01

Introduction

Mutual insurance companies and prevention societies were structured throughout the 20th century, in response to the need for legal coverage of damages caused to workers during their working day. The first signs of prevention societies can be found as early as 1944, when occupational health and safety committees began to be organized.

“

Take the opportunity to learn about the latest trends in Occupational Nursing Management, and improve your Nursing care remarkably”

With this Postgraduate Certificate, the student is offered the possibility of introducing and perfect themselves in the broad framework of Occupational Nursing, whose branches range from the promotion of worker health, the prevention of occupational diseases and accidents. From the assistance of the injured worker with the follow-up of his process until medical discharge or disability if so deemed by the competent body.

All of this fragmented into modules that will detail each area of Nursing work in the occupational health environment.

Furthermore, it is a topic of study that despite the fact that care and observation are on the rise, figures are increasingly prominent in common contingency sick leave, representing a high economic cost for Spanish society.

Across the program, we will carry out an exhaustive review of the main concepts that revolve around mutual and prevention societies and their main functions as private entities and collaborators of the social security. All this without losing sight of the nursing staff, who play a fundamental role in the workplace, since their role includes monitoring and understanding the contents of the data they handle and the results of the medical examinations carried out by the prevention and health surveillance companies.

The role of Nursing personnel within management entities such as workplace accident mutuals is fundamental, in which they represent nursing care in all its essence, providing holistic care to injured workers, favoring the well-being of the patient, covering their recovery needs and managing everything they need from a clinical point of view. All this from the beginning of the accident to the end of the process.

The Postgraduate Certificate represents a complete vision of those aspects that give meaning to the relationship between our working life and our health.

This **Postgraduate Certificate in Management in Occupational Nursing** contains the most complete and up-to-date scientific program on the market. The most important features include:

- ♦ Development of clinical cases presented by experts in the different areas of multidisciplinary knowledge. Its graphic, schematic contents and eminently practical with which they are conceived, they collect scientific and health care information on those essential disciplines for professional practice
- ♦ News about Occupational Nursing Management
- ♦ An algorithm-based interactive learning system for decision-making in the clinical situations presented throughout the course
- ♦ With a special emphasis on evidence-based Nursing and methodologies of research in Occupational Nursing Management
- ♦ All of this will be complemented by theoretical lessons, questions to the expert, debate forums on controversial topics, and individual reflection assignments
- ♦ Content that is accessible from any fixed or portable device with an Internet connection

Update your knowledge, through the Diploma in Occupational Nursing Management program"

“

This Postgraduate Certificate is the best investment you can make in selecting an update program for two reasons: in addition to updating your knowledge in Occupational Nursing Management, you will obtain a Diploma from TECH Technological University”

The program's Its teaching staff includes health professionals belonging to the field of Mental Occupational Nursing Management health, who bring the experience of their work to this specialization , in addition to recognized specialists belonging to scientific societies of reference.

Thanks to its multimedia content developed with the latest educational technology, they will allow the professional a situated and contextual learning, that is to say, a simulated environment that will provide an immersive learning programmed to prepare in real situations.

This program is designed around Problem-Based Learning, whereby the physician must try to solve the different professional practice situations that arise during the course. For this, professionals will have the help of an innovative interactive video system made by recognized experts in the field of Nursing and with extensive teaching experience.

Increase your decision-making confidence by updating your knowledge through this Postgraduate Certificate.

Don't miss out on the opportunity to update your knowledge in Management in Occupational Nursing in order to improve your care of your patients.

02 Objectives

The main objective pursued by the program is the development of theoretical-practical learning, so that the Nursing staff can master in a practical and rigorous way the study of Occupational Nursing Management.

“

This refresher program will generate a sense of confidence in the performance of the Nursing Staff's practice, which will help you grow personally and professionally"

General Objectives

- Know the concepts of health and the legislative framework that is applied in Occupational Nursing
- Delve into the Management System that plans the activity of Nursing Assistance
- Distinguish between the different occupational risk prevention techniques that are linked to prevention and health promotion in the workplace
- Distinguish between the pathologies of occupational origin and their management, as well as the different stages of occupational disability
- Describe the different protocols and performance assessment for occupational nursing practice

This program is the best way to know Management in Occupational Nursing and improve the care your patients need"

Specific Objectives

- ♦ Explain the different layers that make up companies and types of organization
- ♦ Explain the characteristics of a working team and the materials
- ♦ Formulate the organization of a work team
- ♦ Apply teamwork as a central axis of the job
- ♦ Strategically plan according to the necessities that arise
- ♦ Highlight the importance of occupational law
- ♦ Define the different quality systems to which companies are subjected and the audits they undergo
- ♦ Describe the different protocols and performance assessment for occupational nursing practice

03

Course Management

This program includes health professionals of recognized prestige in its teaching staff, who belong to the field of Occupational Nursing Management and who pour the experience of his work in this specialization. Furthermore, recognized specialists and members of national scientific societies of international prestige also participate in its design.

“

*Learn from reference professionals,
the latest advances in Management
in Occupational Nursing”*

Management

Ms. Santos Posada, Araceli

- ♦ President of the Association of Occupational Nursing Specialists
- ♦ National Secretary of ICOH Spain (International Commission on Occupational Health)
- ♦ Teacher at the National School of Occupational Medicine
- ♦ Degree in Nursing from the University of Salamanca
- ♦ Specialist in Nursing Occupational Medicine from the Complutense University of Madrid
- ♦ Diploma in Speech Therapy and Phoniatics
- ♦ Superior Technician in PRL (Safety)
- ♦ Dermo-aesthetic Nursing Expert

Professors

Ms. Chanca Díaz, Alicia

- ♦ Specialist in Occupational Nursing
- ♦ Regional Coordinator Sanitary Services of a private company
- ♦ Work and Organizational Psychologist
- ♦ Occupational Nurse
- ♦ Active member and collaborator of the Madrid Association of Occupational Nursing (AMET) and the National Association of Specialists in Occupational Nursing (AET)
- ♦ Author of scientific publications and tutor of occupational health itineraries and monographs for specialists in occupational nursing carried out by FUDEN and endorsed by the University of Castilla la Mancha
- ♦ Graduate in Psychology National University of Distance Education - UNED
- ♦ Qualification as Nurse Specialist in Occupational Nursing. University of Salamanca
- ♦ Senior Technician in Occupational Risk Prevention with the specialties: Applied Ergonomics and Psychosociology, Industrial Health and Safety. School of Political Scientists and Sociologists
- ♦ Various complementary training courses in Occupational Health, Psychosocial Risks and Leadership and Management

Ms. García Ramírez, Begoña

- ◆ Occupational Nurse
- ◆ Vicepresident of the AMET(Association of Occupational Nursing Specialists)
- ◆ Nursing supervisor
- ◆ Nurse in the National Health System
- ◆ Degree in Nursing
- ◆ Occupational Nursing Specialist from the National School of Occupational Medicine
- ◆ Higher Technician in Occupational Risk Prevention, Safety at Work, Industrial Hygiene, Ergonomics and Psychosociology applied by the International School of High
- ◆ Hospital Management
- ◆ Master's Degree in Nursing Management
- ◆ Master's Degree in Middle School and High School Teacher Training, Professional Training and Language Training
- ◆ Expert in sexuality and recognition of human fertility
- ◆ Postgraduate Diploma in School Nursing
- ◆ Postgraduate Diploma in Trainer of Trainers
- ◆ Active member of the Association of Occupational La Nursing Specialists

Ms. Guerra Cuesta, Ana

- ◆ Specialist in Occupational Nursing
- ◆ President of the Castillian Association of Occupational Nursing (AETCYL Health Nurses)
- ◆ Member of the Spanish Association of Vaccinology
- ◆ Collaboration with the Subdirectorate General for Occupational Health of the Ministry of Health
- ◆ Coordinator of the AET Working Group on Coronaviruses
- ◆ Degree in Nursing, Diploma adaptation course University of Leon
- ◆ Specialist in Occupational Nursing
- ◆ Senior Technician in Occupational Risk Prevention, specializing in Industrial Hygiene
- ◆ Master's Degree in Occupational Risk Prevention (Hygiene, Safety, Ergonomics and Psychosociology)
- ◆ Postgraduate Diploma in Vaccines

Make the most of this opportunity to learn about the latest advances in this field in order to apply them to your daily practice"

04

Structure and Content

The structure of the contents has been designed by a team of professionals who are aware of the implications of specialization in the daily practice of Nursing staff, aware of the current relevance of specialization to be able to act before pediatric patients with learning problems, or mental disorders and committed to quality teaching through new educational technologies.

“

This Postgraduate Certificate in Management in Occupational Nursing contains the most complete scientific program and up-to-date on the market”

Module 1. General Aspects of Management

- 1.1. Business, Types of Business Organization, Work Contract, etc
 - 1.1.1. Types of Businesses
 - 1.1.2. Types of Business Organization
 - 1.1.3. Types of Work Contracts
- 1.2. Human and Material Resources Management
 - 1.2.1. Human Resources Management
 - 1.2.2. Material Resources Management
- 1.3. Organization of Work
 - 1.3.1. Lineal Organization
 - 1.3.2. Functional Organization
- 1.4. Teamwork
 - 1.4.1. Advantages
 - 1.4.2. Possible Disadvantages
- 1.5. Strategic Planning
 - 1.5.1. Integration Strategies
 - 1.5.2. Intensive Strategies
 - 1.5.3. Diversification Strategies
 - 1.5.4. Defensive Strategies
- 1.6. Labor Law
 - 1.6.1. Workers' Rights and Responsibilities
 - 1.6.2. Business Owners' Rights and Responsibilities
- 1.7. Quality Systems in Organizations
 - 1.7.1. Audits
 - 1.7.2. Audit Objectives
 - 1.7.3. Types of Audits
- 1.8. Studies, Protocols, Program Evaluation and Action Guides for Occupational Nursing Practice
 - 1.8.1. Importance of Protocols and Action Guides
 - 1.8.2. Program Evaluation

“

A unique, key, and decisive experience to boost your professional development”

05

Methodology

This academic program offers students a different way of learning. Our methodology uses a cyclical learning approach: **Relearning**.

This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the **New England Journal of Medicine** have considered it to be one of the most effective.

“

Discover Relearning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization"

At TECH Nursing School we use the Case Method

In a given situation, what should a professional do? Throughout the program, students will face multiple simulated clinical cases, based on real patients, in which they will have to do research, establish hypotheses, and ultimately resolve the situation. There is an abundance of scientific evidence on the effectiveness of the method. Nurses learn better, faster, and more sustainably over time.

With TECH, nurses can experience a learning methodology that is shaking the foundations of traditional universities around the world.

According to Dr. Gérvas, the clinical case is the annotated presentation of a patient, or group of patients, which becomes a "case", an example or model that illustrates some peculiar clinical component, either because of its teaching power or because of its uniqueness or rarity. It is essential that the case is based on current professional life, in an attempt to recreate the real conditions in professional nursing practice.

“

Did you know that this method was developed in 1912, at Harvard, for law students? The case method consisted of presenting students with real-life, complex situations for them to make decisions and justify their decisions on how to solve them. In 1924, Harvard adopted it as a standard teaching method”

The effectiveness of the method is justified by four fundamental achievements:

1. Nurses who follow this method not only grasp concepts, but also develop their mental capacity, by evaluating real situations and applying their knowledge.
2. The learning process has a clear focus on practical skills that allow the nursing professional to better integrate knowledge acquisition into the hospital setting or primary care.
3. Ideas and concepts are understood more efficiently, given that the example situations are based on real-life.
4. Students like to feel that the effort they put into their studies is worthwhile. This then translates into a greater interest in learning and more time dedicated to working on the course.

Relearning Methodology

At TECH we enhance the case method with the best 100% online teaching methodology available: Relearning.

This university is the first in the world to combine case studies with a 100% online learning system based on repetition combining a minimum of 8 different elements in each lesson, which is a real revolution compared to the simple study and analysis of cases.

The nurse will learn through real cases and by solving complex situations in simulated learning environments. These simulations are developed using state-of-the-art software to facilitate immersive learning.

At the forefront of world teaching, the Relearning method has managed to improve the overall satisfaction levels of professionals who complete their studies, with respect to the quality indicators of the best online university (Columbia University).

With this methodology we have trained more than 175,000 nurses with unprecedented success in all specialities regardless of practical workload. Our pedagogical methodology is developed in a highly competitive environment, with a university student body with a strong socioeconomic profile and an average age of 43.5 years old.

Relearning will allow you to learn with less effort and better performance, involving you more in your specialization, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation to success.

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

The overall score obtained by TECH's learning system is 8.01, according to the highest international standards.

This program offers the best educational material, prepared with professionals in mind:

Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is really specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

Nursing Techniques and Procedures on Video

We introduce you to the latest techniques, to the latest educational advances, to the forefront of current medical techniques. All of this in direct contact with students and explained in detail so as to aid their assimilation and understanding. And best of all, you can watch them as many times as you want.

Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive educational system for presenting multimedia content was awarded by Microsoft as a "European Success Story".

Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

Expert-Led Case Studies and Case Analysis

Effective learning ought to be contextual. Therefore, TECH presents real cases in which the expert will guide students, focusing on and solving the different situations: a clear and direct way to achieve the highest degree of understanding.

Testing & Retesting

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises, so that they can see how they are achieving their goals.

Classes

There is scientific evidence suggesting that observing third-party experts can be useful.
Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

Quick Action Guides

TECH offers the most relevant contents of the course in the form of worksheets or quick action guides. A synthetic, practical, and effective way to help students progress in their learning.

06 Certificate

The Postgraduate Certificate in Management in Occupational Nursing guarantees students, in addition to the most rigorous and up-to-date education, access to a Postgraduate Certificate issued by TECH Technological University.

“

*Successfully complete this program
and receive your university qualification
without having to travel or fill out
laborious paperwork”*

This **Postgraduate Certificate in Management in Occupational Nursing** contains the most complete and up-to-date scientific program on the market.

After the student has passed the assessments, they will receive their corresponding **Postgraduate Certificate** issued by **TECH Technological University** via tracked delivery*.

The certificate issued by **TECH Technological University** will reflect the qualification obtained in the Postgraduate Certificate, and meets the requirements commonly demanded by labor exchanges, competitive examinations, and professional career evaluation committees.

Title: **Postgraduate Certificate in Management in Occupational Nursing**

Modality: **online**

Duration: **6 weeks**

*Apostille Convention. In the event that the student wishes to have their paper certificate issued with an apostille, TECH EDUCATION will make the necessary arrangements to obtain it, at an additional cost.
