01

Introduction

Diabetic education is a key element in comprehensive diabetes management. All healthcare professionals involved in this disease should actively contribute to its development. Teamwork between diabetes patients, family and the healthcare team is essential for optimizing treatment and, at the same time, being able to integrate it into their daily dietary habits, schedules and habitual activities.

“

This training is the best option you can find to specialize in diabetes”

Diabetes is a complex, chronic process that requires specific knowledge and skills for a comprehensive approach that goes beyond glycemic control.

This Postgraduate Certificate in Diabetes Education. Concept and Fundamentals presents a global and complete vision of this disease that is useful for the adequate management of the patient with diabetes at any level of care.

This is a unique and innovative training program, based on an up-to-date description of the epidemiological situation of diabetes. This Postgraduate Certificate delves into the complex pathophysiology of the disease in the integral evaluation of its acute and chronic complications, from a specialized point of view, and in its integral treatment.

Its content deals with the most innovative aspects of diabetes, such as the application of technology for the control and treatment of this disease, and the most innovative areas in the research of new therapeutic targets. All this, without forgetting the crucial role of diabetes education for the control of the disease.

This program is unique in that it includes a broad view of the disease across all patient ages and special situations. It also delves into the social aspects of diabetic patients' lives that require specific knowledge so that they can be addressed.

A quality training with which you will be able to stand out in a highly competitive sector and improve your skills and knowledge in the field.

This **Postgraduate Certificate in Diabetes Education. Concept and Fundamentals** contains the most complete and up-to-date scientific program on the market. The most important features include:

- ◆ Practical cases presented by experts in Diabetes
- ◆ The graphic, schematic, and practical contents with which they are created, provide scientific and practical information on the disciplines that are essential for professional practice
- ◆ New developments in Diabetes
- ◆ Practical exercises where self-assessment can be used to improve learning
- ◆ Special emphasis on innovative methodologies in Diabetes
- ◆ Theoretical lessons, questions to the expert, debate forums on controversial topics, and individual reflection assignments
- ◆ Content that is accessible from any fixed or portable device with an internet connection

Improve the quality of care for your patients with this innovative diabetes training program"

“

This Postgraduate Certificate is the best investment you can make in the selection of a professional program for two reasons: in addition to upgrading your knowledge in Diabetes, you will obtain a diploma from TECH Global University"

Its teaching staff includes professionals belonging to the field of Diabetes, who bring to this program the experience of their work, in addition to recognized specialists from leading societies and prestigious universities.

Its multimedia content, developed with the latest educational technology, will provide the professional with situated and contextual learning, i.e., a simulated environment that will provide an immersion education programmed to learn in real situations.

The design of this program focuses on Problem-Based Learning, by means of which the professional must try to solve the different professional practice situations that are presented throughout the academic course. For this purpose, the professional will be assisted by an innovative interactive video system created by renowned and experienced experts in Diabetes with extensive medical experience.

*Take the step and join our team.
You will find the best educational material to enhance your studies.*

This 100% online Postgraduate Certificate will allow you to balance your studies with your professional work while increasing your knowledge in this field.

Diagnosis
diabetes

02 Objectives

This Postgraduate Certificate in Diabetes Education. Concept and Fundamentals is oriented to facilitate the performance of the professional dedicated to medicine with the latest advances and newest treatments in the sector.

“

This is your opportunity to learn about the latest treatments in Diabetes”

General Objective

- ◆ Act as a leading professional specialized in Diabetes

“

Take the opportunity to take this unique chance and take the next step to improve your knowledge in the field of Diabetology Education. Concept and Fundamentals”

Specific Objective

- ◆ Acquire the necessary knowledge and skills of diabetes education, as part of the treatment of diabetes, to facilitate the knowledge, skill and ability necessary for self-management

03

Course Management

The program includes in its teaching staff leading experts in Diabetes, who bring to this specialization the experience of their work. Additionally, other recognized specialists participate in its design and preparation which means that the program is developed in an interdisciplinary manner.

“

*Leading professionals in the field
have come together to teach you
the latest advances in Diabetes”*

International Guest Director

More than **four decades** of experience in **Diabetes** research and clinical practice endorse the outstanding career of Dr. Om Ganda. He was part of one of the **most relevant trials in this field**, the 1993 DCCT, which demonstrated the importance of glucose control in the prevention of complications in type 1 diabetes. Likewise, his numerous contributions to this area have allowed outstanding advances in the optimal control of glucose in patients with Diabetes. In recent years, he has directed his research focus to the study of the effects of Omega-3 fatty acids on cardiovascular health and the improvement of treatments for people who have difficulty maintaining a diet or exercising.

He has accumulated **more than 100 scientific** publications in the area of Diabetes, the most cited being those related to the development of a Comprehensive Plan of Care for Diabetes Mellitus (in collaboration with the American Society of Clinical Endocrinologists), the Insulin Resistance Syndrome or the Treatment of Dyslipidemia and Prevention of Atherosclerosis.

His extensive career has led him to direct, as **Medical Director**, the Joslin Diabetes Center Lipid Clinic, where he has also been **Coordinator of the Endocrinology Consultation Service** and Coordinator of Conferences on Clinical Diabetes and Metabolism. He combines these responsibilities as a Researcher being an active part of the Joslin Research Laboratory.

He is also an Associate Professor of Medicine at Harvard Medical School and has held several Clinical and Research Fellowships at Harvard, Boston Veterans Administration Hospital and Peter Bent Brigham Hospital.

Dr. Ganda, Om

- Director of the Lipid Clinic at Joslin Diabetes Center, Boston.
- Coordinator of the Endocrine Consultation Service at Joslin Diabetes Center
- Researcher at Joslin Research Laboratory
- Associate Professor of Medicine at Harvard Medical School
- M.D. from All India Institute of Medical Sciences
- Graduate in Medicine from S.M.S. Medical College of the University of Rajasthan
- ClinicalFellow in Endocrinology and Metabolism at the Boston Veterans Administration Hospital and Tufts University School of Medicine.
- ResearchFellow at Harvard Medical School
- ResearchFellow at Peter Bent Brigham Hospital
- Sub-specialty Board Certified in Endocrinology and Metabolism by the American Society of Internal Medicine.

Thanks to TECH you will be able to learn with the best professionals in the world"

Management

Dr. González Albarrán, Olga

- ◆ Head of Endocrinology and Diabetes at the Gregorio Marañón University Hospital in Madrid.
- ◆ Specialist in Endocrinology and Nutrition.
- ◆ Degree in Medicine from the Autonomous University Madrid
- ◆ Doctor with *Cum Laude* and Extraordinary Prize in Medicine from the University of Alcalá de Henares.
- ◆ Associate Professor at the Complutense University of Madrid.
- ◆ Master's Degree in Clinical Nutrition from the Autonomous University of Madrid
- ◆ Master's Degree in Cardiovascular Risk from McMaster University.
- ◆ Master's Degree in Management of Endocrinology Clinical Units, Meléndez Pelayo University.
- ◆ Spanish Society of Endocrinology and Nutrition Award

Professors

Dr. Asensio González, María

- ◆ Independent Nutritionist
- ◆ Nutritionist at Rowing Club in Alicante
- ◆ Nutritionist at Alex Camarada Sports Center, Alicante
- ◆ Nutritionist at Melody Garcia Nutrition, Benidorm
- ◆ Graduate in Human Nutrition and Dietetics from the University of Valladolid
- ◆ Master in Sports Nutrition by the Catholic University San Antonio of Murcia.
- ◆ Member of the Health Commission of the CODiNuCova College.

04

Structure and Content

The structure of the content has been designed by leading professionals in the Diabetes Sector, with extensive experience and recognized prestige in the profession, backed by the volume of cases reviewed, studied, and diagnosed, and with extensive knowledge of new technologies applied to Diabetes.

“

This Postgraduate Certificate contains the most complete and up-to-date scientific program on the market”

Module 1. Diabetic Education. Concept and Fundamentals

- 1.1. Diabetic Education. Concept. Assessment of the Educational Needs of the Person with Diabetes
- 1.2. Diabetology Education Training Programs
- 1.3. Education and Competencies in People with Type 1 Diabetes
- 1.4. Education and Competencies in People at Risk of Type 2 Diabetes or with Type 2 Diabetes
- 1.5. Therapeutic Education of the Child and Adolescent, their Parents or Caregivers
- 1.6. Therapeutic Education for the Detection of Foot Risk in People with Diabetes
- 1.7. Impact of the "Expert Patient" Program on Diabetology Education
- 1.8. Impact of Patients' Associations
- 1.9. Ethical Aspects in Diabetes Education
- 1.10. Challenges in Chronic Monitoring. Barriers to Adherence and Therapeutic Inertia

“

*This program will allow
you to advance in your
career in a seamless way”*

05

Methodology

This academic program offers students a different way of learning. Our methodology uses a cyclical learning approach: **Relearning.**

This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the **New England Journal of Medicine** have considered it to be one of the most effective.

“

Discover Relearning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization"

At TECH we use the Case Method

What should a professional do in a given situation? Throughout the program, students will face multiple simulated clinical cases, based on real patients, in which they will have to do research, establish hypotheses, and ultimately resolve the situation. There is an abundance of scientific evidence on the effectiveness of the method. Specialists learn better, faster, and more sustainably over time.

With TECH you will experience a way of learning that is shaking the foundations of traditional universities around the world.

According to Dr. Gérvas, the clinical case is the annotated presentation of a patient, or group of patients, which becomes a "case", an example or model that illustrates some peculiar clinical component, either because of its teaching power or because of its uniqueness or rarity. It is essential that the case is based on current professional life, trying to recreate the real conditions in the physician's professional practice.

“

Did you know that this method was developed in 1912, at Harvard, for law students? The case method consisted of presenting students with real-life, complex situations for them to make decisions and justify their decisions on how to solve them. In 1924, Harvard adopted it as a standard teaching method”

The effectiveness of the method is justified by four fundamental achievements:

1. Students who follow this method not only achieve the assimilation of concepts, but also a development of their mental capacity, through exercises that evaluate real situations and the application of knowledge.
2. Learning is solidly translated into practical skills that allow the student to better integrate into the real world.
3. Ideas and concepts are understood more efficiently, given that the example situations are based on real-life.
4. Students like to feel that the effort they put into their studies is worthwhile. This then translates into a greater interest in learning and more time dedicated to working on the course.

Relearning Methodology

At TECH we enhance the case method with the best 100% online teaching methodology available: Relearning.

This university is the first in the world to combine the study of clinical cases with a 100% online learning system based on repetition, combining a minimum of 8 different elements in each lesson, a real revolution with respect to the mere study and analysis of cases.

Professionals will learn through real cases and by resolving complex situations in simulated learning environments. These simulations are developed using state-of-the-art software to facilitate immersive learning.

At the forefront of world teaching, the Relearning method has managed to improve the overall satisfaction levels of professionals who complete their studies, with respect to the quality indicators of the best online university (Columbia University).

With this methodology, more than 250,000 physicians have been trained with unprecedented success in all clinical specialties regardless of surgical load. Our pedagogical methodology is developed in a highly competitive environment, with a university student body with a strong socioeconomic profile and an average age of 43.5 years old.

Relearning will allow you to learn with less effort and better performance, involving you more in your specialization, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation to success.

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

The overall score obtained by TECH's learning system is 8.01, according to the highest international standards.

This program offers the best educational material, prepared with professionals in mind:

Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is highly specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

Surgical Techniques and Procedures on Video

TECH introduces students to the latest techniques, the latest educational advances and to the forefront of current medical techniques. All of this in direct contact with students and explained in detail so as to aid their assimilation and understanding. And best of all, you can watch the videos as many times as you like.

Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive educational system for presenting multimedia content was awarded by Microsoft as a "European Success Story".

Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

Expert-Led Case Studies and Case Analysis

Effective learning ought to be contextual. Therefore, TECH presents real cases in which the expert will guide students, focusing on and solving the different situations: a clear and direct way to achieve the highest degree of understanding.

Testing & Retesting

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises, so that they can see how they are achieving their goals.

Classes

There is scientific evidence on the usefulness of learning by observing experts. The system known as Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

Quick Action Guides

TECH offers the most relevant contents of the course in the form of worksheets or quick action guides. A synthetic, practical, and effective way to help students progress in their learning.

06 Certificate

The Postgraduate Certificate in Diabetic Education. Concept and Fundamentals guarantees students, in addition to the most rigorous and up-to-date education, access to a Postgraduate Certificate issued by TECH Global University.

“

Successfully complete this program and receive your university qualification without having to travel or fill out laborious paperwork”

This program will allow you to obtain your **Postgraduate Certificate in Diabetic Education. Concept and Fundamentals** endorsed by **TECH Global University**, the world's largest online university.

TECH Global University is an official European University publicly recognized by the Government of Andorra ([official bulletin](#)). Andorra is part of the European Higher Education Area (EHEA) since 2003. The EHEA is an initiative promoted by the European Union that aims to organize the international training framework and harmonize the higher education systems of the member countries of this space. The project promotes common values, the implementation of collaborative tools and strengthening its quality assurance mechanisms to enhance collaboration and mobility among students, researchers and academics.

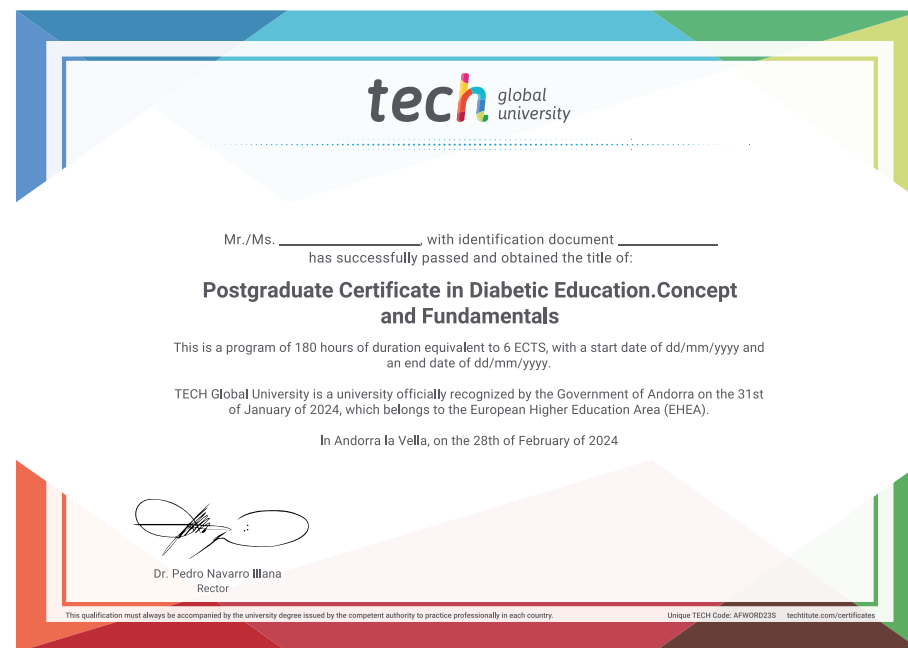

This **TECH Global University** title is a European program of continuing education and professional updating that guarantees the acquisition of competencies in its area of knowledge, providing a high curricular value to the student who completes the program.

Title: **Postgraduate Certificate in Diabetic Education. Concept and Fundamentals**

Modality: **online**

Duration: **6 weeks**

Accreditation: **6 ECTS**

*Apostille Convention. In the event that the student wishes to have their paper certificate issued with an apostille, TECH Global University will make the necessary arrangements to obtain it, at an additional cost.
