Presentation

Informing a patient of a positive result for cervical cancer is one of the most complex moments faced by the professional working in this area. In moments like these, many therapeutic and human factors come into play. In order to face it in an educated and safe way, it is essential to have specific, up-to-date and alternative knowledge that will help to successfully manage this situation.

“

The psychological impact and specific conditions of HPV infection, in a highly specialized course that will equip you with the most appropriate, effective and innovative protocols and developments in this area”

With this high intensity training course, we offer you the possibility to include the most specific knowledge in this area of work in your clinical practice. Training that it perfectly compatible with your personal and professional life, with an eminently practical format, allowing you to immediately apply your newly acquired knowledge into your medical practice.

During this comprehensive Postgraduate Certificate, the student will have the opportunity to acquire the necessary basic knowledge to face situations that arise in patients suspected of having contracted HPV. From the moment of diagnosis and the development of the guidelines that the specialist must follow, to the information on procedures or attitudes to eradicate in this medical practice, the student will learn to integrate new techniques and the most advanced procedures in this discipline into their work.

What distinguishes this course from others, is its eminent practical vision. This approach has been implemented in all the teaching materials that the student will use during their training. Our goal: to enable you to start applying what you have learned immediately in your work.

With a practice-focused vision, this innovative training approach will allow you to offer your patients the most up-to-date and concrete information"

This **Postgraduate Certificate in Cervical Cancer and the Psychological Impact** offers you the characteristics of a high-level scientific, teaching, and technological course.

These are some of its most notable features:

- ♦ Latest technology in online teaching software.
- ♦ Highly visual teaching system, supported by graphic and schematic contents that are easy to assimilate and understand.
- ♦ Practical cases presented by practising experts.
- ♦ State-of-the-art interactive video systems.
- ♦ Teaching supported by telepractice.
- ♦ Continuous updating and recycling systems.
- ♦ Self-regulating learning: full compatibility with other occupations.
- ♦ Practical exercises for self-evaluation and learning verification.
- ♦ Support groups and educational synergies: questions to the expert, debate and knowledge forums.
- ♦ Communication with the teacher and individual reflection work.
- ♦ Content that is accessible from any fixed or portable device with an Internet connection.
- ♦ Banks of complementary documentation permanently available, even after the course.

“

It incorporates the most advanced knowledge in different situations occurring in the patient with HPV, through highly effective online learning. The most practical, useful and efficient way to update your knowledge on this subject"

Our teaching staff is composed of medical professionals and practising specialists. In this way, we ensure that we provide you with the training update we are aiming for. A multidisciplinary team of professors with training and experience in different environments, who will develop the theoretical knowledge in an efficient way, but, above all, will bring their practical knowledge derived from their own experience to the course: one of the differential qualities of this course.

This mastery of the subject is complemented by the effectiveness of the methodology used in the design of this course. Developed by a multidisciplinary team of e-learning experts, it integrates the latest advances in educational technology. This way, you will be able to study with a range of comfortable and versatile multimedia tools that will give you the operability you need in your training.

The design of this program is based on Problem-Based Learning: an approach that conceives learning as a highly practical process. To achieve this remotely, we will use telepractice: with the help of an innovative interactive video system, and learning from an expert, you will be able to acquire the knowledge as if you were actually dealing with the scenario you are learning about. A concept that will allow you to integrate and fix learning in a more realistic and permanent way.

The most outstanding aspect of our educational formula is the possibility of hands-on learning, even while learning remotely: a challenge that we have achieved and that provides our students with the best results.

Observing the expert in the process of performing the task, triggers brain mechanisms similar to those activated when performing the same activity: this is the principle of the high efficiency of our "learning from an expert"

02

Objectives

This program aims to train highly qualified professionals for the workplace. An objective that is complemented, moreover, in a global manner, by promoting human development that lays the foundations for a better society. This objective is focused on helping medical professionals reach a much higher level of expertise and control. A goal that, in just six months, you will be able to achieve with a highly intensive and precise course.

HPV - Test

“

Our goal is yours: to provide you with the best online training and specialization in Cervical Cancer and the Psychological Impact that exists on the market. A highly qualified step, from the hands of the best professionals in this specialty"

General Objectives

- Learn how to deal with a woman affected by HPV and her partner, in both the psychological and sexual field.
- Know the latest information and controversies of current treatment in cervical cancer.

Advance your clinical practice and add to your CV the knowledge and prestige of a high quality course from the world's largest online university.

Specific Objectives

Module 1. Cervical Cancer (CC)

- ♦ Analyze the current management of the invasive cervical pathology, its diagnosis and management according to the current clinical practice guides.
- ♦ Study the most innovative surgical approaches such as robotic surgery and the use of detection techniques on the sentinel lymph node.
- ♦ Analyze the available evidence in the different approaches and treatment techniques for protecting the fertility of young women with cervical cancer.
- ♦ Visualize and analyze the different alternatives in locally advanced cases and the management of tumors >2 cm.

Module 2. Psychological Impact of HPV Infection

- ♦ Analyze the psychosocial impact of HPV diagnosis, not only if the lesions but also simply the presence of the virus.
- ♦ Study the psychological impact of the presence of the virus in women and their partners and the repercussions that follow in the couple's relationship and sexuality activity.
- ♦ Implement criteria of care in couple therapy and know how to comprehensively treat patients beyond the clinical management protocols.
- ♦ Study the circumstances in which women with HPV infections want to get pregnant and the repercussions of this.

03

Course Management

For our Postgraduate Certificate to be of the highest quality, we are proud to work with a teaching staff of the highest level, chosen for their proven track record in the field of education. Professionals from different areas and fields of expertise that make up a complete, multidisciplinary team. A unique opportunity to learn from the best.

“

An impressive teaching staff, made up of professionals from different areas of expertise, will be your teachers during your training: a unique opportunity not to be missed”

Management

Pluvio Coronado, Martín

- Director of the José Botella Llusía Women's Health Clinic of San Carlos Clinical Hospital in Madrid.
- Associate Professor at the Faculty of Medicine of the Complutense University of Madrid.
- Academic Correspondent of the Royal Academy of Medicine of Spain.

Serrano Cogollor, Luis

- ♦ HM Gabinete Velázquez. HM Hospitals.

04

Structure and Content

The contents of this course has been created by establishing an exhaustive overview of each and every one of the essential topics in the field of Cervical Cancer and the Psychological Impact. With a sequential process that will take you through the topics, constantly acquiring new knowledge, this training will become an incredible leap towards the clinical forefront in this specialty.

A multidisciplinary team of experts has created the content of this course, bringing their years of experience to the training program.

“

*A comprehensive teaching program,
structured in well-developed teaching units,
oriented towards learning that is compatible
with your personal and professional life"*

Module 1. Cervical Cancer (CC)

- 1.1. Epidemiology and Risk Factors of CC Development
 - 1.1.1. Worldwide Incidence and Mortality of CC
 - 1.1.2. Incidence and Mortality of CC per Region and Country
 - 1.1.3. Incidence and Mortality of CC in Spain
 - 1.1.4. Tobacco and CC
 - 1.1.5. Hormonal Contraception and CC
 - 1.1.6. Effect of IDU on the Incidence of CC
 - 1.1.7. Diet and CC
 - 1.1.8. Sexually Transmitted Infections and Risk of CC
 - 1.1.9. Parity and CC
 - 1.1.10. Age of Starting Sexual Relations and Promiscuity
 - 1.1.11. Couples At-Risk. Male Circumcision and CC
- 1.2. Staging and Diagnosis of Extension
 - 1.2.1. Diagnosis through Biopsy or Conization
 - 1.2.2. FIGO and TNM Stages
 - 1.2.3. Transvaginal Ultrasound Assessment in the Diagnosis of Extension
 - 1.2.4. Magnetic Resonance Assessment in the Diagnosis of Extension
 - 1.2.5. Tumor Markers Assessment
 - 1.2.6. Clinical vs Post-surgery vs Image Staging
- 1.3. Basis of CC Treatment
 - 1.3.1. Conization as a Treatment. When it is Indicated
 - 1.3.2. Types of Radical Hysterectomy
 - 1.3.3. Complications of the Different Types of Radical Hysterectomy
 - 1.3.4. Sentinel Lymph Node
 - 1.3.5. Para-aortic Lymphadenectomy
 - 1.3.6. External Radiotherapy and Brachytherapy
 - 1.3.7. Chemotherapy
- 1.4. Routes of Surgical Treatment
 - 1.4.1. Laparotomy
 - 1.4.2. Laparoscopy
 - 1.4.3. Robotic
 - 1.4.4. LACC Study: Open vs. Minimally Invasive
- 1.5. Treatment Plans
 - 1.5.1. Decision Algorithms
 - 1.5.2. Treatment in Initial Stages
 - 1.5.2.1. Conization as a Treatment
 - 1.5.2.2. Need for Radicalism
 - 1.5.2.3. Parametrectomy in Previous Hysterectomy
 - 1.5.3. Treatment in Advanced Stages
 - 1.5.3.1. Role of Para-Aortic Lymphadenectomy
 - 1.5.3.2. Para-Aortic Lymphadenectomy Access and Routes
 - 1.5.3.3. Role of PET-CT Against Para-Aortic Lymphadenectomy
 - 1.5.4. Vaccine Therapies Against Cervical Cancer
 - 1.5.5. CC Monitoring
- 1.6. Fertility Preservation Treatment
 - 1.6.1. Indications of Fertility Preservation
 - 1.6.2. Expectant Care After Conization
 - 1.6.3. Simple and Radical Trachelectomy
 - 1.6.4. Most Appropriate Approach of Trachelectomy
 - 1.6.4.1. Open
 - 1.6.4.2. Vaginal
 - 1.6.4.3. Laparoscopy
 - 1.6.4.4. Robotic
- 1.7. Alternative Therapies in Local Advanced CC
 - 1.7.1. Chemoradiotherapy
 - 1.7.2. Role of New Chemotherapies
 - 1.7.3. Immunotherapy

Module 2. Psychological Impact of HPV Infection

- 2.1. Effect of HPV on the Individual
 - 2.1.1. Response of Individual After Finding Out They Have HPV
 - 2.1.2. Physiological Reactions to HPV Infection
 - 2.1.3. Pathological Reactions to HPV Infection
 - 2.1.4. Individual's Sense of Guilt
 - 2.1.5. Effect on Sexual Activity
 - 2.1.6. Management of Psychological Alterations
 - 2.1.7. Access to Information on Social Media and the Internet
 - 2.1.8. Associations Affected by HPV
- 2.2. Effect of HPV on the Partner
 - 2.2.1. Response of the Partner After Finding Out They Have HPV
 - 2.2.2. Physiological Reactions of the Partner to HPV Infection
 - 2.2.3. Pathological Reactions of the Partner to HPV Infection
 - 2.2.4. Behavior Towards Sexual Relations with the Partner
 - 2.2.5. Management of Changes in the Couple's Relationship
 - 2.2.6. Preventative Behavior of the Infection and its Repercussions on the Sexual Activity of the Couple
- 2.3. Sexual Activity after HPV
 - 2.3.1. Psychological Stages after Finding Out They Have HPV
 - 2.3.2. Consequences on Sexual Behavior
 - 2.3.3. Breakup of the Couple
 - 2.3.4. When Only One in the Couple is Infected
 - 2.3.5. When Both are Infected
 - 2.3.6. Behaviors of the Infected Individual or Partner with Members of their Environment
 - 2.3.7. Sexual Orientation of the Infected Couple
- 2.4. Depression and Mood Alterations After HPV
 - 2.4.1. Prevalence of Depressive Syndromes in Those Infected with HPV
 - 2.4.2. Effect of HPV on an Individual's Depression
 - 2.4.3. Management of Depressive Syndromes Caused by HPV
 - 2.4.4. Management of Psychotic Syndromes Caused by HPV
 - 2.4.5. Management of Obsessive Syndromes Caused by HPV
- 2.5. Individual Psychological Management
 - 2.5.1. Professional Attitude Towards a Patient with HPV
 - 2.5.2. How to Explain HPV Infection
 - 2.5.3. Psychotherapy
 - 2.5.4. Group Therapy
 - 2.5.5. Drug Therapy
- 2.6. Couple Psychological Management
 - 2.6.1. Professional Attitude Towards a the Partner of a Patient with HPV
 - 2.6.2. How to Explain HPV Infection to the Partner of a HPV Patient
 - 2.6.3. Professional Attitude Towards the Breakup of the Couple
 - 2.6.4. Couples Therapy. Reinventing Sex
 - 2.6.5. Adjuvant Drug Therapy
- 2.7. Desire to get Pregnant in HPV Infections
 - 2.7.1. Professional Attitude Towards a the Desire to Procreate of a Patient with HPV
 - 2.7.2. Recommendations for Indicating Pregnancy
 - 2.7.3. When Pregnancy Should Be Contraindicated
 - 2.7.4. Monitoring During the Period of Trying to Get Pregnant
 - 2.7.5. Attitude of the Partner During Pregnancy
 - 2.7.6. Psychological Alterations That Occur During the Period of Trying to Get Pregnant

A comprehensive teaching program, structured in well-developed teaching units, oriented towards learning that is compatible with your personal and professional life"

05

Methodology

This training program provides you with a different way of learning. Our methodology uses a cyclical learning approach: ***Re-learning***.

This teaching system is used in the most prestigious medical schools in the world, and major publications such as the ***New England Journal of Medicine*** have considered it to be one of the most effective.

Discover Re-learning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization"

At TECH we use the Case Method

In a given situation, what would you do? Throughout the program, you will be presented with multiple simulated clinical cases based on real patients, where you will have to investigate, establish hypotheses and, finally, resolve the situation. There is abundant scientific evidence on the effectiveness of the method. Specialists learn better, faster, and more sustainably over time.

With TECH you can experience a way of learning that is shaking the foundations of traditional universities around the world.

According to Dr. Gervas, the clinical case is the annotated presentation of a patient, or group of patients, which becomes a "case", an example or model that illustrates some peculiar clinical component, either because of its teaching potential or because of its uniqueness or rarity. It is essential that the case is based on current professional life, trying to recreate the real conditions in professional medical practice.

“

Did you know that this method was developed in 1912 at Harvard for law students? The case method consisted of presenting students with real-life, complex situations for them to make decisions and justify their decisions on how to solve them. In 1924, Harvard adopted it as a standard teaching method”

The effectiveness of the method is justified by four fundamental achievements:

1. Students who follow this method not only grasp concepts, but also develop their mental capacity by evaluating real situations and applying their knowledge.
2. The learning process has a clear focus on practical skills that allow the student to better integrate into the real world.
3. Ideas and concepts are understood more efficiently, given that the example situations are based on real-life.
4. Students like to feel that the effort they put into their studies is worthwhile. This then translates into a greater interest in learning and more time dedicated to working on the course.

Re-Learning Methodology

At TECH we enhance the Harvard case method with the best 100% online teaching methodology available: Re-learning.

Our University is the first in the world to combine the study of clinical cases with a 100% online learning system based on repetition, combining a minimum of 8 different elements in each lesson, which represent a real revolution with respect to simply studying and analyzing cases.

The physician will learn through real cases and by solving complex situations in simulated learning environments. These simulations are developed using state-of-the-art software to facilitate immersive learning.

At the forefront of world teaching, the Re-learning method has managed to improve the overall satisfaction levels of professionals who complete their studies, with respect to the quality indicators of the best Spanish-speaking online university (Columbia University).

With this methodology we have trained more than 250,000 physicians with unprecedented success, in all clinical specialties regardless of the surgical load. All this in a highly demanding environment, where the students have a strong socio-economic profile and an average age of 43.5 years.

Re-learning will allow you to learn with less effort and better performance, involving you more in your specialization, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation to success.

In our program, learning is not a linear process, but rather a spiral (we learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

The overall score obtained by our learning system is 8.01, according to the highest international standards.

In this program you will have access to the best educational material, prepared with you in mind:

Study Material

All the teaching materials are specifically created for the course by specialists who teach on the course so that the teaching content is highly specific and precise.

This content is then adapted in an audiovisual format that will create our way of working online, with the latest techniques that allow us to offer you high quality in all of the material that we provide you with.

Latest Techniques and Procedures on Video

We introduce you to the latest techniques, to the latest educational advances, to the forefront of current medical techniques. All this, in first person, with the maximum rigor, explained and detailed for your assimilation and understanding. And best of all, you can watch them as many times as you want.

Interactive Summaries

We present the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This unique multimedia content presentation training system was awarded by Microsoft as a "European Success Story"

Additional Reading

Recent articles, consensus documents, international guides. in our virtual library you will have access to everything you need to complete your training.

Expert-Led Case Studies and Case Analysis

Effective learning ought to be contextual. Therefore, we will present you with real case developments in which the expert will guide you through focusing on and solving the different situations: a clear and direct way to achieve the highest degree of understanding.

Testing & Re-Testing

We periodically evaluate and re-evaluate your knowledge throughout the program, through assessment and self-assessment activities and exercises: so that you can see how you are achieving your goals.

Classes

There is scientific evidence suggesting that observing third-party experts can be useful.

Learning from an expert strengthens knowledge and memory, and generates confidence in our future difficult decisions.

Quick Action Guides

We offer you the most relevant contents of the course in the form of worksheets or quick action guides. A synthetic, practical, and effective way to help you progress in your learning.

06

Certificate

Through a different and stimulating learning experience, you will be able to acquire the necessary skills to take a big step in your training. An opportunity to progress, with the support and monitoring of a modern and specialized university, which will propel you to another professional level.

Include in your training a Postgraduate Certificate in Cervical Cancer and the Psychological Impact: a high-quality added value for any medical professional"

This **Postgraduate Certificate in Cervical Cancer and the Psychological Impact** contains the most complete and up-to-date scientific program on the market.

After the student has passed the evaluations, they will receive their corresponding University Course Certificate issued by **TECH Technological University** by tracked mail.

The certificate issued by **TECH Technological University** will express the qualification obtained in the course, and meets the requirements commonly demanded by labor exchanges, competitive examinations and professional career evaluation committees.
