01

Introduction

This program in Treatment in Pediatric Rheumatic Diseases offers a specific and intensive syllabus in order to provide the student with the most advanced diagnostic and intervention tools of the current scientific panorama. In this way, the professional will acquire the basic knowledge necessary to face the situations that arise around a child or adolescent suffering from RD and ME. From the moment of diagnosis, with the development of the guidelines that the specialist must follow in the application of a correct treatment and all its follow-up, to the information on procedures or attitudes to be avoided in this medical practice.

“

You will acquire the most advanced diagnostic and intervention tools of the current scientific panorama for the student interested in treatments in pediatric rheumatic diseases”

Childhood is not safe from rheumatologic disease (RD). Although it is difficult to know their exact prevalence, given the absence of specific and global studies, they are potentially serious diseases that lead to a significant decrease in the quality of life of the affected child. Comprehensive care for patients and their families as a fundamental part of the process, is an essential condition in the approach to this group of diseases.

This Postgraduate Certificate offers a different look at the global care that Children with Rheumatic Disease need. A comprehensive approach that covers all aspects of this care: from pre- and post-diagnostic care to families, pharmacological criteria and psychological and emotional care for the affected person and their environment. A holistic approach that you will acquire throughout the most specific and comprehensive online program on the teaching market.

During this comprehensive program, professionals will have the opportunity to acquire the basic knowledge necessary to deal with the situations that arise around a child or adolescent suspected of having RMD. From the moment of diagnosis, with the development of the guidelines that the specialists must follow, to the information on procedures or attitudes to be avoided in this medical practice.

This Postgraduate Certificate will also offer them a different view of what RD means thanks to the participation of expert patients; an unparalleled opportunity to complete the medical knowledge with the view from the other side. This approach seeks to respond to the need for general practitioners, orthopedic surgeons, pediatricians, rheumatologists, social workers, nurses, psychologists and many other professionals to be able to handle situations with a high impact on the lives of children and young people and their families.

This **Postgraduate Certificate in Treatment in Pediatric Rheumatic Diseases** contains the most complete and up-to-date scientific program on the market. The most important features include:

- ♦ The latest technology in online teaching software
- ♦ A highly visual teaching system, supported by graphic and schematic contents that are easy to assimilate and understand
- ♦ Practical cases presented by practising experts
- ♦ State-of-the-art interactive video systems
- ♦ Teaching supported by telepractice
- ♦ Continuous updating and recycling systems
- ♦ Autonomous learning: full compatibility with other occupations
- ♦ Practical exercises for self-evaluation and learning verification
- ♦ Support groups and educational synergies: questions to the expert, debate and knowledge forums
- ♦ Communication with the teacher and individual reflection work
- ♦ Content that is accessible from any fixed or portable device with an Internet connection
- ♦ Supplementary documentation databases are permanently available, even after the program

All aspects of the practice of Pediatric Rheumatology, with a global vision of the care of the affected patient, in the most complete Postgraduate Certificate in the online teaching market"

The teachers of this Postgraduate Certificate have been selected on the basis of two fundamental criteria: their proven experience and knowledge of RD in pediatrics and their proven teaching skills"

*Our innovative telepractice concept will give you the opportunity to learn through an immersive experience, which will provide you with a faster integration and a much more realistic view of the contents:
Learning from an expert"*

The program's teaching staff includes professionals from the sector who contribute their work experience to this educational program, as well as renowned specialists from leading societies and prestigious universities.

The multimedia content, developed with the latest educational technology, will provide the professional with situated and contextual learning, i.e., a simulated environment that will provide immersive education programmed to learn in real situations.

This program is designed around Problem-Based Learning, whereby professionals must try to solve the different professional practice situations that arise during the academic year. For this purpose, the professional will be assisted by an innovative interactive video system created by renowned and experienced experts.

02

Objectives

The objective of TECH is to prepare highly competent professionals, who possess the most up-to-date knowledge and techniques in the medical panorama focused on the treatments on pediatric rheumatic diseases. A goal that the student will be able to achieve thanks to this high intensity and precision Postgraduate Certificate and the best teaching methodology. In this way, you will be able to prescribe a pharmacological or non-pharmacological treatment correctly.

An X-ray image of a human hand and forearm, showing the bones in a reddish-pink hue. The image is positioned on the left side of the slide, partially overlapping a white and blue background. The bones are clearly visible, including the metacarpals, phalanges, and the radius and ulna of the forearm.

“

You will review practical aspects of medication and learn to define adverse effects of medication with good medical practice"

General Objectives

- ♦ Distinguish between different types of musculoskeletal problems in children, approach them and refer them if necessary
- ♦ Treat them from different points of view, medical, psychological or physical, or at least to interpret the suitability of applied treatments
- ♦ Discuss whether a treatment was sufficiently effective
- ♦ Know which attitudes, treatments and strategies are inappropriate and should be avoided
- ♦ Prevent illness and complications
- ♦ Recognize basic needs and refer to specialized resources
- ♦ Identify social and environmental factors and reflect on the impact they have on the quality of life of patients and their families

You will address all aspects of the manifestation of pain in rheumatic diseases in children and adolescents, and you will prescribe the best possible treatment according to the case"

Specific Objectives

- ♦ Review pharmacological treatments
- ♦ Observe treatments common to different conditions
- ♦ Review practical aspects of medication
- ♦ Define the adverse effects of medications
- ♦ Follow the evolution of a pharmacological treatment in children and adolescents.
- ♦ Identify appropriate and inappropriate myths and attitudes.
- ♦ Perform psychological approach to RD and ME to patients and their families
- ♦ Know the indication of physical exercise as a rehabilitation technique
- ♦ Recognize the opportunity of orthopedic surgery
- ♦ Describe the appropriate nutritional guidelines
- ♦ Distinguish the different existing social supports
- ♦ Identify appropriate and inappropriate myths and attitudes

03

Course Management

In its commitment to offer an elite education for all, TECH counts on renowned professionals so that the student acquires a solid knowledge in the area of pediatric rheumatology with a special focus on the different existing treatments. For this reason, the program is composed of various medical professionals whose experience and skills will guide the student towards excellence during their learning. This is a unique opportunity to learn from the best, TECH's guarantee of quality.

“

Do not miss the opportunity to have the best experts in pediatric rheumatology today as teachers, in this program they have gathered to give you the keys that will improve the pattern of the best treatments"

Management

Dr. Carmona, Loreto

- ♦ Rheumatologist and epidemiologist (LIRE). Medical Director InMusc
- ♦ PhD in Epidemiology and Preventive Medicine from the Autonomous University of Madrid
- ♦ University Research Professor at the University Camilo José Cela until 2013

Dr. Clemente Garulo, Daniel

- ♦ Degree in Medicine and Surgery from the Faculty of Medicine from the University of Alcalá (1995-2001).
- ♦ Specialist in Rheumatology, after completing his MIR training at San Carlos Clinical University in Madrid (2002-2006) and in Pediatrics and specific areas, after completing his MIR training at the Infant University Hospital Niño Jesús.
- ♦ PhD in Health Sciences from Camilo José Cela University (July 2018)
- ♦ Since October 2010, he has been an Assistant Physician in Pediatrics at the University Hospital Niño Jesús, working in the Pediatric Rheumatology Unit
- ♦ Since September 2016, he has been a professor in the Faculty of Health Sciences at the Lasalle Center for Higher University Studies

Ms. De La Torre Hervera, Elisenda

- Member of the Spanish Rheumatologic League
- Postgraduate in Patient Advocacy, June 2016 UIC (International University of Catalonia), Barcelona
- Technical Engineering in Computer Management, June 2000 (Polytechnic University of Mataró (UPC), Barcelona)
- Patients' Consultative Council of Catalonia (CCPC) 2016-present
- CCPC Technical Communication Council 2016-present
- Member of the executive board of administration of the healthcare quality agency (AQuAS) 2017 - present
- Member of the Pharmacotherapeutic Commission (CFT-SISCAT) 2017-present

04

Structure and Content

The contents of this program have been developed by the different experts on the course, with a clear purpose: to ensure that our students acquire each and every one of the necessary skills to become true experts in this field. Structured in one module, the student will approach everything related to the treatment of rheumatic diseases in pediatrics, delving into the relevant knowledge and distinguishing themselves in a specialty in continuous research.

“

A comprehensive teaching program, structured in well-developed teaching units, oriented towards learning that is compatible with your personal and professional life"

Module 1. Pharmacological Treatment in Pediatric Rheumatology

- 1.1. Symptomatic Treatment
 - 1.1.1. Analgesics
 - 1.1.2. Anti-Inflammatory Drugs
 - 1.1.3. Opioids
 - 1.1.4. Antiepileptics
 - 1.1.5. Antidepressants
- 1.2. Directed Treatment
 - 1.2.1. Disease-Modifying Drugs
 - 1.2.2. Biological Evidence
 - 1.2.3. Biosimilars
 - 1.2.4. Small Molecules
- 1.3. Day to Day Treatment
 - 1.3.1. Conservation of Treatments, Travel
 - 1.3.2. Complications and adverse effects
- 1.4. What Not to Do?

Module 2. Pharmacological Treatment in Pediatric Rheumatology

- 2.1. Exercise and Physical Activity in Children
 - 2.1.1. Exercise, Physical Activity and Sport
 - 2.1.2. Exercise Specifications in Children with RD and ME
- 2.2. Rehabilitation
 - 2.2.1. Splints and Orthoses
 - 2.2.2. Physical Therapies in Children
- 2.3. Orthopedic Surgery
 - 2.3.1. Special Features of Immature Bone and the Growing Skeleton
 - 2.3.2. Infantile Fractures
 - 2.3.2.1. Most Common Traumatic Fractures and Traumatic Epiphysiolyis
 - 2.3.2.2. Common Techniques of Osteosynthesis in Children
 - 2.3.3. Infection Management in the Locomotor System in Children
 - 2.3.4. Surgery of Growing Spine Deformities
 - 2.3.5. Osteotomies of the Pelvis and the Upper Extremity of the Femur

- 2.4. Nutritional Advice
 - 2.4.1. Obesity
 - 2.4.2. Malnutrition
 - 2.4.3. Supplements
- 2.5. Psychological Approach to Pediatric RD and ME
 - 2.5.1. Fears, Phobias and Anxieties
 - 2.5.2. Generalized Anxiety Disorder and Panic Disorder
 - 2.5.3. Depression in Childhood and Adolescence
 - 2.5.4. Sleep Disorders
 - 2.5.5. Eating Disorders
 - 2.5.6. Dissocial Disorder
 - 2.5.7. Learning Disorders
 - 2.5.8. Training of Parents of Children with RD and ME
 - 2.5.9. Family Behavioral Intervention
- 2.6. Occupational Intervention
 - 2.6.1. Occupational Schedules
 - 2.6.2. Play as Therapy
 - 2.6.3. Technical Aids
- 2.7. What Not to Do?

A unique, key, and decisive educational experience to boost your professional development”

05

Methodology

This academic program offers students a different way of learning. Our methodology uses a cyclical learning approach: **Relearning**.

This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the **New England Journal of Medicine** have considered it to be one of the most effective.

“

Discover Relearning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization"

At TECH we use the Case Method

What should a professional do in a given situation? Throughout the program, students will face multiple simulated clinical cases, based on real patients, in which they will have to do research, establish hypotheses, and ultimately resolve the situation. There is an abundance of scientific evidence on the effectiveness of the method. Specialists learn better, faster, and more sustainably over time.

With TECH you will experience a way of learning that is shaking the foundations of traditional universities around the world.

According to Dr. Gervas, the clinical case is the annotated presentation of a patient, or group of patients, which becomes a "case", an example or model that illustrates some peculiar clinical component, either because of its teaching power or because of its uniqueness or rarity. It is essential that the case is based on current professional life, trying to recreate the real conditions in the physician's professional practice.

“

Did you know that this method was developed in 1912, at Harvard, for law students? The case method consisted of presenting students with real-life, complex situations for them to make decisions and justify their decisions on how to solve them. In 1924, Harvard adopted it as a standard teaching method”

The effectiveness of the method is justified by four fundamental achievements:

1. Students who follow this method not only achieve the assimilation of concepts, but also a development of their mental capacity, through exercises that evaluate real situations and the application of knowledge.
2. Learning is solidly translated into practical skills that allow the student to better integrate into the real world.
3. Ideas and concepts are understood more efficiently, given that the example situations are based on real-life.
4. Students like to feel that the effort they put into their studies is worthwhile. This then translates into a greater interest in learning and more time dedicated to working on the course.

Relearning Methodology

At TECH we enhance the case method with the best 100% online teaching methodology available: Relearning.

This university is the first in the world to combine the study of clinical cases with a 100% online learning system based on repetition, combining a minimum of 8 different elements in each lesson, a real revolution with respect to the mere study and analysis of cases.

Professionals will learn through real cases and by resolving complex situations in simulated learning environments. These simulations are developed using state-of-the-art software to facilitate immersive learning.

At the forefront of world teaching, the Relearning method has managed to improve the overall satisfaction levels of professionals who complete their studies, with respect to the quality indicators of the best online university (Columbia University).

With this methodology, more than 250,000 physicians have been trained with unprecedented success in all clinical specialties regardless of surgical load. Our pedagogical methodology is developed in a highly competitive environment, with a university student body with a strong socioeconomic profile and an average age of 43.5 years old.

Relearning will allow you to learn with less effort and better performance, involving you more in your specialization, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation to success.

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

The overall score obtained by TECH's learning system is 8.01, according to the highest international standards.

This program offers the best educational material, prepared with professionals in mind:

Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is highly specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

Surgical Techniques and Procedures on Video

TECH introduces students to the latest techniques, the latest educational advances and to the forefront of current medical techniques. All of this in direct contact with students and explained in detail so as to aid their assimilation and understanding. And best of all, you can watch the videos as many times as you like.

Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive educational system for presenting multimedia content was awarded by Microsoft as a "European Success Story".

Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

Expert-Led Case Studies and Case Analysis

Effective learning ought to be contextual. Therefore, TECH presents real cases in which the expert will guide students, focusing on and solving the different situations: a clear and direct way to achieve the highest degree of understanding.

Testing & Retesting

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises, so that they can see how they are achieving their goals.

Classes

There is scientific evidence on the usefulness of learning by observing experts. The system known as Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

Quick Action Guides

TECH offers the most relevant contents of the course in the form of worksheets or quick action guides. A synthetic, practical, and effective way to help students progress in their learning.

06 Certificate

The Postgraduate Certificate in Treatment in Pediatric Rheumatic Diseases guarantees students, in addition to the most rigorous and up-to-date education, access to a Postgraduate Certificate issued by TECH Technological University.

“

Successfully complete this program and receive your university qualification without having to travel or fill out laborious paperwork”

This **Postgraduate Certificate in Treatment in Pediatric Rheumatic Diseases** contains the most complete and up-to-date scientific program on the market.

After the student has passed the assessments, they will receive their corresponding **Postgraduate Certificate** issued by **TECH Technological University** via tracked delivery*.

The certificate issued by **TECH Technological University** will reflect the qualification obtained in the Postgraduate Certificate, and meets the requirements commonly demanded by labor exchanges, competitive examinations, and professional career evaluation committees

Title: **Postgraduate Certificate in Treatment in Pediatric Rheumatic Diseases**

Official N° of Hours: **225 h.**

*Apostille Convention. In the event that the student wishes to have their paper certificate issued with an apostille, TECH EDUCATION will make the necessary arrangements to obtain it, at an additional cost.
