# Introduction

Advances in diagnostic techniques are opening up many possibilities in the approach to the oncological process and severe colon pathology. But new developments make it necessary for the specialist to be constantly up-to-date so that he can provide the best care to the patient and improve his prognosis. This **Postgraduate Certificate** is designed to facilitate your update in a practical way, 100% online, through the latest educational technology.

“

*The new scenarios in surgery push us to propose new training programs that fit the real needs of experienced professionals, so that they can incorporate the advances in the practice of Colon Surgery”*

Colon cancer is the second most frequent neoplasm in both men and women, followed by lung and breast cancer, respectively, and with a mortality of diagnosed individuals close to 50%. Surgery is the only curative treatment currently available, the technique and procedure chosen depending on the location, degree of local invasion and/or existence of distant metastases. Adjuvant chemotherapy is administered with the aim of eradicating micrometastatic disease and thereby increasing disease-free survival and overall survival.

Modern surgery implies a constant need for recycling, but the speed at which changes and advances in techniques and procedures occur, and the amount of scientific documentation, articles, etc., that are published every week on new treatments, make it almost impossible for a specialist to reconcile his updating with his daily clinical and surgical practice.

This **Postgraduate Certificate in Colon Surgery** is designed to review the current status of large bowel surgery and the most frequent indications, in order to provide the surgeon the possibility of being up-to-date on the latest surgical techniques, and allowing the exchange of knowledge and experience, create protocols for action and disseminate the most important developments in the surgical field.

This **Postgraduate Certificate in Colon Surgery** contains the most complete and up-to-date scientific program on the market. The most outstanding features of the Postgraduate Certificate are:

- ◆ Contains clinical cases presented by experts. The graphic, schematic, and eminently practical contents with which they are created provide scientific and practical information on the disciplines that are essential for professional practice.
- ◆ Diagnostic-therapeutic developments on the care of the patient with Colon problems, who is susceptible to surgical intervention.
- ◆ Presentation of practical workshops on procedures in the surgical approach to large intestine pathology.
- ◆ Video lessons on the different pathologies and their approach.
- ◆ Algorithm-based interactive learning system for decision-making in the presented clinical situations.
- ◆ Theoretical lessons, questions to the expert, debate forums on controversial topics, and individual reflection assignments.
- ◆ Content that is accessible from any fixed or portable device with an Internet connection.

*Scientific evidence increases the quality of surgical practice. Keeping up-to-date is key to providing better care for the patient with Large Intestine pathology”*

“

*This Postgraduate Certificate may be the best investment you can make in the selection of a refresher program for two reasons: in addition to updating your knowledge in Colon Surgery, you will obtain a Postgraduate Certificate issued by TECH Technological University”*

Its teaching staff includes leading specialists in surgery, who bring to this training the experience of their work, in addition to other specialists belonging to prestigious scientific societies.

The multimedia content developed with the latest educational technology will provide the professional with situated and contextual learning, i.e., a simulated environment that will provide immersive training program to train in real situations.

The design of this program is based on Problem-Based Learning, by means of which the physician must try to solve the different professional practice situations that arise throughout the **Postgraduate Certificate**. This will be done with the help of an innovative interactive video system developed by renowned experts in Colon surgery, with extensive teaching experience.

*The Postgraduate Certificate allows training in simulated environments, which provide immersive learning programmed to train for real situations.*

*Don't miss the opportunity to update your knowledge in Colon Surgery.*

# 02 Objectives

This program is oriented towards a review of the main aspects of the approach to Colon Surgery, based on scientific evidence and the experience of renowned professionals in the surgical field.

“

*This refresher program will provide you with the skills to act safely in the performance of surgical praxis, which will help you grow personally and professionally”*

## General Objective

---

- To update the surgeon's knowledge in the most frequent procedures and techniques of the usual practice in Colon Surgery, providing answers to common questions of the professional's day-to-day work.

*Take this opportunity and take the step to get up-to-date on the most important aspects of Colon Surgery.*

## Specific Objectives

---

### Module 1.

- ◆ Lay the foundations of medical oncology and radiotherapy in colon cancer.
- ◆ Describe the principles of colon cancer surgery.
- ◆ Establish the differential characteristics in the approach to ascending, descending, and transverse colon cancer.

### Module 2.

- ◆ Describe innovations in general and digestive system surgery: in surgical learning, in surgical devices, in NOTES surgery, and in Cell Therapy and Surgery.
- ◆ Point out the role of Information and Communication Technologies applied to surgery.
- ◆ Explain the indications and importance of robotic surgery.
- ◆ Address the features of financing, protection, and transfer of innovation in surgery.

03

# Course Management

The program includes in its teaching staff surgeons of reference in the care of patients with intestinal etiology pathology, who pour into this training the experience of their work. Additionally, other recognized specialists participate in its design and preparation, which means that the program is developed in an interdisciplinary manner.

“

*Learn from leading professionals the latest advances in surgical procedures for colon pathology”*

## Management

### Dr. Díaz Domínguez, Joaquín

In Memoriam

"Dr. Joaquín Díaz Domínguez was at the head of this program in its numerous editions, leading the teaching team, collaborating intensively, and going out of his way to continue spreading his knowledge of medicine and surgery to everyone that has had the opportunity to participate in this program.

From Tech University we want to pay a heartfelt tribute full of affection and gratitude for his dedication and commitment during these years, always lending himself to others and sharing his experience unconditionally, to contribute to continue saving lives and caring for people who have needed it most.

Thank you very much, Joaquín."

### Dr. Pascual Migueláñez, Isabel

- Degree in Medicine from the Autonomous University Madrid
- Doctorate from the Autonomous University of Madrid with the thesis "Use of sutures coated with stem cells (biosutures) in colic anastomoses. An experimental study in rats" with the qualification "Outstanding cum laude".
- Resident Doctor from the MIR program in General and Digestive System Surgery at La Paz University Hospital. Madrid
- Specialist in General and Digestive System Surgery at the Infanta Sofía University Hospital, San Sebastián de los Reyes, Madrid. Hepatobiliopancreatic Surgery Unit
- Specialist in General and Digestive System Surgery at La Paz University Hospital, Madrid. Colorectal Surgery Unit

## Management

### Dr. Álvarez Gallego, Mario

- Degree in Medicine and Surgery from the University of Alcalá de Henares
- Diploma of Advanced Studies (DAS): "Use of mesenchymal stem cells to prevent the formation of intra-abdominal adhesions". Autonomous University of Madrid. Surgery Department. Grade. Outstanding, Cum Laude
- Residency in General and Digestive System Surgery at La Paz University Hospital, Madrid.
- Specialist in General and Digestive System Surgery, Colorectal Surgery Unit, Infanta Sofía Hospital.
- Specialist in General and Digestive System Surgery at the Infanta Cristina Hospital, Parla, Madrid.
- Specialist in General and Digestive System Surgery, Colorectal Surgery Unit, La Paz Hospital, Madrid.
- Rotations: General and Digestive System Surgery Service, Son Llátzer Hospital, Palma de Mallorca; Abdominal Organ Transplant Unit, 12 de Octubre Hospital, Madrid; Polytraumatized Patient Unit, Los Angeles County Hospital, University of Southern California (USC), Los Angeles, California, USA.
- Member of the Innovation Platform of La Paz Hospital (Idipaz).
- Patent: "Insufflation and suction assisted surgical specimen removal device". Ownership: FIBHULP. Inventor: Mario Álvarez Gallego. Spanish patent: P201031490. Application for international protection PCT/ ES2011/002357

## Professors

### **Dr. Belinchón Olmeda, Belén.**

- ♦ Radiation Oncology Service.
- ♦ La Paz University Hospital. Madrid.

### **Dr. Fernández Cebrián, José María.**

- ♦ Head of the General and Digestive System Surgery Department.
- ♦ Fundación Alcorcón University Hospital. Madrid.
- ♦ Professor at Rey Juan Carlos University.

### **Dr. Gil Yonte, Pablo.**

- ♦ General and Digestive System Surgery Department.
- ♦ Fundación Alcorcón Hospital. Madrid.

### **Dr. Olea, Joseba.**

- ♦ General and Digestive System Surgery Department.
- ♦ Son Espases Hospital Palma de Mallorca.

### **Dr. Pintor Tortolero, José**

- ♦ General and Digestive System Surgery Department.
- ♦ La Paz University Hospital. Madrid.

### **Dr. Rodríguez Rodríguez, Isabel.**

- ♦ Radiation Oncology Service.
- ♦ La Paz University Hospital. Madrid.

### **Dr. Rodríguez Salas, Nuria.**

- ♦ Medical Oncology Department.
- ♦ La Paz University Hospital. Madrid.

### **Dr. Rubio Pérez, Inés.**

- ♦ General and Digestive System Surgery Department.
- ♦ La Paz Hospital. Madrid

### **Dr. García Oria, Miguel Juan.**

- ♦ General and Digestive System Surgery Department.
- ♦ Puerta de Hierro Hospital. Madrid.

### **Dr. Jiménez Toscano, Marta.**

- ♦ General and Digestive System Surgery Department.
- ♦ Barcelona Clinical Hospital.

### **Dr. Morandeira Rivas, Antonio.**

- ♦ General and Digestive System Surgery Department.
- ♦ "La Mancha-Centro" Hospital Complex.
- ♦ Alcázar de San Juan.

### **Dr. Moreno Sanz, Carlos.**

- ♦ Head of the General and Digestive System Surgery Department.
- ♦ "La Mancha-Centro" Hospital Complex. Alcázar de San Juan.

**Dr. Noguera Aguilar, José F.**

- ♦ Head of the General and Digestive System Surgery Department.
- ♦ A Coruña University Hospital Complex.

**Sánchez Simón, Estela.**

- ♦ Lawyer and Innovation and Knowledge Transfer Manager at the Innovation Support Unit of the Health Research Institute of the La Paz University Hospital (IdiPAZ). Madrid Madrid.

**Tejedor Botello, Marisa.**

- ♦ Economist La Paz University Hospital-Institute for Biomedical Research of La Paz Hospital (IdiPAZ) of Madrid, as a member of the Innovation Support Unit.

04

# Structure and Content

The structure of the contents has been designed by a team of professionals knowledgeable about the implications of specialization in the practice of colon surgery, aware of the current relevance of training to be able to act before the patient with digestive problems and committed to quality teaching through new educational technologies.

“

*This Postgraduate Certificate in Colon Surgery contains the most complete and up-to-date scientific program on the market”*

### Module 1. Colon Surgery

- 1.1. Principles of Colon Cancer Surgery
- 1.2. Right Hemicolectomy
- 1.3. Left Colon Cancer
- 1.4. Transverse Colon Cancer
- 1.5. Medical and Radiotherapy Oncology in Colon Cancer

### Module 2. Surgical Innovation

- 2.1. Introduction to Surgical Innovation
- 2.2. Innovation in Surgical Learning
- 2.3. ICT
- 2.4. Innovation in Surgical Devices
- 2.5. Innovation in NOTES Surgery
- 2.6. Robotic Surgery
- 2.7. Financing, Protection, and Transfer of Innovation in Surgery

“

*A unique, key and decisive training experience to boost your professional development”*

05

# Methodology

This training program provides you with a different way of learning. Our methodology uses a cyclical learning approach: ***Re-learning***.

This teaching system is used in the most prestigious medical schools in the world, and major publications such as the ***New England Journal of Medicine*** have considered it to be one of the most effective.

“

*Discover Re-learning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization"*

## At TECH we use the Case Method

In a given situation, what would you do? Throughout the program, you will be presented with multiple simulated clinical cases based on real patients, where you will have to investigate, establish hypotheses and, finally, resolve the situation. There is abundant scientific evidence on the effectiveness of the method. Specialists learn better, faster, and more sustainably over time.

*With TECH you can experience a way of learning that is shaking the foundations of traditional universities around the world.*

According to Dr. Gérvas, the clinical case is the annotated presentation of a patient, or group of patients, which becomes a "case", an example or model that illustrates some peculiar clinical component, either because of its teaching potential or because of its uniqueness or rarity. It is essential that the case is based on current professional life, trying to recreate the real conditions in professional medical practice.

“

*Did you know that this method was developed in 1912 at Harvard for law students? The case method consisted of presenting students with real-life, complex situations for them to make decisions and justify their decisions on how to solve them. In 1924, Harvard adopted it as a standard teaching method”*

The effectiveness of the method is justified by four fundamental achievements:

1. Students who follow this method not only grasp concepts, but also develop their mental capacity by evaluating real situations and applying their knowledge.
2. The learning process has a clear focus on practical skills that allow the student to better integrate into the real world.
3. Ideas and concepts are understood more efficiently, given that the example situations are based on real-life.
4. Students like to feel that the effort they put into their studies is worthwhile. This then translates into a greater interest in learning and more time dedicated to working on the course.

## Re-Learning Methodology

At TECH we enhance the Harvard case method with the best 100% online teaching methodology available: Re-learning.

Our University is the first in the world to combine the study of clinical cases with a 100% online learning system based on repetition, combining a minimum of 8 different elements in each lesson, which represent a real revolution with respect to simply studying and analyzing cases.

*The physician will learn through real cases and by solving complex situations in simulated learning environments. These simulations are developed using state-of-the-art software to facilitate immersive learning.*

At the forefront of world teaching, the Re-learning method has managed to improve the overall satisfaction levels of professionals who complete their studies, with respect to the quality indicators of the best Spanish-speaking online university (Columbia University).

With this methodology we have trained more than 250,000 physicians with unprecedented success, in all clinical specialties regardless of the surgical load. All this in a highly demanding environment, where the students have a strong socio-economic profile and an average age of 43.5 years.

*Re-learning will allow you to learn with less effort and better performance, involving you more in your specialization, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation to success.*

In our program, learning is not a linear process, but rather a spiral (we learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

The overall score obtained by our learning system is 8.01, according to the highest international standards.

In this program you will have access to the best educational material, prepared with you in mind:

#### Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is highly specific and precise.

This content is then adapted in an audiovisual format that will create our way of working online, with the latest techniques that allow us to offer you high quality in all of the material that we provide you with.

#### Latest Techniques and Procedures on Video

We introduce you to the latest techniques, to the latest educational advances, to the forefront of current medical techniques. All this, in first person, with the maximum rigor, explained and detailed for your assimilation and understanding. And best of all, you can watch them as many times as you want.

#### Interactive Summaries

We present the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This unique multimedia content presentation training system was awarded by Microsoft as a "European Success Story".

#### Additional Reading

Recent articles, consensus documents, international guides. in our virtual library you will have access to everything you need to complete your training.

#### Expert-Led Case Studies and Case Analysis

Effective learning ought to be contextual. Therefore, we will present you with real case developments in which the expert will guide you through focusing on and solving the different situations: a clear and direct way to achieve the highest degree of understanding.

#### Testing & Re-testing

We periodically evaluate and re-evaluate your knowledge throughout the program, through assessment and self-assessment activities and exercises: so that you can see how you are achieving your goals.

#### Classes

There is scientific evidence suggesting that observing third-party experts can be useful.

Learning from an expert strengthens knowledge and memory, and generates confidence in our future difficult decisions.

#### Quick Action Guides

We offer you the most relevant contents of the course in the form of worksheets or quick action guides. A synthetic, practical, and effective way to help you progress in your learning.

# 06 Certificate

The **Postgraduate Certificate in Colon Surgery** guarantees you, in addition to the most rigorous and up-to-date training, access to a **Postgraduate Certificate** issued by **TECH Technological University**.

“

*Successfully complete this Postgraduate Certificate and receive your diploma without the hassle of travel or paperwork”*

This **Postgraduate Certificate in Colon Surgery** contains the most complete and up-to-date program on the market.

After the student has passed the assessments, they will receive their corresponding **Postgraduate Certificate** issued by **TECH Technological University** via tracked delivery\*.

The certificate issued by **TECH Technological University** will reflect the qualification obtained in the Postgraduate Certificate, and meets the requirements commonly demanded by labor exchanges, competitive examinations, and professional career evaluation committees.

Title: **Postgraduate Certificate in Colon Surgery**

Official N° of Hours: **250 h.**

\*Apostille Convention. In the event that the student wishes to have their paper certificate issued with an apostille, TECH EDUCATION will make the necessary arrangements to obtain it, at an additional cost.
