Introduction

The objective of this intensive program, is to know about the main respiratory allergic diseases in the current situation, their epidemiology in the 21st century, and their diagnosis and treatment, all from a professional intervention point of view. With this program in Allergic Diseases you will be able to improve your knowledge of the most up-to-date protocol guidelines in this area of intervention.

Allergology is one of the most rapidly-evolving specialties in recent years. Become one of the most in-demand professionals of today”

Allergology has seen how, in recent years, the number of people affected by the different forms of manifestation of the disease has increased notably. In the last two decades, this increasing trend has been particularly revealed among children. And yet, very few countries have specialized services in this medical field.

This prevalence has led to allergy being considered a major health problem: according to the WHO, hundreds of millions of people suffer from rhinitis, one of the most common allergy conditions, and at least 300 million suffer from asthma. In addition to these figures, there is an enormous variety of other common and new allergies that have become commonplace in the specialist's office.

This Postgraduate Diploma has been created with the aim of providing professionals with specific training in the field of allergology to equip them with the most up-to-date knowledge in diagnosis and intervention.

In this sense, the professional must be able to offer their patients a study of their disease in which the recognition of allergens is a priority in order to work towards a lifestyle that aims to avoid symptoms and, with them, the progression of the disease.

During this program, you will learn about new lines of research and practice in allergic disease with a special interest in areas such as asthma and diagnosis by inflammatory genotypes or measurements: Induced sputum, flow cytometry, measurement of cytokines and interleukin.

A comprehensive refresher program that will also allow you to incorporate Big Data and telemedicine skills. Work routines that will provide you with a new spectrum of performance and permanent growth.

This **Postgraduate Diploma in Allergic Diseases** contains the most complete and up-to-date scientific program on the market. The most important features include:

- ♦ The latest technology in online teaching software
- ♦ A highly visual teaching system, supported by graphic and schematic contents that are easy to assimilate and understand
- ♦ Practical cases presented by practicing experts
- ♦ State-of-the-art interactive video systems
- ♦ Teaching supported by telepractice
- ♦ Continuous updating and recycling systems
- ♦ Autonomous learning: full compatibility with other occupations
- ♦ Practical exercises for self-assessment and learning verification
- ♦ Support groups and educational synergies: questions to the expert, debate and knowledge forums
- ♦ Communication with the teacher and individual reflection work
- ♦ Content that is accessible from any fixed or portable device with an Internet connection
- ♦ Banks of complementary documentation permanently available, even after the program

Get updated in one of the most in-demand specialties, with 30-40% of the world's population affected by allergies"

“

With a methodological design based on proven teaching techniques, this Postgraduate Diploma will take you through different teaching approaches to allow you to learn in a dynamic and effective way”

Our teaching staff is composed of medical professionals, practicing specialists. In this way we ensure that we deliver the educational update we are aiming for. A multidisciplinary team of doctors specialized and experienced in different environments, who will develop the theoretical knowledge efficiently, but, above all, will put at the service of the program the practical knowledge derived from their own experience: one of the differential qualities of this specialization.

This mastery of the subject is complemented by the effectiveness of the methodological design of this Postgraduate Diploma. Developed by a multidisciplinary team of e-learning experts, it integrates the latest advances in educational technology. In this way, you will be able to study with a range of easy-to-use and versatile multimedia tools that will give you the necessary skills you need for your specialization.

The design of this program is based on Problem-Based Learning: an approach that views learning as a highly practical process. To achieve this remotely, we will use telepractice learning: with the help of an innovative interactive video system, and learning from an expert, you will be able to acquire the knowledge as if you were actually dealing with the scenario you are learning about. A concept that will allow you to integrate and fix learning in a more realistic and permanent way.

Update the classic concepts of the disease and incorporate the use of new drugs and treatments into your practice.

We offer you the latest developments in advanced allergology, helping you acquire knowledge of new ways of working and approaching patients.

02

Objectives

Our goal is to prepare highly qualified professionals for work experience. An objective that is complemented, moreover, in a global manner, by promoting human development that lays the foundations for a better society. This objective is focused on helping medical professionals reach a much higher level of expertise and control. A goal that, in just six months, you will be able to achieve with a highly intensive and precise course.

“

If your goal is to take a step towards achieving the highest medical quality, this is the course for you: a program that aspires to excellence”

General Objectives

- Define 21st century allergology
- Recognize new forms of allergic disease conditions
- Review the latest international practices in allergology
- Learn the new international lines of research in allergology
- Become familiar with new approaches
- Recognize the importance of allergic disease in primary care morbidity
- Recognize allergens for appropriate preventive intervention and reduce the risk of exposure as a priority preventive measure

Specific Objectives

Module 1. Main Respiratory Allergic Diseases. Epidemiology, Diagnosis, and Treatment

- ♦ Review the allergic epidemiology of the 20th century
- ♦ Review the main respiratory allergic pathologies
- ♦ Develop up-to-date diagnostic and treatment techniques
- ♦ Learn how to interact with other involved specialties
- ♦ Define how modern Multidisciplinary Units operate
- ♦ Differential diagnosis and diagnostic techniques of the main respiratory allergic diseases: Rhinitis, Asthma, Polyposis
- ♦ Differential diagnosis of other allergic respiratory diseases: Eosinophilic Bronchitis, Allergic Bronchopulmonary Aspergillosis
- ♦ Know doses and indications of the different biological formats for treating allergic respiratory diseases

Module 2. Allergy-Related Skin Diseases

- ♦ Get up-to-date on new practice guidelines for skin diseases related to the field of allergology
- ♦ Learn about new biological drugs for skin conditions
- ♦ Understand and know how to diagnose the main allergic skin conditions: dermatitis, urticaria, edema
- ♦ Know both the traditional and modern treatments for these diseases
- ♦ Know the indications and dosage of biological formats for treating allergic skin diseases

Module 3. Food allergies. Epidemiology, Diagnosis, and Treatment

- ♦ Study the most prevalent food allergies today
- ♦ Analyze the main forms of food allergy in pediatrics
- ♦ Learn how to use the main techniques for diagnosing and treating food allergies
- ♦ Understand the different food groups, their classification and taxonomy
- ♦ Understand the different molecular profiles of different food allergies: vegetables, fish and seafood, fruits and nuts, legumes
- ♦ Diagnose and treat the most prevalent food allergies in the pediatric population: milk and egg allergy and fish allergy

Module 4. Allergy to Hymenoptera. Classification and Taxonomy

- ♦ Hymenoptera allergy analysis
- ♦ Classify and taxonomize Hymenoptera according to the patient's geographical location
- ♦ Know other types of insects of relevance in terms of their impact in different parts of the planet
- ♦ Know the classification and taxonomy of the different vespids
- ♦ Learn about diagnostic tests for hymenoptera allergy
- ♦ Become acquainted with international guidelines for treating hymenoptera allergy

03

Course Management

Within the concept of total quality of our program, we are proud to put at your disposal a Teaching Staff of the highest level, chosen for their proven experience. Professionals from different areas and fields of expertise that make up a complete, multidisciplinary team. A unique opportunity to learn from the best.

“

An impressive teaching staff, made up of professionals from different areas of expertise, will be your teachers during your training: A unique opportunity not to be missed"

Management

Dr. Fernández Nieto, María del Mar

- ♦ Assistant Physician, Allergology Unit, Jiménez Díaz Foundation IIS CIBERES (Respiratory Diseases)
- ♦ Member of the SEAIC Asthma Committee
- ♦ Member of the NeumoMadrid Asthma Group
- ♦ Member of the SEPAR Asthma Working Group
- ♦ Member of ERS
- ♦ Member of EAACI

Professors

Dr. Gómez Cardeñosa, Aída

- ♦ Attending Physician of the Allergy Department at Jiménez Díaz Foundation
- ♦ Member of the multidisciplinary asthma unit. Jiménez Díaz Foundation
- ♦ Member of the Spanish Society of Allergology (SEAIC)
- ♦ Member of the Social Networking Commission (SEAIC)
- ♦ Member of the Cutaneous Allergy Committee (SEAIC)
- ♦ Member of EAACI
- ♦ Collaborating reviser for the Journal of Investigational Allergology and Clinical Immunology

Dr. Jara Gutiérrez, Pamela

- ♦ Member of the Medical Association of Rhineland-Westphalia, Germany
- ♦ Allergy Physician trained at the Jiménez Díaz Foundation, Spain
- ♦ Surgeon from San Agustín National University, Peru
- ♦ PhD in Medicine and Surgery from the Autonomous University of Madrid, Spain
- ♦ Member of the European Academy of Allergy and Clinical Immunology. EAACI
- ♦ Member of the Society of Allergy and Clinical Immunology of Madrid-Castilla in La Mancha.S MCLM

Dr. Arochena González, Lourdes

- ♦ Attending Physician of the Allergology Department at Jiménez Díaz Foundation
- ♦ Member of the Multidisciplinary Asthma Unit at Jiménez Díaz Foundation
- ♦ Master's Degree: "Talent in Allergy" 2017. IE Business School, Madrid
- ♦ Member of the SEAIC Asthma Committee
- ♦ Member of EAACI, AAAAI, and ERS

Dr. Seoane Reula, Elena

- ♦ Allergist. Doce de Octubre Hospital. Madrid
- ♦ Immunologist. Gregorio Marañón Hospital. Madrid
- ♦ Master's degree in Pediatrics: San Jorge University. Zaragoza
- ♦ Doctor of Medicine and Surgery. Outstanding Award. Cádiz University
- ♦ Coordinator of the Children's Immuno-Allergy Society. Gregorio Marañón Hospital. Madrid. Spain
- ♦ Medical advisor of the Spanish Association of Primary Immune Deficits. (AEDIP)
- ♦ President of the Immunology Committee of the Spanish Society of Allergology (SEAIC)
- ♦ Member of the Clinical Immunology Working Group of the Spanish Society of Clinical Immunology and Pediatric Allergy (SEICAP)
- ♦ Member of the Clinical Immunology Group of the Spanish Society of Immunology (EI)
- ♦ Member of the European Society for Immunodeficiency Diseases (ESID)

04

Structure and Content

The contents of this Postgraduate Diploma in Allergic Diseases have been developed by the different experts on this program, with a clear purpose: to ensure that our students acquire each and every one of the necessary skills to become true experts in this field.

A complete and well-structured program that will take you to the highest standards of quality and success.

“

*A comprehensive teaching program,
structured in well-developed teaching units,
oriented towards learning that is compatible
with your personal and professional life"*

Module 1. Main Respiratory Allergic Diseases. Epidemiology, Diagnosis, and Treatment

- 1.1. Allergic Rhinoconjunctivitis
- 1.2. Nasosinusual Polyposis
- 1.3. Asthma . Definition and Classification
- 1.4. Asthma
 - 1.4.1. Diagnoses Treatment
- 1.5. ACOS Mixed Phenotype
- 1.6. Biological Drugs in the Treatment of Asthma
- 1.7. Thermoplasty in Asthma Treatment
- 1.8. Eosinophilic Bronchitis
- 1.9. Allergic Bronchopulmonary Aspergillosis
- 1.10. Alpha 1 Antitrypsin Deficiency and Respiratory Allergic Pathology

Module 2. Allergy-Related Skin Diseases

- 2.1. Atopic Dermatitis
- 2.2. Chronic Spontaneous Urticaria
- 2.3. Angioedema
- 2.4. Urticarial-Vasculitis
- 2.5. Alpha 1 Antitrypsin Deficiency and Skin Diseases in Allergology
- 2.6. Biological Drugs in the Treatment of Atopic Dermatitis
- 2.7. Biological Drugs in the Treatment of Chronic Urticaria
- 2.8. Biological Drugs in the Treatment of Angioedema

Module 3. Food allergies. Epidemiology, Diagnosis, and Treatment

- 3.1. Food Allergy. Classification and Taxonomy
- 3.2. Milk Allergy
- 3.3. Egg Allergy
- 3.4. Fish Allergy
- 3.5. Seafood Allergy
- 3.6. Fruit and Nut Allergy
- 3.7. Legume Allergy
- 3.8. Allergy to Other Plant-Based Foods
- 3.9. Gluten Allergy
- 3.10. Allergy to Additives and Preservatives

Module 4. Allergy to Hymenoptera. Classification and Taxonomy

- 4.1. Classification and Taxonomy
- 4.2. Epidemiology and Prevalence
- 4.3. Geographical Location of the Different Allergologically Relevant Hymenoptera
- 4.4. Systemic Allergic Reactions due to Hymenoptera: Bees
- 4.5. Systemic Allergic Reactions due to Hymenoptera: Wasps
- 4.6. Diagnosis of Allergic Reactions to Hymenoptera
- 4.7. Prophylaxis of Reactions to Hymenoptera Venoms
- 4.8. Treatment of Hymenoptera Allergy
- 4.9. Allergy to Hymenoptera Venom and Mastocytosis
- 4.10. Other Insect Bites

GOLOGY

05 Methodology

This academic program offers students a different way of learning. Our methodology uses a cyclical learning approach: **Relearning**.

This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the **New England Journal of Medicine** have considered it to be one of the most effective.

“

Discover Relearning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization"

At TECH we use the Case Method

What should a professional do in a given situation? Throughout the program, students will face multiple simulated clinical cases, based on real patients, in which they will have to do research, establish hypotheses, and ultimately resolve the situation. There is an abundance of scientific evidence on the effectiveness of the method. Specialists learn better, faster, and more sustainably over time.

With TECH you will experience a way of learning that is shaking the foundations of traditional universities around the world.

According to Dr. Gervas, the clinical case is the annotated presentation of a patient, or group of patients, which becomes a "case", an example or model that illustrates some peculiar clinical component, either because of its teaching power or because of its uniqueness or rarity. It is essential that the case is based on current professional life, trying to recreate the real conditions in the physician's professional practice.

“

Did you know that this method was developed in 1912, at Harvard, for law students? The case method consisted of presenting students with real-life, complex situations for them to make decisions and justify their decisions on how to solve them. In 1924, Harvard adopted it as a standard teaching method”

The effectiveness of the method is justified by four fundamental achievements:

1. Students who follow this method not only achieve the assimilation of concepts, but also a development of their mental capacity, through exercises that evaluate real situations and the application of knowledge.
2. Learning is solidly translated into practical skills that allow the student to better integrate into the real world.
3. Ideas and concepts are understood more efficiently, given that the example situations are based on real-life.
4. Students like to feel that the effort they put into their studies is worthwhile. This then translates into a greater interest in learning and more time dedicated to working on the course.

Relearning Methodology

At TECH we enhance the case method with the best 100% online teaching methodology available: Relearning.

This university is the first in the world to combine the study of clinical cases with a 100% online learning system based on repetition, combining a minimum of 8 different elements in each lesson, a real revolution with respect to the mere study and analysis of cases.

Professionals will learn through real cases and by resolving complex situations in simulated learning environments. These simulations are developed using state-of-the-art software to facilitate immersive learning.

At the forefront of world teaching, the Relearning method has managed to improve the overall satisfaction levels of professionals who complete their studies, with respect to the quality indicators of the best online university (Columbia University).

With this methodology, more than 250,000 physicians have been trained with unprecedented success in all clinical specialties regardless of surgical load. Our pedagogical methodology is developed in a highly competitive environment, with a university student body with a strong socioeconomic profile and an average age of 43.5 years old.

Relearning will allow you to learn with less effort and better performance, involving you more in your specialization, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation to success.

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

The overall score obtained by TECH's learning system is 8.01, according to the highest international standards.

This program offers the best educational material, prepared with professionals in mind:

Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is highly specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

Surgical Techniques and Procedures on Video

TECH introduces students to the latest techniques, the latest educational advances and to the forefront of current medical techniques. All of this in direct contact with students and explained in detail so as to aid their assimilation and understanding. And best of all, you can watch the videos as many times as you like.

Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive educational system for presenting multimedia content was awarded by Microsoft as a "European Success Story".

Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

Expert-Led Case Studies and Case Analysis

Effective learning ought to be contextual. Therefore, TECH presents real cases in which the expert will guide students, focusing on and solving the different situations: a clear and direct way to achieve the highest degree of understanding.

Testing & Retesting

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises, so that they can see how they are achieving their goals.

Classes

There is scientific evidence on the usefulness of learning by observing experts. The system known as Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

Quick Action Guides

TECH offers the most relevant contents of the course in the form of worksheets or quick action guides. A synthetic, practical, and effective way to help students progress in their learning.

06 Certificate

The Postgraduate Diploma in Allergic Diseases guarantees students, in addition to the most rigorous and up-to-date education, access to a Postgraduate Diploma issued by TECH Technological University.

“

Successfully complete this program and receive your university qualification without having to travel or fill out laborious paperwork”

This **Postgraduate Diploma in Allergic Diseases** contains the most complete and up-to-date scientific program on the market.

After the student has passed the assessments, they will receive their corresponding **Postgraduate Diploma**, issued by **TECH Technological University** via tracked delivery*.

The certificate issued by **TECH Technological University** will reflect the qualification obtained in the Postgraduate Diploma, and meets the requirements commonly demanded by labor exchanges, competitive examinations, and professional career evaluation committees.

Title: **Postgraduate Diploma in Allergic Diseases**

Official N° of Hours: **600 h.**

*Apostille Convention. In the event that the student wishes to have their paper certificate issued with an apostille, TECH EDUCATION will make the necessary arrangements to obtain it, at an additional cost.
