Introduction

The program in Trauma and Vascular Emergencies in Primary Care is designed to update medical care procedures for patients with pathologies of the musculoskeletal system and neurosurgical and vascular etiology, which family physicians frequently have to face in their daily clinical practice, in order to identify, treat and correctly refer the patient in primary health care.

This Postgraduate Certificate addresses the main aspects of trauma and vascular emergencies in primary care, so that you will be able to face situations that can compromise a patient's life. Learn how to identify, initially care for and eventually transfer patients with osteoarticular and vascular problems from primary care to a hospital center"

This Postgraduate Certificate in Trauma and Vascular Emergencies in Primary Care is a complete program that includes comprehensive systematized action plans for locomotor system and neurosurgical etiology emergencies, which must be faced by medical professionals in primary care in their daily clinical practice, helping them to make prompt and accurate decisions.

The program includes the approach to trauma and its systemic consequences in the different parts of the body, as well as patient care for polytrauma, cerebral hemorrhages, arterial ischemia, DVT or aneurysmal disease. It also presents in the form of workshops updated procedures in trauma patient mobilization and immobilization, functional bandaging, casting, wound dressing and sutures.

The program contents are based on the latest scientific evidence and the experience of renowned professionals in the field of Primary Care, which makes it practical and easy to transfer to routine clinical work.

Update your knowledge through the Postgraduate Certificate in Trauma and Vascular Emergencies in Primary Care, in a practical way and adapted to your needs".

This **Postgraduate Certificate in Trauma and Vascular Emergencies in Primary Care** is the most complete and up-to-date scientific program on the market. The most important features include:

- Clinical cases presented by experts in the different specialties.
- The graphic, schematic, and practical contents with which they are created, provide scientific and practical information on the disciplines that are essential for professional practice.
- New diagnostic and therapeutic developments in how to deal with the most frequent trauma and neurosurgical emergencies in the primary health care setting; it also includes the approach to trauma, wounds, burns and hemorrhages, as well as patient management for cerebral hemorrhage and the Polytrauma Code.
- Presentation of patient procedures, diagnostic and therapeutic techniques in the form of workshops on trauma patient mobilization and immobilization, functional bandaging, casting, bandaging and suturing
- A module devoted to vascular emergencies
- An algorithm-based interactive learning system for decision-making in the clinical situations presented throughout the course.
- With a special emphasis on evidence-based medicine and research methodologies in emergencies.
- All of this will be complemented by theoretical lessons, questions to the expert, debate forums on controversial topics, and individual reflection assignments.
- Content that is accessible from any fixed or portable device with an Internet connection

“

This Postgraduate Certificate is the best investment you can make when selecting a refresher program, for two reasons: in addition to updating your knowledge of Trauma and Vascular Emergencies in Primary Care, you will obtain a qualification from TECH Technological University”

Forming part of the teaching staff is a group of professionals in the field of Primary Care emergencies, who bring to this specialization their work experience, as well as renowned specialists recognized by esteemed scientific communities.

The multimedia content developed with the latest educational technology will provide the professional with situated and contextual learning, i.e., a simulated environment that will provide an immersive program to learn in real situations.

This program is designed around Problem-Based Learning, whereby the doctor must try to solve the different professional practice situations that arise throughout the Postgraduate Certificate. For this reason, you will be assisted by an innovative, interactive video system created by renowned experts in the field of trauma and vascular emergencies in primary health care with great teaching experience.

This Postgraduate Certificate includes real clinical cases and exercises to bring the development of the program closer to clinical practice.

Take the opportunity to update your knowledge of traumatological and vascular emergencies in Primary Care to improve patient care and family assistance.

02 Objectives

The main program objective is to develop theoretical and practical learning, so that physicians can practically and rigorously master the approach to patients in an emergency situation in primary health care.

“

This up-to-date program will generate a sense of confidence when practising medicine, which will help you grow both personally and professionally”

General Objective

- Get up to date in the diagnostic and therapeutic procedures for the most frequent urgent and emergency situations that doctors usually deal with in primary care.

“

Seize the opportunity and take the step to get up to date on the latest developments in traumatological and vascular emergencies in Primary Care.

Specific Objectives

- Differentiate between the different degrees of burns
- Differentiate the severity of different spinal injuries
- Calculate the amount of fluids needed to infuse a burn victim according to the extent and depth of the burn
- Identify the different urgencies and emergencies in pediatrics
- Analyze arterial ischemia of the extremities
- Quickly and effectively diagnose patients with thrombosis and analyze their treatment process

03

Course Management

This program includes highly regarded health professionals in the field of emergency primary care in its teaching staff, who bring the experience of their work to this specialization. In addition, renowned specialists, members of prestigious national and international scientific communities, are involved in designing and preparing the program.

“

*Learn the latest advances in medical procedures for
traumatological and neurosurgical emergencies in primary
health care from leading professionals”*

International Guest Director

As National Director of Clinical Innovation at US Acute Care Solutions, Jesse M. Pines, M.D., is one of the most recognized figures in the Emergency Medicine and Healthcare Services field. In fact, his accomplishments include the creation and execution of the first governmental alternative payment model (ED EQUIP, in Maryland) to reduce the total cost of care. In addition, he leads the development and implementation of Telemedicine programs covering a wide variety of specialties, including the ER, Psychiatry and Intensive Care Units, among others.

His extensive experience in medical leadership, large database study design and Big Data research has led him to publish over 350 peer-reviewed articles and writing seven books in these areas. His work has been recognized internationally in various reputable media outlets, including TIME Magazine, the Wall Street Journal and Slate Magazine.

His more than two decades of experience have earned him several leadership positions at George Washington University. Among them, he was the Director of the Center for Health Innovation and Research, also leading the Research Fellowship program and the Center for Healthcare Quality.

Therefore, throughout his career, Dr. Jesse M. Pines has received multiple awards, both for the articles he has published and for his own work and contribution to the field of Emergency Medicine. He is also the Chair of the American College of Emergency Physicians (ACEP) Task Force on New Practice Models, holding various positions in ACEP, the Society for Academic Emergency Medicine and the American Academy of Emergency Medicine.

Dr. M. Pines, Jesse

- National Director of Clinical Innovation at US Acute Care Solutions, United States.
- Emergency Physician at Allegheny Health Network
- Professor of Emergency Medicine at The George Washington University, USA
- Professor of Emergency Medicine at Drexel University
- Director of the Medical Research Fellowship Program at The George Washington University
- Director of the George Washington University Center for Health Research and Innovation
- M.D., Georgetown University
- Master of Business Administration from Georgetown University
- M.S. in Clinical Epidemiology from the University of Pennsylvania

“

Thanks to TECH, you will be able to learn with the best professionals in the world”

Management

Dr. Vicente Fco Roig D' Cunha-Kamath

- ◆ Degree in Medicine from the University of Valencia
- ◆ Specialist via MIR in Family and Community Medicine
- ◆ Assistant Physician of the Emergency Medicine Department at the Clinical University Hospital of Valencia.
- ◆ Professor of Human Anatomy at the European University of Valencia.
- ◆ Physician at the Valencia Health and Community Foundation.
- ◆ Doctor for the ASCIRES group

Professors

Dr. Brasó Aznar, José Vicente

- ◆ Hospital Emergency Physician
- ◆ Associate Professor of Emergency Medicine at the Faculty of Medicine of the University of Valencia.
- ◆ Head of Department Emergency Medicine. Ribera University Hospital

04

Structure and Content

The content structure has been designed by a team of professionals who recognize the implications of the program in daily medical praxis for trauma and vascular emergencies in primary care, who are aware of the relevance of current specialization to treat patients with emergency pathologies, and who are committed to quality teaching using new educational technologies.

“

This Postgraduate Certificate in Trauma and Vascular Emergencies in Primary Care is the most complete and up-to-date scientific program on the market”

Module 1. Trauma and Neurosurgical Emergencies

- 1.1 Lower Back Pain and Lumbosciatica
- 1.2 Trauma. General Aspects
- 1.3 Lower Extremity Trauma
- 1.4 Upper Extremity Trauma
- 1.5 Body and Head Trauma
- 1.6 Cranioencephalic Trauma. Skull Fractures and Contusions
- 1.7 Thoracic Trauma. Rib Fractures and Contusions
- 1.8 Vertebral Fractures and Contusions
- 1.9 Cerebral Hemorrhage
- 1.10 Spinal Cord Injury
- 1.11 Out-of-Hospital Major Trauma Care. Polytrauma Code
- 1.12 Injuries and Burns
- 1.13 Workshop on Mobilization and Immobilization of Trauma Patients
- 1.14 Workshop on Functional Bandages
- 1.15 Plaster Workshop
- 1.16 Acute and Chronic Wound Care Workshop
- 1.17 Suture Workshop

Module 2. Vascular Emergencies

- 2.1 Acute Limb Ischemia
- 2.2 Deep Vein Thrombosis
- 2.3 Venous Insufficiency
- 2.4 Aneurysmal Disease

“

A unique, key, and decisive program to boost your professional development”

05

Methodology

This academic program offers students a different way of learning. Our methodology uses a cyclical learning approach: **Relearning**.

This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the ***New England Journal of Medicine*** have considered it to be one of the most effective.

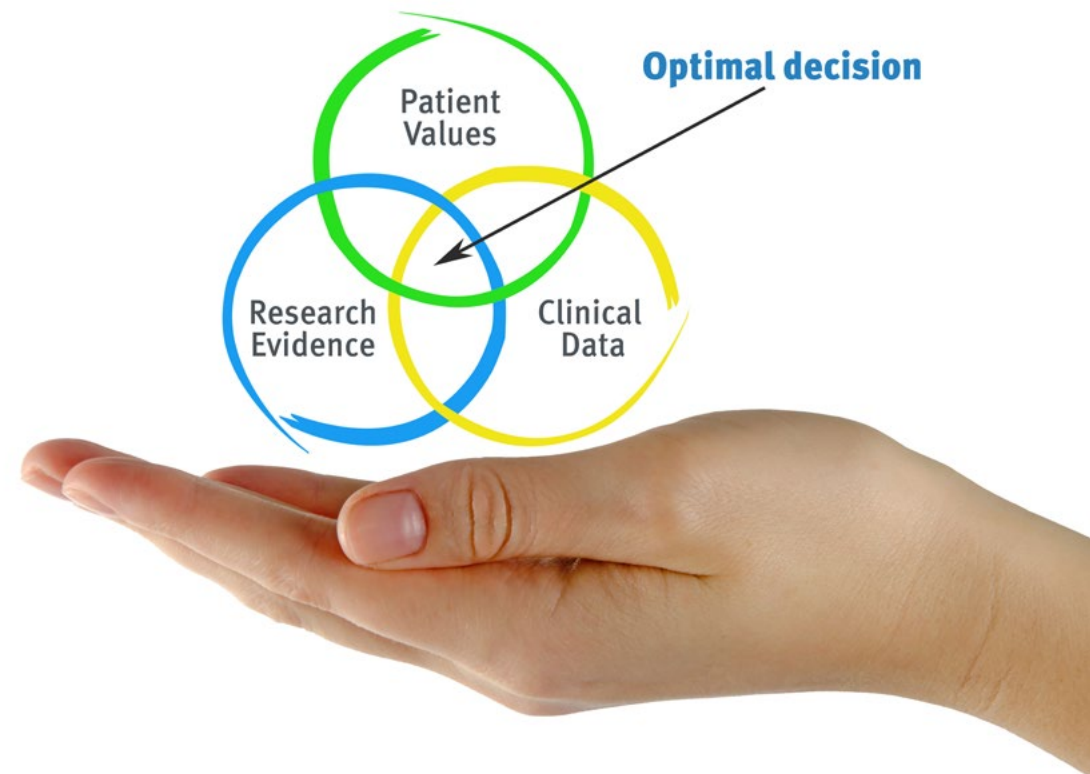

“

Discover Relearning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization"

At TECH, we use the Case Method

What should a professional do in a given situation? Throughout the program, students will face multiple simulated clinical cases, based on real patients, in which they will have to do research, establish hypotheses, and ultimately resolve the situation. There is an abundance of scientific evidence on the effectiveness of the method. Specialists learn better, faster, and more sustainably over time.

With TECH you will experience a way of learning that is shaking the foundations of traditional universities around the world.

According to Dr. Gérvas, the clinical case is the annotated presentation of a patient, or group of patients, which becomes a "case", an example or model that illustrates some peculiar clinical component, either because of its teaching power or because of its uniqueness or rarity. It is essential that the case is based on current professional life, trying to recreate the real conditions in the physician's professional practice.

“

Did you know that this method was developed in 1912, at Harvard, for law students? The case method consisted of presenting students with real-life, complex situations for them to make decisions and justify their decisions on how to solve them. In 1924, Harvard adopted it as a standard teaching method.

The effectiveness of the method is justified by four fundamental achievements:

- 1 Students who follow this method not only achieve the assimilation of concepts, but also a development of their mental capacity, through exercises that evaluate real situations and the application of knowledge.
- 2 Learning is solidly translated into practical skills that allow the student to better integrate into the real world.
- 3 Ideas and concepts are understood more efficiently, given that the example situations are based on real-life.
- 4 Students like to feel that the effort they put into their studies is worthwhile. This then translates into a greater interest in learning and more time dedicated to working on the course.

Relearning Methodology

TECH effectively combines the Case Study methodology with a 100% online learning system based on repetition, which combines 8 different teaching elements in each lesson.

We enhance the Case Study with the best 100% online teaching method: Relearning.

Professionals will learn through real cases and by resolving complex situations in simulated learning environments. These simulations are developed using state-of-the-art software to facilitate immersive learning.

At the forefront of world teaching, the Relearning method has managed to improve the overall satisfaction levels of professionals who complete their studies, with respect to the quality indicators of the best online university (Columbia University).

With this methodology, more than 250,000 physicians have been trained with unprecedented success in all clinical specialties regardless of surgical load. Our pedagogical methodology is developed in a highly competitive environment, with a university student body with a strong socioeconomic profile and an average age of 43.5 years old.

Relearning will allow you to learn with less effort and better performance, involving you more in your specialization, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation to success.

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

The overall score obtained by TECH's learning system is 8.01, according to the highest international standards.

This program offers the best educational material, prepared with professionals in mind:

Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is highly specific and precise.

These contents are then adapted in audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high-quality pieces in each and every one of the materials that are made available to the student.

Surgical Techniques and Procedures on Video

TECH introduces students to the latest techniques, the latest educational advances and to the forefront of current medical techniques. All of this in direct contact with students and explained in detail so as to aid their assimilation and understanding. And best of all, you can watch the videos as many times as you like.

Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive educational system for presenting multimedia content was awarded by Microsoft as a "European Success Story".

Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

Expert-Led Case Studies and Case Analysis

Effective learning ought to be contextual. Therefore, TECH presents real cases in which the expert will guide students, focusing on and solving the different situations: a clear and direct way to achieve the highest degree of understanding.

Testing & Retesting

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises, so that they can see how they are achieving their goals.

Classes

There is scientific evidence on the usefulness of learning by observing experts. The system known as Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

Quick Action Guides

TECH offers the most relevant contents of the course in the form of worksheets or quick action guides. A synthetic, practical, and effective way to help students progress in their learning.

06 Certificate

The Postgraduate Certificate in Trauma and Vascular Emergencies in Primary Care guarantees students, in addition to the most rigorous and up-to-date education, access to a Postgraduate Certificate issued by TECH Technological University.

“

*Successfully complete this program
and receive your university qualification
without having to travel or fill out
laborious paperwork”*

This **Postgraduate Certificate in Trauma and Vascular Emergencies in Primary Care** is the most complete and up-to-date scientific program on the market.

After the student has passed the assessments, they will receive their corresponding **Postgraduate Certificate** issued by **TECH Technological University** via tracked delivery.

The diploma issued by TECH Technological University will reflect the qualification obtained in the Postgraduate Certificate, and meets the requirements commonly demanded by labor exchanges, competitive examinations, and professional career evaluation committees
