01

Introduction

The most recent research on alcoholic liver disease and metabolic hepatic steatosis reveals promising treatments and diagnostics in the management of these pathologies. For this reason, the specialist must maintain a constant level of updating in this field of hepatology, incorporating the most pioneering and current advances into his or her daily practice. TECH has developed this program to provide the specialist with the latest news on the diagnosis and severity of alcoholic liver disease, as well as its possible evolution towards acute hepatitis or cirrhosis. In addition, state-of-the-art treatments and approaches for metabolic hepatic steatosis are detailed.

“

Update with TECH on the latest advances in alcoholic liver disease and metabolic hepatic steatosis”

The increase in alcohol consumption in recent years, especially among younger people, in turn increases the chances of developing alcoholic liver disease in the future. This obliges specialists to be prepared to approach this type of pathology with the greatest possible rigor and scientific updating.

Also of concern is the high prevalence of other pathologies such as metabolic hepatic steatosis, which is so prevalent in society due in part to the current pace of life and habits. This also makes it a preferred field of research for specialists in various fields, especially hematology.

This TECH program brings together the most recent scientific postulates and advances regarding these two pathologies, bringing together the clinical manifestations, epidemiology, diagnoses and treatments currently in force. Thus, the specialist will be accessing a high-quality program, designed to meet his or her most demanding updating needs.

In addition, it is a 100% online Postgraduate Certificate that provides the student with the ease of being able to study it comfortably, wherever and whenever he/she wants. All you need is a device with internet access to take your career one step further. A modality in line with the current times with all the guarantees to position the medical professional in a highly demanded field.

This **Postgraduate Certificate in Alcoholic Liver Disease Metabolic Hepatic Steatosis** contains the most complete and up-to-date scientific program on the market. The most important features include:

- ◆ More than 80 clinical cases presented by experts in the different specialties. The graphic, schematic, and eminently practical contents with which they are created, provide scientific and practical information on the disciplines that are essential for professional practice
- ◆ New diagnoses and treatments for different hepatic pathologies
- ◆ Presentation of practical workshops on procedures, diagnosis, and treatment techniques
- ◆ An algorithm-based interactive learning system for decision-making in the clinical situations presented throughout the course
- ◆ With a special emphasis on evidence-based medicine and research methodologies in the field of hepatology
- ◆ All of this will be complemented by theoretical lessons, questions to the expert, debate forums on controversial topics, and individual reflection assignments
- ◆ Content that is accessible from any fixed or portable device with an Internet connection

*You will broaden and modernize
all your knowledge about liver
cancer and transplantation in
metabolic hepatic steatosis”*

“

A unique university course, 100% online, that you can study comfortably at the time that best suits you, reconciling your specialization with your personal life”

Thanks to this TECH university course you will have at your disposal the most current knowledge in liver transplantation in ALD.

A whole team of great professionals will be advising you during the program, offering you unparalleled personalized attention.

The program's teaching staff includes professionals from the sector who contribute their work experience to this training program, as well as renowned specialists from leading societies and prestigious universities.

The multimedia content, developed with the latest educational technology, will provide the professional with situated and contextual learning, i.e., a simulated environment that will provide immersive training programmed to train in real situations.

This program is designed around Problem Based Learning, whereby the professional must try to solve the different professional practice situations that arise during the academic year. For this purpose, the professional will be assisted by an innovative interactive video system created by renowned and experienced experts.

02 Objectives

The program of this Postgraduate Certificate, together with a unique teaching methodology, will allow the student to achieve the proposed objectives, in order to update and study in depth the medical branch of hepatology with the most updated knowledge on ALD and MetHS. To this end, different expert hepatologists have poured their knowledge into the development of the points of the study plan, which will provide the professional with a complete perspective and a current approach, with full training for the achievement of his or her academic goal. For this reason, TECH establishes a series of general and specific objectives that the future graduate will master after completing this course.

“

You will achieve your professional goal of comprehensive updating even before the end of the program, thanks in part to TECH's advanced pedagogical methodology”

General Objective

- ◆ Expand the specialist's knowledge in the management of patients with liver disease, taking into account the latest advances in the field of hepatology, in order to provide quality and safe care and to improve the prognosis of the disease

You will have at your disposal the best possible syllabus and academic resources on diagnosis, pathogenesis and clinical manifestations of ALD and MetHS"

Specific Objective

- ◆ Learn the most recent developments in alcoholic liver disease
- ◆ Delve into the complications that can arise and modern diagnostics for OH cirrhosis and OH acute hepatitis
- ◆ Address state-of-the-art methodology in liver transplantation in HD and MethS
- ◆ Study pioneering treatments for metabolic hepatic steatosis

03

Course Management

TECH University has renowned medical professionals for the student to acquire a solid knowledge in key advances for ALD and MetHS. Therefore, this Postgraduate Certificate has a team of highly qualified teachers, whose extensive experience in the field of Hepatology brings excellence to the program, resulting in a quality syllabus and the best tools for the student in the development of their skills during the course. In this way, the student has the quality guarantees required to enter basic research in hepatology with success.

“

Nationally renowned hepatologists will accompany you in learning this program on alcoholic liver disease and metabolic hepatic steatosis”

International Guest Director

Dr. Doan Y. Dao is an internationally recognized figure in the study and care of patients affected by Hepatitis B virus (HBV). As director of the Center of Excellence for Liver Disease in Vietnam (COE), he leads Johns Hopkins University's initiatives to help address the growing, urgent and significant disease burden of Liver Cancer caused by Hepatitis B in Vietnam.

As CEO, Dr. Dao is responsible for managing projects that contribute to the delivery of medical services to combat these diseases. This is an ongoing collaboration with the Johns Hopkins School of Medicine, where he also fosters scientific research and educational activities related to specialization in diagnosis and effective therapeutic treatments.

As a member of the Board of Directors of V-VHA (Vietnam Viral Hepatitis Alliance), he has played a crucial role in promoting clinical care and international scientific studies in HBV. In addition, he was co-chair of the National Task Force on Hepatitis B: Focus on Asian and Pacific Islander Americans, where he worked tirelessly to raise awareness of the condition.

He has received several awards throughout his career, such as the Hepatitis Fund for the Cure Postdoctoral Research Fellowship (2014), awarded by the American Liver Foundation; or the Asian Heritage Award in Public Health (2016), presented by the Asian Heritage Society of California. In addition, he was named Everyday Hero (2016) by the American Liver Foundation, thanks to his efforts in addressing Hepatitis B, both in the United States and Vietnam. His clinical training in Internal Medicine and Gastroenterology and Hepatology at UT Southwestern Medical Center in Dallas, Texas, along with his commitment to academic medicine, have allowed him to lead groundbreaking research in search of a cure for HBV.

Dr. Dao, Doan Y

- Director of the Center of Excellence for Liver Disease in Vietnam (COE) at the Johns Hopkins University School of Medicine
- Assistant Professor of Medicine, Division of Gastroenterology and Hepatology, at Johns Hopkins University School of Medicine
- Co-Chair of the National Task Force on Hepatitis B: Focus on Asian and Pacific Islander Americans
- Fellow in Internal Medicine, Gastroenterology and Hepatology at UT Southwestern Dallas Medical Center
- Medical Degree from UT Southwestern Medical Center at UT Southwestern Dallas
- Awards Received:
 - Hepatitis Fund for the Cure Postdoctoral Research Fellowship (2014), by the American Liver Foundation
 - Asian Heritage Award in Public Health (2016), by the Asian Heritage Society of California
 - Everyday Hero (2016) by the American Liver Foundation
- He is a member of:
 - V-VHA (Vietnam Viral Hepatitis Alliance).
 - Hepatitis B Foundation
 - Dallas Fort Worth (DFW) Hepatitis B Free

“

Thanks to TECH, you will be able to learn with the best professionals in the world”

Management

Dr. García Samaniego, Javier

- ♦ Head of the Hepatology Department, La Paz University Hospital, Madrid
- ♦ Group Leader and Lead Researcher of the Hepatic and Digestive Diseases at the La Paz University Hospital/IdiPAZ. CIBERehd of the Carlos III Health Institute, Madrid
- ♦ Trustee of the Biomedical Research Foundation of La Paz University Hospital and member of the Governing Council of IdiPAZ.
- ♦ Coordinator at the Alliance for the Elimination of Viral Hepatitis in Spain (AEHVE)
- ♦ He graduated in medicine from the University of Santiago in 1983 and obtained his PhD in 1996 from the Autonomous University of Madrid
- ♦ He has participated in numerous nationally and internationally funded research projects
- ♦ FIS and ANEP project evaluator
- ♦ He has been a member of the board of directors of the AEEH and of the Regional Ethics and Clinical Research Committee of the Community of Madrid
- ♦ He has participated in Guidelines and therapeutic protocols for viral hepatitis: consensus for the treatment of viral hepatitis in HIV-positive patients
- ♦ Coordinator for the Spanish Guidelines for the treatment of hepatitis B promoted by the AEEH (2020).
- ♦ Lead investigator in more than 60 international clinical trials on the treatment of viral hepatitis.
- ♦ Guest lecturer at numerous national and international congresses, as well as in Spanish and international forums, especially on the management of viral hepatitis B and C treatment. He has participated in the elaboration of the AEEH hepatitis C elimination document (2019) and is the coordinator of the hepatitis B treatment guidelines (2020)

Professors

Dr. Abadía, Marta

- ◆ Digestive System Attending. La Paz University Hospital (May 2017 - Present).
- ◆ Digestive System Specialist. Residency at La Paz University Hospital (2013 - 2017)
- ◆ Access by MIR exam (Position: 239)
- ◆ External rotation at the Hepatology and Liver Transplant Unit of the Clinic Institute of Digestive and Metabolic Diseases (Hospital Clinic de Barcelona)
- ◆ PhD from the Autonomous University of Madrid with outstanding mention CUMLAUDE for the thesis on "Non-invasive assessment of hepatic venous pressure gradient in patients with cirrhosis and portal hypertension following recovery from hepatitis C virus"
- ◆ EMILIO MOYANO Award for the best oral presentation at the XXVIII Jornada Nacional de Ecografía Digestiva (May 2017): "Two-dimensional hepatic elastometry, shear wave, in the assessment of clinically significant portal hypertension"
- ◆ Degree in Medicine. Navarra University, Faculty of Medicine, Spain (2006 - 2012)

04

Structure and Content

The structure of the contents of this Postgraduate Certificate has been designed following TECH's most innovative pedagogical methodology. To this end, the most urgent developments in ALD and MetHS are studied, as well as complementary topics covering liver cancer, cirrhosis and acute hepatitis. In this way, the professional expands and updates his/her knowledge in this field of medicine, thanks to a syllabus prepared by expert hepatologists. All in all, thanks to the proposed syllabus, the student will acquire the skills to develop professionally in this medical specialty thanks to quality content and the best teaching methodology.

“

You will have access to interactive summaries, useful practical guides and a wealth of top-notch audiovisual material on the approach to ALD and MetHS”

Module 1. Alcoholic Liver Disease and Metabolic Hepatic Steatosis

- 1.1 Alcoholic Liver Disease (ALD): Epi., Clinical Manifestations and Natural History
- 1.2 ALD: Diagnosis and Severity Assessment
- 1.3 Acute Hepatitis
- 1.4 Cirrhosis
- 1.5 Liver Transplantation in ALD
- 1.6 Metabolic Hepatic Steatosis (MetHS): Definition, Epi and Natural History
- 1.7 MetHS: Pathogenesis and Role of the Intestinal Microbiota
- 1.8 MetHS: Diagnosis
- 1.9 MetHS: Treatment
- 1.10 Liver Cancer and Transplantation in MetHS

“

You will be able to contextualize all the updates offered thanks to the real clinical cases proposed by the teaching team”

05 Methodology

This academic program offers students a different way of learning. Our methodology uses a cyclical learning approach: **Relearning**.

This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the **New England Journal of Medicine** have considered it to be one of the most effective.

“

Discover Relearning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization"

At TECH, we use the Case Method

What should a professional do in a given situation? Throughout the program, students will face multiple simulated clinical cases, based on real patients, in which they will have to do research, establish hypotheses, and ultimately resolve the situation. There is an abundance of scientific evidence on the effectiveness of the method. Specialists learn better, faster, and more sustainably over time.

With TECH you will experience a way of learning that is shaking the foundations of traditional universities around the world.

According to Dr. Gérvas, the clinical case is the annotated presentation of a patient, or group of patients, which becomes a "case", an example or model that illustrates some peculiar clinical component, either because of its teaching power or because of its uniqueness or rarity. It is essential that the case is based on current professional life, trying to recreate the real conditions in the physician's professional practice.

“

Did you know that this method was developed in 1912, at Harvard, for law students? The case method consisted of presenting students with real-life, complex situations for them to make decisions and justify their decisions on how to solve them. In 1924, Harvard adopted it as a standard teaching method”

The effectiveness of the method is justified by four fundamental achievements:

1. Students who follow this method not only achieve the assimilation of concepts, but also a development of their mental capacity, through exercises that evaluate real situations and the application of knowledge.
2. Learning is solidly translated into practical skills that allow the student to better integrate into the real world.
3. Ideas and concepts are understood more efficiently, given that the example situations are based on real-life.
4. Students like to feel that the effort they put into their studies is worthwhile. This then translates into a greater interest in learning and more time dedicated to working on the course.

Relearning Methodology

At TECH we enhance the Harvard case method with the best 100% online teaching methodology available: Relearning.

Our University is the first in the world to combine the study of clinical cases with a 100% online learning system based on repetition, combining a minimum of 8 different elements in each lesson, which represent a real revolution with respect to simply studying and analyzing cases.

The physician will learn through real cases and by solving complex situations in simulated learning environments. These simulations are developed using state-of-the-art software to facilitate immersive learning.

At the forefront of world teaching, the Relearning method has managed to improve the overall satisfaction levels of professionals who complete their studies, with respect to the quality indicators of the best online university (Columbia University).

With this methodology, more than 250,000 physicians have been trained with unprecedented success in all clinical specialties regardless of surgical load. Our pedagogical methodology is developed in a highly competitive environment, with a university student body with a strong socioeconomic profile and an average age of 43.5 years old.

Relearning will allow you to learn with less effort and better performance, involving you more in your specialization, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation to success.

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

The overall score obtained by TECH's learning system is 8.01, according to the highest international standards.

This program offers the best educational material, prepared with professionals in mind:

Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is highly specific and precise.

These contents are then adapted in audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high-quality pieces in each and every one of the materials that are made available to the student.

Surgical Techniques and Procedures on Video

TECH introduces students to the latest techniques, the latest educational advances and to the forefront of current medical techniques. All of this in direct contact with students and explained in detail so as to aid their assimilation and understanding. And best of all, you can watch the videos as many times as you like.

Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive educational system for presenting multimedia content was awarded by Microsoft as a "European Success Story".

Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

Expert-Led Case Studies and Case Analysis

Effective learning ought to be contextual. Therefore, TECH presents real cases in which the expert will guide students, focusing on and solving the different situations: a clear and direct way to achieve the highest degree of understanding.

Testing & Retesting

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises, so that they can see how they are achieving their goals.

Classes

There is scientific evidence on the usefulness of learning by observing experts. The system known as Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

Quick Action Guides

TECH offers the most relevant contents of the course in the form of worksheets or quick action guides. A synthetic, practical, and effective way to help students progress in their learning.

06

Certificate

The Postgraduate Certificate in Alcoholic Liver Disease and Metabolic Hepatic Steatosis guarantees students, in addition to the most rigorous and up-to-date education, access to a Postgraduate Certificate issued by TECH Technological University.

“

Successfully complete this training program and receive your university certificate without travel or laborious paperwork”

This **Postgraduate Certificate in Alcoholic Liver Disease and Metabolic Hepatic Steatosis** contains the most complete and up-to-date scientific on the market.

After the student has passed the assessments, they will receive their corresponding **Postgraduate Certificate** issued by **TECH Technological University** via tracked delivery*.

The diploma issued by **TECH Technological University** will reflect the qualification obtained in the Postgraduate Certificate, and meets the requirements commonly demanded by labor exchanges, competitive examinations, and professional career evaluation committees.

Title: **Postgraduate Certificate in Alcoholic Liver Disease and Metabolic Hepatic Steatosis**

Official N° of hours: **150 h.**

*Apostille Convention. In the event that the student wishes to have their paper diploma issued with an apostille, TECH EDUCATION will make the necessary arrangements to obtain it, at an additional cost.
