# 01 Introduction

Patient care during childhood and adolescence is radically different for the nursing professional, who must develop and hone a number of skills specific to this area. Indeed, child health care has undergone a clear improvement in recent decades as a result of the effectiveness of treatment and quality of care and of activities related to health promotion and disease prevention. For this reason, and with the aim of bringing the professional the latest developments in Pediatric Nursing, TECH has designed this program in which the professional will be able to develop their maximum potential and growth through the face-to-face approach of patients with complex pathologies in a practical stay of 3 weeks duration.

“

*With this Practical Training you will incorporate into your daily professional activity the most updated advances in the therapeutic management of pediatric patients by nursing staff"*

In hospital-based child care units, nurses are responsible for multiple tasks of varying complexity. These professionals are responsible for providing the best care to sick children and adolescents and, together with physicians, participate in their clinical evaluation. With the scientific and technological evolution of recent years, the nurse's work materials and work protocols have undergone considerable changes and they are now responsible for performing procedures of greater complexity and manipulating more advanced tools. However, the scarcity of educational programs focused on these updates makes it difficult for these healthcare professionals to catch up in a holistic way.

For this reason, TECH has designed an innovative study modality that will contribute to the acquisition of updated competencies by the nursing professional in an eminently practical way. Thanks to it, the nurse will be able to handle on-site situations such as performing catheterizations, lumbar punctures, extracting foreign bodies from accessible orifices, among others. In addition, you will be able to apply the latest technological advances and innovations in this health field.

This Practical Training will be developed during 3 weeks, from Monday to Friday, for 8 consecutive hours, in a prestigious hospital institution. In these facilities, the nurse will have the opportunity to expand his or her skills under the supervision of an assistant tutor who will monitor his or her progress. It will also clarify doubts and concepts of interest in conjunction with leading experts in this health area. Therefore, this is a unique opportunity to get up to date in a prestigious clinical center, incorporating the most advanced pediatric nursing methodology into your daily practice.

# 02

## Why Study an Internship Program?

This learning modality, 100% practical, is ideal for all those professionals who already have a background in the field of Pediatric Nursing. This Practical Training will allow them to save long periods of theoretical content with which to directly engage in the acquisition of practical skills essential for their personal updating. The stay, which lasts only 3 weeks, will be carried out in a highly prestigious hospital center and each graduate will be able to complete his or her studies with a holistic mastery of the most select techniques and work resources available.

*TECH offers you a high-level practical specialization in state-of-the-art intervention methodologies for the care of children with chronic diseases or cancer"*

### 1. Updating from the Latest Technology Available

Health care for pediatric patients depends to a large extent on technological resources adjusted to their body characteristics. All these tools are complex and are constantly up-to-date according to current scientific innovations. However, the TECH student will be able to master all of them thanks to the innovative contents of this Practical Training.

### 2. Gaining In-depth Knowledge from the Experience of Top Nurse

This program promotes the connection of its students with great professionals in the field of Pediatric Nursing. During 120 practical hours, students will be able to discuss with experts on questions and skills of interest. In addition, they will rub shoulders with these experts, learning on an ongoing basis how they perform in their day-to-day work.

### 3. Delve in Excellence environments in the Sectors of nursing

For this type of studies, TECH has carefully selected internationally renowned centers that will host its students for 3 weeks. These hospital facilities have extensive experience in Pediatric Nursing and, at the same time, handle the most up-to-date technological tools. Upon completion of this Professional Training, graduates will have an in-depth knowledge of work dynamics and practical experiences that will enhance their personal résumé.

#### 4. Putting the acquired knowledge into daily practice from the very first moment

TECH is aware that many educational programs fail to allow students to combine their professional interests with a rapid and feasible assimilation of practical knowledge. That is why it has devised this degree in which students will develop skills in an agile and flexible way by the hand of the most active and comprehensive experts in the field of Pediatric Nursing.

#### 5. Expanding the Boundaries of Knowledge

This TECH Practical Training is unique of its kind in the educational market since it extends the student's horizons on an international scale. Thanks to the network of agreements and collaborators that this program has, students will be able to be linked to institutions located in different latitudes and, thus, obtain a complete vision of the standards that today govern Pediatric Nursing as a professional discipline.

*You will have full practical immersion at the center of your choice"*

# 03 Objectives

TECH brings this program with the objective of making the nursing professional up-to-date their knowledge in pediatric patient care and attention. In this Practical Training, the student will approach the main interventions in this field of work, which will allow them to improve and enhance their assistance competencies.

## General Objectives

---

- ♦ Master the principles of nursing in child and adolescent care
- ♦ Describe the different procedures and techniques in pediatric settings
- ♦ Manage the care related to the different health problems of the child as , well as the psychosocial approach in the pediatric age

*Learning from real scenarios is the most effective way to internalize knowledge. Don't miss this great opportunity and improve your treatment of pediatric patients"*

## Specific Objectives

---

- ◆ Identify and define the stages of pregnancy and childbirth and the role of nurses in the different stages
- ◆ Determine newborn screening tests
- ◆ Establish the main health problems of newborns
- ◆ Define the process of labor and delivery resuscitation, post- Post-Resuscitation stabilization and neonatal transport
- ◆ Describe the different health examinations and controls in healthy child at different stages of development
- ◆ Establish the vaccination schedule and vaccination in special situations
- ◆ Explain infant, preschool, school and adolescent feeding
- ◆ Define nursing care in emergencies and pediatric emergencies
- ◆ Explain the basic concepts and maneuvers of pediatric advanced life support depending on the age of the child

*Thanks to this degree, you will classify and evaluate clinical manifestations in pediatric patients as part of your nursing competencies"*

# 04 Education Plan

This Internship Program consists of a 3-week period , from Monday to Friday with 8 consecutive hours of practical up-to- education with an attending Tutor. This stay will allow you to deal with real patients with a team of reference professionals in the of Pediatric Nursing area, applying the most innovative diagnostic procedures and planning the latest generation Therapeutics in each pathology.

In this training proposal, completely practical in nature, the activities are aimed at developing and perfecting the skills necessary for the provision of healthcare in areas and conditions that require a high level of qualification, and which are oriented to the specific training for the exercise of the activity, in a safe environment for the patient and a high professional performance.

It is undoubtedly an opportunity to learn by working in the innovative hospital of the future where real-time health monitoring of patients is at the center of the digital culture of its professionals.

The practical education will be carried out with the active participation of the student performing the activities and procedures of each area of competence (learning to learn and learning to do), with the accompaniment and guidance of teachers and other fellow trainees that facilitate teamwork and multidisciplinary integration as transversal competencies for Current La nursing practice Pediatric(learning to be and learning to relate).

The procedures described below will form the basis of the practical part of the internship, and their implementation is subject to both the suitability of the patients and the availability of the center and its workload, with the proposed activities being as follows:

*Receive specialized education in an institution that can offer you all these possibilities, with an innovative academic program and a human team that will help you develop your full potential"*

**Related internship programs:**

- Occupational Nursing
- Diagnosis in Physiotherapy

“

*Make the most of this opportunity to surround yourself with expert professionals and learn from their work methodology”*

# 06

## General Conditions

### Civil Liability Insurance

This institution's main concern is to guarantee the safety of the trainees and other collaborating agents involved in the internship process at the company. Among the measures dedicated to achieve this is the response to any incident that may occur during the entire teaching-learning process.

To this end, this entity commits to purchasing a civil liability insurance policy to cover any eventuality that may arise during the course of the internship at the center.

This liability policy for interns will have broad coverage and will be taken out prior to the start of the practical training period. That way professionals will not have to worry in case of having to face an unexpected situation and will be covered until the end of the internship program at the center.

## General Conditions of the Internship Program

The general terms and conditions of the internship agreement for the program are as follows:

**1. TUTORING:** During the Internship Program, students will be assigned with two tutors who will accompany them throughout the process, answering any doubts and questions that may arise. On the one hand, there will be a professional tutor belonging to the internship center who will have the purpose of guiding and supporting the student at all times. On the other hand, they will also be assigned with an academic tutor, whose mission will be to coordinate and help the students during the whole process, solving doubts and facilitating everything they may need. In this way, the student will be accompanied and will be able to discuss any doubts that may arise, both clinical and academic.

**2. DURATION:** The internship program will have a duration of three continuous weeks, in 8-hour days, 5 days a week. The days of attendance and the schedule will be the responsibility of the center and the professional will be informed well in advance so that they can make the appropriate arrangements.

**3. ABSENCES:** If the students does not show up on the start date of the Internship Program, they will lose the right to it, without the possibility of reimbursement or change of dates. Absence for more than two days from the internship, without justification or a medical reason, will result in the professional's withdrawal from the internship, therefore, automatic termination of the internship. Any problems that may arise during the course of the internship must be urgently reported to the academic tutor.

**4. CERTIFICATION:** Professionals who pass the Internship Program will receive a certificate accrediting their stay at the center.

**5. EMPLOYMENT RELATIONSHIP:** The Internship Program shall not constitute an employment relationship of any kind.

**6. PRIOR EDUCATION:** Some centers may require a certificate of prior education for the Internship Program. In these cases, it will be necessary to submit it to the TECH internship department so that the assignment of the chosen center can be confirmed.

**7. DOES NOT INCLUDE:** The Internship Program will not include any element not described in the present conditions. Therefore, it does not include accommodation, transportation to the city where the internship takes place, visas or any other items not listed

However, students may consult with their academic tutor for any questions or recommendations in this regard. The academic tutor will provide the student with all the necessary information to facilitate the procedures in any case.

# 06 Certificate

This program will allow you to obtain your **Internship Program diploma in Pediatric Nursing** endorsed by **TECH Global University**, the world's largest online university.

**TECH Global University** is an official European University publicly recognized by the Government of Andorra ([official bulletin](#)). Andorra is part of the European Higher Education Area (EHEA) since 2003. The EHEA is an initiative promoted by the European Union that aims to organize the international training framework and harmonize the higher education systems of the member countries of this space. The project promotes common values, the implementation of collaborative tools and strengthening its quality assurance mechanisms to enhance collaboration and mobility among students, researchers and academics.

This **TECH Global University** title is a European program of continuing education and professional updating that guarantees the acquisition of competencies in its area of knowledge, providing a high curricular value to the student who completes the program.

Title: **Internship Program in Pediatric Nursing**
