Introduction

Sometimes it is difficult to determine what mental illness may be causing a patient's presenting symptoms. Therefore, the importance of taking the time and effort to obtain an accurate diagnosis that will help determine the appropriate treatment is emphasized. This 100% online training covers the mechanism by which Mental Illnesses are triggered, from a multidisciplinary approach, and includes the main psychotropic drugs for each case. Thanks to this high-level program, students will gain in-depth knowledge of this branch of medicine, laying the scientific foundations for understanding health and disease, and their relationship with various profiles such as psychologists and psychiatry, among others.

“

Constant updating of knowledge is the key to continue providing better care to your patients with the latest techniques on the market"

Since Psychopharmacology is a multidisciplinary science and its objective is to understand the effects of drugs on people with special attention to cognitive, emotional and behavioral manifestations, it is an area that has grown rapidly in recent years. The patient will improve more quickly and experience fewer treatment-induced side effects if they get the correct diagnosis early in the process. For this purpose, TECH offers the student this Postgraduate Certificate.

Students who complete this program will acquire the necessary knowledge to offer their patients a more effective and quality treatment, through the list of drugs currently marketed and authorized in Spain by the Spanish Agency of Medicines and Health Products. The syllabus covers the main current topics in Mental Illness and Psychotropic, such a way that whoever masters them will be prepared to work in this field.

Likewise, this Postgraduate Certificate is taught in a 100% online format, so that the graduates can choose the time and place that best suits their availability, schedule and interests. Through a study method of proven efficiency, you will be able to acquire competencies in the areas of the involvement of Medicine in Mental Illnesses.

This **Postgraduate Certificate in Vademecum of Mental Illnesses** contains the most complete and up-to-date scientific program on the market. The most important features include:

- ◆ The development of case studies presented by experts in Mental Diseases
- ◆ Graphic, schematic, and practical contents with which they are created, provide scientific and practical information on the disciplines that are essential for professional practice
- ◆ Practical exercises where the self-assessment process can be carried out to improve learning
- ◆ Its special emphasis on innovative methodologies
- ◆ Theoretical lessons, questions to the expert, debate forums on controversial topics, and individual reflection work
- ◆ Content that is accessible from any fixed or portable device with an Internet connection

With this Postgraduate Certificate, you will have the flexibility to balance your academic life with your professional work”

“

This program will train you with the most up-to-date knowledge on the side effects of drugs so that they do not hinder the intervention in psychotherapy”

The program includes, in its teaching staff, professionals from the sector who bring to this program the experience of their work, in addition to recognized specialists from prestigious reference societies and universities.

Its multimedia content, developed with the latest educational technology, will allow the professionals a situated and contextual learning, that is, a simulated environment that will provide an immersive education programmed to prepare in real situations.

This program is designed around Problem-Based Learning, whereby the professionals must try to solve the different professional practice situations that arise throughout the program. This will be done with the help of an innovative system of interactive videos made by renowned experts.

Boost your future career with an academic program that will enable you to describe the harmful links between medications.

This Postgraduate Certificate is the best option if you want to update your knowledge in Mental Illnesses.

02 Objectives

This training has as its main objective to forge medical experts in Mental Disease starting from a cutting-edge content and updated with the latest developments in the field said field in the involvement of the mind. Upon successful completion of the academic program, the graduates will be fully empowered to design and implement everything learned in their sessions.

“

You will become an optimal specialist to become part of a constantly growing job market"

General Objectives

- ◆ Master the current knowledge on medication used in psychiatry and neurology
- ◆ Train to achieve the therapist-patient-medication link
- ◆ Identify the absorption properties of medication
- ◆ Develop proficiency in pharmacodynamics
- ◆ Describe in protocols the intervention programs, taking into account the characteristics and specific aspects of taking medication
- ◆ Identify the evolution of the different disorders listed in the DSM-5 or ICD-10
- ◆ Master the fields of physician-psychologist interaction in family intervention
- ◆ Train the professionals on all the updated references on the diagnosis, intervention and therapeutic process in order to interact with the medication
- ◆ Describe with decision protocols the individualized study of family members to perform a rigorous psychopathological study
- ◆ Use decision trees to permanently perform differential diagnosis
- ◆ Organize all the information within a multidisciplinary framing model in the study of the biopsychosocial framework of the psychotherapy-pharmacology relationship

Specific Objectives

- ◆ Identify study methods to demonstrate that the drug has utility
- ◆ Discovering the legal procedures for the use of the drug
- ◆ Describe the harmful links between drugs
- ◆ Use knowledge about the side effects of drugs so that they do not hinder the intervention in psychotherapy
- ◆ Describe the beneficial effects of the drug
- ◆ Master the adverse effects and toxicity of the drug

“ Upgrade your knowledge in Mental Diseases and start to see how you improve day by day in your daily practice”

03

- 1.2. Antipsychotics and Neuroleptics
- 1.3. Anxiolytics and Sedatives
- 1.4. Antidepressants
- 1.5. Antimanic or Euthymic Drugs
- 1.6. Antiseizure Medications
- 1.7. Medications for Agitation
- 1.8. Pharmacotherapy of Confusion
- 1.9. Drugs for Dementia
- 1.10. Medication Against Deficiencies

“

Take advantage of the best theoretical and practical content, ideal to optimally update you on "Vademecum of Mental Illness"

05 Methodology

This academic program offers students a different way of learning. Our methodology uses a cyclical learning approach: **Relearning**.

This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the **New England Journal of Medicine** have considered it to be one of the most effective.

“

Discover Relearning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization"

At TECH we use the Case Method

What should a professional do in a given situation? Throughout the program, students will face multiple simulated clinical cases, based on real patients, in which they will have to do research, establish hypotheses, and ultimately resolve the situation. There is an abundance of scientific evidence on the effectiveness of the method. Specialists learn better, faster, and more sustainably over time.

With TECH you will experience a way of learning that is shaking the foundations of traditional universities around the world.

According to Dr. Gérvas, the clinical case is the annotated presentation of a patient, or group of patients, which becomes a "case", an example or model that illustrates some peculiar clinical component, either because of its teaching power or because of its uniqueness or rarity. It is essential that the case is based on current professional life, trying to recreate the real conditions in the physician's professional practice.

“

Did you know that this method was developed in 1912, at Harvard, for law students? The case method consisted of presenting students with real-life, complex situations for them to make decisions and justify their decisions on how to solve them. In 1924, Harvard adopted it as a standard teaching method”

The effectiveness of the method is justified by four fundamental achievements:

1. Students who follow this method not only achieve the assimilation of concepts, but also a development of their mental capacity, through exercises that evaluate real situations and the application of knowledge.
2. Learning is solidly translated into practical skills that allow the student to better integrate into the real world.
3. Ideas and concepts are understood more efficiently, given that the example situations are based on real-life.
4. Students like to feel that the effort they put into their studies is worthwhile. This then translates into a greater interest in learning and more time dedicated to working on the course.

Relearning Methodology

At TECH we enhance the case method with the best 100% online teaching methodology available: Relearning.

This university is the first in the world to combine the study of clinical cases with a 100% online learning system based on repetition, combining a minimum of 8 different elements in each lesson, a real revolution with respect to the mere study and analysis of cases.

Professionals will learn through real cases and by resolving complex situations in simulated learning environments. These simulations are developed using state-of-the-art software to facilitate immersive learning.

At the forefront of world teaching, the Relearning method has managed to improve the overall satisfaction levels of professionals who complete their studies, with respect to the quality indicators of the best online university (Columbia University).

With this methodology, more than 250,000 physicians have been trained with unprecedented success in all clinical specialties regardless of surgical load. Our pedagogical methodology is developed in a highly competitive environment, with a university student body with a strong socioeconomic profile and an average age of 43.5 years old.

Relearning will allow you to learn with less effort and better performance, involving you more in your specialization, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation to success.

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

The overall score obtained by TECH's learning system is 8.01, according to the highest international standards.

This program offers the best educational material, prepared with professionals in mind:

Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is highly specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

Surgical Techniques and Procedures on Video

TECH introduces students to the latest techniques, the latest educational advances and to the forefront of current medical techniques. All of this in direct contact with students and explained in detail so as to aid their assimilation and understanding. And best of all, you can watch the videos as many times as you like.

Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive educational system for presenting multimedia content was awarded by Microsoft as a "European Success Story".

Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

Expert-Led Case Studies and Case Analysis

Effective learning ought to be contextual. Therefore, TECH presents real cases in which the expert will guide students, focusing on and solving the different situations: a clear and direct way to achieve the highest degree of understanding.

Testing & Retesting

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises, so that they can see how they are achieving their goals.

Classes

There is scientific evidence on the usefulness of learning by observing experts. The system known as Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

Quick Action Guides

TECH offers the most relevant contents of the course in the form of worksheets or quick action guides. A synthetic, practical, and effective way to help students progress in their learning.

06 Certificate

The Postgraduate Certificate in Vademecum of Mental Illness guarantees students, in addition to the most rigorous and up-to-date education, access to a Postgraduate Certificate issued by TECH Global University.

“

Successfully complete this program and receive your university qualification without having to travel or fill out laborious paperwork”

This program will allow you to obtain your **Postgraduate Certificate in Vademecum of Mental Illnesses** endorsed by **TECH Global University**, the world's largest online university.

TECH Global University is an official European University publicly recognized by the Government of Andorra (**official bulletin**). Andorra is part of the European Higher Education Area (EHEA) since 2003. The EHEA is an initiative promoted by the European Union that aims to organize the international training framework and harmonize the higher education systems of the member countries of this space. The project promotes common values, the implementation of collaborative tools and strengthening its quality assurance mechanisms to enhance collaboration and mobility among students, researchers and academics.

This **TECH Global University** title is a European program of continuing education and professional updating that guarantees the acquisition of competencies in its area of knowledge, providing a high curricular value to the student who completes the program.

Title: **Postgraduate Certificate in Vademecum of Mental Illnesses**

Modality: **online**

Duration: **6 weeks**

Accreditation: **8 ECTS**

*Apostille Convention. In the event that the student wishes to have their paper diploma issued with an apostille, TECH Global University will make the necessary arrangements to obtain it, at an additional cost.
