Introduction

The **Postgraduate Certificate in Traumatologic and Vascular Emergencies in Primary Care** is designed to update medical care procedures for patients with locomotor system and neurosurgical and vascular etiology pathologies, which family physicians frequently have to face in their daily clinical practice, in order to identify, treat and correctly refer patients in primary health care.

“

This Postgraduate Certificate addresses the main aspects of traumatologic and vascular emergencies in Primary Care, so that you will be able to face situations that can compromise a patient's life. Learn how to identify, initially care for and eventually transfer patients with osteoarticular and vascular problems from primary care to a hospital center”

This Postgraduate Certificate in Traumatologic and Vascular Emergencies in Primary Care is a complete program that includes comprehensive systematized action plans for locomotor system and neurosurgical etiology emergencies, which must be faced by medical professionals in primary care in their daily clinical practice, helping them to make prompt and accurate decisions.

The program includes the approach to trauma and its systemic consequences in the different parts of the body, as well as patient care for polytrauma, cerebral hemorrhages, arterial ischemia, DVT or aneurysmal disease. It also presents in the form of workshops updated procedures in trauma patient mobilization and immobilization, functional bandaging, casting, wound dressing and sutures.

The program contents are based on the latest scientific evidence and the experience of renowned professionals in the field of Primary Care, which makes it practical and easy to transfer to routine clinical work.

Expand your knowledge through the Postgraduate Certificate in Traumatologic and Vascular Emergencies in Primary Care in a practical way adapted to your needs”

This **Postgraduate Certificate in Traumatologic and Vascular Emergencies in Primary Care** is the most complete and up-to-date scientific program on the market. The most important features of the Postgraduate Certificate are:

- Clinical cases presented by experts in the different specialties.
- The graphic, schematic, and eminently practical contents with which they are created provide scientific and practical information on the disciplines that are essential for professional practice.
- New diagnostic and therapeutic developments in how to deal with the most frequent trauma and neurosurgical emergencies in the primary health care setting; it also includes the approach to trauma, wounds, burns and hemorrhages, as well as patient management for cerebral hemorrhage and the Polytrauma Code.
- Presentation of patient procedures, diagnostic and therapeutic techniques in the form of workshops on trauma patient mobilization and immobilization, functional bandaging, casting, bandaging and suturing.
- A module devoted to vascular emergencies.
- Algorithm-based interactive learning system for decision-making in the presented clinical situations.
- With a special emphasis on evidence-based medicine and research methodologies in emergencies.
- All this will be complemented by theoretical lessons, questions to the expert, debate forums on controversial topics, and individual reflection assignments.
- Content that is accessible from any fixed or portable device with an Internet connection.

“

This Postgraduate Certificate may be the best investment you can make when choosing a refresher program for two reasons: in addition to updating your knowledge of traumatologic and vascular emergencies in Primary Care, you will obtain a qualification from TECH - Technological University”

Forming part of the teaching staff is a group of professionals in the field of Primary Care emergencies, who bring to this specialization their work experience, as well as renowned specialists recognized by esteemed scientific communities.

The multimedia content developed with the latest educational technology will provide the professional with situated and contextual learning, i.e., a simulated environment that will provide an immersive training program to train in real situations.

Problem-Based Learning underpins this program design, whereby the doctor must use it to try and solve the different professional practice situations that arise throughout the training. For this reason, you will be assisted by an innovative, interactive video system created by renowned experts in the field of trauma and vascular emergencies in primary health care with great teaching experience.

This Postgraduate Certificate includes real clinical cases and exercises to bring the development of the program closer to clinical practice.

Take the opportunity to update your knowledge of traumatologic and vascular emergencies in Primary Care to improve patient care and family assistance.

02 Objectives

The main program objective is to develop theoretical and practical learning, so that physicians can practically and rigorously master life support maneuvers and invasive emergency techniques in primary health care.

“

This program will provide you with the skills to carry out your medical praxis with confidence, which will help you grow both personally and professionally”

General Objective

- ♦ Provide action rules for dealing with the traumatologic and vascular emergencies that family physicians must face in their daily clinical practice, helping them to make prompt and accurate decisions.

Specific Objectives

- ♦ Address general procedure and technique management applied to patients in the most frequent traumatologic and neurosurgical emergencies.
- ♦ Deliver demonstrative workshops to explain the procedure for trauma patient mobilization and immobilization.
- ♦ Explain the application procedures for functional bandaging and casting, acute and chronic wound dressings and sutures.
- ♦ Describe the comprehensive action plan in case of Polytraumatized Code.
- ♦ Address general procedure and technique management applied to patients in vascular emergency situations.
- ♦ Describe the clinical presentation of acute arterial ischemia and how to proceed in case of clinical suspicion.
- ♦ Establish the protocol for suspected deep vein thrombosis and the inclusion criteria.

avoid fragmentation.

- ♦ Establish patient procedure for aneurysmal disease.
- ♦ Define the classification strategies of aortic aneurysms according to shape, size, location, structure or etiology.
- ♦ Describe patient management in case of suspected ruptured aneurysm.

Seize the opportunity and take the step to get up to date on the latest developments in traumatologic and vascular emergencies in Primary Care.

03

Course Management

This program includes highly regarded health professionals in the field of emergency primary care in its teaching staff, who bring the experience of their work to this specialization. In addition, renowned specialists, members of prestigious national and international scientific communities, are involved in designing and preparing the program.

“

*Learn the latest advances in medical procedures for
traumatologic and neurosurgical emergencies in primary health
care from leading professionals”*

International Guest Director

As National Director of Clinical Innovation at US Acute Care Solutions, Jesse M. Pines, M.D., is one of the most recognized figures in the Emergency Medicine and Healthcare Services field. In fact, his accomplishments include the creation and execution of the first governmental alternative payment model (ED EQUIP, in Maryland) to reduce the total cost of care. In addition, he leads the development and implementation of Telemedicine programs covering a wide variety of specialties, including the ER, Psychiatry and Intensive Care Units, among others.

His extensive experience in medical leadership, large database study design and Big Data research has led him to publish over 350 peer-reviewed articles and writing seven books in these areas. His work has been recognized internationally in various reputable media outlets, including TIME Magazine, the Wall Street Journal and Slate Magazine.

His more than two decades of experience have earned him several leadership positions at George Washington University. Among them, he was the Director of the Center for Health Innovation and Research, also leading the Research Fellowship program and the Center for Healthcare Quality.

Therefore, throughout his career, Dr. Jesse M. Pines has received multiple awards, both for the articles he has published and for his own work and contribution to the field of Emergency Medicine. He is also the Chair of the American College of Emergency Physicians (ACEP) Task Force on New Practice Models, holding various positions in ACEP, the Society for Academic Emergency Medicine and the American Academy of Emergency Medicine.

Dr. M. Pines, Jesse

- National Director of Clinical Innovation at US Acute Care Solutions, United States.
- Emergency Physician at Allegheny Health Network
- Professor of Emergency Medicine at The George Washington University, USA
- Professor of Emergency Medicine at Drexel University
- Director of the Medical Research Fellowship Program at The George Washington University
- Director of the George Washington University Center for Health Research and Innovation
- M.D., Georgetown University
- Master of Business Administration from Georgetown University
- M.S. in Clinical Epidemiology from the University of Pennsylvania

“

Thanks to TECH, you will be able to learn with the best professionals in the world”

Management

Dr. Vicente Fco. Roig D'Cunha-Kamath

- ♦ Degree in Medicine from the University of Valencia
- ♦ Specialist via MIR in Family and Community Medicine
- ♦ Assistant Physician of the Emergency Medicine Department at the Clinical University Hospital of Valencia.
- ♦ Professor of Human Anatomy at the European University of Valencia.
- ♦ Physician at the Valencia Health and Community Foundation.
- ♦ Doctor for the ASCIRES group

Professors

Dr. Brasó Aznar, José Vicente

- ♦ Hospital Emergency Physician
- ♦ Associate Professor of Emergency Medicine at the Faculty of Medicine of the University of Valencia.
- ♦ Head of Department Emergency Medicine. Ribera University Hospital

04

Structure and Content

The content structure has been designed by a team of professionals who recognize the implications of training in daily medical praxis for traumatologic and vascular emergencies in Primary Care, who are aware of the relevance of current specialization to treat patients with emergency pathologies, and who are committed to quality teaching using new educational technologies.

“

This Postgraduate Certificate in Traumatologic and Vascular Emergencies from Primary Care is the most complete and up-to-date scientific program on the market”

Module 1. Trauma and Neurosurgical Emergencies

- 1.1. Lower Back Pain and Lumbosciatica.
- 1.2. Trauma. General Aspects
- 1.3. Lower Extremity Trauma
- 1.4. Upper Extremity Trauma
- 1.5. Body and Head Trauma.
- 1.6. Cranioencephalic Trauma. Skull Fractures and Contusions.
- 1.7. Thoracic Trauma Rib Fractures and Contusions
- 1.8. Vertebral Fractures and Contusions.
- 1.9. Cerebral Hemorrhage.
- 1.10. Spinal Cord Injury.
- 1.11. Out-of-Hospital Major Trauma Care. POLYTRAUMA CODE.
- 1.12. Injuries and Burns.
- 1.13. Workshop on Mobilization and Immobilization of Trauma Patients.
- 1.14. Workshop on Functional Bandages.
- 1.15. Plaster Workshop.
- 1.16. Acute and Chronic Wound Care Workshop.
- 1.17. Suture Workshop.

Module 2. Vascular Emergencies

- 2.1. Acute Limb Ischemia.
- 2.2. Deep Vein Thrombosis.
- 2.3. Venous Insufficiency.
- 2.4. Aneurysmal Disease.

“

A unique, key, and decisive master's degree experience to boost your professional development”

05

Methodology

This training program provides you with a different way of learning. Our methodology uses a cyclical learning approach: ***Re-learning***.

This teaching system is used in the most prestigious medical schools in the world, and major publications such as the ***New England Journal of Medicine*** have considered it to be one of the most effective.

“

Discover Re-learning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization”

At TECH we use the Case Method

In a given situation, what would you do? Throughout the program, you will be presented with multiple simulated clinical cases based on real patients, where you will have to investigate, establish hypotheses and, finally, resolve the situation. There is an abundance of scientific evidence on the effectiveness of the method. Specialists learn better, faster, and more sustainably over time.

With TECH you can experience a way of learning that is shaking the foundations of traditional universities around the world.

According to Dr. Gervas, the clinical case is the annotated presentation of a patient, or group of patients, which becomes a "case", an example or model that illustrates some peculiar clinical component, either because of its teaching potential or because of its uniqueness or rarity. It is essential that the case is based on current professional life, trying to recreate the real conditions in professional medical practice.

“

Did you know that this method was developed in 1912 at Harvard for law students? The case method consisted of presenting students with real-life, complex situations for them to make decisions and justify their decisions on how to solve them. In 1924, Harvard adopted it as a standard teaching method”

The effectiveness of the method is justified by four fundamental achievements:

1. Students who follow this method not only grasp concepts, but also develop their mental capacity by evaluating real situations and applying their knowledge.
2. The learning process has a clear focus on practical skills that allow the student to better integrate into the real world.
3. Ideas and concepts are understood more efficiently, given that the example situations are based on real-life.
4. Students like to feel that the effort they put into their studies is worthwhile. This then translates into a greater interest in learning and more time dedicated to working on the course.

Re-learning Methodology

At TECH we enhance the Harvard case method with the best 100% online teaching methodology available: Re-learning.

Our University is the first in the world to combine the study of clinical cases with a 100% online learning system based on repetition, combining a minimum of 8 different elements in each lesson, which represent a real revolution with respect to simply studying and analyzing cases.

The physician will learn through real cases and by solving complex situations in simulated learning environments. These simulations are developed using state-of-the-art software to facilitate immersive learning.

At the forefront of world teaching, the Re-learning method has managed to improve the overall satisfaction levels of professionals who complete their studies, with respect to the quality indicators of the best Spanish-speaking online university (Columbia University).

With this methodology we have trained more than 250,000 physicians with unprecedented success, in all clinical specialties regardless of the surgical load. All this in a highly demanding environment, where the students have a strong socio-economic profile and an average age of 43.5 years.

Re-learning will allow you to learn with less effort and better performance, involving you more in your specialization, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation to success.

In our program, learning is not a linear process, but rather a spiral (we learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

The overall score obtained by our learning system is 8.01, according to the highest international standards.

In this program you will have access to the best educational material, prepared with you in mind:

Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is really specific and precise.

This content is then adapted in an audiovisual format that will create our way of working online, with the latest techniques that allow us to offer you high quality in all of the material that we provide you with.

Latest Techniques and Procedures on Video

We introduce you to the latest techniques, to the latest educational advances, to the forefront of current medical techniques. All this, in first person, with the maximum rigor, explained and detailed for your assimilation and understanding. And best of all, you can watch them as many times as you want.

Interactive Summaries

We present the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

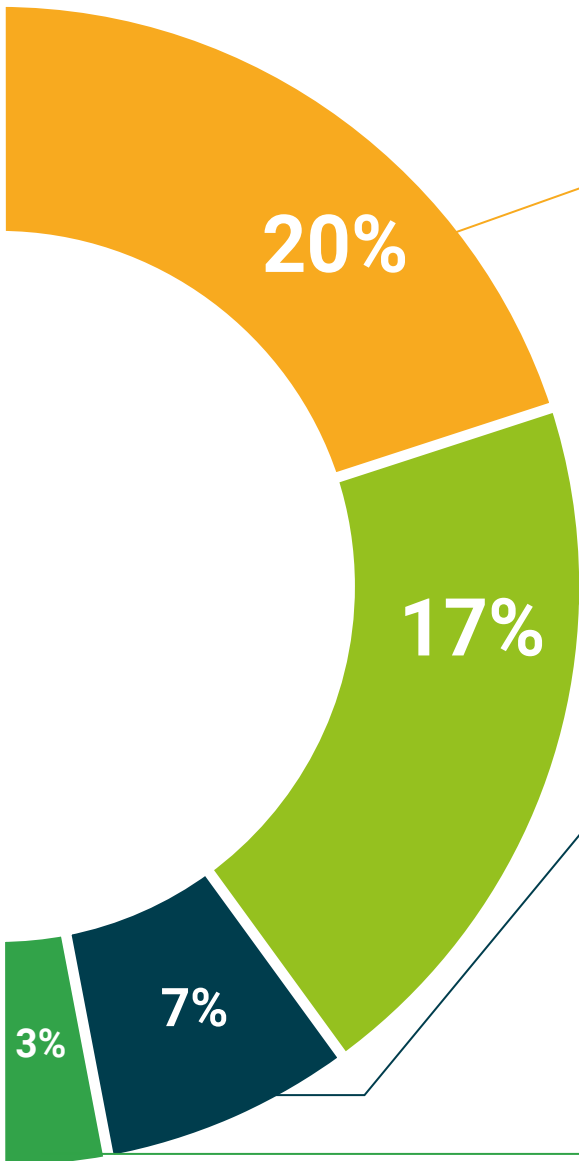

This unique multimedia content presentation training system was awarded by Microsoft as a "European Success Story".

Additional Reading

Recent articles, consensus documents, international guides. in our virtual library you will have access to everything you need to complete your training.

Expert-Led Case Studies and Case Analysis

Effective learning ought to be contextual. Therefore, we will present you with real case developments in which the expert will guide you through focusing on and solving the different situations: a clear and direct way to achieve the highest degree of understanding.

Testing & Retesting

We periodically evaluate and re-evaluate your knowledge throughout the program, through assessment and self-assessment activities and exercises: so that you can see how you are achieving your goals.

Classes

There is scientific evidence suggesting that observing third-party experts can be useful.

Learning from an expert strengthens knowledge and memory, and generates confidence in our difficult future decisions.

Quick Action Guides

We offer you the most relevant contents of the course in the form of worksheets or quick action guides. A synthetic, practical, and effective way to help you progress in your learning.

06 Certificate

The Postgraduate Certificate in Traumatologic and Vascular Emergencies guarantees, in addition to the most accurate and updated training, access to a qualification issued by TECH - Universidad Tecnológica.

“

Successfully complete this specialization and receive your certificate without the hassle of travel or paperwork”

This **Postgraduate Certificate in Traumatologic and Vascular Emergencies from Primary Care** is the most complete and up-to-date scientific program on the market.

After the student has passed the evaluations, they will receive by mail with acknowledgment of receipt their corresponding **certificate** issued by TECH Technological University.

The certificate issued by TECH - Technological University will reflect the qualification obtained in the Postgraduate Certificate, and meets the requirements commonly demanded by labor exchanges, competitive examinations, and professional career evaluation.

Title: **Postgraduate Certificate in Traumatologic and Vascular Emergencies in Primary Care**

ECTS: 3

Official Number of Hours: 75

*Apostille Convention. In the event that the student wishes to have their paper certificate Apostilled, TECH EDUCATION will make the necessary arrangements to obtain it at an additional cost of €140 plus shipping costs of the Apostilled certificate.
