01 Introduction

For many patients, the use of different integrative medicine therapies has meant a radical change in their situation, due to the positive influence of this type of strategies in their physical and psychological improvement. Helping them feel better through a combination of conventional and alternative treatments is, therefore, the task of health professionals who dedicate their careers to this specialty. Among them, the role of the nurse in ensuring the well-being of the person in the process of recovery and autonomy stands out, a responsibility that obliges him or her to always be up to date with the most innovative and effective strategies. Precisely for this reason TECH has considered it necessary to launch this eminently practical program, so that the graduate can, throughout the 3 weeks in which it is developed, perfect their professional skills in the management of chronic patients.

This Practical Training offers you the most direct and real vision of the patient's approach through the most innovative techniques applied in Integrative Medicine"

In recent decades there has been an increasing trend in the use of acupuncture, homeopathy or osteopathy in combination with conventional treatments in the management of chronic clinical cases. Therefore, the highly beneficial results in improving the patient's health have led to a boom in integrative medicine. In this way, the latest techniques employed under the most recent scientific postulates, oblige nursing professionals to be aware of the transformation that is taking place in this area.

In view of this reality, TECH has designed this Practical Training, which provides the most advanced and direct knowledge of this specialty. All this, in addition to a stay in a reference center, integrated by an excellent team of professionals.

This is a 120-hour experience in a clinical center in the use of alternative therapies in which the patient will be able to work side by side with experts in the sector. In this way you will not only be able to develop and contextualize your knowledge by applying it to the reality of the practice, but you will also be able to keep up to date with the latest developments in Advanced Integrative Nursing. In addition, you will be supported by a mentoring team committed to your professional growth and improvement.

02

Why Study an Internship Program?

Undoubtedly, nursing professionals must be constantly updating their knowledge, but it is in the healthcare field where greater practical specialization is required. In response to this need, TECH has designed a unique and disruptive academic product in the current educational landscape. This Practical Training leads the professional, from the very first moment, to be together with an excellent team of experts from a prestigious clinical center. A real scenario, with patients where you will be able to test the most advanced techniques and procedures used in Advanced Integrative Medicine. A unique opportunity to be in a magnificent environment, where the graduate becomes the center and the main objective is to achieve, in just 3 weeks, an intensive update of their knowledge in this area.

Access the most innovative techniques of Advanced Integrative Medicine from the best specialized nurses"

1. Up-to-date from the Latest TECHNIQUES Available

The area of advanced integrative medicine has been able to perfectly unify traditional and alternative medicine. A combination that has had great advances in recent years thanks to genomic medicine, the development of personalized, clinically meaningful omics-based solutions or progress in chronological age studies. For this reason, and in order to bring the nurse closer to these techniques, TECH presents this Practical Training, where the professional will enter a state-of-the-art healthcare environment. A space that will give you access to the latest technology and methodology applied today in this field.

2. Gaining In-depth Knowledge from the Experience of Top Nurse

The prestigious center where the professional will develop the stay is integrated by an excellent team of professionals who will accompany them throughout the 3 weeks of duration of this Practical Training. With a specifically designated tutor, the graduate will be able to see what daily care is like, the methods and procedures used, as well as the most innovative techniques used in a top-level healthcare environment.

3. Entering First-Class Clinical Environments

TECH under criteria selects all available centers for Internship Programs. In this way, this institution seeks to fulfill its maxim of offering quality programs that respond to the real needs of professionals. For this reason, during this eminently practical period, you will be able to obtain the updated knowledge you are looking for in Advanced Integrative Medicine.

4. Putting the acquired knowledge into daily practice from the very first moment

In this program, TECH moves away from the theoretical concept and the long hours of study and memorization and focuses this instruction on an exclusively practical phase, where the professional will be able to apply his knowledge and expand, with the help of real experts, his competencies and capabilities in the approach to the patient through integrative medicine. All of this in an intensive course, in a clinical center of reference clinical center.

5. Expanding the Boundaries of Knowledge

TECH offers the professional the possibility to catch up with the best professionals, who practice in first level clinics. This will allow them not only to up-to-date techniques and procedures in integrative medicine, but also to apply them in any other prestigious center where the professional wishes to apply the knowledge received during this Practical Training. this Practical Training. An excellent opportunity that only this academic institution offers.

You will have full practical immersion at the center of your choice"

03 Objectives

With the course of this practical program, the nurse will acquire the latest and necessary knowledge in the assessment of the suitability of each discipline in the clinical setting, which will allow them to provide quality care based on the latest scientific evidence. It is, therefore, a unique opportunity that will encourage the graduate's professional stimulus through continuous training and research, positively influencing the promotion of work strategies based on the integrative approach and multimodal rehabilitation. Therefore, the specialized nurse will be able to update his or her knowledge in a comprehensive manner in the various fields of specific nursing based on integrative medicine.

General Conditions

Civil Liability Insurance

This institution's main concern is to guarantee the safety of the trainees and other collaborating agents involved in the internship process at the company. Among the measures dedicated to achieve this is the response to any incident that may occur during the entire teaching-learning process.

To this end, this entity commits to purchasing a civil liability insurance policy to cover any eventuality that may arise during the course of the internship at the center.

This liability policy for interns will have broad coverage and will be taken out prior to the start of the practical training period. That way professionals will not have to worry in case of having to face an unexpected situation and will be covered until the end of the internship program at the center.

General Conditions of the Internship Program

The general terms and conditions of the internship agreement for the program are as follows:

1. TUTORING: During the Internship Program, students will be assigned with two tutors who will accompany them throughout the process, answering any doubts and questions that may arise. On the one hand, there will be a professional tutor belonging to the internship center who will have the purpose of guiding and supporting the student at all times. On the other hand, they will also be assigned with an academic tutor, whose mission will be to coordinate and help the students during the whole process, solving doubts and facilitating everything they may need. In this way, the student will be accompanied and will be able to discuss any doubts that may arise, both clinical and academic.

2. DURATION: The internship program will have a duration of three continuous weeks, in 8-hour days, 5 days a week. The days of attendance and the schedule will be the responsibility of the center and the professional will be informed well in advance so that they can make the appropriate arrangements.

3. ABSENCES: If the students does not show up on the start date of the Internship Program, they will lose the right to it, without the possibility of reimbursement or change of dates. Absence for more than two days from the internship, without justification or a medical reason, will result in the professional's withdrawal from the internship, therefore, automatic termination of the internship. Any problems that may arise during the course of the internship must be urgently reported to the academic tutor.

4. CERTIFICATION: Professionals who pass the Internship Program will receive a certificate accrediting their stay at the center.

5. EMPLOYMENT RELATIONSHIP: The Internship Program shall not constitute an employment relationship of any kind.

6. PRIOR EDUCATION: Some centers may require a certificate of prior education for the Internship Program. In these cases, it will be necessary to submit it to the TECH internship department so that the assignment of the chosen center can be confirmed.

7. DOES NOT INCLUDE: The Internship Program will not include any element not described in the present conditions. Therefore, it does not include accommodation, transportation to the city where the internship takes place, visas or any other items not listed.

However, students may consult with their academic tutor for any questions or recommendations in this regard. The academic tutor will provide the student with all the necessary information to facilitate the procedures in any case.

07 Certificate

This program will allow you to obtain your **Internship Program diploma in Advanced Integrative Medicine and Health for Nursing** endorsed by **TECH Global University**, the world's largest online university.

TECH Global University is an official European University publicly recognized by the Government of Andorra ([official bulletin](#)). Andorra is part of the European Higher Education Area (EHEA) since 2003. The EHEA is an initiative promoted by the European Union that aims to organize the international training framework and harmonize the higher education systems of the member countries of this space. The project promotes common values, the implementation of collaborative tools and strengthening its quality assurance mechanisms to enhance collaboration and mobility among students, researchers and academics.
