01

Introduction

Advances in Pancreatic Surgery procedures continue to yield higher and higher success rates and improvements in the rehabilitation process of patients. But advances make it necessary for the surgeon to be constantly updated so that they can perform the surgical practice based on the latest scientific evidence and improve the patient's prognosis. This Postgraduate Certificate is designed to facilitate your update in a practical way.

“

The new scenarios in surgery push us to propose new specialization programs that fit the real needs of experienced professionals, so that they can incorporate the advances in the practice of Pancreatic Surgery”

Cephalic duodenopancreatectomy is the surgical technique of choice for the radical treatment of neoplasms located in the duodenum, periampullary region, biliopancreatic confluent and pancreatic head, but it can also be the treatment of choice for some benign diseases such as chronic pancreatitis or premalignant lesions such as some neuroendocrine tumors.

On the other hand, pancreatic surgery has advanced greatly with laparoscopy, especially in the field of distal pancreatectomy for cystic and neuroendocrine tumors, in addition to playing an important role in the staging of pancreatic tumors.

This Postgraduate Certificate in Pancreatic Surgery aims to review the current status of liver surgery and the most frequent indications, with special emphasis on pancreatic surgery, in order to provide the surgeon with the possibility of being up-to-date on the latest surgical techniques, and allowing the exchange of knowledge and experience, creating protocols for action and disseminating the most important developments in this field of surgery.

This **Postgraduate Certificate in Pancreatic Surgery** contains the most complete and up-to-date scientific program on the market. The most outstanding features of the Postgraduate Certificate are:

- ♦ Contains clinical cases presented by experts. The graphic, schematic, and eminently practical contents with which they are created provide scientific and practical information on the disciplines that are essential for professional practice.
- ♦ Diagnostic-therapeutic developments on the care of the patient with Pancreatic problems, who is susceptible to surgical intervention.
- ♦ Presentation of practical workshops on procedures in the surgical approach to Pancreatic pathology.
- ♦ Video lessons on the different pathologies and their approach.
- ♦ Algorithm-based interactive learning system for decision-making in the presented clinical situations.
- ♦ Theoretical lessons, questions to the expert, debate forums on controversial topics, and individual reflection assignments.
- ♦ Availability of the contents from any fixed or portable device with internet connection.

Scientific evidence increases the quality of surgical practice. Keeping up-to-date is key to providing better care for the patient with Pancreatic disease"

“

This Postgraduate Certificate may be the best investment you can make in the selection of a refresher program for two reasons: in addition to updating your knowledge in pancreas surgery, you will obtain a Postgraduate Certificate issued by TECH Technological University”

Its teaching staff includes leading specialists in surgery, who bring to this training the experience of their work, in addition to other specialists belonging to prestigious scientific societies.

The multimedia content developed with the latest educational technology will provide the professional with situated and contextual learning, i.e., a simulated environment that will provide immersive training program to train in real situations.

The design of this program is based on Problem-Based Learning, by means of which the physician must try to solve the different professional practice situations that arise throughout the Postgraduate Certificate. This will be done with the help of an innovative interactive video system created by renowned experts in Pancreatic Surgery with extensive teaching experience.

The Postgraduate Certificate allows training in simulated environments, which provide immersive learning programmed to train for real situations.

Don't miss the opportunity to update your knowledge in Pancreatic Surgery.

02 Objectives

This program is oriented towards a review of the main aspects of the approach to pancreatic surgery, based on scientific evidence and the experience of renowned professionals in the surgical field.

“

This refresher program will provide you with the skills to act safely in the performance of surgical praxis, which will help you grow personally and professionally”

General Objective

- Update the surgeon's knowledge in the most frequent procedures and techniques of the usual practice in hepatic surgery, providing answers to the common day-to-day questions of the professional.

Specific Objectives

Module 1.

- ♦ Establish the differentiation and features of acute and chronic pancreatitis.
- ♦ Analyze the surgical processes in treatment of pancreatic tumors and the anatomopathological considerations in pancreatic cancer.
- ♦ Address the surgical management of neuroendocrine tumors.
- ♦ Address the surgical management of cystic tumors of the pancreas.

Module 2.

- ♦ Describe innovations in general and digestive system surgery: in surgical learning, in surgical devices, in NOTES surgery, and in Cell Therapy and Surgery.
- ♦ Point out the role of Information and Communication Technologies applied to surgery.
- ♦ Explain the indications and importance of robotic surgery.
- ♦ Address the features of financing, protection, and transfer of innovation in surgery.

Take this opportunity and take the step to get up-to-date on the most important aspects of Pancreatic Surgery.

03

Course Management

The program includes in its teaching staff surgeons of reference in the care of patients with pancreatic etiology pathology, who pour into this specialization the experience of their work. Additionally, other recognized specialists participate in its design and preparation, which means that the program is developed in an interdisciplinary manner.

“

*Learn from leading professionals the latest advances
in surgical procedures for Pancreatic pathology”*

Management

Dr. Díaz Domínguez, Joaquín

In Memoriam

"Dr. Joaquín Díaz Domínguez was at the head of this program in its numerous editions, leading the teaching team, collaborating intensively, and going out of his way to continue spreading his knowledge of medicine and surgery to everyone that has had the opportunity to participate in this program.

From Tech University we want to pay a heartfelt tribute full of affection and gratitude for his dedication and commitment during these years, always lending himself to others and sharing his experience unconditionally, to contribute to continue saving lives and caring for people who have needed it most.

Thank you very much, Joaquín."

Dr. Pascual Migueláñez, Isabel

- Degree in Medicine from the Autonomous University Madrid
- Doctorate from the Autonomous University of Madrid with the thesis "Use of sutures coated with stem cells (biosutures) in colic anastomoses. An experimental study in rats" with the qualification "Outstanding cum laude".
- Resident Doctor from the MIR program in General and Digestive System Surgery at La Paz University Hospital. Madrid
- Specialist in General and Digestive System Surgery at the Infanta Sofía University Hospital, San Sebastián de los Reyes, Madrid. Hepatobiliopancreatic Surgery Unit
- Specialist in General and Digestive System Surgery at La Paz University Hospital, Madrid. Colorectal Surgery Unit

Management

Dr. Álvarez Gallego, Mario

- Degree in Medicine and Surgery from the University of Alcalá de Henares
- Diploma of Advanced Studies (DAS): "Use of mesenchymal stem cells to prevent the formation of intra-abdominal adhesions". Autonomous University of Madrid. Surgery Department. Grade. Outstanding, Cum Laude
- Residency in General and Digestive System Surgery at La Paz University Hospital, Madrid.
- Specialist in General and Digestive System Surgery, Colorectal Surgery Unit, Infanta Sofía Hospital.
- Specialist in General and Digestive System Surgery at the Infanta Cristina Hospital, Parla, Madrid.
- Specialist in General and Digestive System Surgery, Colorectal Surgery Unit, La Paz Hospital, Madrid.
- Rotations: General and Digestive System Surgery Service, Son Llátzer Hospital, Palma de Mallorca; Abdominal Organ Transplant Unit, 12 de Octubre Hospital, Madrid; Polytraumatized Patient Unit, Los Angeles County Hospital, University of Southern California (USC), Los Angeles, California, USA.
- Member of the Innovation Platform of La Paz Hospital (Idipaz).
- Patent: "Insufflation and suction assisted surgical specimen removal device". Ownership: FIBHULP. Inventor: Mario Álvarez Gallego. Spanish patent: P201031490. Application for international protection PCT/ ES2011/002357

Professors

Dr. Alkorta Zuloaga, Maialen.

- ♦ General and Digestive System Surgery Department.
- ♦ Donostia Hospital. San Sebastián

Dr. Ayuela García, Susana.

- ♦ General and Digestive System Surgery Department.
- ♦ La Paz University Hospital. Madrid.

Dr. Cuadrado García, Ángel.

- ♦ General and Digestive System Surgery Department.
- ♦ Infanta Sofía University Hospital. Madrid.

Dr. Custodio Carretero, Ana.

- ♦ Medical Oncology Department.
- ♦ La Paz University Hospital. Madrid.

Dr. Georgiev Hristov, Tihomir.

- ♦ General and Digestive System Surgery Department.
- ♦ Jiménez Díaz Foundation, Madrid.

Dr. Guerra Pastroián, Laura.

- ♦ Anatomic Pathology Service.
- ♦ La Paz University Hospital. Madrid.

Dr. Marín Serrano, Eva.

- ♦ Gastroenterology Department.
- ♦ La Paz University Hospital. Madrid.

Dr. Nasimi Sabbagh, Rula.

- ♦ General and Digestive System Surgery Department.
- ♦ La Paz University Hospital. Madrid.

Dr. Prieto Nieto, Isabel.

- ♦ General and Digestive System Surgery Department.
- ♦ La Paz Hospital. Madrid
- ♦ Associate Professor at the AUM.

Dr. García Oria, Miguel Juan.

- ♦ General and Digestive System Surgery Department.
- ♦ Puerta de Hierro Hospital. Madrid.

Dr. Jiménez Toscano, Marta.

- ♦ General and Digestive System Surgery Department.
- ♦ Barcelona Clinical Hospital.

Dr. Morandeira Rivas, Antonio.

- ♦ General and Digestive System Surgery Department.
- ♦ “La Mancha-Centro” Hospital Complex. Alcázar de San Juan.

Dr. Moreno Sanz, Carlos.

- ♦ Head of the General and Digestive System Surgery Department.
- ♦ “La Mancha-Centro” Hospital Complex. Alcázar de San Juan.

Dr. Noguera Aguilar, José F.

- ♦ Head of the General and Digestive System Surgery Department.
- ♦ A Coruña University Hospital Complex.

Sánchez Simón, Estela.

- ♦ Lawyer and Innovation and Knowledge Transfer Manager at the Innovation Support Unit of the La Paz University Hospital (IdiPAZ).
- ♦ Institute for Health Research of La Paz University Hospital (IdiPAZ). Madrid.

Dr. Tejedor Botello, Marisa.

- ♦ Economist La Paz University Hospital-Institute for Biomedical Research of La Paz Hospital (IdiPAZ) of Madrid, as a member of the Innovation Support Unit.

04

Structure and Content

The structure of the contents has been designed by a team of professionals knowledgeable about the implications of training in the practice of Pancreatic surgery, aware of the relevance of current specialization in order to be able to act before the patient with digestive problems and committed to quality teaching through new educational technologies.

“

This Postgraduate Certificate in Pancreatic Surgery contains the most complete and up-to-date scientific program on the market”

Module 1. Pancreatic and Spleen Surgery

- 1.1. Acute Pancreatitis
- 1.2. Chronic Pancreatitis.
- 1.3. Pancreatic Head Tumors and Tumors of Ampulla.
- 1.4. Pancreatic Body and Tail Tumors
- 1.5. Anatomopathologic Considerations in Pancreatic Cancer
- 1.6. Neuroendocrine Tumors
- 1.7. Pancreatic Cystic Tumors
- 1.8. Pancreas, Intestinal, and Multivisceral Transplantation
- 1.9. Benign and Malignant Pathology and Surgery of the Spleen

Module 2. Surgical Innovation

- 2.1. Introduction to Surgical Innovation
- 2.2. Innovation in Surgical Learning
- 2.3. ICT
- 2.4. Innovation in Surgical Devices
- 2.5. Innovation in NOTES Surgery
- 2.6. Robotic Surgery
- 2.7. Financing, Protection, and Transfer of Innovation in Surgery

A detailed microscopic image of plant tissue, likely a cross-section of a root or stem. The image shows various layers of cells, including a prominent epidermis, a thick cortex, and a central vascular cylinder. The cells are stained with a pinkish-purple dye, highlighting their structure and arrangement. The tissue appears to be from a young plant, given the clear cellular boundaries and the presence of large, thin-walled cells in the cortex.

“

*A unique, key and decisive
training experience to boost your
professional development”*

05 Methodology

This training program provides you with a different way of learning. Our methodology uses a cyclical learning approach: ***Re-learning***.

This teaching system is used in the most prestigious medical schools in the world and has been considered one of the most effective by major publications such as the ***New England Journal of Medicine***.

“

Discover Re-learning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization"

At TECH we use the Case Method

In a given situation, what would you do? Throughout the program, you will be presented with multiple simulated clinical cases based on real patients, where you will have to investigate, establish hypotheses and, finally, resolve the situation. There is abundant scientific evidence on the effectiveness of the method. Specialists learn better, faster, and more sustainably over time.

With TECH you can experience a way of learning that is shaking the foundations of traditional universities around the world.

According to Dr. Gervas, the clinical case is the annotated presentation of a patient, or group of patients, which becomes a "case", an example or model that illustrates some peculiar clinical component, either because of its teaching potential or because of its uniqueness or rarity. It is essential that the case is based on current professional life, trying to recreate the real conditions in professional medical practice.

“

Did you know that this method was developed in 1912 at Harvard for law students? The case method consisted of presenting students with real-life, complex situations for them to make decisions and justify their decisions on how to solve them. In 1924, Harvard adopted it as a standard teaching method”

The effectiveness of the method is justified by four fundamental achievements:

1. Students who follow this method not only grasp concepts, but also develop their mental capacity by evaluating real situations and applying their knowledge.
2. The learning process has a clear focus on practical skills that allow the student to better integrate into the real world.
3. Ideas and concepts are understood more efficiently, given that the example situations are based on real-life.
4. Students like to feel that the effort they put into their studies is worthwhile. This then translates into a greater interest in learning and more time dedicated to working on the course.

Re-Learning Methodology

At TECH we enhance the Harvard case method with the best 100% online teaching methodology available: Re-learning.

Our University is the first in the world to combine the study of clinical cases with a 100% online learning system based on repetition, combining a minimum of 8 different elements in each lesson, which represent a real revolution with respect to simply studying and analyzing cases.

The physician will learn through real cases and by solving complex situations in simulated learning environments. These simulations are developed using state-of-the-art software to facilitate immersive learning.

At the forefront of world teaching, the Re-learning method has managed to improve the overall satisfaction levels of professionals who complete their studies, with respect to the quality indicators of the best Spanish-speaking online university (Columbia University).

With this methodology we have trained more than 250,000 physicians with unprecedented success, in all clinical specialties regardless of the surgical load. All this in a highly demanding environment, where the students have a strong socio-economic profile and an average age of 43.5 years.

Re-learning will allow you to learn with less effort and better performance, involving you more in your specialization, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation to success.

In our program, learning is not a linear process, but rather a spiral (we learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

The overall score obtained by our learning system is 8.01, according to the highest international standards.

In this program you will have access to the best educational material, prepared with you in mind:

Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is highly specific and precise.

This content is then adapted in an audiovisual format that will create our way of working online, with the latest techniques that allow us to offer you high quality in all of the material that we provide you with.

Latest Techniques and Procedures on Video

We introduce you to the latest techniques, to the latest educational advances, to the forefront of current medical techniques. All this, in first person, with the maximum rigor, explained and detailed for your assimilation and understanding. And best of all, you can watch them as many times as you want.

Interactive Summaries

We present the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

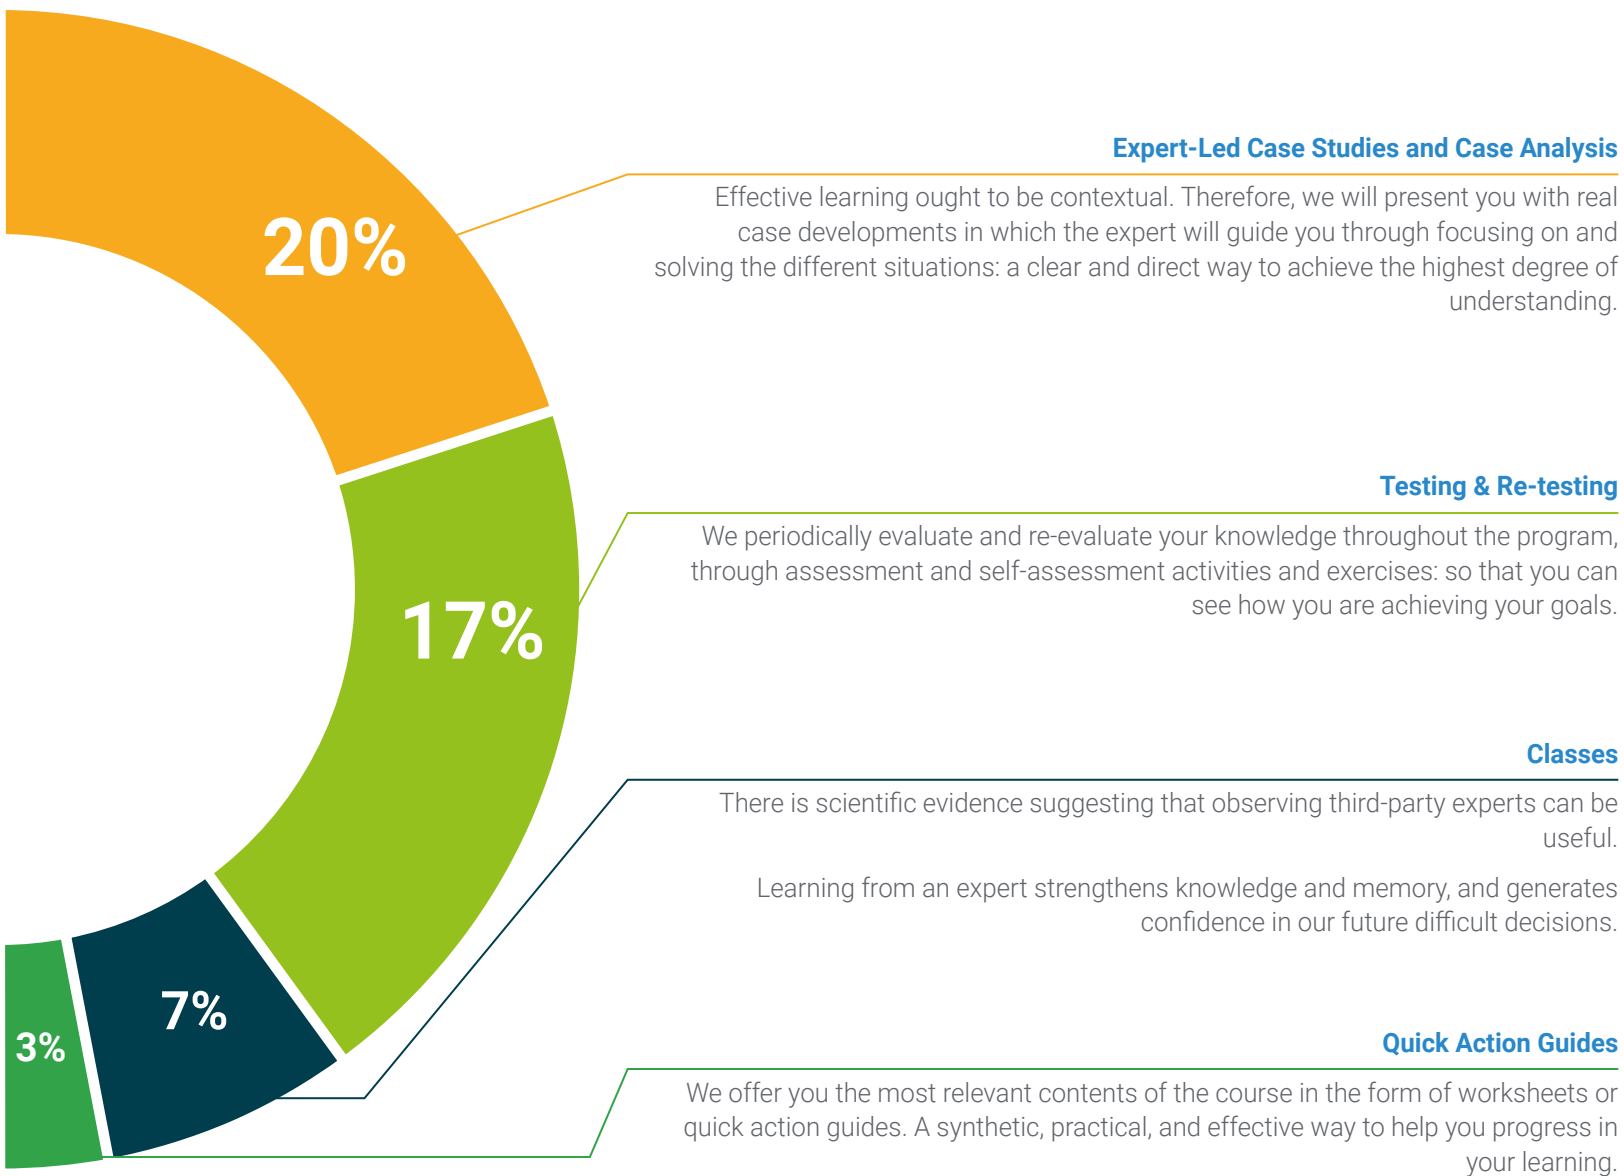

This unique multimedia content presentation training system was awarded by Microsoft as a "European Success Story".

Additional Reading

Recent articles, consensus documents, international guides. in our virtual library you will have access to everything you need to complete your training.

06 Certificate

The **Postgraduate Certificate in Pancreatic Surgery** guarantees you, in addition to the most rigorous and up-to-date training, access to a Postgraduate Certificate issued by TECH Technological University.

“

*Successfully complete this
Postgraduate Certificate and receive
your diploma without the hassle of
travel or paperwork”*

This **Postgraduate Certificate in Pancreatic Surgery** contains the most complete and up-to-date scientific program on the market.

After the student has passed the evaluations, they will receive by mail with acknowledgment of receipt their corresponding **Postgraduate Certificate** issued by **TECH Technological University**.

The certificate issued by **TECH Technological University** will specify the qualification obtained through the Postgraduate Certificate, and meets the requirements commonly demanded by labor exchanges, competitive examinations, and professional career evaluation committees.
