01 Introduction

Cancer is becoming more and more frequent in the world, and although progress has been made in its treatment, millions of people perish every year because of it. However, scientific progress has made it possible for more and more patients to overcome this disease. Healthcare personnel, especially in the area of Oncology Nursing, must therefore be constantly updated on the latest advances in the management and care of people suffering from this and other tumor diseases. With this aim in mind, this Postgraduate Certificate was created, with an eminently practical approach where students will be able to update their knowledge with the help of specialists with experience in this health area.

Enjoy an intensive 3-week stay in a reputable center and get up to date on the latest clinical procedures to achieve professional growth"

The care that an affected patient must have during the different processes that a disease such as cancer or tumors that affect the digestive tract are key to their recovery. In this context, the role of nurses is of vital importance and they must be aware of recent advances in treatments such as chemotherapy or the current psychosocial approach to oncology patients. All this knowledge can be acquired in this training, in which you will be able to carry out a practical stay of 3 weeks in a health center of reference and with highly qualified professionals in oncology care.

“ *This Internship Program will allow you to incorporate the latest advances in Oncology Nursing to your practical knowledge”*

02

Why Study an Internship Program?

Oncology is one of the most advanced fields in healthcare. Both doctors and nurses must be updated on a relatively constant basis, as new techniques and diagnoses make it necessary to revise the protocols of action from time to time. This Internship Program places the nurse in a privileged clinical environment, with the possibility of being updated in the latest practical methodology available for 3 weeks.

Learn more about the latest oncology patient care and assistance in this first level Internship Program"

1. Updating from the latest technology available

Technology is a must in any medical field. When it comes to oncology it is even more so, since advances in both diagnosis and treatment are a differential factor in the recovery process of patients. As nurses are a key figure in these processes, they will have access to state-of-the-art technology throughout the Internship Program.

2. Gaining In-Depth Knowledge from the Experience of Top Specialists

All the Internship Program will be conducted under the guidance of a team of experts and professionals with extensive experience in the management and care of oncology patients. Thanks to this, nurses will be able to nurture not only their professional experience, but also to see in situ what the day-to-day life of a disciplined and demanding work group is like.

3. Entering First-Class Clinical Environments

Thanks to TECH's exhaustive selection process, all clinical centers available in this Internship Program meet the highest quality standards. This means that the nurses will have access to a first-class clinical environment, where they will be able to develop their most important competencies thanks to an efficient workflow and coordination.

4. Putting the acquired knowledge into daily practice from the very first moment

The entire Internship Program is designed so that nurses can apply the acquired techniques and care of oncology patients immediately. In this way, they will be able to improve their own skills after graduation, as practical experience will be key to their development and updating.

5. Expanding the Boundaries of Knowledge

Given the importance in areas such as palliative care and the psychosocial approach to the oncology patient, nurses will find in this Internship Program a unique opportunity to take their knowledge to a new level. A practical update that will undoubtedly be decisive in following the most rigorous scientific vanguard.

You will have full practical immersion at the center of your choice"

03

Objectives

The purpose of this Internship Program is to provide students with real teaching in a relevant clinical center and with specialists in the area of Oncology Nursing, where they will be able to approach the different types of tumors, oncological treatments, the main diagnostic techniques, approach and practical methodology used in the daily care of oncological patients. All of this will allow you to incorporate the most commonly used techniques and guidelines into your daily professional life with the utmost rigor.

General Objectives

- To know the most updated assistance in Oncology Nursing
- Work in a multidisciplinary team, caring for patients with different oncological pathologies
- Practice the most rigorous examinations, assessment and care in Oncology Nursing

This program will allow you to deepen in the most innovative treatments used for the cure of Cancer"

Specific Objectives

- ♦ Describe the professional competencies of Oncology Nursing
- ♦ Know the main types of malignant tumors in relation to their anatomical location
- ♦ Describe the therapeutic modalities that exist in the adult oncology patient, as well as the main indications for their choice
- ♦ Recognize the steps in the process of administering chemotherapy treatment
- ♦ Apply the Nursing Care Process (NCP) in the oncology patient, establishing a comprehensive and individualized care plan
- ♦ Deepen in the relationship between nutrition and cancer
- ♦ Recognize the importance of palliative care and know its historical background
- ♦ Communicate in an understandable way, appropriate to the patient's needs and providing true information that helps decision
- ♦ Determine the prevalence of cancer in pediatric age and become familiar with the most frequent tumors
- ♦ Expose the fundamentals of research in Health Sciences and its importance in the field of Oncology

This Internship Program gives you the opportunity to work in a real scenario with oncology patients that require professionals with extensive knowledge and psychosocial skills"

04 Planning of teaching

The Internship Program in Oncology Nursing will take place in a reference health center where professionals will be able to grow in this field, thanks to a 3-week stay, in which they will be working and acquiring a wide learning experience together with nursing personnel specialized in the attention and care of oncology patients.

Therefore, students taking this practical qualification will be present at the health center from Monday to Friday with 8-hour consecutive days, which will allow them to see patients who are currently going through different stages of their disease, with the most current treatments applied for their recovery. You will be able to live this experience together with specialists who will guide you in this teaching by showing you the most innovative diagnoses, techniques and methods used in Oncology Nursing.

In this completely practical Internship Program, the activities are aimed at developing and perfecting the skills necessary to provide healthcare care in areas and conditions that require highly qualified professionals, and are oriented towards specific expertise for practicing the activity, in a safe environment for the patient and with highly professional performance.

An excellent opportunity to learn by working in a center where you can see the global assessment of the oncology patient, the examination and analysis of tumors such as digestive, breast, hematological, musculoskeletal, practice in chemotherapy administration routes, the application of nursing care or palliative care and comprehensive care of the oncology patient. A wide range of actions that can be carried out on a daily basis by the nursing staff, and where students will be able to integrate the processes by perfecting their professional skills.

The practical teaching will be carried out with the active participation of the student performing the activities and procedures of each area of competence (learning to learn and learning to do), with the accompaniment and guidance of teachers and other training partners that facilitate teamwork and multidisciplinary integration as transversal competencies for clinical nursing praxis (learning to be and learning to relate).

The procedures described below will form the basis of the practical part of the training, and their implementation is subject to both the suitability of the patients and the availability of the center and its workload, with the proposed activities being as follows:

Receive specialized education in an institution that can offer you all these possibilities, with an innovative academic program and a human team that will help you develop your full potential"

Module	Practical Activity
Oncology Nursing and Treatments	Offer support in the global assessment of the oncology patient.
	Assist in oncologic surgery procedures
	Assist in chemotherapy, radiotherapy and interventional radiology treatments.
	Analyze the biological treatments applicable to oncology patients
	Palliate possible side effects derived from radiotherapy treatments
The role of the nurse in the oncological treatment and emergency processes	Proper management of the storage of cytostatic products
	Practice chemotherapy administration routes
	Managing phlebitis or extravasation
	Assisting in the analysis and examination of urinary, respiratory or digestive system manifestations
	Apply analgesic treatments in the oncology patient
Specific nursing care in post-surgical, palliative and terminal patients	Apply post-surgical care after thoracic or breast surgeries
	Assisting ostomized patients
	Intervene in the care of terminally ill patients, analyzing signs and symptoms that may develop
	Approach the Grief from the point of view of Nurse
	To know modern pharmacology applicable to palliative or terminal patients
Research and the future of Oncology Nursing	To develop the practical bases of nursing research in the oncology area
	To know the application of ICT and apps in the field of Oncology
	Manage potential resources to address nursing care research and oncology patient issues
	To deepen in the areas of Surgical Oncology, Radiation Oncology and Medical Oncology from the nurse's point of view

05 Where Can I Do the Internship Program?

This Internship Program includes a 3-week stay in a reference clinical center, where students will be able to advance and improve in the daily work they must perform in the Oncology Nursing area. For this purpose, TECH has selected a relevant center with a team specialized in treating oncology patients, with whom they employ the most widely used treatments and techniques currently used.

Take advantage of this opportunity to surround yourself with expert professionals and learn from their work methodology"

The student will be able to do this program at the following centers:

06

General Conditions

Civil Liability Insurance

This institution's main concern is to guarantee the safety of the trainees and other collaborating agents involved in the internship process at the company. Among the measures dedicated to achieve this is the response to any incident that may occur during the entire teaching-learning process.

For this purpose, this educational entity undertakes to take out a liability insurance policy to cover any eventuality that may arise during the stay at the internship center.

This liability policy for interns will have broad coverage and will be taken out prior to the start of the practical training period. That way professionals will not have to worry in case of having to face an unexpected situation and will be covered until the end of the internship program at the center.

General Conditions of the Internship Program

The general terms and conditions of the internship program agreement shall be as follows:

1. TUTOR: During the Internship Program, students will be assigned with two tutors who will accompany them throughout the process, answering any doubts and questions that may arise. On the one hand, there will be a professional tutor belonging to the internship center who will have the purpose of guiding and supporting the student at all times. On the other hand, they will also be assigned with an academic tutor, whose mission will be to coordinate and help the students during the whole process, solving doubts and facilitating everything they may need. In this way, the student will be accompanied and will be able to discuss any doubts that may arise, both clinical and academic.

2. DURATION: The internship program will have a duration of three continuous weeks, in 8-hour days, 5 days a week. The days of attendance and the schedule will be the responsibility of the center and the professional will be informed well in advance so that they can make the appropriate arrangements.

3. ABSENCE: If the students does not show up on the start date of the Internship Program, they will lose the right to it, without the possibility of reimbursement or change of dates. Absence for more than two days from the internship, without justification or a medical reason, will result in the professional's withdrawal from the internship, therefore, automatic termination of the internship. Any problems that may arise during the course of the internship must be urgently reported to the academic tutor.

4. CERTIFICATION: Professionals who pass the Internship Program will receive a certificate accrediting their stay at the center.

5. EMPLOYMENT RELATIONSHIP: The Internship Program shall not constitute an employment relationship of any kind.

6. PRIOR EDUCATION: Some centers may require a certificate of prior education for the Internship Program. In these cases, it will be necessary to submit it to the TECH internship department so that the assignment of the chosen center can be confirmed.

7. DOES NOT INCLUDE: The Internship Program will not include any element not described in the present conditions. Therefore, it does not include accommodation, transportation to the city where the internship takes place, visas or any other items not listed.

However, students may consult with their academic tutor for any questions or recommendations in this regard. The academic tutor will provide the student with all the necessary information to facilitate the procedures in any case.

07 Certificate

This program will allow you to obtain your **Internship Program diploma in Oncology Nursing** endorsed by **TECH Global University**, the world's largest online university.

TECH Global University is an official European University publicly recognized by the Government of Andorra ([official bulletin](#)). Andorra is part of the European Higher Education Area (EHEA) since 2003. The EHEA is an initiative promoted by the European Union that aims to organize the international training framework and harmonize the higher education systems of the member countries of this space. The project promotes common values, the implementation of collaborative tools and strengthening its quality assurance mechanisms to enhance collaboration and mobility among students, researchers and academics.

This **TECH Global University** title is a European program of continuing education and professional updating that guarantees the acquisition of competencies in its area of knowledge, providing a high curricular value to the student who completes the program.

Title: **Internship Program in Oncology Nursing**

Duration: **3 weeks**

Attendance: **Monday to Friday, 8-hour consecutive shifts**

Accreditation: **120 ECTS**
