# tech 06 | Introduction

Vascular Anatomy and Physiology is a health branch that, in tune with scientific advances, is constantly evolving. In recent years, it has been detected that changes in vascular geometry and biomechanical properties can influence the progression of vascular diseases. As a result, it is possible to establish a rigorous monitoring and treatment of these diseases, ensuring the well-being of the patients who suffer from them. Therefore, keeping up to date in this field is crucial for any specialist who wishes to be at the medical forefront.

That is why TECH has created the Postgraduate Certificate in Vascular Anatomy and Physiology, which will provide students with the most advanced aspects in this field in just 6 weeks of educational experience. In 180 hours of study, you will learn about recent advances in anatomical and physiological variations of blood vessels or hormonal regulation in the vascular system. Likewise, it will delve into the mechanisms of venous recoil and venous return or the influence of age on the vascular system according to the latest scientific evidence.

All this, following a revolutionary methodology 100% online, which will allow students to develop their own study schedules to achieve a fully optimized learning. In addition, this Postgraduate Certificate has been designed and developed by excellent specialists in the area of Vascular Surgery, who have a long professional career behind them. Therefore, the knowledge you will receive throughout the program will be fully applicable in your daily practice.

This **Postgraduate Certificate in Vascular Anatomy and Physiology** contains the most complete and up-to-date scientific program on the market. The most important features include:

- Practical cases presented by experts in vascular surgery
- The graphic, schematic, and practical contents with which they are created, provide scientific and practical information on the disciplines that are essential for professional practice
- Practical exercises where self-assessment can be used to improve learning
- Its special emphasis on innovative methodologies
- Theoretical lessons, questions to the expert, debate forums on controversial topics, and individual reflection assignments
- Content that is accessible from any fixed or portable device with an Internet connection

Delve into recent advances in the anatomical and physiological variations of blood vessels through this program"

With a 100% online methodology, you will get an excellent update in Vascular Anatomy and Physiology without having to leave your home"

The program's teaching staff includes professionals from the field who contribute their work experience to this educational program, as well as renowned specialists from leading societies and prestigious universities.

The multimedia content, developed with the latest educational technology, will provide the professional with situated and contextual learning, i.e., a simulated environment that will provide immersive education programmed to learn in real situations.

This program is designed around Problem-Based Learning, whereby the professional must try to solve the different professional practice situations that arise during the academic year For this purpose, the students will be assisted by an innovative interactive video system created by renowned and experienced experts.

Enjoy a syllabus designed by specialists in Vascular Surgery who hold responsible positions in prestigious hospitals.

Don't miss this opportunity to update your knowledge with the best study facilities in the educational panorama!

# tech 10 | Objectives

# **General Objectives**

- Learn about the structure and function of blood vessels, both arterial and venous, and the regulation of blood flow in the microcirculation
- Delve into the epidemiology and Risk Factors
- Update knowledge on the main risk factors for the development of vascular diseases and the strategies for primary and secondary prevention
- Gain in-depth understanding of the pathophysiology of vascular diseases
- Inquire into the different diagnostic methods
- Delve into the diagnostic techniques used in vascular pathology, including clinical examination and vascular semiology, imaging methods, laboratory diagnosis and study of vascular function and hemodynamics
- Explain the different research methods and advances in vascular pathology, especially those focused on vascular pathology, including the development of new drug therapies, genetics and genomics in vascular diseases, and the development of new imaging techniques for the diagnosis and follow-up of vascular diseases

# **Specific Objectives**

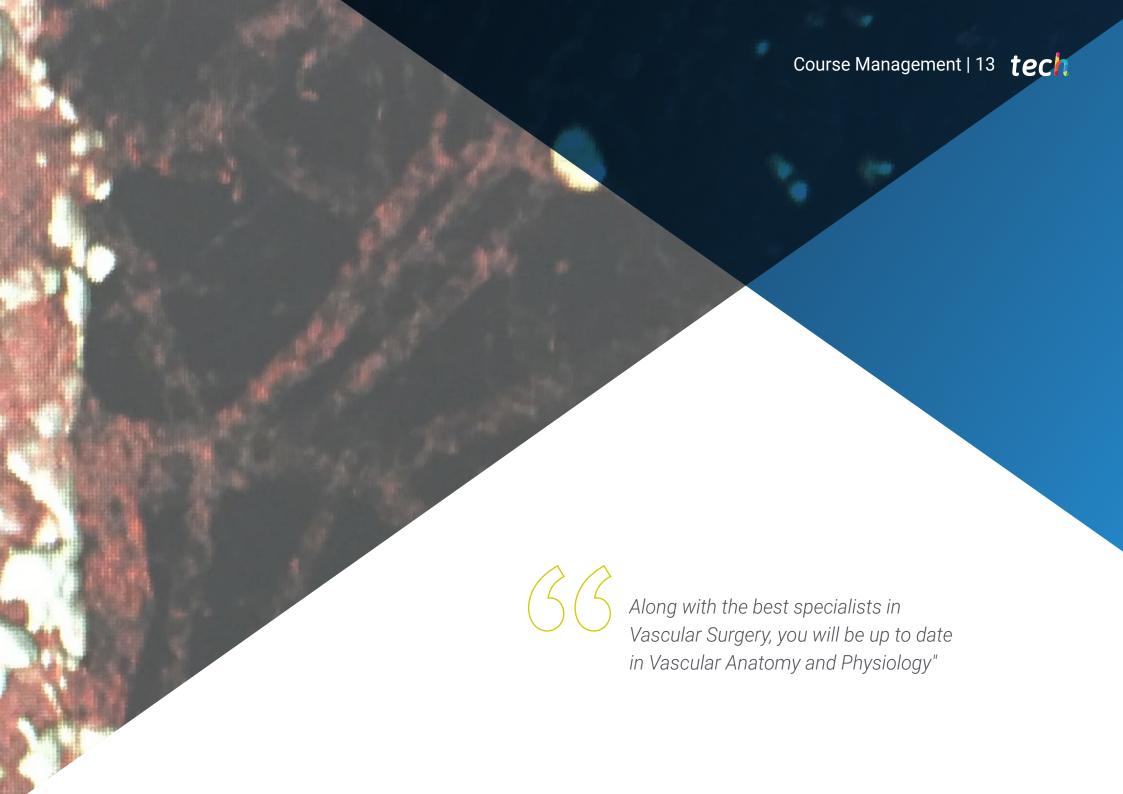

- Inquire into the anatomy and histology of arteries and veins
- Delve into the physiology of arterial and venous circulation
- Delve into the regulation of blood flow in the microcirculation

Follow the objectives that TECH has outlined for this program and place yourself at the forefront of Vascular Surgery"

# tech 14 | Course Management

#### Address

#### Dr. Del Río Sola, María Lourdes

- Head of the Angiology and vascular surgery at Valladolids Clinical University Hospital
- Specialist in Angiology and Vascular Surgery
- European Board in Vascular Surger
- Permanent Correspondents of the Royal Academy of Medicine and Surgery
- Professor at Miguel de Cervantes European University
- Associate Teacher in Health Sciences, University of Valladolid

#### **Professors**

#### Dr. Revilla Calavia, Álvaro

- Assistant Physician at the the Angiology and vascular surgery at Valladolid Clinical University Hospital
- Specialist in Angiology and Vascular Surgery
- Associate Professor at Miguel de Cervantes European University
- Doctor Cum Laude from the University of Valladolid
- Certification of the second level training course in Radiation Protection oriented to interventional practice
- Academic Correspondent of the Royal Academy of Medicine and Surgery of Valladolid

# tech 18 | Structure and Content

#### Module 1. Vascular Anatomy and Physiology

- 1.1 Anatomical structure of blood vessels
  - 1.1.1. Composition of arterial and venous walls
  - 1.1.2. The Structure of the Vascular Endothelium
  - 1.1.3. Types of cells present in the vascular wall
- 1.2 Blood Vessels Functions
  - 1.2.1. Transport of nutrients and oxygen
  - 1.2.2. Blood Pressure Regulation
  - 1.2.3. Control of blood flow and blood distribution in the organism
- 1.3 Human Circulatory System
  - 1.3.1. Anatomy and function of the heart
  - 1.3.2. Cardiac cycle and its relation to blood circulation
  - 1.3.3. Electrical conduction pathways in the heart
- 1.4 Arterial and Venous Circulation
  - 1.4.1. Structural differences between arteries and veins
  - 1.4.2. Backflow and venous return mechanisms
  - 1.4.3. Tissue Perfusion phenomena
- 1.5 Control of blood flow
  - 1.5.1. Mechanisms of local regulation of blood flow
  - 1.5.2. Regulation of blood flow by the autonomic nervous system
  - 1.5.3. Hormonal Control of blood flow
- 1.6 Adaptive mechanisms of the blood vessels
  - 1.6.1. Arterial remodeling in hypertension
  - 1.6.2. Venous adaptation in chronic venous insufficiency
  - 1.6.3. Mechanisms of vascular response to hypoxia
- 1.7 Vascularization of organs and tissues
  - 1.7.1. Characteristics of microcirculation
  - 1.7.2. Mechanisms of angiogenesis
  - 1.7.3. Vascular repercussions of systemic diseases

# Structure and Content | 19 tech

- Influence of age on the vascular system
  - Anatomical and functional changes of the vascular system with age
  - Vascular aging and atherosclerosis 1.8.2.
  - Clinical repercussions of vascular fragility in the elderly
- Anatomical and physiological Variations of blood vessels
  - Congenital Abnormalities of blood vessels
  - Variations in the anatomical arrangement of the blood vessels
  - Role of anatomical variants in vascular pathology
- 1.10 Hormonal regulation in the vascular system
  - 1.10.1. Action of the catecholamines in the cardiovascular system
  - 1.10.2. Influence of natriuretic peptides on vascular tone
  - 1.10.3. Effects of sex steroids on the vascular system

Get the most up-to-date knowledge in Vascular Anatomy and Physiology with this Postgraduate Certificate"

# tech 22 | Methodology

#### At TECH we use the Case Method

What should a professional do in a given situation? Throughout the program, students will face multiple simulated clinical cases, based on real patients, in which they will have to do research, establish hypotheses, and ultimately resolve the situation. There is an abundance of scientific evidence on the effectiveness of the method. Specialists learn better, faster, and more sustainably over time.

With TECH you will experience a way of learning that is shaking the foundations of traditional universities around the world.

According to Dr. Gérvas, the clinical case is the annotated presentation of a patient, or group of patients, which becomes a "case", an example or model that illustrates some peculiar clinical component, either because of its teaching power or because of its uniqueness or rarity. It is essential that the case is based on current professional life, trying to recreate the real conditions in the physician's professional practice.

Did you know that this method was developed in 1912, at Harvard, for law students? The case method consisted of presenting students with real-life, complex situations for them to make decisions and justify their decisions on how to solve them. In 1924, Harvard adopted it as a standard teaching method"

#### The effectiveness of the method is justified by four fundamental achievements:

- Students who follow this method not only achieve the assimilation of concepts, but also a development of their mental capacity, through exercises that evaluate real situations and the application of knowledge.
- 2. Learning is solidly translated into practical skills that allow the student to better integrate into the real world.
- 3. Ideas and concepts are understood more efficiently, given that the example situations are based on real-life.
- 4. Students like to feel that the effort they put into their studies is worthwhile. This then translates into a greater interest in learning and more time dedicated to working on the course.

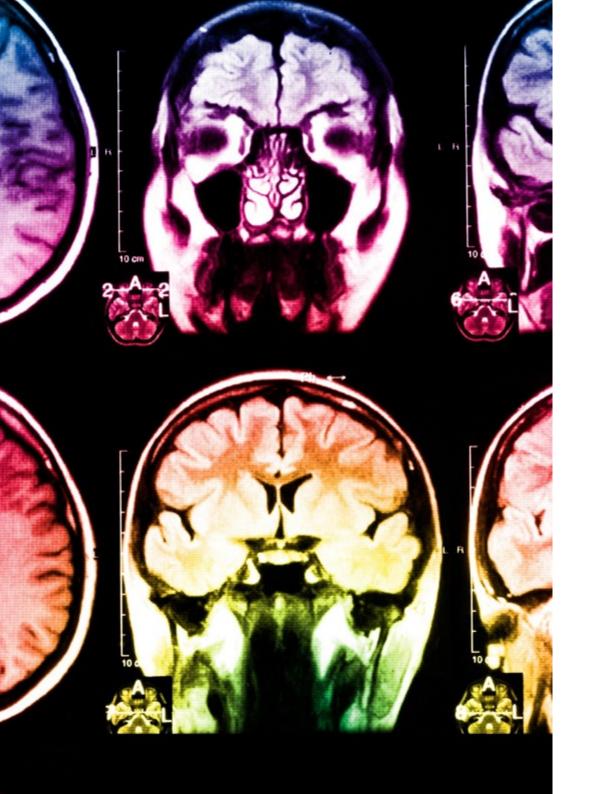

#### Relearning Methodology

At TECH we enhance the case method with the best 100% online teaching methodology available: Relearning.

This university is the first in the world to combine the study of clinical cases with a 100% online learning system based on repetition, combining a minimum of 8 different elements in each lesson, a real revolution with respect to the mere study and analysis of cases.

Professionals will learn through real cases and by resolving complex situations in simulated learning environments. These simulations are developed using state-of-the-art software to facilitate immersive learning.

## Methodology | 25 tech

At the forefront of world teaching, the Relearning method has managed to improve the overall satisfaction levels of professionals who complete their studies, with respect to the quality indicators of the best online university (Columbia University).

With this methodology, more than 250,000 physicians have been trained with unprecedented success in all clinical specialties regardless of surgical load. Our pedagogical methodology is developed in a highly competitive environment, with a university student body with a strong socioeconomic profile and an average age of 43.5 years old.

Relearning will allow you to learn with less effort and better performance, involving you more in your specialization, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation to success.

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

The overall score obtained by TECH's learning system is 8.01, according to the highest international standards.

# tech 26 | Methodology

This program offers the best educational material, prepared with professionals in mind:

#### **Study Material**

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is highly specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

#### **Surgical Techniques and Procedures on Video**

TECH introduces students to the latest techniques, the latest educational advances and to the forefront of current medical techniques. All of this in direct contact with students and explained in detail so as to aid their assimilation and understanding. And best of all, you can watch the videos as many times as you like.

#### **Interactive Summaries**

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive educational system for presenting multimedia content was awarded by Microsoft as a "European Success Story".

#### **Additional Reading**

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

### **Expert-Led Case Studies and Case Analysis**

Effective learning ought to be contextual. Therefore, TECH presents real cases in which the expert will guide students, focusing on and solving the different situations: a clear and direct way to achieve the highest degree of understanding.

#### **Testing & Retesting**

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises, so that they can see how they are achieving their goals.

#### Classes

There is scientific evidence on the usefulness of learning by observing experts.

The system known as Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

#### **Quick Action Guides**

TECH offers the most relevant contents of the course in the form of worksheets or quick action guides. A synthetic, practical, and effective way to help students progress in their learning.

# tech 30 | Certificate

This program will allow you to obtain your **Postgraduate Certificate in Vascular Anatomy and Physiology** endorsed by **TECH Global University**, the world's largest online university.

**TECH Global University** is an official European University publicly recognized by the Government of Andorra (*official bulletin*). Andorra is part of the European Higher Education Area (EHEA) since 2003. The EHEA is an initiative promoted by the European Union that aims to organize the international training framework and harmonize the higher education systems of the member countries of this space. The project promotes common values, the implementation of collaborative tools and strengthening its quality assurance mechanisms to enhance collaboration and mobility among students, researchers and academics.

This **TECH Global University** title is a European program of continuing education and professional updating that guarantees the acquisition of competencies in its area of knowledge, providing a high curricular value to the student who completes the program.

Title: Postgraduate Certificate in Vascular Anatomy and Physiology

Modality: online

Duration: 6 weeks

Accreditation: 6 ECTS

Mr./Ms. \_\_\_\_\_, with identification document \_\_\_\_\_ has successfully passed and obtained the title of:

#### Postgraduate Certificate in Vascular Anatomy and Physiology

This is a program of 180 hours of duration equivalent to 6 ECTS, with a start date of dd/mm/yyyy and an end date of dd/mm/yyyy.

TECH Global University is a university officially recognized by the Government of Andorra on the 31st of January of 2024, which belongs to the European Higher Education Area (EHEA).

In Andorra la Vella, on the 28th of February of 2024

<sup>\*</sup>Apostille Convention. In the event that the student wishes to have their paper diploma issued with an apostille, TECH Global University will make the necessary arrangements to obtain it, at an additional cost.
