01 Introduction

Social and scientific awareness of various dermatological pathologies has led to the emergence of advances in their detection and treatment. Thus, novel methods have been developed to quickly identify possible skin cancer or to alleviate the effects of hyperdrosis. For this reason, Update in Clinical Dermatology specialists must master innovations in this field to improve the quality of life of their patients. For this reason, TECH has created this 100% practical program, which will allow professionals to spend 3 weeks in a high-level clinical environment to adopt the latest therapeutic updates in inflammatory diseases or oncological dermatology in their daily practice.

Through this 100% practical program, you will acquire new skills for the detection and treatment of dermatological pathologies such as acne or psoriasis"

The increasing relevance of aesthetics in today's society has made the Update in Clinical Dermatology one of the most demanded areas of medicine by patients. In this line, the professionals in this field have the ability to alleviate the effects of diseases such as acne or psoriasis in visible areas of the body such as the face or arms. To this end, they must manage the latest advances in the detection and treatment of this type of pathology, with the intention of applying the most effective therapies adapted to the needs of each patient.

For these reasons, TECH has created this 100% practical program, with the objective of favoring the acquisition of numerous skills that enhance the professional growth of physicians specialized in Update in Clinical Dermatology. During 3 weeks, the expert will enter an excellent clinical environment where, integrated in a work team, they will have access to real patients with various dermatological pathologies. Throughout this experience, you will master the latest treatments for seborrheic dermatitis, rosacea or alopecia. Likewise, it will assimilate novel diagnostic methods to identify those skin diseases that may pose a risk to patients' lives.

Throughout the practical stage, the student will be accompanied and advised by a tutor specifically designated for them. This specialist will be responsible for resolving all possible doubts that may arise during the clinical stay and for ensuring that the learning process meets your expectations. This TECH Professional Training, therefore, is a great tool to assimilate updated skills based on scientific evidence and applicable in daily work, in order to place the physician at the forefront of the dermatological sector.

02

Why Study an Internship Program?

In many sectors, academic education must go beyond the mere updating of content. In the world of medicine, it is necessary to know how to apply new techniques and methods to detect and treat various pathologies in the work environment. Due to this, TECH has designed a pioneer product in the educational market, which will allow the specialist to spend 3 weeks in a hospital center to put into practice the most updated procedures in Update in Clinical Dermatology. In this period of time, accompanied and integrated in a team formed by the best professionals in this field, the student will acquire excellent skills with a great applicability in their day-to-day work.

Through this opportunity offered by TECH, you will spend 120 hours in a multidisciplinary work team to learn about new procedures and updated techniques in Update in Clinical Dermatology"

1. Updating from the latest technology available

The field of Update in Clinical Dermatology has experienced numerous scientific advances in recent years such as the emergence of new therapies to treat atopic dermatitis or the use of Artificial Intelligence as a method for diagnosing skin pathologies. For this reason, TECH has created a program that will allow the student to learn and apply all the updates in this field, entering a first level professional environment.

2. Gaining In-Depth Knowledge from the Experience of Top Specialists

The large team of specialists that will accompany the professional during his or her practical experience guarantees the excellent quality of the program. Under the guidance of a specific tutor, the student will have access to patients with various dermatological pathologies in a real environment, which will enable him/her to incorporate the most updated procedures and techniques in Update in Clinical Dermatology in their daily practice.

3. Entering First-Class Clinical Environments

TECH carefully selects all available centers for Internship Programs. Thanks to this, the professional will have guaranteed access to a prestigious clinical environment in the area of Update in Clinical Dermatology. In this way, you will be able to see the day-to-day work of a demanding, rigorous and exhaustive sector, always applying the latest theses and scientific postulates in its work methodology.

4. Putting the acquired knowledge into daily practice from the very first moment

In the academic field, there are a huge number of programs aimed exclusively at the teaching of theoretical contents, characterized by rigid schedules and little compatibility with professional life. Given this situation, TECH has opted to create a 100% practical learning model, which allows professionals to expand their knowledge and master the application of new procedures in Update in Clinical Dermatology in just 3 weeks.

5. Expanding the Boundaries of Knowledge

TECH offers the possibility of carrying out this Internship Program in centers of national importance. In this way, the specialist will be able to expand their frontiers and keep up to date with the best professionals, who practice in first class clinics and in different continents. A unique opportunity that only TECH could offer to its students.

*You will have full practical immersion
at the center of your choice"*

03

Objectives

The general objective of this program is to ensure that the professional updates the diagnostic and therapeutic procedures of Update in Clinical Dermatology in an exclusively practical way, through a hospital stay designed with clinical and academic rigor, under the guidance of renowned professionals in a hospital center of the highest scientific quality and technological innovation.

General Objectives

- You update your knowledge in Clinical Dermatology with the use of the latest scientific evidence to contribute with quality and safety when making medical decisions, diagnosis, treatment, and patient support
- Incorporate the most effective methods, approaches and clinical analyses into daily work, backed by a team of prestigious experts in the field of Clinical Dermatology
- Know the approach to the most frequent pathologies in Clinical Dermatology

Specific Objectives

- ♦ Describe the analytical tests as well as the appropriate complementary ones to be ordered to confirm clinical diagnoses
- ♦ Apply the appropriate therapeutic regimen according to the pathology, but also according to the patient's own characteristics
- ♦ Establish the differences between the different types of inherited dermatological diseases
- ♦ Identify the routes of administration and the most commonly used medicines in common or frequent conditions
- ♦ Analyze the main dermatological diseases of inflammatory origin
- ♦ Determine which skin manifestations are serious and require immediate attention
- ♦ Point out the main typical locations and distribution patterns of skin lesions
- ♦ Address new diagnostic techniques and the therapeutic approach to pilosebaceous junction pathologies
- ♦ Determine the differences between the different types of connective tissue diseases by analysing the main clinical manifestations
- ♦ Detail the main disorders of keratinisation and their distinguishing features
- ♦ Identify the signs and symptoms of neurocutaneous diseases and their consequences for the patient
- ♦ Recognise the keys to establishing a differential diagnosis for nosological entities that share cutaneous clinical features
- ♦ Incorporate the latest advances in diagnostic and therapeutic procedures in dermatological oncological processes
- ♦ Differentiate between papulosquamous, blistering and pustular pathologies
- ♦ Describe the new diagnostic approaches in special population groups in the specialty
- ♦ Detect the pathochrony and natural history, associated extracutaneous symptoms and signs, and other distinctive clinical data to enable identification
- ♦ Establish medical care procedures for cutaneous manifestations of internal diseases
- ♦ Broaden new developments in the field of nail pathology
- ♦ Review the evidence on clinical management of vascular malformations and haemangiomas
- ♦ Detail the advances in photodermatology and its therapeutic applications in skin pathology

This program will provide you with the best tools to treat the different dermatological pathologies that affect your patients"

04

Educational Plan

The Internship Program consists of a 3-week stay in a prestigious clinical center, from Monday to Friday, with 8 consecutive hours of work under the supervision of an associate specialist. This period will allow you to deal with real patients alongside a team of leading professionals in the area of dermatology, applying the most innovative diagnostic procedures and planning the latest generation of therapy for each pathology.

In this completely practical Internship Program, the activities are aimed at developing and perfecting the skills necessary to provide healthcare care in areas and conditions that require highly qualified professionals, and are oriented towards specific expertise for practicing the activity, in a safe environment for the patient and with highly professional performance.

It is undoubtedly an opportunity to learn by working in the field of Update in Clinical Dermatology, where the application of updated dermatological treatments is essential to promote the welfare of patients. This is a new way of understanding and integrating healthcare processes, and makes the clinical center the ideal teaching scenario for this innovative experience in the improvement of professional medical competencies for the 21st century.

The practical teaching will be carried out with the active participation of the student performing the activities and procedures of each area of competence (learning to learn and learning to do), with the accompaniment and guidance of the professors and other fellow trainees that facilitate teamwork and multidisciplinary integration as transversal competencies for the praxis of Update in Clinical Dermatology (learning to be and learning to relate).

The procedures described below will form the basis of the practical part of the training, and their completion is subject to both the suitability of the patients and the availability of the center and its workload, with the proposed activities being as follows:

Train in an institution that can offer you all these possibilities, with an innovative academic program and a human team capable of developing you to the maximum"

Module	Practical Activity
Dermatopathology	Use of microscopic morphology in diagnostic work
	Perform and interpret skin biopsies
	Use other diagnostic techniques such as special stains, polarized light, immunohistochemistry, photomicroscopy or immunofluorescence
	Interpret frozen samples from dermatological surgeries or cutaneous electron micrographs
Immunodermatology	Evaluate dermatological diseases and mucous membranes by immunology
	Interpret the results of various immunodermatological tests
	Analyze samples using cutaneous immunofluorescence, anti-endothelial antibody, desmoglein 1 and 3, BP180 and BP230
Infectious and inflammatory diseases	Analyze cases of inflammatory skin diseases
	Apply advanced diagnosis and treatment in patients with clinical pictures of infectious and inflammatory diseases
	Care for inpatients and outpatients with infectious skin lesions
	Diagnose cutaneous and mucosal mycoses
	Follow-up of patients with STIs
Oncologic dermatology and internal skin diseases	Treating dermatologic lesions in HIV patients
	Management of nutritional dermopathies
	Analyze treatments and guidelines in cases of melanoma
	Manage malignant and benign tumors of the skin
Dermatology in special groups of the population and other procedures	Apply phototherapy, peeling or mesotherapy techniques in those cases where it is convenient
	Using digital dermatoscopes for skin cancer detection and mole mapping
	Manage dermopathies associated with aging or pregnancy
	Tailoring therapies and diagnostic procedures to neonates and young children with skin lesions

05

Where Can I Do the Internship Program?

In order to guarantee a highly beneficial practical experience for the graduate, TECH has selected a group of leading national clinics in the field of Update in Clinical Dermatology. In this way, the graduate who accesses this training will be able to enjoy a stay in a prestigious center where they will be able to enjoy a stay in a prestigious center where they will be able to improve and expand their professional competencies and skills in only 120 hours.

You will have, at all times, a tutor who will guide you in your practical experience, so that you can act with total guarantee in the management of common and complex clinical cases"

The student will be able to do this program at the following centers:

Medicine

Instituto de Dermatología Ignacio Umbert

Country: Spain City: Barcelona

Address: Plaça Manuel Corachán 4 Barcelona, 08017 Barcelona (Clínica Corachán 4ª Planta)

Clinical center for specialized dermatological care

General Conditions

Civil Liability Insurance

This institution's main concern is to guarantee the safety of the trainees and other collaborating agents involved in the internship process at the company. Among the measures dedicated to achieve this is the response to any incident that may occur during the entire teaching-learning process.

To this end, this educational entity undertakes to take out civil liability insurance to cover any eventuality that may arise during the stay at the internship center.

This liability policy for interns will have broad coverage and will be taken out prior to the start of the practical training period. That way professionals will not have to worry in case of having to face an unexpected situation and will be covered until the end of the internship program at the center.

General Conditions of the Internship Program

The general terms and conditions of the internship agreement for the program are as follows:

1. TUTOR: During the Internship Program, students will be assigned with two tutors who will accompany them throughout the process, answering any doubts and questions that may arise. On the one hand, there will be a professional tutor belonging to the internship center who will have the purpose of guiding and supporting the student at all times. On the other hand, they will also be assigned with an academic tutor, whose mission will be to coordinate and help the students during the whole process, solving doubts and facilitating everything they may need. In this way, the student will be accompanied and will be able to discuss any doubts that may arise, both clinical and academic.

2. DURATION: The internship program will have a duration of three continuous weeks, in 8-hour days, 5 days a week. The days of attendance and the schedule will be the responsibility of the center and the professional will be informed well in advance so that they can make the appropriate arrangements.

3. ABSENCE: If the students do not show up on the start date of the Internship Program, they will lose the right to it, without the possibility of reimbursement or change of dates. Absence for more than two days from the internship, without justification or a medical reason, will result in the professional's withdrawal from the internship, therefore, automatic termination of the internship. Any problems that may arise during the course of the internship must be urgently reported to the academic tutor.

4. CERTIFICATION: Professionals who pass the Internship Program will receive a certificate accrediting their stay at the center.

5. EMPLOYMENT RELATIONSHIP: The Internship Program shall not constitute an employment relationship of any kind.

6. PRIOR EDUCATION: Some centers may require a certificate of prior education for the Internship Program. In these cases, it will be necessary to submit it to the TECH internship department so that the assignment of the chosen center can be confirmed.

7. DOES NOT INCLUDE: The Internship Program will not include any element not described in the present conditions. Therefore, it does not include accommodation, transportation to the city where the internship takes place, visas or any other items not listed

However, students may consult with their academic tutor for any questions or recommendations in this regard. The academic tutor will provide the student with all the necessary information to facilitate the procedures in any case.

07 Certificate

This program will allow you to obtain your **Internship Program certificate in Update in Clinical Dermatology** endorsed by **TECH Global University**, the world's largest online university.

TECH Global University is an official European University publicly recognized by the Government of Andorra ([official bulletin](#)). Andorra is part of the European Higher Education Area (EHEA) since 2003. The EHEA is an initiative promoted by the European Union that aims to organize the international training framework and harmonize the higher education systems of the member countries of this space. The project promotes common values, the implementation of collaborative tools and strengthening its quality assurance mechanisms to enhance collaboration and mobility among students, researchers and academics.

This **TECH Global University** title is a European program of continuing education and professional updating that guarantees the acquisition of competencies in its area of knowledge, providing a high curricular value to the student who completes the program.
