01

Introduction

The work of the physician in the field of congenital heart disease and pediatric cardiology is very complex. It deals with a wide variety of rare pathologies, with continuous advances in diagnosis and treatment and covers the entire age spectrum, from the fetus to the adult, including the neonate, infant, child and adolescent.

“

Improve your knowledge through this program, where you will find the best didactic material with real clinical cases. Learn here about the latest advances in the specialty to be able to perform a quality medical practice"

There are a lot of professionals involved in this field who come from a diverse range of areas, from clinics to surgery.

To treat these pathologies it is necessary to have specialized training. This is a long process and difficult to achieve, since it is not covered at the undergraduate stage and is not offered at the postgraduate level. Therefore, it is relegated to the hospital care setting. In hospitals, there are very irregular programs in terms of student selection, teaching content, duration and teacher support. In addition, they do not have any academic or institutional endorsement.

This program aims to address these shortcomings and needs by offering the professional a quality training focused on the acquisition of strong skills.

This **Postgraduate Certificate in Heart Disease, Cardiomyopathies and Tumors in Pediatrics** contains the most complete and up-to-date scientific program on the market.

The most important features of the program include:

- ♦ Clinical cases presented by experts in cardiology. The graphic, schematic, and eminently practical contents with which they are created provide scientific and practical information on the disciplines that are essential for professional practice.
- ♦ The latest diagnostic and therapeutic information on how to approach nutrition.
- ♦ Algorithm-based interactive learning system for decision-making in the presented clinical situations.
- ♦ With a special emphasis on evidence-based medicine and research methodologies in Pediatric Cardiology.
- ♦ All of this will be complemented by theoretical lessons, questions to the expert, debate forums on controversial topics, and individual reflection assignments.
- ♦ Content that is accessible from any fixed or portable device with an Internet connection.

Update your knowledge through the Postgraduate Certificate in Heart Disease, Cardiomyopathies and Tumors in Pediatrics, in a practical way and adapted to your needs"

“

This Postgraduate Certificate may be the best investment you can make when choosing a refresher program for two reasons: in addition to updating your knowledge in Heart Disease, Cardiomyopathies and Tumors in Pediatrics, you will obtain a Postgraduate Certificate qualification from TECH Technological University”

Forming part of the teaching staff is a group of professionals in the world of Pediatric Cardiology, who bring to this course their work experience, as well as a group of renowned specialists, recognised by esteemed scientific communities.

The multimedia content developed with the latest educational technology will provide the professional with situated and contextual learning, i.e., a simulated environment that will provide an immersive training program to train in real situations.

Problem-Based Learning underpins this program design, and the doctor must use it to try and solve the different professional practice situations that arise throughout the course. For this reason, you will be assisted by an innovative, interactive video system created by renowned and experienced experts in the field of cardiology with extensive teaching experience.

The course includes real clinical cases and exercises to bring the development of the course closer to the clinical practice of a physician.

Make the most of the opportunity to update your knowledge in Heart Disease, Cardiomyopathies and Tumors in Pediatrics and improve your patient care.

02

Objectives

The program's primary objective is focused on theoretical and practical learning, so that the doctor is able to master Heart Disease, Cardiomyopathies and Tumors in Pediatrics in both a practical and rigorous manner.

“

This refresher program will generate a sense of confidence in your medical praxis which will help you grow both personally and professionally”

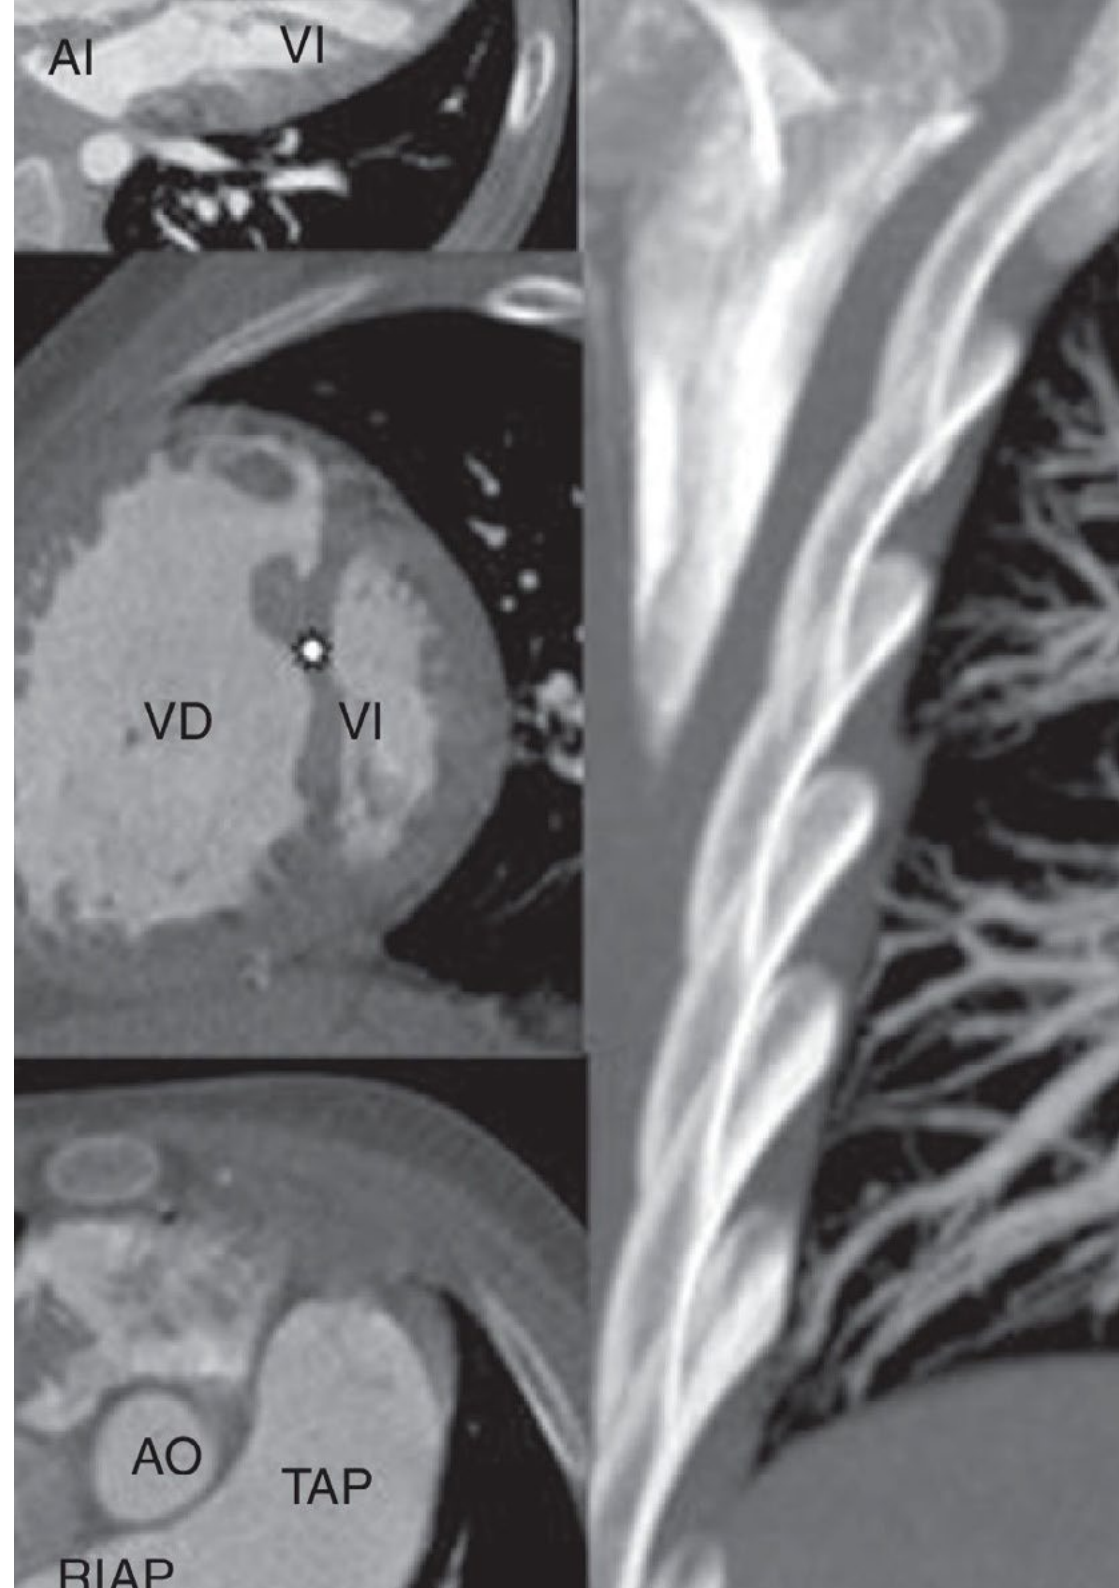

General Objectives

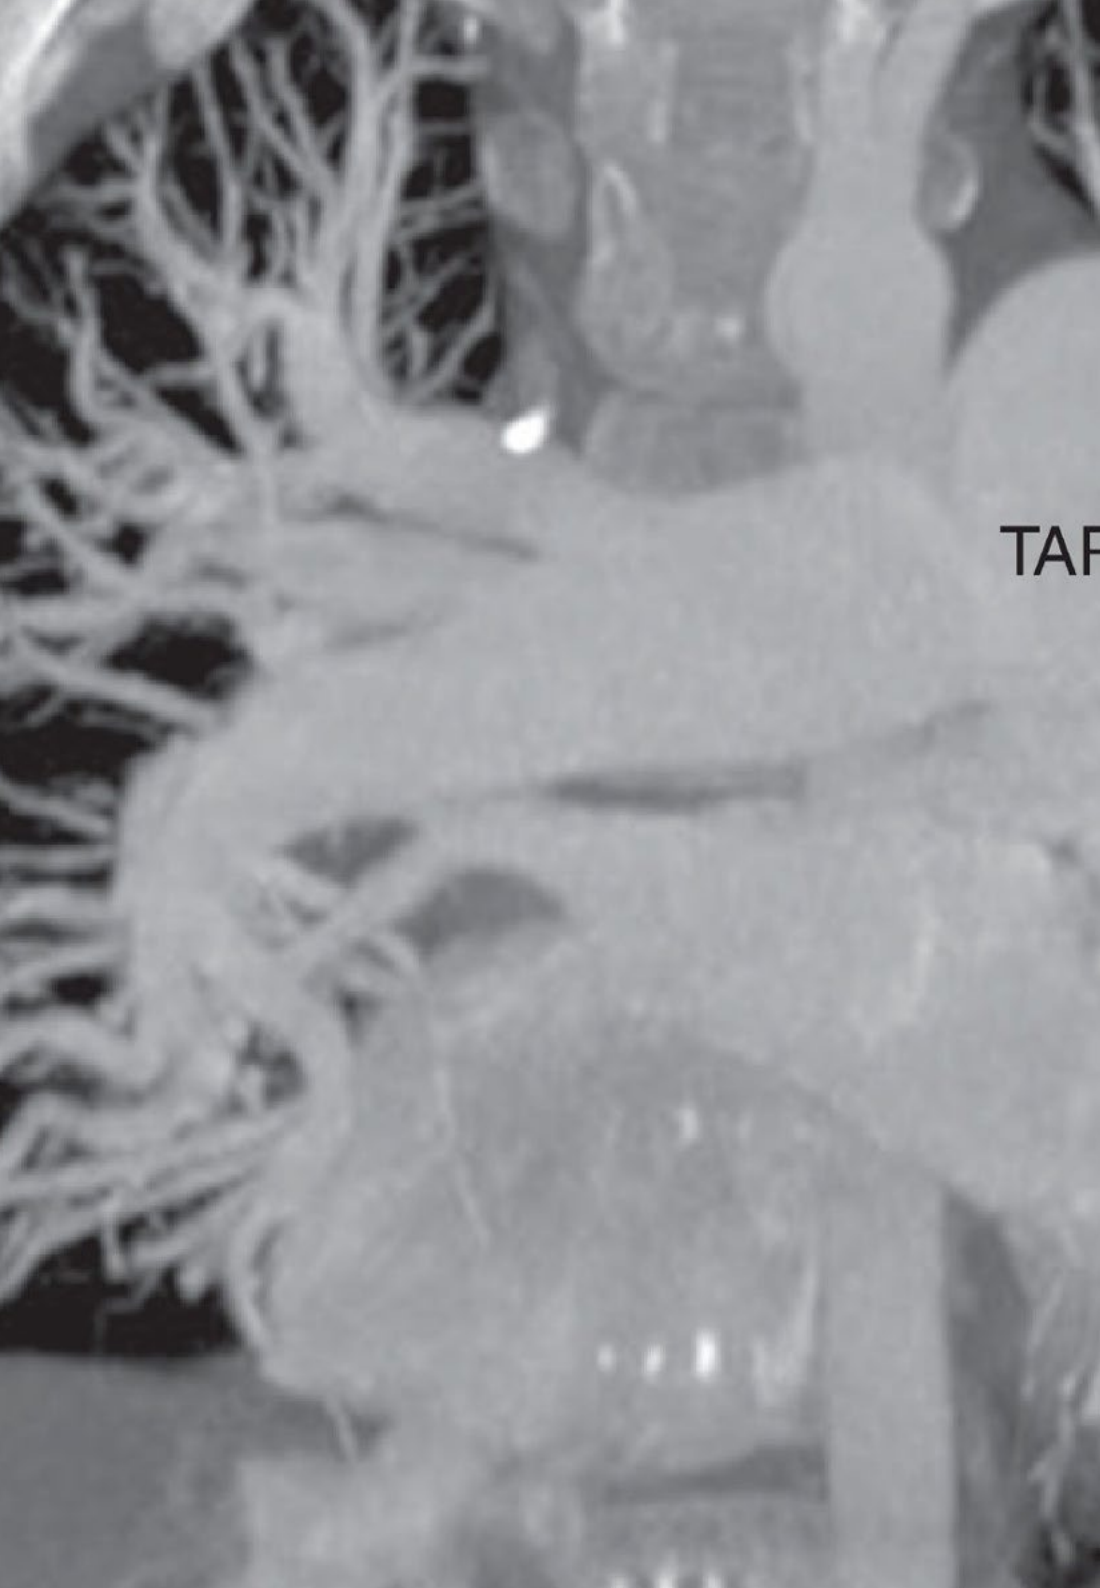

- Provide the theoretical knowledge necessary to understand the environment in which professional care is given to fetuses with heart disease.
- Develop the necessary skills to diagnose and treat a neonate with heart disease.
- Apply the most innovative diagnostic methods to detect congenital heart disease in breastfeeding infants, children and adolescents with heart problems.
- Determine the appropriate treatment for congenital heart disease in the pediatric age group.
- Gain in-depth understanding of the areas in which professionals must be trained, in order for them to be able to provide the best practice when dealing with fetuses, children and adolescents with heart disease, both congenital and acquired.

Specific Objectives

- Define the characteristics of different congenital heart diseases.
- Explain myocarditis and cardiomyopathies in pediatrics.
- Define the management of cardiomyopathies.
- Explain the clinical and surgical management of other pathologies such as perocarditis, endocarditis and Kawasaki Disease.
- Explain the diagnosis and management of cardiac tumors.
- Define the cardiologic involvement that pediatric systemic diseases can have.
- Explain the appropriate management of a child cancer survivor.

TAF

“

Make the most of the opportunity and take the step to get up-to-date on the latest developments in Heart Disease, Cardiomyopathies and Tumors in Pediatrics”

03

Course Management

This program includes highly regarded health professionals in the field of pediatric cardiology in its teaching staff, who bring the experience of their work to this training. In addition, renowned specialists, members of prestigious national and international scientific communities, are involved in designing and preparing the program.

“

Learn the latest advances in Heart Disease, Cardiomyopathies and Tumors in Pediatrics from leading professionals"

Management

Dr. Gutiérrez - Larraya, Federico

- ♦ PhD in Medicine Complutense University Madrid
- ♦ Head of the Pediatric Cardiology at La Paz University Hospital
- ♦ Head of the Pediatric Cardiology at Ruber International Hospital
- ♦ Master's Degree in Clinical and Health Psychology European Institution of Health and Social Wellbeing
- ♦ Executive Master's Degree in Healthcare Organization Management. ESADE.
- ♦ Chairman of the Permanent Management Committee of the Children's Hospital La Paz University Hospital
- ♦ Member of the Platform of Innovation La Paz University Hospital

Professors

Dr. García-Guereta Silva, Luis

- ♦ PhD in Medicine
- ♦ Pediatric Cardiology Department La Paz University Hospital

04

Structure and Content

The structure of the contents has been designed by a team of professionals who recognise the implications of training in daily praxis the field of Heart Disease, Cardiomyopathies and Tumors in Pediatrics, aware of the relevance of current training to treat patients with cardiac pathologies and who are committed to quality teaching using new educational technologies.

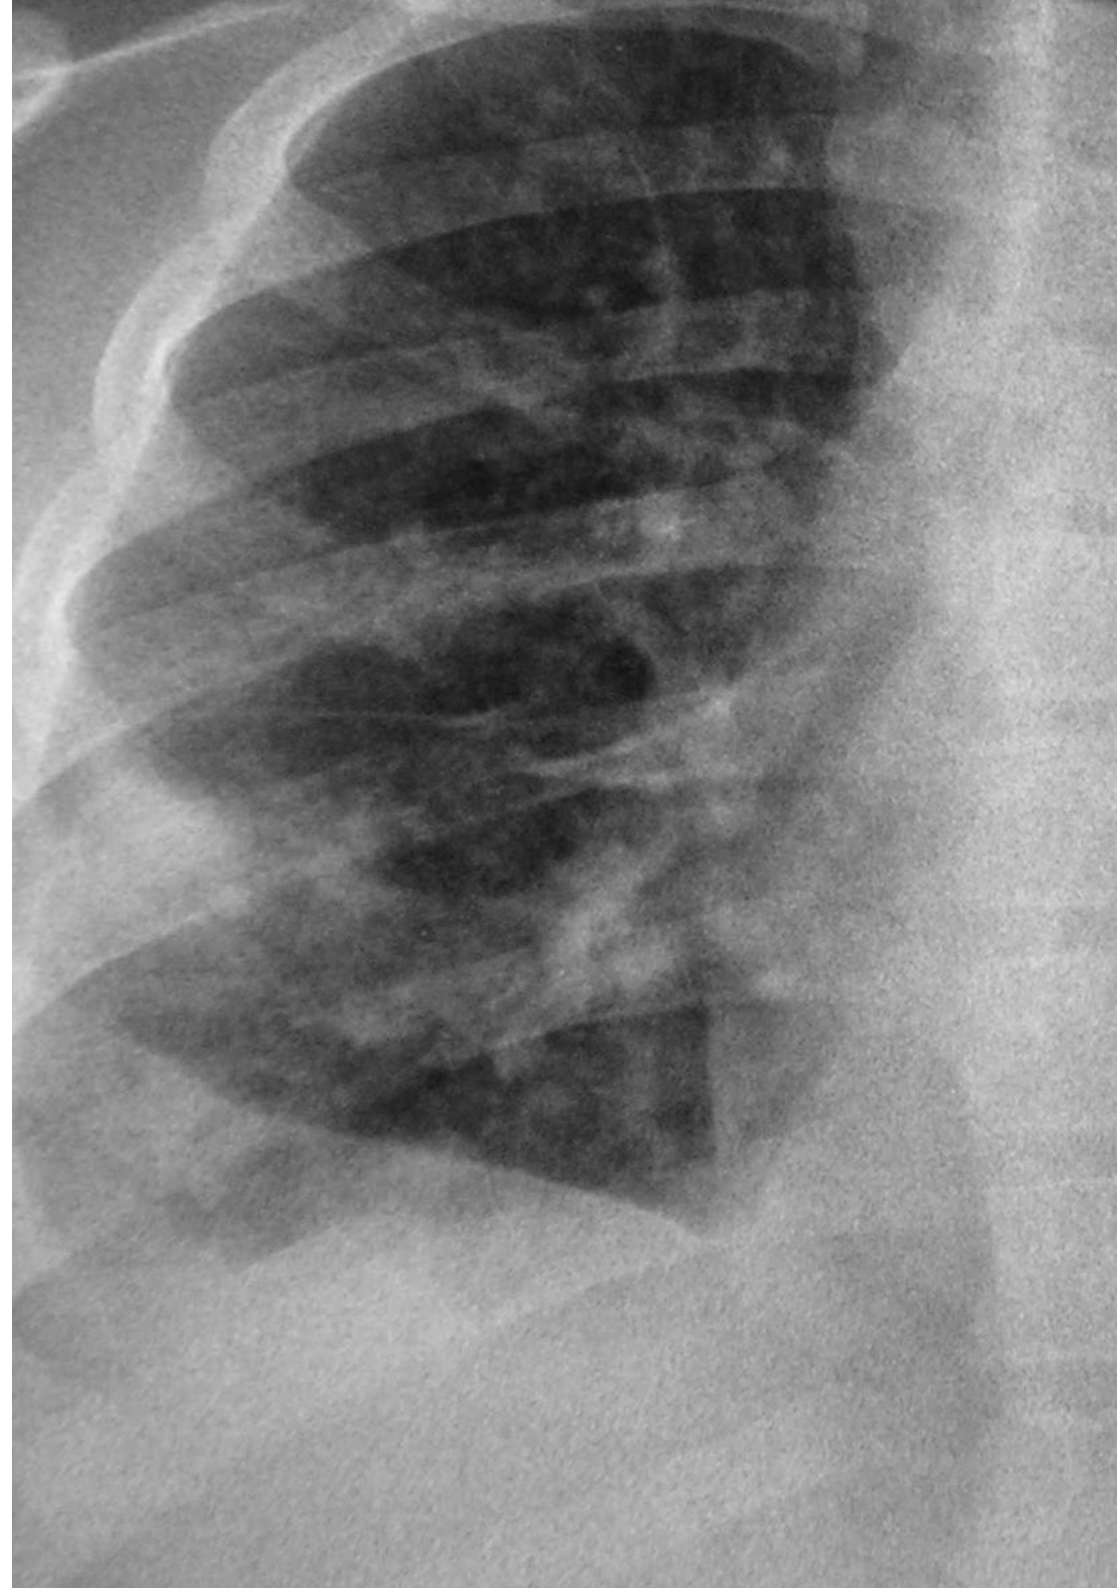

A

“

This Postgraduate Certificate in Heart Disease, Cardiomyopathies and Tumors in Pediatrics contains the most complete and up-to-date scientific program on the market”

Module 1. Heart Disease, Cardiomyopathies and Tumors in Pediatrics

- 1.1. Congenital Heart Disease
 - 1.1.1. Visceral and Atrial Situs Anomalies
 - 1.1.2. Infradiaphragmatic Total Pulmonary Venous Drainage
 - 1.1.3. Atrial Septal Defect Ostium Secundum
 - 1.1.4. Atrial Septal Defect of the Venous Sinus and Coronary Sinus Type
 - 1.1.5. Partial Anomalous Pulmonary Venous Anomalous Drainage Including S of the Scimitar
 - 1.1.6. Nomenclature and Anatomical Types of Atrioventricular Septal Defects
 - 1.1.7. Atrial Septal Defect Ostium Secundum
 - 1.1.8. Complete and Transitional Atrioventricular Septal Defects
 - 1.1.9. Ventricular Septal Defect
 - 1.1.10. Nephrological Pathology in a Newborn
 - 1.1.11. Ductus Arteriosus
 - 1.1.12. Aortopulmonary Window
- 1.2. Myocarditis and Cardiomyopathy
 - 1.2.1. Myocarditis
 - 1.2.2. Dilated Cardiomyopathy
 - 1.2.3. Non-Compaction Cardiomyopathy
 - 1.2.4. Restrictive Cardiomyopathy
 - 1.2.5. Arrhythmogenic Dysplasia
 - 1.2.6. Hypertrophic Cardiomyopathy
 - 1.2.7. Cardiac Tamponade
- 1.3. Perocarditis, Endocarditis and Kawasaki Disease
 - 1.3.1. Pericarditis.
 - 1.3.2. Infectious Endocarditis General Perspective
 - 1.3.3. Infectious Endocarditis Cardiological Perspective
 - 1.3.4. Kawasaki Disease
- 1.4. Cardiac Tumors
- 1.5. Cardiologic Involvement in Pediatric Systemic Diseases
- 1.6. Child Cancer Survivor

“

*A unique, key, and decisive
training experience to boost your
professional development”*

05

Methodology

This training program provides you with a different way of learning. Our methodology uses a cyclical learning approach: ***Re-learning***.

This teaching system is used in the most prestigious medical schools in the world, and major publications such as the ***New England Journal of Medicine*** have considered it to be one of the most effective.

“

Discover Re-learning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization"

At TECH we use the Case Method

In a given situation, what would you do? Throughout the program, you will be presented with multiple simulated clinical cases based on real patients, where you will have to investigate, establish hypotheses and, finally, resolve the situation. There is abundant scientific evidence on the effectiveness of the method. Specialists learn better, faster, and more sustainably over time.

With TECH you can experience a way of learning that is shaking the foundations of traditional universities around the world.

According to Dr. Gervas, the clinical case is the annotated presentation of a patient, or group of patients, which becomes a "case", an example or model that illustrates some peculiar clinical component, either because of its teaching potential or because of its uniqueness or rarity. It is essential that the case is based on current professional life, trying to recreate the real conditions in professional medical practice.

“

Did you know that this method was developed in 1912 at Harvard for law students? The case method consisted of presenting students with real-life, complex situations for them to make decisions and justify their decisions on how to solve them. In 1924, Harvard adopted it as a standard teaching method.

The effectiveness of the method is justified by four fundamental achievements:

1. Students who follow this method not only grasp concepts, but also develop their mental capacity by evaluating real situations and applying their knowledge.
2. The learning process has a clear focus on practical skills that allow the student to better integrate into the real world.
3. Ideas and concepts are understood more efficiently, given that the example situations are based on real-life.
4. Students like to feel that the effort they put into their studies is worthwhile. This then translates into a greater interest in learning and more time dedicated to working on the course.

Re-Learning Methodology

At TECH we enhance the Harvard case method with the best 100% online teaching methodology available: Re-learning.

Our University is the first in the world to combine the study of clinical cases with a 100% online learning system based on repetition, combining a minimum of 8 different elements in each lesson, which represent a real revolution with respect to simply studying and analyzing cases.

The physician will learn through real cases and by solving complex situations in simulated learning environments. These simulations are developed using state-of-the-art software to facilitate immersive learning.

At the forefront of world teaching, the Re-learning method has managed to improve the overall satisfaction levels of professionals who complete their studies, with respect to the quality indicators of the best Spanish-speaking online university (Columbia University).

With this methodology we have trained more than 250,000 physicians with unprecedented success, in all clinical specialties regardless of the surgical load. All this in a highly demanding environment, where the students have a strong socio-economic profile and an average age of 43.5 years.

Re-learning will allow you to learn with less effort and better performance, involving you more in your specialization, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation to success.

In our program, learning is not a linear process, but rather a spiral (we learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

The overall score obtained by our learning system is 8.01, according to the highest international standards.

In this program you will have access to the best educational material, prepared with you in mind:

Study Material

All the teaching materials are specifically created for the course, by specialists who teach on the course, so that the teaching content is highly specific and precise.

This content is then adapted in an audiovisual format that will create our way of working online, with the latest techniques that allow us to offer you high quality in all of the material that we provide you with.

Latest Techniques and Procedures on Video

We introduce you to the latest techniques, to the latest educational advances, to the forefront of current medical techniques. All this, in first person, with the maximum rigor, explained and detailed for your assimilation and understanding. And best of all, you can watch them as many times as you want.

Interactive Summaries

We present the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This unique multimedia content presentation training system was awarded by Microsoft as a "European Success Story".

Additional Reading

Recent articles, consensus documents, international guides. in our virtual library you will have access to everything you need to complete your training.

Expert-Led Case Studies and Case Analysis

Effective learning ought to be contextual. Therefore, we will present you with real case developments in which the expert will guide you through focusing on and solving the different situations: a clear and direct way to achieve the highest degree of understanding.

Testing & Re-Testing

We periodically evaluate and re-evaluate your knowledge throughout the program, through assessment and self-assessment activities and exercises: so that you can see how you are achieving your goals.

Classes

There is scientific evidence suggesting that observing third-party experts can be useful.

Learning from an expert strengthens knowledge and memory, and generates confidence in our difficult future decisions.

Quick Action Guides

We offer you the most relevant contents of the course in the form of worksheets or quick action guides. A synthetic, practical, and effective way to help you progress in your learning.

06

Certificate

The Postgraduate Certificate in Heart Disease, Cardiomyopathies and Tumors in Pediatrics guarantees you, in addition to the most rigorous and up-to-date training, access to a Postgraduate Certificate issued by TECH Technological University.

“

Successfully complete this training and receive your university qualification without travel or laborious paperwork”

This **Postgraduate Certificate in Heart Disease, Cardiomyopathies and Tumors in Pediatrics** contains the most complete and up-to-date scientific program on the market.

After students have passed the evaluations, they will receive their corresponding **Postgraduate Certificate** issued by **TECH Technological University** via tracked delivery*.

The certificate issued by **TECH Technological University** will specify the qualification obtained through the Postgraduate Certificate, and meets the requirements commonly demanded by labor exchanges, competitive examinations, and professional career evaluation committees.
