tech 06 | Introduction

In the health structure, medical divisions are fundamental in performing different health processes, where the paradigm of Clinical Management is increasingly imposed, making it necessary to provide training in this area for physicians who develop or may reach positions of responsibility in health care, either in middle management, health care or in medical director and manager positions.

The new challenges of the sector, such as the approach to complexity and chronicity, the relationships between professional groups, citizens (users, patients, clients) and providers, the development of new health technologies, the need to increase efficiency in the use of resources, to assume the new leadership, participative and transparent, or to gain its position in the interdisciplinary team, are challenges to be addressed.

Increase your competencies in the approach to Medical Quality Management through this Postgraduate Diploma"

This **Postgraduate Diploma in Medical Quality Management** contains the most complete and up-to-date scientific program on the market. The most important features include:

- Development of practical cases carried out by experts in health management and other specialties
- The graphic, schematic, and practical contents with which they are created provide scientific and practical information on the situations that regularly occur in the hospital setting
- Presentation of practical workshops on procedures and decision making
- Algorithm-based interactive learning system for decision-making in the situations that are
 presented to the student
- Action protocols, where you can find the latest trends in health management
- All this will be complemented by theoretical lessons, questions to the expert, debate forums on controversial topics, and individual reflection assignments. With a special emphasis on scientific methods and research methodologies in health management
- Content that is accessible from any fixed or portable device with an Internet connection

This Postgraduate Diploma is the best investment you can make when selecting a refresher program, for two reasons: in addition to train your knowledge as a Clinical Manager, you will obtain a qualification endorsed TECH Technological University"

It includes, in its teaching staff, a team of prestigious health management professionals, who bring to this training the experience of their work, in addition to recognized health specialists who complement the program in an interdisciplinary way.

The multimedia content developed with the latest educational technology will provide doctors with situated and contextual learning, i.e., a simulated environment that will provide an immersive learning program to practice in real situations.

This program is designed around Problem-Based Learning, through which the physician must try to solve the different professional practice situations that arise throughout the program. This will be done with the help of an innovative interactive video system developed by renowned experts in the field of health management, with extensive teaching experience.

You will be able to complete the Postgraduate Diploma 100% online, adapting it to your needs and allowing you to study while you carry out your full-time healthcare work.

Increase the quality of your management with this training program and improve patient care.

tech 10 | Objectives

General Objective

• Improve knowledge and professional competencies in health quality management from a clinical management point of view, knowing the practical methodological tools to apply in the critical areas of health management and direction, both institutional and day-to-day

With this program you will be able to better manage resources, optimize quality and improve processes in your healthcare institution"

Specific Objectives

Module 1. Clinical Management

- Understand, interpret, transmit and apply regulatory norms for the activities and functions
 of health professionals in Clinical Management, in accordance with the legal framework
 of the health sector
- Recognize and know how to apply and interpret health law in order to contextualize
 clinical practice in terms of professional and social responsibility, as well as the ethical
 aspects associated with health care

Module 2. Quality Management

- Analyze and apply techniques, styles and methods to define, conduct and lead professional – talent management policies in health institutions
- Within a clinical setting, recognize, apply and learn how to assess the usefulness of different leadership and management tools that can also be applied to the context of healthcare practice
- Lead patient quality and safety systems, applied to the context of Clinical Management units

Module 3. Quality Accreditation in Healthcare

- Integrate the ability to analyze the different healthcare benefits
- Develop methodological and instrumental skills in epidemiological research and the assessment of centers, services, technologies and the health programs

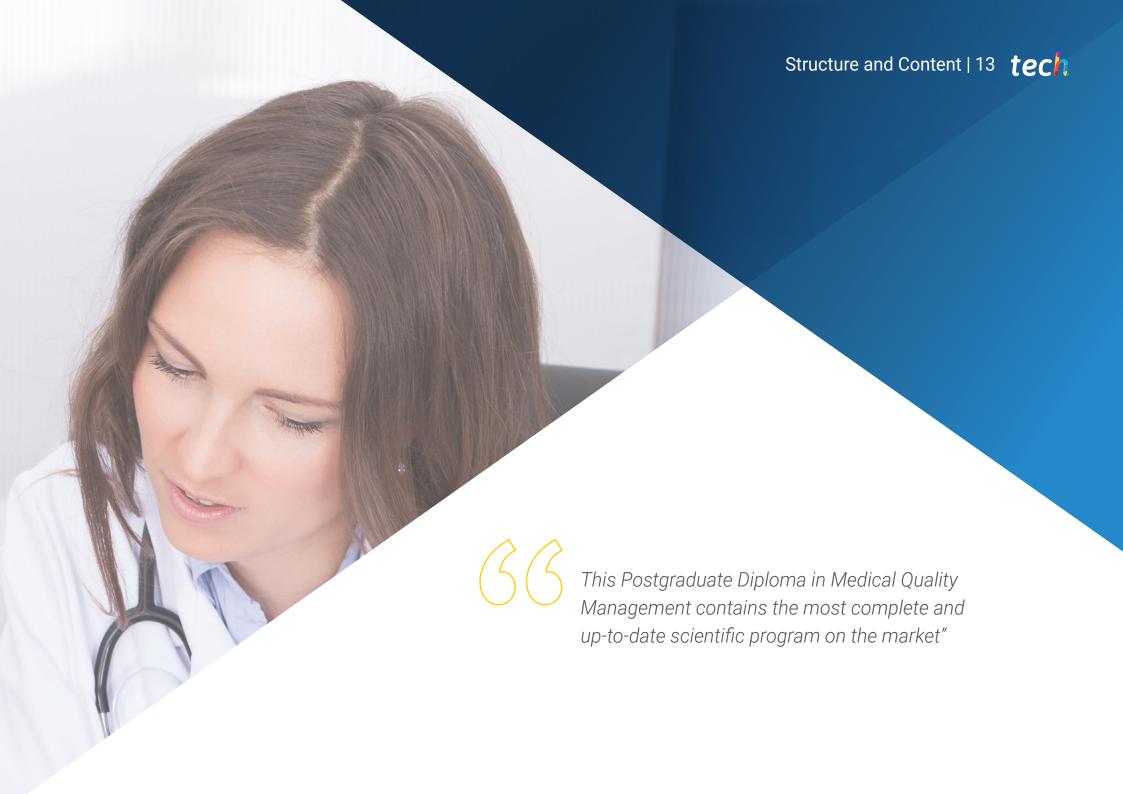

Module 4. Patient Security

- Place the definition of patient safety in the current context
- Recognize the risks of infections associated with nursing care, especially in the care of venous accesses
- $\bullet \ \ \text{Identify the risk of falls in order to anticipate and monitor falls in the hospitalized patient}$

The structure of the syllabus has been designed by a team of professionals knowledgeable about the implications of medical Training in Clinical Management; aware of the relevance of current specialization and committed to quality teaching through new educational technologies.

tech 14 | Structure and Content

Module 1. Clinical Management

- 1.1. Patient Classification Systems
 - 1.1.1. Diagnosis-Related Groups (DRGs)
 - 1.1.2. The Nipe Project (Standardization of Interventions) BORRAR
 - 1.1.3. Patient Classification Systems
 - 1.1.4. Essential Resources
- 1.2. Definitions and Regulation of Clinical Analysis Management
 - 1.2.1. Definition of Clinical Governance
 - 1.2.2. Evolution of Clinical Management in the National Health System
 - 1.2.3. The Contract-Program and Clinical Management
 - 1.2.4. Regulation of Clinical Management in Spain BORRAR
 - 1.2.5. Current Status and Controversies
- 1.3. Processes and Protocols in Clinical Management. Handling Scientific Evidence
 - 1.3.1. Variability in Medical Practice
 - 1.3.2. Scientific Evidence
 - 1.3.3. Clinical Management
 - 1.3.4. Processes, Procedures, Clinical Pathways and Clinical Management Units
- 1.4. Models and Clinical Management Units: Inter-hospital Units
 - 1.4.1. What Can Be Considered in a Clinical Management Unit: Interhospital
 - 1.4.2. Requirements of Interhospital Clinical Management Units
 - 1.4.3. Importance of Leadership in Interhospital Clinical Management Units
 - 1.4.4. Human Resources, Continuing Education, Research and Teaching
 - 1.4.5. Patients and Companions. Humanization in Healthcare
 - 1.4.6. Processes in Interhospital Clinical Management Units
 - 1.4.7. The Indicators of these Interhospital Units
 - 1.4.8. Management by Objectives and Improvement
- 1.5. Prudent Drug Prescription. Electronic Prescription
 - 1.5.1. Good Prescribing Standards
 - 1.5.2. Principles for Prudent Prescribing
 - 1.5.3. Tools for Prudent Pharmacological Prescribing
 - 1.5.4. Prescribing Quality Indicators

- 1.6. Prescription Complementary Tests
 - 1.6.1. Management of Requests
 - 1.6.2. Information Systems Integration Model for the Management of Diagnostic Tests
 - 1.6.3. Benefits of a Request Manager
 - 1.6.4. Lean Method

Module 2. Quality Management

- 2.1. Quality in Health Care
 - 2.1.1. Quality Care
 - 2.1.2. Health and Quality Activity Records
- 2.2. Quality of Healthcare Programs
 - 2.2.1. Quality of Care

Module 3. Quality Accreditation in Healthcare

- 3.1. Accreditation in Health Care
 - 3.1.1. Quality Management Systems: Accreditation, Certification and Excellence Models
- 3.2. Joint Commision International
 - 3.2.1. History
 - 3.2.2. The Joint Commission International
- 3.3. EFQM Model
 - 3.3.1. Criteria in Models for Excellence
 - 3.3.2. The Reder Logic Scheme
 - 3.3.3. Update of the EFQM Excellence Model
- 3.4. ISO Accreditation
 - 3.4.1. Rules Are Used as a Standard for Certification
 - 3.4.2. Healthcare System Accreditation Status
 - 3.4.4. Accreditation in Perspective: Main Theoretical-Practical Conflicts

Module 4. Patient Security

- 4.1. Patient Safety: Evolution Over Time
 - 4.1.1. Introduction and Definition. Background and Current Situation
 - 4.1.2. Unequivocal Patient Identification. Localization and Traceability Systems
 - 4.1.3. Patients at Risk of Developing Pressure Ulcers (PUs)
 - 4.1.4. Infection Risks Associated to Nursing Care Venous Access Care
 - 4.1.5. Risk of Falling Fall Prevention and Monitoring in Hospitalized Patients
- 4.2. Nosocomial Infections
 - 4.2.1. Nosocomial Infections. Definition and Classification. Evolution of EPINE (Prevalence of Nosocomial Infections in Spain) Studies
 - 4.2.2. Care for Nosocomial Infection
 - 4.2.3. Hospital Infection Control and Surveillance Programs and Networks
 - 4.2.4. Asepsis, Disinfection and Sterilization
- 4.3. Prevention
 - 4.3.1. Primary and Secondary Prevention Types and Examples
 - 4.3.2. Prevention and Detection of Adverse Events Related to the Preparation and Administration of Medication
 - 4.3.3. Screening Programs: Breast Cancer. Management
 - 4.3.4. Screening Programs: Colon Cancer. Management
 - 4.3.5. Vaccination Program Management. Childhood vaccination
 - 4.3.6. Vaccination Program Management. Flu Vaccination
 - 4.3.7. FMEA (Failure Mode and Effects Analysis). Root Cause Analysis
- 4.4. Information and Record Systems
 - 4.4.1. Information and Record Systems
 - 4.4.2. Adverse Event Reporting and Recording Systems
- 4.5. Secondary and Tertiary Victims
 - 4.5.1. Health Professionals in the Face of Adverse Effects.
 - 4.5.2. Recovery Trajectory and Emotional Support
 - 4.5.3. Impact on Corporate Image

tech 18 | Methodology

At TECH we use the Case Method

What should a professional do in a given situation? Throughout the program, students will face multiple simulated clinical cases, based on real patients, in which they will have to do research, establish hypotheses, and ultimately resolve the situation. There is an abundance of scientific evidence on the effectiveness of the method. Specialists learn better, faster, and more sustainably over time.

With TECH you will experience a way of learning that is shaking the foundations of traditional universities around the world.

According to Dr. Gérvas, the clinical case is the annotated presentation of a patient, or group of patients, which becomes a "case", an example or model that illustrates some peculiar clinical component, either because of its teaching power or because of its uniqueness or rarity. It is essential that the case is based on current professional life, trying to recreate the real conditions in the physician's professional practice.

Did you know that this method was developed in 1912, at Harvard, for law students? The case method consisted of presenting students with real-life, complex situations for them to make decisions and justify their decisions on how to solve them. In 1924, Harvard adopted it as a standard teaching method"

The effectiveness of the method is justified by four fundamental achievements:

- Students who follow this method not only achieve the assimilation of concepts, but also a development of their mental capacity, through exercises that evaluate real situations and the application of knowledge.
- 2. Learning is solidly translated into practical skills that allow the student to better integrate into the real world.
- 3. Ideas and concepts are understood more efficiently, given that the example situations are based on real-life.
- 4. Students like to feel that the effort they put into their studies is worthwhile. This then translates into a greater interest in learning and more time dedicated to working on the course.

Relearning Methodology

At TECH we enhance the case method with the best 100% online teaching methodology available: Relearning.

This university is the first in the world to combine the study of clinical cases with a 100% online learning system based on repetition, combining a minimum of 8 different elements in each lesson, a real revolution with respect to the mere study and analysis of cases.

Professionals will learn through real cases and by resolving complex situations in simulated learning environments. These simulations are developed using state-of-the-art software to facilitate immersive learning.

Methodology | 21 tech

At the forefront of world teaching, the Relearning method has managed to improve the overall satisfaction levels of professionals who complete their studies, with respect to the quality indicators of the best online university (Columbia University).

With this methodology, more than 250,000 physicians have been trained with unprecedented success in all clinical specialties regardless of surgical load. Our pedagogical methodology is developed in a highly competitive environment, with a university student body with a strong socioeconomic profile and an average age of 43.5 years old.

Relearning will allow you to learn with less effort and better performance, involving you more in your specialization, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation to success.

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

The overall score obtained by TECH's learning system is 8.01, according to the highest international standards.

tech 22 | Methodology

This program offers the best educational material, prepared with professionals in mind:

Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is highly specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

Surgical Techniques and Procedures on Video

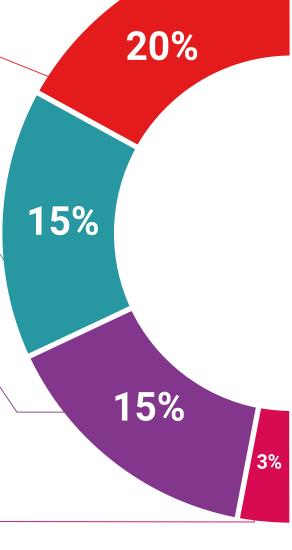

TECH introduces students to the latest techniques, the latest educational advances and to the forefront of current medical techniques. All of this in direct contact with students and explained in detail so as to aid their assimilation and understanding. And best of all, you can watch the videos as many times as you like.

Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive educational system for presenting multimedia content was awarded by Microsoft as a "European Success Story".

Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

Expert-Led Case Studies and Case Analysis

Effective learning ought to be contextual. Therefore, TECH presents real cases in which the expert will guide students, focusing on and solving the different situations: a clear and direct way to achieve the highest degree of understanding.

Testing & Retesting

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises, so that they can see how they are achieving their goals.

Classes

There is scientific evidence on the usefulness of learning by observing experts.

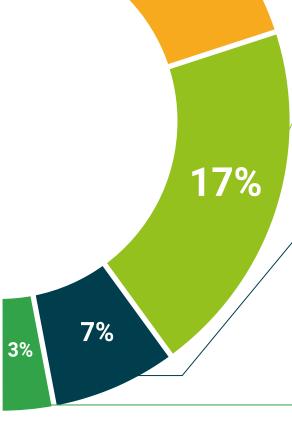

The system known as Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

Quick Action Guides

TECH offers the most relevant contents of the course in the form of worksheets or quick action guides. A synthetic, practical, and effective way to help students progress in their learning.

tech 26 | Certificate

This private qualification will allow you to obtain a **Postgraduate Diploma in Medical Quality Management** endorsed by **TECH Global University**, the world's largest online university.

TECH Global University is an official European University publicly recognized by the Government of Andorra (*official bulletin*). Andorra is part of the European Higher Education Area (EHEA) since 2003. The EHEA is an initiative promoted by the European Union that aims to organize the international training framework and harmonize the higher education systems of the member countries of this space. The project promotes common values, the implementation of collaborative tools and strengthening its quality assurance mechanisms to enhance collaboration and mobility among students, researchers and academics.

This **TECH Global University** private qualification is a European program of continuing education and professional updating that guarantees the acquisition of competencies in its area of knowledge, providing a high curricular value to the student who completes the program.

Title: Postgraduate Diploma in Medical Quality Management

Modality: online

Duration: 6 months

Accreditation: 16 ECTS

Postgraduate Diploma in Medical Quality Management

This is a private qualification of 480 hours of duration equivalent to 16 ECTS, with a start date of dd/mm/yyyy and an end date of dd/mm/yyyy.

TECH Global University is a university officially recognized by the Government of Andorra on the 31st of January of 2024, which belongs to the European Higher Education Area (EHEA).

In Andorra la Vella, on the 28th of February of 2024
