7.4. Malignant Fibrohistiocytic Tumors
- 7.5. Actinic Keratosis
- 7.6. Non-Melanoma Skin Cancer
- 7.7. Cutaneous Melanoma
- 7.8. Cutaneous Sarcoma
- 7.9. Cutaneous Paraneoplastic Syndrome
- 7.10. Cutaneous Lymphomas

Module 8. Dermatology in Special Population Groups

- 8.1. Neonatal Dermatology
- 8.2. Pediatric Dermatology
- 8.3. Adolescent Dermatology
- 8.4. Geriatric Dermatology
- 8.5. Pregnancy Dermatoses
- 8.6. Dermatology of Black Skin
- 8.7. Dermatology in Immunocompromised Patients

Module 9. Cutaneous Manifestations of Internal Diseases

- 9.1. Cutaneous Manifestations of Endocrinology Diseases
- 9.2. Cutaneous Manifestations of Renal Diseases
- 9.3. HIV/AIDS
- 9.4. Cutaneous Manifestations of Nutritional Disorders
- 9.5. Cutaneous Manifestations of Digestive Diseases
- 9.6. Cutaneous Manifestations of Cardiac Diseases
- 9.7. Cutaneous Signs of Internal Malignancy

Module 10. Other Areas of Interest in Dermatology

- 10.1. Nail Pathology
- 10.2. Dermatolocgical Emergencies
- 10.3. Oral Mucosal Pathology
- 10.4. Photodermatology
- 10.5. Vascular Malformations and Hemangiomas
- 10.6. Urticaria and Angioedema
- 10.7. Magistral Formulas
- 10.8. Change to Skin Pigmentation Disorders
- 10.9. Pressure Ulcers
- 10.10. Genomics and Skin Care

tech 30 | Clinical Internship

The Internship Program's practical training consists of a practical stay in a clinical center, lasting 3 weeks, from Monday to Friday, with 8 consecutive hours of work with an associate specialist. This stay will allow you to deal with real patients with a team of leading professionals in the area of dermatology, applying the most innovative diagnostic procedures and planning the latest generation of therapy for each pathology.

In this completely practical Internship Program, the activities are aimed at developing and perfecting the skills necessary to provide healthcare care in areas and conditions that require highly qualified professionals, and are oriented towards specific expertise for practicing the activity, in a safe environment for the patient and with highly professional performance.

It is undoubtedly an opportunity to learn by working in the field of Update in Clinical Dermatology, where the application of updated dermatological treatments is essential to promote the welfare of patients. This is a new way of understanding and integrating healthcare processes, and makes the clinical center the ideal teaching scenario for this innovative experience in the improvement of professional medical competencies for the 21st century.

The practical teaching will be carried out with the active participation of the student performing the activities and procedures of each area of competence (learning to learn and learning to do), with the accompaniment and guidance of teachers and other fellow trainees that facilitate teamwork and multidisciplinary integration as transversal competencies for the praxis of Clinical Dermatology (learning to be and learning to relate).

The procedures described below will form the basis of the practical part of the training, and their completion is subject to both the suitability of the patients and the availability of the center and its workload, with the proposed activities being as follows:

Clinical Internship | 31 tech

Module	Practical Activity
Dermatopathology	Use of microscopic morphology in diagnostic work
	Perform and interpret skin biopsies
	Use other diagnostic techniques such as special stains, polarized light, immunohistochemistry, photomicroscopy or immunofluorescence
	Interpret frozen samples from dermatological surgeries or cutaneous electron micrographs
Immunodermatology	Evaluate dermatological diseases and mucous membranes by immunology
	Interpret the results of various immunodermatological tests
	Analyze samples using cutaneous immunofluorescence, anti-endomysial antibody, desmoglein 1 and 3, BP180 and BP230
Infectious and inflammatory diseases	Analyze cases of inflammatory skin diseases
	Apply advanced diagnosis and treatment in patients with clinical pictures of infectious and inflammatory diseases
	Care for inpatients and outpatients with infectious skin lesions
	Diagnose cutaneous and mucosal mycoses
	Follow-up of patients with STIs
Oncologic dermatology and internal skin diseases	Treating dermatologic lesions in HIV patients
	Management of nutritional dermopathies
	Analyze treatments and guidelines in cases of melanoma
	Manage malignant and benign tumors of the skin
Dermatology in special groups of the population and other procedures	Apply phototherapy, peeling or mesotherapy techniques in those cases where it is convenient
	Using digital dermatoscopes for skin cancer detection and mole mapping
	Manage dermopathies associated with aging or pregnancy
	Tailoring therapies and diagnostic procedures to neonates and young children with skin lesions

Civil Liability Insurance

This institution's main concern is to guarantee the safety of the trainees and other collaborating agents involved in the internship process at the company. Among the measures dedicated to achieve this is the response to any incident that may occur during the entire teaching-learning process.

To this end, this educational entity undertakes to take out civil liability insurance to cover any eventuality that may arise during the stay at the internship center.

This liability policy for interns will have broad coverage and will be taken out prior to the start of the practical training period. In this way, the professional will not have to worry in case he/she has to face an unexpected situation and will be covered until the end of the practical program at the center.

General Conditions for Practical Training

The general terms and conditions of the internship agreement for the program are as follows:

- 1. TUTOR: During the Hybrid Professional Master's Degree, students will be assigned with two tutors who will accompany them throughout the process, answering any doubts and questions that may arise. On the one hand, there will be a professional tutor belonging to the internship center who will have the purpose of guiding and supporting the student at all times. On the other hand, they will also be assigned with an academic tutor whose mission will be to coordinate and help the students during the whole process, solving doubts and facilitating everything they may need. In this way, the student will be accompanied and will be able to discuss any doubts that may arise, both clinical and academic.
- 2. DURATION: The internship program will have a duration of three continuous weeks, in 8-hour days, 5 days a week. The days of attendance and the schedule will be the responsibility of the center and the professional will be informed well in advance so that they can make the appropriate arrangements.
- 3. ABSENCE: If the students does not show up on the start date of the Hybrid Professional Master's Degree, they will lose the right to it, without the possibility of reimbursement or change of dates. Absence for more than two days from the internship, without justification or a medical reason, will result in the professional's withdrawal from the internship, therefore, automatic termination of the internship. Any problems that may arise during the course of the internship must be urgently reported to the academic tutor.

- **4. CERTIFICATION:** Professionals who pass the Hybrid Professional Master's Degree will receive a certificate accrediting their stay at the center.
- **5. EMPLOYMENT RELATIONSHIP:** The Hybrid Professional Master's Degree shall not constitute an employment relationship of any kind.
- **6. PRIOR EDUCATION**: Some centers may require a certificate of prior education for the Hybrid Professional Master's Degree. In these cases, it will be necessary to submit it to the TECH internship department so that the assignment of the chosen center can be confirmed.
- 7. DOES NOT INCLUDE: The Hybrid Professional Master's Degree will not include any element not described in the present conditions. Therefore, it does not include accommodation, transportation to the city where the internship takes place, visas or any other items not listed

However, students may consult with their academic tutor for any questions or recommendations in this regard. The academic tutor will provide the student with all the necessary information to facilitate the procedures in any case.

tech 36 | Where Can | Do the Clinical Internship?

The student will be able to take the practical part of this Hybrid Professional Master's Degree in the following centers:

Instituto de Dermatología Ignacio Umbert

Country Spain Barcelona

Address: Plaça Manuel Corachán 4 Barcelona, 08017 Barcelona (Clínica Corachan 4º Planta)

Clinical center for specialized dermatological care

Related internship programs:

tech 46 | Methodology

At TECH we use the Case Method

What should a professional do in a given situation? Throughout the program, students will face multiple simulated clinical cases, based on real patients, in which they will have to do research, establish hypotheses, and ultimately resolve the situation. There is an abundance of scientific evidence on the effectiveness of the method. Specialists learn better, faster, and more sustainably over time.

With TECH you will experience a way of learning that is shaking the foundations of traditional universities around the world.

According to Dr. Gérvas, the clinical case is the annotated presentation of a patient, or group of patients, which becomes a "case", an example or model that illustrates some peculiar clinical component, either because of its teaching power or because of its uniqueness or rarity. It is essential that the case is based on current professional life, trying to recreate the real conditions in the physician's professional practice.

Did you know that this method was developed in 1912, at Harvard, for law students? The case method consisted of presenting students with real-life, complex situations for them to make decisions and justify their decisions on how to solve them. In 1924, Harvard adopted it as a standard teaching method"

The effectiveness of the method is justified by four fundamental achievements:

- Students who follow this method not only achieve the assimilation of concepts, but also a development of their mental capacity, through exercises that evaluate real situations and the application of knowledge.
- 2. Learning is solidly translated into practical skills that allow the student to better integrate into the real world.
- 3. Ideas and concepts are understood more efficiently, given that the example situations are based on real-life.
- 4. Students like to feel that the effort they put into their studies is worthwhile. This then translates into a greater interest in learning and more time dedicated to working on the course.

Relearning Methodology

At TECH we enhance the case method with the best 100% online teaching methodology available: Relearning.

This university is the first in the world to combine the study of clinical cases with a 100% online learning system based on repetition, combining a minimum of 8 different elements in each lesson, a real revolution with respect to the mere study and analysis of cases.

Professionals will learn through real cases and by resolving complex situations in simulated learning environments. These simulations are developed using state-of-the-art software to facilitate immersive learning.

Methodology | 49 tech

At the forefront of world teaching, the Relearning method has managed to improve the overall satisfaction levels of professionals who complete their studies, with respect to the quality indicators of the best online university (Columbia University).

With this methodology, more than 250,000 physicians have been trained with unprecedented success in all clinical specialties regardless of surgical load. Our pedagogical methodology is developed in a highly competitive environment, with a university student body with a strong socioeconomic profile and an average age of 43.5 years old.

Relearning will allow you to learn with less effort and better performance, involving you more in your specialization, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation to success.

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

The overall score obtained by TECH's learning system is 8.01, according to the highest international standards.

tech 50 | Methodology

This program offers the best educational material, prepared with professionals in mind:

Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is highly specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

Surgical Techniques and Procedures on Video

TECH introduces students to the latest techniques, the latest educational advances and to the forefront of current medical techniques. All of this in direct contact with students and explained in detail so as to aid their assimilation and understanding. And best of all, you can watch the videos as many times as you like.

Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive educational system for presenting multimedia content was awarded by Microsoft as a "European Success Story".

Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

Expert-Led Case Studies and Case Analysis

Effective learning ought to be contextual. Therefore, TECH presents real cases in which the expert will guide students, focusing on and solving the different situations: a clear and direct way to achieve the highest degree of understanding.

Testing & Retesting

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises, so that they can see how they are achieving their goals.

Classes

There is scientific evidence on the usefulness of learning by observing experts.

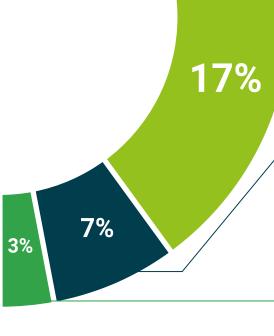

The system known as Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

Quick Action Guides

TECH offers the most relevant contents of the course in the form of worksheets or quick action guides. A synthetic, practical, and effective way to help students progress in their learning.

tech 54 | Certificate

This **Hybrid Professional Master's Degree in Update in Clinical Dermatology** contains the most complete and up-to-date program on the professional and educational field.

After the student has passed the assessments, they will receive their corresponding Hybrid Professional Master's Degree diploma issued by TECH Technological University via tracked delivery*.

In addition to the certificate, students will be able to obtain an academic transcript, as well as a certificate outlining the contents of the program. In order to do so, students should contact their academic advisor, who will provide them with all the necessary information.

Title: Hybrid Professional Master's Degree in Update in Clinical Dermatology

Course Modality: Hybrid (Online + Clinical Internship)

Duration: 12 months

Certificate: TECH Technological University

Teaching Hours: 1,620 h.

^{*}Apostille Convention. In the event that the student wishes to have their paper certificate issued with an apostille, TECH EDUCATION will make the necessary arrangements to obtain it, at an additional cost.
