Introduction

Cervical cancer is the most common cancer in women of reproductive age and one of the most common cancers globally in developing countries. For its correct diagnosis and treatment, professionals must be highly skilled in the management of this disease. This program offers specialists the opportunity to update their knowledge in a practical way using the latest educational technology tailored to their needs.

“

New circumstances in gynecologic oncology have pushed us to develop new educational programs that meet the real needs of experienced professionals, so that they can incorporate the latest advances into their daily practice”

The high prevalence of recurrent cervical HPV infection in women makes this disease a major public health risk. Furthermore, Cervical Cancer is one of the only cancers that can be effectively prevented primarily through the use of prophylactic vaccines and secondly through screening techniques such as cervical cytology and HPV detection.

Thorough knowledge of the disease is essential both for general practitioners in terms of prevention and for specialist physicians providing treatment after an accurate diagnosis. It is, therefore, important for the professional to have in-depth knowledge of this disease, how to prevent it and how to manage it in case of failed prevention, but it is hard to find specific programs in this area.

By obtaining this Postgraduate Diploma, professionals can improve their understanding, help prevent disease, and establish their credentials in the field of cervical pathology and Cervical Cancer.

In short, thanks to this Postgraduate Diploma, the student will be able to conceptually manage the principles of tumor biology and targeted medical treatments, as well as all issues related to the diagnosis and treatment of cervical tumors in women.

This **Postgraduate Diploma in Cervical Cancer** contains the most complete and up-to-date scientific program on the market. The most important features include:

- The examination of clinical cases, recorded with POV (*Point of View*) systems from different angles, presented by experts in gynecology and other disciplines
- The graphic, schematic, and practical contents with which they are created, provide scientific and practical information on the disciplines that are essential for professional practice
- Presentation of practical workshops on procedures and techniques
- An algorithm-based interactive learning system for decision-making in the clinical situations presented throughout the course
- Action protocols and clinical practice guidelines, which cover the most important latest developments in this specialist area
- All of this will be complemented by theoretical lessons, questions to the expert, debate forums on controversial topics, and individual reflection assignments
- Special emphasis on test-based medicine and research methodologies in oncology
- Content that is accessible from any fixed or portable device with an Internet connection

Seize this opportunity and take the next step to get up to date on the latest developments in cervical cancer treatments”

“ *This Postgraduate Diploma may be the best investment you can make when selecting a refresher program, for two reasons: in addition to updating your knowledge on Cervical Cancer, you will obtain a Postgraduate Diploma from TECH Global University*”

The teaching staff includes a team of renowned gynecologists and oncologists, who bring their professional experience to this program, in addition to recognized specialists belonging to leading scientific societies.

The multimedia content developed with the latest educational technology will provide the professional with situated and contextual learning, i.e., a simulated environment that will provide an immersive training program to train in real situations.

The design of this program focuses on problem-based learning, by means of which the specialist must try to solve the different professional practice situations that arise throughout the program. For this reason, you will be assisted by an innovative, interactive video system created by renowned and experienced experts in the field of gynecology and oncology with extensive teaching experience.

Incorporate the latest developments in the approach to Cervical Cancer into your daily practice and improve the prognosis of your patients.

This Postgraduate Diploma will allow you to learn about the latest advances in Cervical Cancer, using the latest educational technology.

02 Objectives

The main objective is to cover advances in the approach to Cervical Cancer, ensuring that the specialist can update their knowledge in a practical way, with the latest educational technology and adapting the educational process to their real needs.

“

This program will give you a sense of assurance when making decisions about Cervical Cancer, and will help you grow both professionally”

General Objective

- ♦ Gain up-to-date, specialist knowledge on the procedures and techniques Cervical Cancer treatment, incorporating the latest advances in order to enhance daily medical practice

“

Make the most of this opportunity and take the next step to get up to date on the latest developments in Cervical Cancer”

Specific Objectives

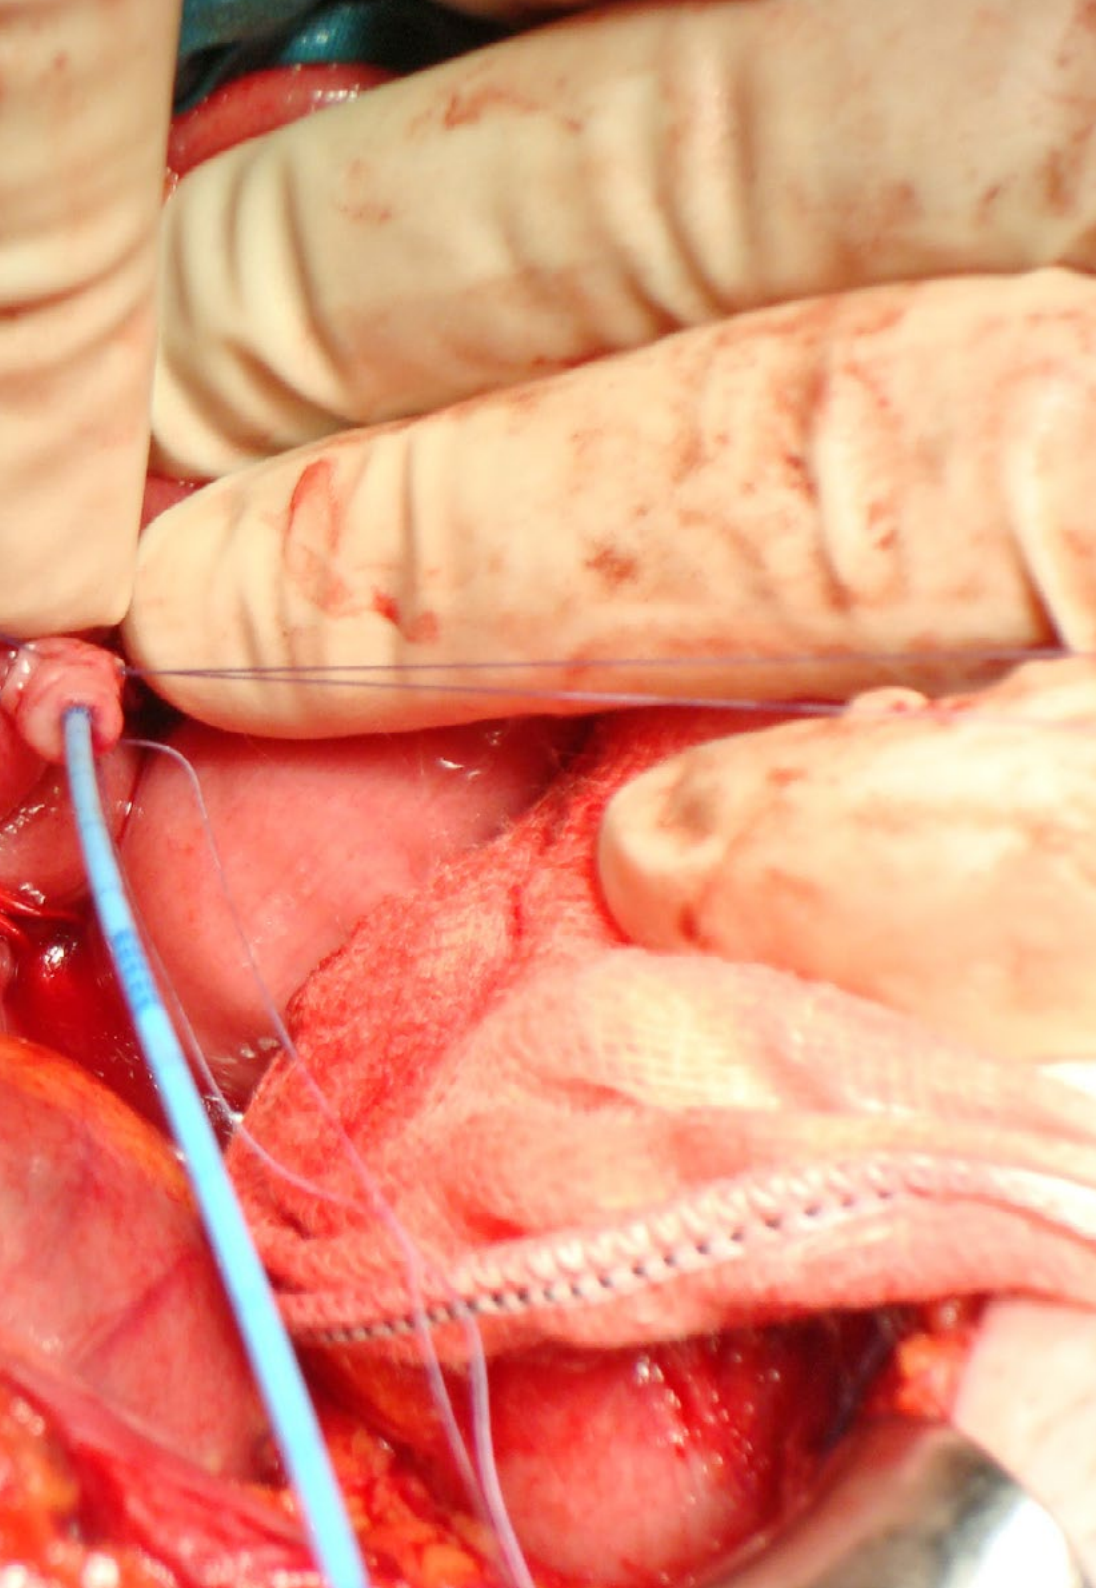

Module 1. Biological Basis of Cancer

- ◆ Recognize and understand the molecular bases of carcinogenesis as well as its development and metastasis production
- ◆ Define the basis of cellular growth regulation
- ◆ Understand the role of carcinogens in the formation of genital cancer
- ◆ Gain up-to-date knowledge of cancer genetics
- ◆ Understand the cellular mechanisms of programmed cell death and apoptosis and their relationship and activity with malignant pathology
- ◆ Interpret the mechanisms of cancer production and distant metastasis at a molecular level
- ◆ Identify the origins of genetic alterations that provoke cancer
- ◆ Identify the epigenetic changes and oncogenes related with genital tract tumor pathology
- ◆ Explain the mechanisms tumor neof ormation in blood vessels
- ◆ Recognize respiratory symptomatology, such as that caused by pleural effusion, in the treatment of gynecologic cancer

Module 2. Basis of Chemotherapy Treatment, Adverse Effects and New Therapies

- ♦ Identify the essentials for the use of chemotherapy in gynecologic oncology as well as adverse effects and complications
- ♦ Identify the basic factors that are involved in chemotherapy treatment
- ♦ Highlight the influence of chemotherapy in the cellular cycle
- ♦ Identify the action mechanisms of antineoplastic agents
- ♦ Recognize the mechanisms for the resistance of medical treatments in gynecologic cancer
- ♦ Gain up-to-date knowledge of toxicity and side effects
- ♦ Review the available antineoplastic drugs and their characteristics
- ♦ Identify cases in which patient observation can be used without using adjuvant treatment
- ♦ Understand the role of new tests such as positron emission tomography for cervical cancer
- ♦ Evaluate the role of tumor markers such as SCC
- ♦ Update the role of laparoscopy in the performance of radical hysterectomy and para-aortic staging lymphadenectomy for non-early tumor stages
- ♦ Evaluate the use of medical and surgical therapy in metastatic, recurrent or persistent illness
- ♦ Study and analyze the postoperative care of patients to identify any complications early on
- ♦ Appropriately assess the role of chemotherapy in gestational trophoblastic disease
- ♦ Manage the progression of pelvic tumor disease in the most effective way

Module 3. Cervical Cancer I

- ♦ Identify pre-invasive pathologies of the cervix and correctly apply early diagnosis methods
- ♦ Laparoscopic removal of pelvic sentinel lymph node
- ♦ Determine the etiology and etiopathogenesis of cervical cancer and its stages of development
- ♦ Gain up-to-date knowledge of the distant imaging techniques for diagnosing cervical cancer such as magnetic resonance and scanning
- ♦ Acquire up-to-date knowledge of the treatment for preinvasive cervical lesions including surgery and immunotherapy
- ♦ Identify the role of the sentinel node in cervical cancer and the pelvic sentinel node labeled with indocyanine green
- ♦ Gain up-to-date knowledge of the use of concurrent and neoadjuvant chemotherapy in cervical cancer
- ♦ Compare the characteristics of squamous cell carcinoma and cervical adenocarcinoma

Module 4. Cervical Cancer II

- ♦ Classify and treat cervical cancers in the most appropriate way
- ♦ Know the risk factors for contracting the human papillomavirus
- ♦ Review the application of techniques for early diagnosis of cervical cancer and hereditary-familial diseases affecting the cervix
- ♦ Evaluate the role of FIGO and TNM classification in cervical cancer and its prognostic role
- ♦ Revise the different invasive surgical techniques for cervical cancer, especially the different types of radical hysterectomy with or without nerve preservation
- ♦ Identify the indications of chemotherapy and radiotherapy in cervical cancer
- ♦ Gain up-to-date knowledge of the invasive cervical adenocarcinoma and adenocarcinoma in situ

03

Course Management

Including renowned international directors, all the content of this program is focused on the most current clinical practice. In this way, the specialist will have access to a privileged teaching content, enriched with a multitude of real examples and practical cases analyzed. In this way, the most outstanding advances in Gynecologic Oncology can be incorporated into daily practice, endorsed by recognized experts with multiple recognitions and accumulated clinical merits.

“

Get up-to-date with the latest advances in Gynecologic Oncology, supported by the experience of leading specialists in the field"

International Guest Director

Dr. Anil K. Sood is a leading gynecologic oncologist and scientist internationally recognized for his contributions to the study and treatment of Ovarian Cancer. In this regard, he has served as Vice Chair of Translational Research in the Departments of Gynecologic Oncology and Cancer Biology at The University of Texas MD Anderson Cancer Center, where he has also served as Co-Director of the RNA Interference and Non-Coding RNA Center. In addition, he has directed the Blanton-Davis Multidisciplinary Ovarian Cancer Research Program and co-led the Ovarian Cancer Moon Shot Program. In fact, his research focus has been on Cancer Biology, with emphasis on Angiogenesis, Metastasis and RNAi Therapy.

He has also pioneered the development of new strategies for the delivery of interfering RNA (siRNA) in cancer treatments, achieving significant advances in the creation of targeted therapies for targets previously considered “untreatable”. His research has also addressed the influence of Neuroendocrine Stress on tumor growth and the mechanisms of resistance to anticancer treatments. This research has allowed crucial advances in the understanding of how the tumor microenvironment and neural effects impact the progression of Gynecologic Cancer.

He is the recipient of multiple awards, including the Research Professor Award from the American Cancer Society and the Claudia Cohen Research Foundation Prize for Outstanding Researcher in Gynecologic Cancer. In turn, he has contributed more than 35 book chapters and numerous peer-reviewed scientific publications, as well as filing 11 patents and technology licenses. In short, his work has been instrumental in academia and clinical practice, where he has continued to share his expertise as an invited lecturer and leader in Gynecologic Cancer research.

Dr. Sood, Anil K.

- Vice Chair of Translational Research at MD Anderson Cancer Center, Texas, United States
- Co-Director of the Center for RNA Interference and Non-Coding RNA at MD Anderson Cancer Center
- Director of the Blanton-Davis Multidisciplinary Ovarian Cancer Research Program
- Co-Director of the Ovarian Cancer Moon Shot Program
- Fellow in Gynecologic Oncology at the University of Iowa Hospitals
- Doctor of Medicine from the University of North Carolina
- Member of: American Society for Clinical Investigation (ASCI), American Association for the Advancement of Science (AAAS) and Association of American Physicians (AAP)

“

Thanks to TECH, you will be able to learn with the best professionals in the world”

International Guest Director

Dr. Allan Covens is an international eminence in the field of Gynecologic Oncology. Throughout his distinguished professional career, the Postgraduate Diploma has investigated germ cell tumors, Gestational Trophoblastic Disease, Cervical Cancer, as well as radical and reconstructive surgical techniques. In particular, he is a reference for his medical innovations that, after different types of surgeries, aim at preserving the fertility of patients. Thanks to these contributions, he has accumulated more than 32 awards and grants.

In addition, this eminent specialist has performed live interventions in several continents, also taking his medical contributions to nearly 30 countries around the world through lectures. He is also the author of more than 135 peer-reviewed publications and has participated in 16 textbooks on Gynecologic Oncology. Another of his works is a DVD/book on advanced laparoscopic techniques in this field of women's health.

In turn, Dr. Covens has chaired the Division of Gynecologic Oncology at the University of Toronto and Sunnybrook Health Sciences Centre. At the latter institution, he directed his fellowship to train potential scientists for 13 years. He also serves on the board of the Global Curriculum Review Committee and coordinates the Rare Tumor Committee. He is also a member of MAGIC, a multidisciplinary team developing protocols for malignant germ cell tumors.

In addition, this distinguished scientist is on the editorial board of the journal Cancer and reviews articles for Lancet Oncology, Gynecologic Oncology, International Journal of Gynecologic Cancer, among many other specialized publications.

Dr. Covens, Allan

- Director of the Division of Gynecologic Oncology at the University of Toronto
- Advisor to Moi University, Eldoret, Kenya
- Past President of the International Gynecologic Cancer Society (IGCS)
- Advisor to the Editorial Board of the journal Cancer
- Specialist in Obstetrics and Gynecology from the University of Western Ontario
- Medical Degree from the University of Toronto
- Research Fellowship in Gynecologic Oncology at the University of Toronto/McMaster's Degree in Gynecologic Oncology
- Member of: Rare Tumor Committee, Gynecology, Cervical and Gestational Trophoblastic Committee of the NRG Postgraduate Certificate in Treatment and Management of Uterine Sarcoma

“

Thanks to TECH you will be able to learn with the best professionals in the world”

International Guest Director

As one of the pioneer surgeons in Brazil by introducing advanced techniques of **Laparoscopic Oncologic Surgery** in Paraná, Dr. Reitan Ribeiro is one of the most prolific figures in this specialty. So much so that he has even received recognition as an **honorary citizen** of the city of Curitiba, highlighting his work in the creation and development of the technique of **Uterine Transposition**.

The IJGC, International Journal of Gynecologic Cancer, has also recognized the outstanding work of Dr. Reitan Ribeiro. His publications on **Uterine Robotic Transposition in Cervical Cancer**, Uterine Transposition after Radical Trachelectomy and directed research in the technique of Uterine Transposition for patients with gynecological cancers who want to preserve fertility are highlighted. He has received the **national award for medical innovation** for his research in the field of Uterine Transposition, highlighting these advances in the preservation of the patient's fertility.

His professional career is not without success, as he holds **numerous positions of responsibility** in the prestigious Erasto Gaertner Hospital. He directs the research program in Gynecologic Oncology of this center, being also director of the Fellowship program in this specialty, in addition to coordinating the training program in Robotic Surgery focused on Gynecologic Oncology.

At the academic level, he has completed internships at numerous prestigious centers, including Memorial Sloan Kettering Cancer Center, McGill University and the National Cancer Institute of Brazil. He balances his clinical responsibilities with consulting work for leading medical and pharmaceutical companies, mainly Johnson & Johnson and Merck Sharp & Dohme.

Dr. Ribeiro, Reitan

- Research Director, Gynecologic Oncology Department - Erasto Gaertner Hospital - Brazil
- Director of the Fellowship Program in Gynecologic Oncology at the Erasto Gaertner Hospital
- Director of the Robotic Surgery Training Program of the Gynecologic Oncology Department of the Erasto Gaertner Hospital
- Senior Surgeon in the Department of Gynecologic Oncology, Erasto Gaertner Hospital
- Director of the Resident Oncologist Program at the Erasto Gaertner Hospital
- Consultant at Johnson & Johnson and Merck Sharp & Dohme
- Degree in Medicine at the Federal University of Porto Alegre
- Fellowship in Gynecologic Oncologic Surgery at Memorial Sloan Kettering Cancer Center
- Fellowship in Minimally Invasive Surgery, McGill University
- Internships at Governador Celso Ramos Hospital, National Cancer Institute of Brazil and Erasto Gaertner Hospital
- Certification in Oncologic Surgery by the Oncologic Surgery Society of Brazil

Thanks to TECH you will be able to learn with the best professionals in the world"

04

Structure and Content

The syllabus has been designed by a team of professionals aware of the importance of up-to-date medical education on gynecologic oncology treatments, who are committed to excellent teaching using new educational technologies.

A close-up photograph of a person's face, focusing on the eye area. A medical procedure is being performed, with a small, clear, gel-like substance applied to the eye. The person's skin is light-colored, and the background is dark and out of focus.

“

This Postgraduate Diploma in Cervical Cancer contains the most complete and up-to-date scientific program on the market”

Module 1. Biological Basis of Cancer

- 1.1. Cell Growth Regulation
- 1.2. Carcinogenesis and Carcinogens
- 1.3. Genetics of Cancer
- 1.4. Mechanisms of Apoptosis and Programmed Cell Death
- 1.5. Molecular Mechanisms of Cancer Production and Metastasis
- 1.6. Origin of Genetic Alterations
- 1.7. Epigenetic Changes and Oncogenes
- 1.8. Angiogenesis

Module 2. Basis of Chemotherapy Treatment, Adverse Effects and New Therapies

- 2.1. Introduction
- 2.2. Justification for the Use of Chemotherapy
- 2.3. Development of Cancer and the Influence of Chemotherapy
 - 2.3.1. Tumor Growth
 - 2.3.2. Cellular Cycle
 - 2.3.3. Specific Drugs for each of the Cellular Phases
- 2.4. Factors that Influence Treatment
 - 2.4.1. Tumor Characteristics
 - 2.4.2. Patient Tolerance
 - 2.4.3. Treatment Objectives
 - 2.4.4. Pharmacological Factors and Administration Routes
- 2.5. Principles of Resistance to Drugs
- 2.6. Combined Therapies
- 2.7. Treatment or Dosis Adjustments
- 2.8. Drug Toxicity
- 2.9. General Management of Secondary Effects and Complications of Chemotherapy

- 2.10. Antineoplastic Agents in Gynecology
 - 2.10.1. Alkylating Agents
 - 2.10.2. Antibiotics
 - 2.10.3. Antimetabolites
 - 2.10.4. Plant Alkaloids
 - 2.10.5. Topoisomerase 1 Inhibitors
 - 2.10.6. Antiangiogenic Drugs
 - 2.10.7. PARP Inhibitors
 - 2.10.8. Tyrosine Kinase Inhibitors
 - 2.10.9. Other Drugs
- 2.11. Future Indications

Module 3. Cervical Cancer I

- 3.1. Epidemiology and Etiopathogenesis of the Disease
- 3.2. Precancerous Lesions and the Evolutionary Process
- 3.3. Risk Factors for Contracting the Disease
- 3.4. Notions about Cervical Pathology and HPV
- 3.5. Normal Colposcopy and Vulvoscopy
- 3.6. Abnormal Colposcopy and Vulvoscopy
- 3.7. Cervical Cancer Screening
- 3.8. Hereditary-Familial Carcinoma
- 3.9. Forms of Presentation in Anatomic Pathology
- 3.10. Diagnostic Process: Imaging Tests and Tumor Markers
- 3.11. Role of New Technologies such as PET-CT
- 3.12. FIGO and TNM Classification in Cervical Carcinoma

05 Methodology

This academic program offers students a different way of learning. Our methodology uses a cyclical learning approach: **Relearning**.

This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the **New England Journal of Medicine** have considered it to be one of the most effective.

“

Discover Relearning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization"

At TECH we use the Case Method

What should a professional do in a given situation? Throughout the program, students will face multiple simulated clinical cases, based on real patients, in which they will have to do research, establish hypotheses, and ultimately resolve the situation. There is an abundance of scientific evidence on the effectiveness of the method. Specialists learn better, faster, and more sustainably over time.

With TECH you will experience a way of learning that is shaking the foundations of traditional universities around the world.

According to Dr. Gervas, the clinical case is the annotated presentation of a patient, or group of patients, which becomes a "case", an example or model that illustrates some peculiar clinical component, either because of its teaching power or because of its uniqueness or rarity. It is essential that the case is based on current professional life, trying to recreate the real conditions in the physician's professional practice.

Relearning Methodology

At TECH we enhance the case method with the best 100% online teaching methodology available: Relearning.

This university is the first in the world to combine the study of clinical cases with a 100% online learning system based on repetition, combining a minimum of 8 different elements in each lesson, a real revolution with respect to the mere study and analysis of cases.

Professionals will learn through real cases and by resolving complex situations in simulated learning environments. These simulations are developed using state-of-the-art software to facilitate immersive learning.

Expert-Led Case Studies and Case Analysis

Effective learning ought to be contextual. Therefore, TECH presents real cases in which the expert will guide students, focusing on and solving the different situations: a clear and direct way to achieve the highest degree of understanding.

Testing & Retesting

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises, so that they can see how they are achieving their goals.

Classes

There is scientific evidence on the usefulness of learning by observing experts. The system known as Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

Quick Action Guides

TECH offers the most relevant contents of the course in the form of worksheets or quick action guides. A synthetic, practical, and effective way to help students progress in their learning.

06 Certificate

The Postgraduate Diploma in Cervical Cancer guarantees students, in addition to the most rigorous and up-to-date education, access to a Postgraduate Diploma issued by TECH Global University.

“

Successfully complete this program and receive your university qualification without having to travel or fill out laborious paperwork”

This private qualification will allow you to obtain a **Postgraduate Diploma in Cervical Cancer** endorsed by **TECH Global University**, the world's largest online university.

TECH Global University is an official European University publicly recognized by the Government of Andorra (*official bulletin*). Andorra is part of the European Higher Education Area (EHEA) since 2003. The EHEA is an initiative promoted by the European Union that aims to organize the international training framework and harmonize the higher education systems of the member countries of this space. The project promotes common values, the implementation of collaborative tools and strengthening its quality assurance mechanisms to enhance collaboration and mobility among students, researchers and academics.

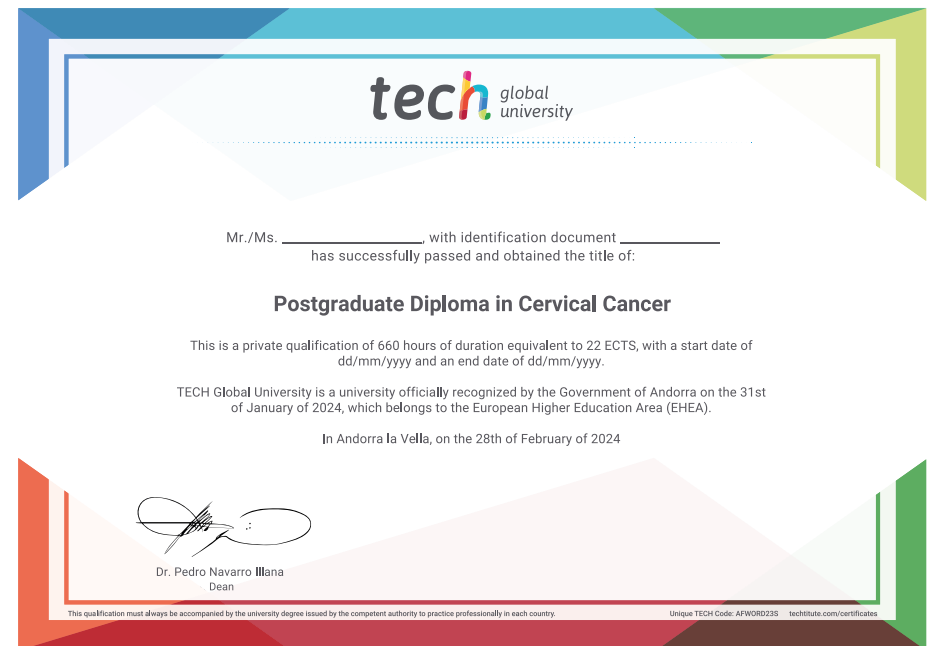

This **TECH Global University** private qualification is a European program of continuing education and professional updating that guarantees the acquisition of competencies in its area of knowledge, providing a high curricular value to the student who completes the program.

Title: **Postgraduate Diploma in Cervical Cancer**

Modality: **online**

Duration: **6 months**

Accreditation: **22 ECTS**

*Apostille Convention. In the event that the student wishes to have their paper diploma issued with an apostille, TECH Global University will make the necessary arrangements to obtain it, at an additional cost.
