tech 06 | Introduction

International cooperation for the development of peoples is a highly valuable initiative aimed at helping the needlest countries to achieve effective, sustainable, balanced and quality development. But for this to be achieved, it is necessary to count on the collaboration of the countries that have more resources and that, therefore, can allocate their aid to contribute to the development of the rest of the countries.

One of the fundamental issues to achieve the evolution of a town is to have quality healthcare, which will help the survival of its citizens. This is where the work of the Nursing staff plays a relevant role, whose professionals, in addition to having specific knowledge in their area of action, are capable of carrying out multidisciplinary tasks, among which can be found project management or intervention in education to create freer societies.

This program combines basic knowledge in International Cooperation and Development applied to the field of Nursing, tools that allow the cooperant to seek to improve the performance of their functions in those areas that people and peoples demand. Orienting them to change and focusing them on the present situation through the tools and resources of cooperation will be possible after taking this Postgraduate Certificate.

During 2 modules of study you will be able to delve into the different methods of research in International Development Cooperation, learn about the causes, dynamics and consequences of human mobility and migration. In addition, he/she will develop skills to work with the main vulnerable subjects involved in development cooperation actions and programs, as well as to understand the international cooperation system and the different actors that make it up.

A complete academic program that will allow you to develop a unique and avant-garde professional background that will allow you to perform with the required security in multidisciplinary and complex environments in the international humanitarian field. As it is a 100% online Postgraduate Certificate, you will have the freedom to choose the best time to be trained without imposed schedules or transfers to a classroom.

This Postgraduate Certificate in International Cooperation for the Development of Peoples for Nursing contains the most complete and up-to-date scientific program on the market. The most important features include:

- The development of practical cases presented by experts in international cooperation for the development of peoples
- The graphic, schematic, and practical contents with which they are created, provide scientific and practical information on the disciplines that are essential for professional practice.
- Practical exercises where self-assessment can be used to improve learning.
- Its special emphasis on innovative methodologies
- Theoretical lessons, questions to the expert, debate forums on controversial topics, and individual reflection assignments
- Content that is accessible from any fixed or portable device with an Internet connection

You will obtain the fundamental knowledge for the design of International Cooperation projects for development in a comfortable and agile way, 100% online"

The program's teaching staff includes professionals from sector who contribute their work experience to this program, as well as renowned specialists from leading societies and prestigious universities.

Its multimedia content, developed with the latest educational technology, will provide the professional with situated and contextual learning, i.e., a simulated environment that will provide an immersive education programmed to learn in real situations.

The design of this program focuses on Problem-Based Learning, by means of which the professional must try to solve the different professional practice situations that are presented throughout the academic course. For this purpose, the student will be assisted by an innovative interactive video system created by renowned experts.

You will delve into the modalities of International Cooperation for Development with the help of the most expert teachers.

Study from the place and time of your choice. You will be able to dedicate the time necessary to complete this program at your own pace.

tech 10 | Objectives

General Objectives

- Provide students with an advanced qualification in International Development Cooperation, specialized and based on theoretical and instrumental knowledge that will allow them to acquire and develop the skills necessary to obtain a qualification as a professional in international cooperation
- Provide the student with basic knowledge of the cooperation and development process based on the latest advances in policies on the sustainability processes involved in both economic and social aspects
- Improve professional performance and develop strategies for adapting and solving the problems of today's world by means of scientific research in cooperation and development processes
- Disseminate the basics of the current system and develop the critical and entrepreneurial spirit necessary to adapt to political changes, within the framework of international law

With the help of the best professionals in the sector, you will study the latest developments in the humanistic field and International Cooperation"

Specific Objectives

- Know different methods of research in International Development Cooperation
- Gain knowledge on methodologies for public policy advocacy, social communication, political change, etc
- Know the evolution and status of current debates on development
- Become familiar with the instruments of international cooperation for development, as well as the types of projects and existing NGOs
- Develop skills to work with the main vulnerable subjects involved in development cooperation actions and programs
- Understand the international cooperation system and the different members that make it up
- Know the management cycle of a development project
- Know the techniques, trends and projects of international cooperation for development
- Understand the main problems of the different regional and international environments
- Know the different systems, modalities and basic actors of International Development Cooperation
- Know the regional particularities of development and cooperation

tech 14 | Course Management

Guest Director

Ms. Rodríguez Arteaga, Carmen

- Director of the Studies Office of the INEM Directorate
- Head of Education, Strategic Planning and Coordinator of Knowledge Networks in AECID
- Degree in Philosophy and Educational Sciences at UCM
- Specialist in Knowledge Management
- Expert in Educational Evaluation at OEI
- Expert in Educational Indicators and Statistics at UNED
- Expert in Development Cooperation in Education at the University of Barcelona

Management

Ms. Romero Mateos, María del Pilar

- Employment training teacher
- Gender Equality Agent
- Author and collaborator in educational projects at Abile Educativa
- Co-Author of the book: 'Principeso Cara de Beso'
- Postgraduate Diploma in International Development Cooperation

Professors

Mr. Cano Corcuera, Carlos

- General Coordinator of the Spanish Cooperation in the Dominican Republic
- General Coordinator of the Spanish Cooperation in Mexico
- Degree in Biology with a major in Zoology and a minor in Animal Ecology.
- Specialization courses in the following areas: International Cooperation; Identification,
 Formulation and Monitoring of Cooperation Projects; Humanitarian Aid; Equal
 Opportunities; International Negotiations; Planning with a Gender Perspective; ResultsOriented Management for Development; Disability Approach in Cooperation Projects;
 European Union Delegated Cooperation, etc.

Ms. Sánchez Garrido, Araceli

- Responsible for the application of AECID's Cultural Diversity Mainstreaming Guide.
- Professor of the Master in Cultural Management at the Carlos III University of Madrid.
- Degree in Geography and History, specializing in Anthropology and Ethnology of America, Complutense University of Madrid.
- Member of the Faculty of Museum Curators assigned to the Museo de América de Madrid.

Ms. Córdoba, Cristina

- Training and experience in International Development Cooperation Projects
- Co-founder and participant of PalSpain project
- Founder of the Youth Association APUMAK

Ms. Flórez Gómez, Mercedes

- Director of the CFCE in Montevideo
- Degree in Geography and History from the Complutense University of Madrid
- Advanced Diploma in South Cooperation
- Diploma in Humanitarian Action Institute of Studies on Conflict and Humanitarian Action
- MSc in Corporate Social Responsibility from the Pontifical University of Salamanca.
- MSc in Information and Documentation from the Antonio de Nebrija University
- Specialist in Inequality, Cooperation and Development, Instituto Universitario de Desarrollo y Cooperación, Complutense University of Madrid.
- Education, Science and Culture by the OEI.

Ms. Ramos Rollón, Marisa

- Coordinator of the department of Democratic Governance in the Eurosocial program.
- Full Professor of Political Science at UCM
- Responsible for the Democratic Governance sector at the Spanish Agency for International Cooperation.
- Professor of Political Science at the University of Salamanca
- Development Cooperation Advisor to the Vice Rector of International Relations and Cooperation of the Complutense University of Madrid
- Doctor of Political Science from the Complutense University of Madrid in the Contemporary Latin America program.
- Bachelor's Degree in Political Science with a major in International Relations and Latin American Studies from UCM.

tech 18 | Structure and Content

With TECH a new way of learning has arrived. Study 100% online and combine your daily life with this new program"

This academic program offers students a different way of learning. Our methodology uses a cyclical learning approach: **Relearning.**

This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the **New England Journal of Medicine** have considered it to be one of the most effective.

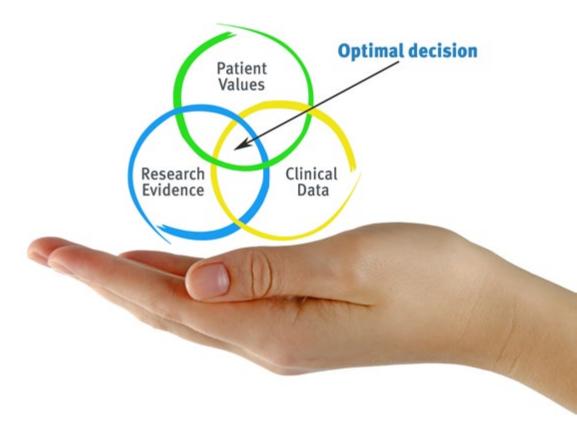

tech 26 | Methodology

At TECH Nursing School we use the Case Method

In a given situation, what should a professional do? Throughout the program, students will face multiple simulated clinical cases, based on real patients, in which they will have to do research, establish hypotheses, and ultimately resolve the situation. There is an abundance of scientific evidence on the effectiveness of the method. Nurses learn better, faster, and more sustainably over time.

With TECH, nurses can experience a learning methodology that is shaking the foundations of traditional universities around the world.

According to Dr. Gérvas, the clinical case is the annotated presentation of a patient, or group of patients, which becomes a "case", an example or model that illustrates some peculiar clinical component, either because of its teaching power or because of its uniqueness or rarity. It is essential that the case is based on current professional life, in an attempt to recreate the real conditions in professional nursing practice.

Did you know that this method was developed in 1912, at Harvard, for law students? The case method consisted of presenting students with real-life, complex situations for them to make decisions and justify their decisions on how to solve them. In 1924, Harvard adopted it as a standard teaching method"

The effectiveness of the method is justified by four fundamental achievements:

- Nurses who follow this method not only grasp concepts, but also develop their mental capacity, by evaluating real situations and applying their knowledge.
- 2. The learning process has a clear focus on practical skills that allow the nursing professional to better integrate knowledge acquisition into the hospital setting or primary care.
- 3. Ideas and concepts are understood more efficiently, given that the example situations are based on real-life.
- **4.** Students like to feel that the effort they put into their studies is worthwhile. This then translates into a greater interest in learning and more time dedicated to working on the course.

Relearning Methodology

At TECH we enhance the case method with the best 100% online teaching methodology available: Relearning.

This university is the first in the world to combine case studies with a 100% online learning system based on repetition combining a minimum of 8 different elements in each lesson, which is a real revolution compared to the simple study and analysis of cases.

The nurse will learn through real cases and by solving complex situations in simulated learning environments.

These simulations are developed using state-of-the-art software to facilitate immersive learning.

Methodology | 29 tech

At the forefront of world teaching, the Relearning method has managed to improve the overall satisfaction levels of professionals who complete their studies, with respect to the quality indicators of the best online university (Columbia University).

With this methodology we have trained more than 175,000 nurses with unprecedented success in all specialities regardless of practical workload. Our pedagogical methodology is developed in a highly competitive environment, with a university student body with a strong socioeconomic profile and an average age of 43.5 years old.

Relearning will allow you to learn with less effort and better performance, involving you more in your specialization, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation to success.

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

The overall score obtained by TECH's learning system is 8.01, according to the highest international standards.

This program offers the best educational material, prepared with professionals in mind:

Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is really specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

Nursing Techniques and Procedures on Video

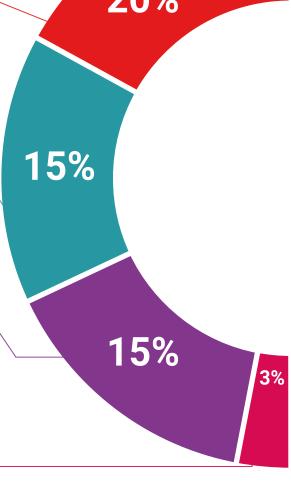

We introduce you to the latest techniques, to the latest educational advances, to the forefront of current medical techniques. All of this in direct contact with students and explained in detail so as to aid their assimilation and understanding. And best of all, you can watch them as many times as you want.

Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive educational system for presenting multimedia content was awarded by Microsoft as a "European Success Story".

Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

Expert-Led Case Studies and Case Analysis

Effective learning ought to be contextual. Therefore, TECH presents real cases in which the expert will guide students, focusing on and solving the different situations: a clear and direct way to achieve the highest degree of understanding.

Testing & Retesting

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises, so that they can see how they are achieving their goals.

Classes

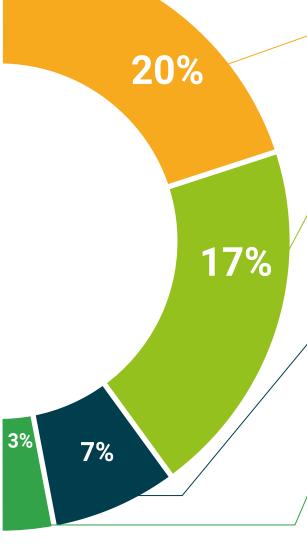

There is scientific evidence suggesting that observing third-party experts can be useful.

Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

Quick Action Guides

TECH offers the most relevant contents of the course in the form of worksheets or quick action guides. A synthetic, practical, and effective way to help students progress in their learning.

tech 34 | Certificate

This program will allow you to obtain your **Postgraduate Certificate in International Cooperation for People's Development for Nursing** endorsed by **TECH Global University**, the world's largest online university.

TECH Global University is an official European University publicly recognized by the Government of Andorra (*official bulletin*). Andorra is part of the European Higher Education Area (EHEA) since 2003. The EHEA is an initiative promoted by the European Union that aims to organize the international training framework and harmonize the higher education systems of the member countries of this space. The project promotes common values, the implementation of collaborative tools and strengthening its quality assurance mechanisms to enhance collaboration and mobility among students, researchers and academics.

This **TECH Global University** title is a European program of continuing education and professional updating that guarantees the acquisition of competencies in its area of knowledge, providing a high curricular value to the student who completes the program.

Title: Postgraduate Certificate in International Cooperation for People's Development for Nursing Modality: online

Duration: 12 weeks

Accreditation: 12 ECTS

Mr./Ms. _____, with identification document _____ has successfully passed and obtained the title of:

Postgraduate Certificate in International Cooperation for People's Development for Nursing

This is a program of 360 hours of duration equivalent to 12 ECTS, with a start date of dd/mm/yyyy and an end date of dd/mm/yyyy.

TECH Global University is a university officially recognized by the Government of Andorra on the 31st of January of 2024, which belongs to the European Higher Education Area (EHEA).

In Andorra la Vella, on the 28th of February of 2024

^{*}Apostille Convention. In the event that the student wishes to have their paper diploma issued with an apostille, TECH Global University will make the necessary arrangements to obtain it, at an additional cost.
