01 Introduction

Blood clotting problems in the body can cause bleeding problems in people, so it is necessary for medical professionals to be up to date on the main antihemorrhagic drugs. Don't miss this opportunity and join our community of students to specialize in the latest in hemorrhagic disorders and the use of antihemorrhagics. You will advance in your career thanks to this 100% online training.

tech 06 | Introduction

At present, the specialty of hematology is a pioneer in innovation in diagnosis and treatment and it should be noted that hematologists are leaders in the clinical application of immunotherapy in the fight against the different blood cancers.

Different scientific societies around the world that deal with this specialty strive to rapidly incorporate the results of biomedical research into clinical practice, especially the treatment of hematological malignancies (blood cancers), but also iron deficiency and anemias, the administration of direct-acting oral anticoagulants-DOACs, bone marrow transplants and, in the long-term, research focused on obtaining artificial blood, with the ultimate aim of ensuring that healthcare managers include these techniques in the services provided by national healthcare systems as soon as possible.

The reasons why hematology and hemotherapy is one of the fastest progressing medical disciplines in terms of knowledge and technology in recent decades lie in the integration of biological and clinical knowledge, which has led to a better understanding of the mechanisms of disease, thereby facilitating the development of more appropriate guidelines for clinical action. All of this has contributed to hematology and hemotherapy reaching a remarkable degree of maturity and justifying its future as an integrated specialty, this being the ideal framework for training and improving specialists in this area of medical knowledge.

This Postgraduate Certificate in Developments in Hemorrhagic Disorders and Use of Antihemorrhagics endorses the latest advances in research and the highest scientific evidence, with a robust and didactic teaching program that positions it as a teaching product of the highest scientific rigor at international level, aimed at health professionals, who in their daily clinical practice face the care of patients or populations with bleeding disorders. In addition, the training program is based on a multidisciplinary approach to its subjects, which allows training and professional development in different areas.

This Postgraduate Certificate in New Developments in Hemorrhagic Disorders and Use of Antihemorrhagics supports the latest advances in research and the highest scientific evidence, offering a solid and didactic teaching program that places itself as a program of the highest scientific quality at an international level. Aimed at health professionals who deal with the care of patients or populations with hemorrhagic diseases in their daily clinical practice, the program is supported by a multidisciplinary approach to the hematological field, addressing both antihemorrhagic drugs and treatments for hemorrhagic disorders. In addition, the program includes masterclasses given by a world renowned expert in the field of hematology, providing students with a unique opportunity to learn from the leading experts in the field.

This Postgraduate Certificate in New Developments in Hemorrhagic Disorders and Use of Antihemorrhagics contains the most complete and up-to-date scientific program on the market. The most important features of the program include:

- Clinical symptoms cases presented by experts in hematology.
- The graphic, schematic, and eminently practical contents with which they are created provide scientific and practical information on the disciplines that are essential for professional.
- Diagnostictherapeutic developments on assessment, diagnosis, and treatment in hematology patients..
- Practical exercises where the self-assessment process can be carried out to improve learning.
- The Iconography of clinical and diagnostic imaging tests.
- An algorithm-based interactive learning system for decision-making in the clinical situations presented throughout the course..
- With special emphasis on evidence-based medicine and research methodologies in hematology.
- Theoretical lessons, questions to the expert, debate forums on controversial topics, and individual reflection assignments.
- Content that is accessible from any, fixed or portable device with an Internet connection..

This course is the best investment you can make to acquire the best and most up-todate training in Hemorrhagic Disorders and Antihemorrhagic Use"

The teaching body is made up of respected and renowned professionals with extensive experience in healthcare, teaching, and research, who have work in many countries where these diseases are prevalent.

The methodological design of this course, developed by a multidisciplinary team of e-learning experts, integrates the latest advances in educational technology for the creation of numerous multimedia educational tools allow the professional, based primarily on the problem-based learning method, to address real problems in their daily clinical practice, which will allow them to advance by acquiring knowledge and developing skills that will impact their future professional work.

It should be noted in this course that each of the contents generated, as well as the videos, self-evaluations, clinical cases and exams, have been thoroughly reviewed, updated, and integrated by the team of experts that make up the faculty, to ensure that the learning process is orderly and instructive in order to achieve the program's objectives.

This course offers training in simulated environments, which provides an immersive learning experience designed to train for real-life situations.

It includes clinical cases to bring the program's degree as close as possible to the reality of care in medicine.

tech 10 | Objectives

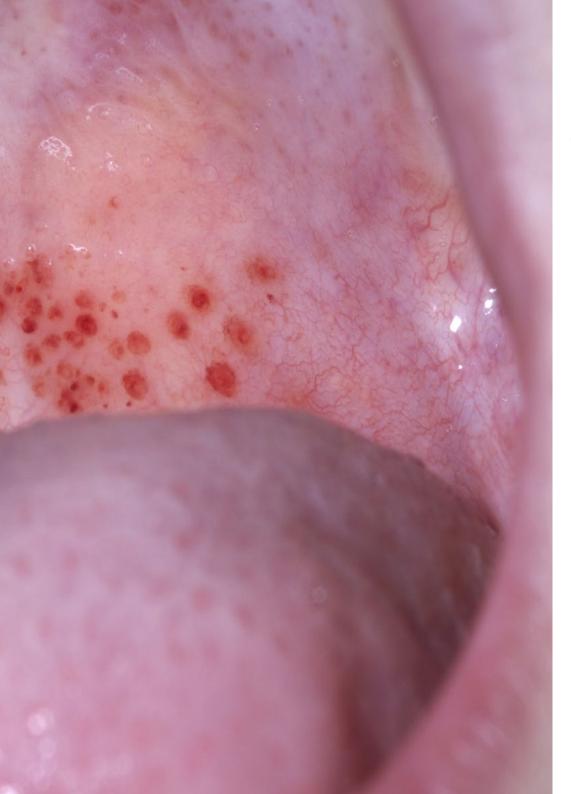

General Objective

Update the specialist's knowledge through the latest scientific evidence in the diagnosis
and treatment of hematological diseases, in order to develop measures to prevent,
diagnose, treat, and rehabilitate hematological diseases, with a multidisciplinary and
integrative approach that supports medical care with the highest quality standards for
managing and monitoring hematology patients..

Don't miss the opportunity and get up to date on new developments in hemorrhagic disorders and the use of antihemorrhagics to incorporate them into your daily medical practice"

Objectives | 11 tech

Specific Objectives

- Provide training and practical/theoretical improvement that will ensure a reliable clinical diagnosis supported by the efficient use of diagnostic methods.
- Explain the complex pathophysiologic and etiopathogenic interrelationships in the mechanisms of hematologic disease onset.
- Get up to date in molecular and cellular biology, providing general concepts of modern molecular terminology, essential for future medical practice, both at clinical and diagnostic laboratory levels..
- Look at epidemiological studies on morbimortality due to hematological disorders in depth.
- Emphasize the role of the rational use of diagnostic technologies when studying these patients.
- Address, in detail and depth, the most up-to-date scientific evidence on the mechanisms of action, adverse effects, dosage, and use of drugs to treat these diseases.
- An in-depth look at the most innovative and developing alternatives offered when caring for these patients.
- Emphasize the development of new drugs for the future and other treatment approaches for controlling these diseases.

International Guest Director

Dr. Joseph Hai Oved is a pediatric hemato-oncology specialist at Memorial Sloane Kettering Cancer Center, considered one of the best cancer centers in the world. His work focuses on stem cell and bone marrow transplantation, as well as cell therapies, to treat non-cancerous diseases. His work in the field of transplantation to patients with difficult-to-treat immune dysfunctions or inherited immune deficiencies, as well as those with bone marrow failure syndromes, is particularly noteworthy.

His research is prolific in the hemato-oncology area, seeking new ways to personalize transplantation to achieve a precise cure with minimal side effects. He has studied in depth the effects of the different techniques used to manipulate donated stem cells, extracting or adding specific cells of interest. He has also analyzed how exposure to different conditioning agents (chemotherapies or other drugs used to prepare the body for transplantation) affect outcomes. His work has advanced the identification of biomarkers to more accurately predict transplant outcomes.

Joseph is a member of several national and international groups in bone marrow transplantation, hematology and immunology. He serves on committees of many of these organizations, where they discuss potential future therapies, clinical trials and efforts to further advance the field of pediatric transplantation and cellular therapies worldwide.

All his scientific contribution places him as a reference in his field, receiving several awards. These include two fellowships awarded by the Howard Hughes Medical Institute, one of the largest privately funded organizations for biological and medical research in the United States. He also received a fellowship in immunology from the Weizmann Institute of Science, considered one of the most advanced multidisciplinary research institutions in the world.

Dr. Hai Oved, Joseph

- Pediatrician specialized in hemato-oncology at the MSK Cancer Center New York
- Member of the Scientific Advisory Board of Emendo Biotherapeutics.
- Managing Partner of New World Health, LLC
- Observer on the board of BioTrace Medical Inc.
- Pediatrician specializing in hemato-oncology at Children's Hospital of Philadelphia
- M.D. from NYU School of Medicine
- Fellowship in pediatric hemato-oncology at Children's Hospital of Philadelphia
- Residency in Pediatrics at New York Presbyterian Weill Cornell Medical College

tech 16 | Course Management

Guest Director

Dr. Martínez-López, Joaquín

- Head of the Hematology Department at the 12 de Octubre Hospital, Madrid.
- PhD in Medicine from the Complutense University of Madrid.
- Hematology Medical Specialist
- Director of the translational research group and the early clinical trials unit in hematology at 12 de Octubre Hospital.
- 140 publications in international scientific journals.
- President of AltumSequencing.

Professors

Dr. Carreño Gómez-Tarragona, Gonzalo

- Specialist physician at the 12 de Octubre University Hospital.
- Degree in Medicine. Autonomous University of Madrid. 2013.
- Professional Master's Degree in Hematopoietic Transplantation. University of Valencia. 2019
- Cytology Course in Myelodysplasia. Del Mar Hospital. 2017.
- Teaching collaborator for the following subjects: Hematology and Hemotherapy, Degree of Medicine (Complutense University of Madrid); and Advances in Vascular Function, Degree of Medicine (Autonomous University of Madrid).
- Participation in the Clinical Research Ethics Committee at the 12 de Octubre University Hospital. 2019.
- Participation in national and international conferences.
- Distinction as Best Scientific Communication. VII National Research Conference for Undergraduate Students in Health Sciences. Complutense University of Madrid. 2013.

Dr. Sánchez Pina, José María

- Attending Physician in the area of hospitalization and hematopoietic transplantation.
 Member of the cell therapy group. Since 2017
- Degree in Medicine. University of Alcalá. 2006-2012
- Professional Master's Degree in Hematopoietic Transplantation, 4th edition, University of Valencia
- Resident intern of Hematology and Hemotherapy at 12 de Octubre University Hospital in Madrid. 2013-2017
- Teaching collaborator in the Professional Master's Degree in Translational Medicine.
 The Complutense University of Madrid; and Professional Master's Degree in Organ and Tissue Transplants. European University of Madrid.

Course Management | 17 tech

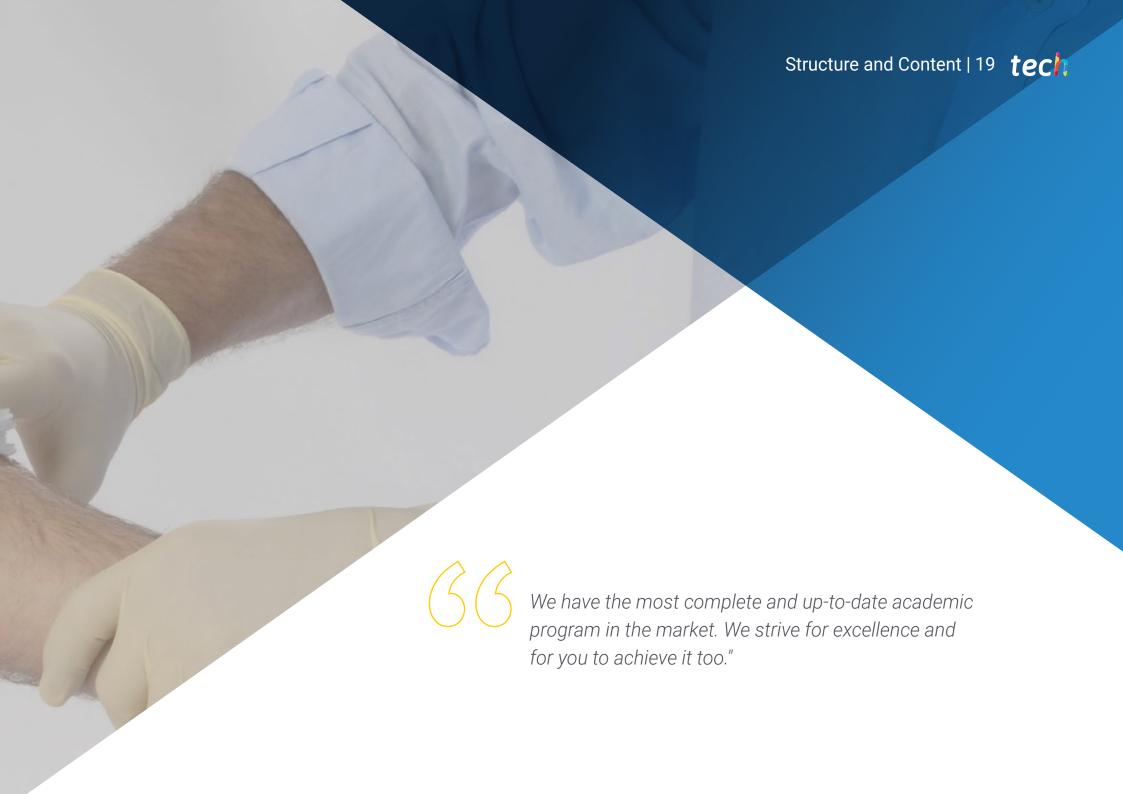

Dr. Rodríguez Rodríguez, Mario

- Specialist in Thrombophilia and Hemostasis consultation and in basic and special coagulation laboratory at the 12 de Octubre University Hospital. Since June 2017.
- Graduate in Medicine and Surgery from the Complutense University of Madrid. Class of 2006 2012.
- Hematology on-call duty as an attending physician (FEA). Since June 2017.
- Resident Medical Intern in Hematology and Hemotherapy at the 12 de Octubre University Hospital (21/05/2013 21/05/2017).
- Participation in quality work for ENAC accreditation in the coagulation laboratory at the 12 de Octubre University Hospital.
- Usability study/evaluation of the cobas t711 coagulometer, Roche Diagnostics.
- Participation in the following publications: "Evaluation of The MD Anderson Tumor Score for Diffuse Large B-cell Lymphomain the Rituximab Era", "Clinical course and risk factors for mortality from COVID-19 inpatients with haematological malignancies" and "Thrombosis and antiphospholipid antibodies in patients with SARS-COV-2 infection (COVID-19)", among others.

Dr. Paciello Coronel, María Liz

- Specialist in Hematology and Hemotherapy. 12 de Octubre University Hospital. Since 2008.
- Graduate in Medicine and Surgery. National University of Asunción, Paraguay.
- Collaborator in clinical trials as principal investigator and sub-investigator.

tech 20 | Structure and Content

Module 1. New Developments in Major Bleeding Disorders

- 1.1. Vascular Hemorrhagic Disorders:
 - 1.1.1. Definition
 - 1.1.2. Epidemiology
 - 1.1.3. Clinical Manifestations
 - 1.1.4. Diagnostic Difficulties
 - 1.1.5. Treatment Developments
- 1.2. Platelet Hemorrhagic Disorders:
 - 1.2.1. Definition
 - 1.2.2. Epidemiology and Etiology
 - 1.2.3. Clinical Manifestations
 - 1.2.4. Diagnostic Complexities
 - .2.5. New Treatment Approaches
- 1.3. Hemophilias
 - 1.3.1. Definition
 - 1.3.2. Epidemiology
 - 1.3.3. Clinical Manifestations
 - 1.3.4. Diagnosis
 - 1.3.5. Treatment and Current Issues in Electrical Therapy
- 1.4. Von Willebrand Disease: Diagnostic and Therapeutic Challenge
 - 1.4.1. Definition
 - 1.4.2. Epidemiology
 - 1.4.3. Clinical Manifestations
 - 1.4.4. Diagnosis by Screening Tests
 - 1.4.5. Treatment
- 1.5. Hemorrhagic Disorders due to Vitamin K Deficiency:
 - 1.5.1. Definition
 - 1.5.2. Epidemiology
 - 1.5.3. Clinical Manifestations
 - 1.5.4. Etiological Diagnosis
 - 1.5.5. Treatment Plans

- 1.6. Hemorrhagic Disorders due to Excess Anticoagulants:
 - 1.6.1. Definition
 - 1.6.2. Epidemiology
 - 1.6.3. Clinical Manifestations
 - 1.6.4. Diagnostic Tests
 - 1.6.5. Treatment Complexities
- 1.7. Acquired Hemorrhagic Disorders:
 - 1.7.1. Definition
 - 1.7.2. Epidemiology
 - 1.7.3. Clinical Manifestations
 - 1.7.4. Diagnosis: The Role of Necessary Tests
 - 1.7.5. Treatment
- 1.8. Disseminated Intravascular Coagulation: Recent Findings
 - 1.8.1. Definition
 - 1.8.2. Epidemiology and Etiology
 - 1.8.3. Clinical Manifestations
 - 1.8.4. Use of Diagnostic Tests
 - 1.8.5. Treatment Alternatives

Module 2. Update on Antihemorrhagics

- 2.1. Antihemorrhagic Drugs
 - 2.1.1. Definitions
 - 2.1.2. Main Drugs
 - 2.1.3. Mechanism of Action
 - 2.1.4. Main Indications
- 2.2. Use of Vitamin K in Hemorrhagic Disorders
 - 2.2.1. Indication of Vitamin K in Hemorrhagic Disorders
 - 2.2.2. Pharmacokinetics and Pharmacodynamics
 - 2.2.3. Presentation and Dosage

Structure and Content | 21 tech

- 2.3. Coagulation Factor Concentrate:
 - 2.3.1. Treatment Indications
 - 2.3.2. Pharmacokinetics and Pharmacodynamics
 - 2.3.3. Presentation and Dosage
- 2.4. Use of Fresh Frozen Plasma and Protamine Sulfate:
 - 2.4.1. Treatment Indications
 - 2.4.2. Pharmacokinetics and Pharmacodynamics
 - 2.4.3. Presentation and Dosage
- 2.5. Latest Recommendations for the Use of Platelets:
 - 2.5.1. Treatment Indications
 - 2.5.2. Pharmacokinetics and Pharmacodynamics
 - 2.5.3. Presentation and Dosage
- 2.6. Platelet Aggregation Inhibitors: The Reality of Use
 - 2.6.1. Treatment Indications
 - 2.6.2. Pharmacokinetics and Pharmacodynamics
 - 2.6.3. Presentation and Dosage
- 2.7. Capillary Protective and Hemostatic Vasoconstrictor Drugs:
 - 2.7.1. Treatment Indications
 - 2.7.2. Pharmacokinetics and Pharmacodynamics
 - 2.7.3. Presentation and Dosage
- 2.8. Antifibrinolytics
 - 2.8.1. Treatment Indications
 - 2.8.2. Pharmacokinetics and Pharmacodynamics
 - 2.8.3. Presentation and Dosage

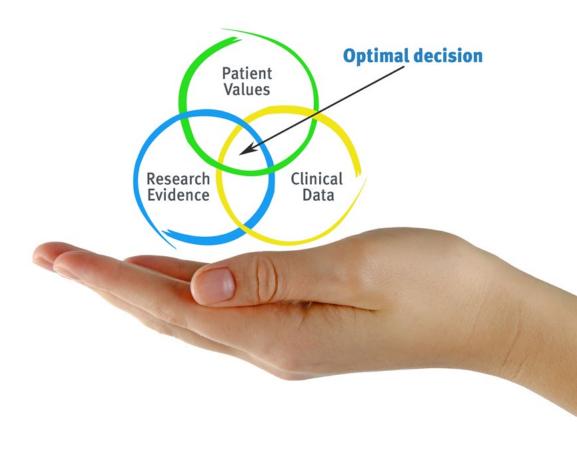

tech 24 | Methodology

In a given situation, what would you do? Throughout these months, the professional will face multiple simulated clinical cases based on real patients in which he/she will have to investigate, establish hypotheses and finally, resolve the situation. This method ensures specialists learn better as they accept more responsibility and get closer to the reality of their professional future.

Re-learning will allow you to learn with less effort and better performance, involving you more in your training, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation to success"

The clinical case is the annotated presentation of a patient, or group of patients, which becomes a "case", an example or model that illustrates some peculiar clinical component, either because of its teaching potential or because of its uniqueness or rarity. It is essential that the case is based on current professional life, trying to recreate the real conditions in professional medical practice.

The effectiveness of the method is justified by four fundamental achievements:

01

Students who follow this method not only grasp concepts, but also develop their mental capacity by evaluating real situations and applying their knowledge.

02

The learning process has a clear focus on practical skills that allow the student to better integrate into the real world.

03

Ideas and concepts are understood more efficiently, given that the example situations are based on real-life.

Students like to feel that the effort they put into their studies is worthwhile. This then translates into a greater interest in learning and more time dedicated to working on the course.

04

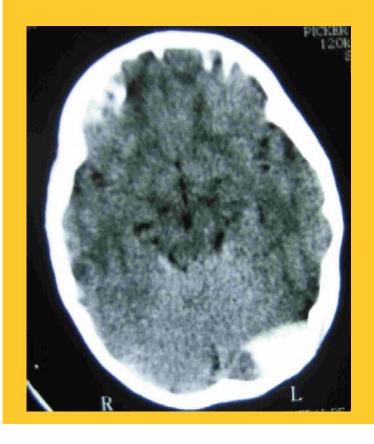

The student will be able to learn with the advantages of having access to simulated learning environments and the learning-by-observation approach, Learning from an Expert"

An immersive system of knowledge transmission, through participation in the resolving real problems and supported by the best audiovisual technology on the educational market".

Learning with the Relearning method will allow you, besides learning and consolidating what you have learned in a more effective way, to achieve your training goals with more speed and less effort.

Metodology | 27 tech

At the forefront of world teaching, the Re-learning method has managed to improve the overall satisfaction levels of professionals who complete their studies with respect to the quality indicators of the best Spanish-speaking Online University (TECH). The teaching quality, the quality of the materials, the structure of the course and the objectives achieved were rated as very positive.

With more than 150,000 professionals trained in this methodology and an international satisfaction level of 8.01, relearning has proven to be at the height of the most demanding assessment environments.

In our system, learning is not a linear process, but rather a spiral (we learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

More than 150,000 professionals have been trained through this methodology, achieving unprecedented success. All this in a highly demanding environment, with the highest standards of evaluation and monitoring.

This training will be based, above all, on experience. A process in which you will test the knowledge you will acquire, consolidating and improving it gradually.

During the course you will have access to the best educational material, prepared with you in mind.

Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is highly specific and precise.

This content is then adapted in an audiovisual format that will create our way of working online, with the latest techniques that allow us to offer you high quality in all of the material that we provide you with.

Video Education Techniques and Procedures

We introduce you to the latest techniques, to the latest educational advances, to the forefront of current medical techniques. All this, in first person, with the maximum rigor, explained and detailed for your assimilation and understanding. And best of all, you can watch them as many times as you want.

Interactive Summaries

We present the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge. This unique training system for presenting multimedia content was awarded by Microsoft as a "European Success Story".

Additional Reading

Participation in this course will give you access to a virtual library where you will be able to complement and keep your training updated with the latest articles on the subject, consensus documents, international guidelines...

An invaluable resource that you will be able to use even when you finish your training period with us.

17% 7%

3%

Expert-Led Case Studies and Case Analysis

Effective learning ought to be contextual. Therefore, we will present you with real case developments in which the expert will guide you through focusing on and solving the different situations: a clear and direct way to achieve the highest degree of understanding.

Testing & Re-testing

We periodically evaluate and re-evaluate your knowledge throughout the program through assessment activities and exercises: so that you can see how you are achieving your goals.

Learning from an expert

Observation of an expert performing a task is the most effective way of learning. It is called Learning from an Expert: a proven way to reinforce knowledge and memory of what has been learned. For this reason, we include this type of learning through master classes in our courses.

There is scientific evidence suggesting that observing third-party experts can be useful. Learning from an expert strengthens knowledge and memory, and generates confidence in our future difficult decisions.

Quick Action Guides

We offer you the most relevant contents of the course in the form of worksheets or quick action guides. A synthetic, practical, and effective way to help you progress in your learning.

tech 32 | Certificate

This Postgraduate Certificate in New Developments in Hemorrhagic Disorders and Use of Antihemorrhagics contains the most complete and up-to-date scientific program on the market

After students have passed the assessments, they will receive by mail with acknowledgment of receipt their **Postgraduate Certificate Certificate** issued by **TECH Technological University**

The certificate issued by TECH Technological - University will express the qualification obtained in the Postgraduate Certificate, and will meet the requirements of the labor exchanges, competitive examinations and professional career evaluation committees.

Title: Postgraduate Certificate in New Developments in Hemorrhagic Disorders and Use of Antihemorrhagics

Official Number of Hours: 250h.
