01 Introduction

Currently there is an increased prevalence of pathologies such as colon cancer, ulcerative colitis or Crohn's disease. This has led to an increase in the number of studies among the population, both to determine the diagnosis and to initiate treatment. Therefore, the appearance of new techniques and protocols in the care of this type of patient obliges nursing professionals to update their knowledge. For that reason, to access the latest advances in this area, TECH has created this unique program in the academic panorama, which provides an update through a 3-week on-site stay in a prestigious clinical center.

Thanks to this Internship Program you will be updated on the latest techniques and methods used in the Digestive System Service"

The techniques used in colonoscopies and gastroscopies have been improved in recent years, due to technological progress and the procedures used for the early detection of diseases in the digestive system. All this generates a positive impact on the population, but at the same time forces health professionals to continuously update their knowledge.

Faced with this reality, this academic institution has designed this Internship Program, which responds to the demands of nurses, through a classroom program with a current and innovative vision of Nursing in the Digestive System Service.

Therefore, this program provides the most avant-garde knowledge in this area, in a completely practical way and in a prestigious clinical center. In this scenario, the health care professional will intervene in the care of patients with the accompaniment of professionals from the center itself who work in the Digestive System Service. All this will allow them to enhance their skills and abilities in patient care and introduce in their daily practice the latest criteria and protocols for diagnosis and therapeutic procedures.

Enjoy an intensive 3-week stay in a prestigious center and update yourself in the latest clinical procedures to grow professionally"

02

Why Study an Internship Program?

Nowadays, professionals demand academic programs that provide concepts, techniques and procedures of great practical utility and in accordance with the current needs of each specialty. In the health care field, moreover, scientific evidence and available tools are of utmost importance so that all this can be put into daily practice. With this in mind, TECH has created a groundbreaking program in the pedagogical panorama. Therefore, with this Internship Program, the nursing professional will be able to enter a 100% real clinical scenario, where he will be able to apply the latest methods and techniques in the Digestive System Service. During 3 weeks of intensive stay, he will be integrated into a highly trained team with experience in this area. In this scenario, the professional will check the latest advances for the attention, diagnosis and care of the patient. This unique opportunity gives nurses the chance to update their knowledge in a state-of-the-art health care environment and in a reference center.

You are facing a unique educational option, which offers you the possibility of entering into real clinical environments to deepen, from the hand of the best professionals, the latest advances in Nursing in the Digestive System Service"

1. Updating from the latest technology available

In recent years, new technologies have made it possible to improve imaging techniques and analysis in the Digestive System. Thanks to this, the examination of patients with serious diseases has increased, and at the same time, a greater early detection has been achieved. This progress should undoubtedly be known by nursing professionals. For this reason, and with the aim of bringing the health care professional closer to these advances, TECH has created this Internship Program, with which the professional will be able, in a clinical environment, to keep abreast of the latest technical advances in this area.

2. Gaining In-Depth Knowledge from the Experience of Top Nursing Professionals

One of the great attractions of this Internship Program is the possibility of staying with a team of highly qualified and experienced professionals. Therefore, during this period you will be accompanied by specialized nurses, which is a guarantee in the search for updated knowledge. In this way, you will be able to see real patients in a prestigious center, which will allow you to incorporate into your daily practice the most effective protocols and techniques in the Digestive System Service.

3. Entering First-Class Clinical Environments

In its philosophy of offering a unique practical experience in the pedagogical panorama, TECH carefully selects all the centers available for the Internship Program. In this way, it guarantees access to an excellent and referential clinical environment in the Digestive System Service. Therefore, the professional will be able to obtain a direct, updated and rigorous vision of the procedures used in the present, always applying the maximum scientific rigor.

4. Putting the acquired knowledge into daily practice from the very first moment

In this program, TECH offers a pedagogical alternative that is 100% adapted to the daily work of the nurse. In this way, this Internship Program provides the professional with an update of his knowledge, in an intensive stay of 3 weeks duration. A period that will allow him to integrate the most innovative methodologies in the examination and care of the patient in the Digestive System Service.

5. Expanding the Boundaries of Knowledge

TECH provides nursing professionals with an excellent opportunity to expand their skills and abilities in a reference center. An update, moreover, from the hand of high-level specialized nurses. With all this, you will not only obtain a current view of the Digestive System Service, but will also be able to integrate this knowledge in any other prestigious hospital.

You will have full practical immersion at the center of your choice"

03 Objectives

The main objective of this Practical Nursing Training in the Digestive System Service is to bring the nurse closer to the most advanced techniques and procedures in this field. To achieve this, TECH offers a practical and intensive stay in a center of recognized prestige, where you can get up to date by performing numerous activities focused on patients suffering from this type of pathologies.

General Objectives

- ♦ Master the latest techniques, modern scientific postulates and application of cutting-edge technologies in the diagnosis of pathologies in the digestive system
- ♦ Incorporate the most effective methods, procedures and clinical analyses, endorsed by a team of prestigious experts in the Digestive System Service
- ♦ Apply the most effective protocols in the specific approach to patients with serious pathologies

Specific Objectives

- ◆ Update the knowledge in patient care in the Digestive Pathology Service
- ◆ Improve the prognosis and reduce the aftereffect and complications of patients
- ◆ Know the most advanced techniques of patient care in specific procedures carried out in the Digestive System Service
- ◆ Develop in a practical way the necessary skills to adapt to the latest transformations in this clinical area

With this intensive internship you will be able to comfortably navigate your way through the Digestive System Service and expand your technical skills in patient analysis and assessment"

04 Educational Plan

This Internship Program includes a stay in an outstanding clinical center, integrated by an excellent team of professionals. In this environment, the professional will stay for 3 weeks, with a schedule from Monday to Friday and 8 consecutive hours of learning in each of these days. Consequently, the nurse will be able to update in a smooth and continuous way, in a real environment, accessing patients, always with the guidance of the clinic's experts.

In this completely practical Internship Program, the activities are aimed at developing and perfecting the skills necessary to provide healthcare care in areas and conditions that require highly qualified professionals, and are oriented towards specific expertise for practicing the activity, in a safe environment for the patient and with highly professional performance.

TECH offers a magnificent opportunity to expand abilities and technical skills in an excellent health care environment and with the latest technology applied to the Digestive System Service. A program that represents a before and after for professionals who enter it, and who wish, above all, to improve their practical knowledge in an innovative health environment.

The practical teaching will be carried out with the active participation of the student performing the activities and procedures of each area of competence (learning to learn and learning to do), with the accompaniment and guidance of teachers and other fellow trainees to facilitate teamwork and multidisciplinary integration as transversal competencies for clinical nursing practice (learning to be and learning to relate).

The procedures described below will be the basis of the practical part of the training, and their implementation will be subject to the center's own availability and workload, the proposed activities being the following.

Module	Practical Activity
Examination and evaluation of diseases in the Digestive System	Collaborate in the evaluation of the cirrhotic patient's electronic clinical history
	Contribute in the analysis of viral hepatitis in Crohn's disease
	Offer support in the examination of patients requiring liver transplantation
	Assist in the evaluation of patients with ulcerative colitis and pancreatitis
Examination techniques of the Digestive System	Collaborate in the practice of gastroscopy, colonoscopy and ERCP
	Contribute in the placement of esophageal prosthesis
	Assist in the placement of PEG probes
	Apply the latest methodologies for colorectal cancer screening
The role of the nurse in ostomies	Address the assessment of digestive surgery
	Perform analysis of the different types of ostomies
	Assessing the nutritional needs of the ostomized patient
	Apply the care plan procedure in ostomized patients
Other digestive nursing techniques	Correctly identify the different types of stool in patients with digestive diseases
	Collaborate in the insertion of orogastric, nasogastric, nasoduodenal and nasojunal probes
	Perfect the practice of gastric lavage
	Apply cleansing enemas in patients with digestive problems
	Collaborate in the extraction of fecalomas in patients with digestive problems

05 Where Can I Do the Internship Program?

TECH has selected the most prestigious centers to carry out this internship, where the nurse will be able to perform various activities in their digestive system services. Consequently, this stay will not only help the professional to be updated, but will provide an increase in prestige, having been able to develop for 3 weeks in a clinic of great reputation.

“

Choose one of the reference centers that TECH has selected for you and carry out an internship that will be a before and after in your goal of updating your knowledge”

General Conditions

Civil Liability Insurance

This institution's main concern is to guarantee the safety of the trainees and other collaborating agents involved in the internship process at the company. Among the measures dedicated to achieve this is the response to any incident that may occur during the entire teaching-learning process.

To this end, this entity commits to purchasing a civil liability insurance policy to cover any eventuality that may arise during the course of the internship at the center.

This liability policy for interns will have broad coverage and will be taken out prior to the start of the practical training period. That way professionals will not have to worry in case of having to face an unexpected situation and will be covered until the end of the internship program at the center.

General Conditions of the Internship Program

The general terms and conditions of the internship agreement for the program are as follows:

1. TUTOR: During the Internship Program, students will be assigned with two tutors who will accompany them throughout the process, answering any doubts and questions that may arise. On the one hand, there will be a professional tutor belonging to the internship center who will have the purpose of guiding and supporting the student at all times. On the other hand, they will also be assigned with an academic tutor, whose mission will be to coordinate and help the students during the whole process, solving doubts and facilitating everything they may need. In this way, the student will be accompanied and will be able to discuss any doubts that may arise, both clinical and academic.

2. DURATION: The internship program will have a duration of three continuous weeks, in 8-hour days, 5 days a week. The days of attendance and the schedule will be the responsibility of the center and the professional will be informed well in advance so that they can make the appropriate arrangements.

3. ABSENCE: If the students does not show up on the start date of the Internship Program, they will lose the right to it, without the possibility of reimbursement or change of dates. Absence for more than two days from the internship, without justification or a medical reason, will result in the professional's withdrawal from the internship, therefore, automatic termination of the internship. Any problems that may arise during the course of the internship must be urgently reported to the academic tutor.

4. CERTIFICATION: Professionals who pass the Internship Program will receive a certificate accrediting their stay at the center.

5. EMPLOYMENT RELATIONSHIP: The Internship Program shall not constitute an employment relationship of any kind.

6. PRIOR EDUCATION: Some centers may require a certificate of prior education for the Internship Program. In these cases, it will be necessary to submit it to the TECH internship department so that the assignment of the chosen center can be confirmed.

7. DOES NOT INCLUDE: The Internship Program will not include any element not described in the present conditions. Therefore, it does not include accommodation, transportation to the city where the internship takes place, visas or any other items not listed

However, students may consult with their academic tutor for any questions or recommendations in this regard. The academic tutor will provide the student with all the necessary information to facilitate the procedures in any case.

07 Certificate

This **Internship Program in Nursing in the Digestive System Service** contains the most complete and up-to-date program in the professional and academic landscape.

After the student has passed the assessments, they will receive their corresponding Internship Program diploma issued by TECH Technological University via tracked delivery*.

The certificate issued by TECH will reflect the grade obtained in the test.

Title: **Internship Program in Nursing in the Digestive System Service**
