06 Certificate

tech 06 | Introduction

Within the out-of-hospital emergency care process, the transport and transfer of the patient occupies a prominent place, since the objective is to provide specialized health care in the shortest possible time, in order to avoid death or serious sequelae to the patient.

The transfer of the patient to the hospital for care and definitive treatment must be carried out with all the guarantees of speed and safety, so it is essential that the nursing professional has a high level of qualification in this field and knows how to organize and coordinate a Medical Emergency System, the pathophysiology of medical transport, as well as the different models of patient transfer.

This Postgraduate Certificate in Medical Transport for Nurses is designed to update the knowledge of the nursing professional on the operation of emergency services and medical transport, with special emphasis on specific training for the exercise of the professional activity.

This **Postgraduate Certificate in Medical Transport for Nurses** contains the most complete and up-to-date scientific program on the market. The most important features of the Postgraduate Certificate are:

- Clinical cases presented by experts in medical transport. The graphic, schematic, and eminently practical contents with which they are created, provide scientific and practical information on the disciplines that are essential for professional practice.
- Diagnostic and therapeutic novelties on the most frequently referred emergencies by means of medicalized transport
- An algorithmbased interactive learning system for decision-making in the clinical different situations presented throughout the course
- All of this will be complemented by theoretical lessons, questions to the expert, debate forums on controversial topics, and individual reflection assignments.
- Content that is accessible from any fixed or portable device with an Internet connection

Update your knowledge through the Postgraduate Certificate in Medical Transport for Nurses in a practical way and adapted to your needs"

This may be the best investment you can make when choosing a refresher program for two reasons: in addition to updating your knowledge in medical transport, you will obtain a Postgraduate Certificate from TECH Technological University"

Forming part of the teaching staff is a group of professionals in the field of emergencies, who bring to this training their work experience, as well as a group of renowned specialists, recognised by esteemed scientific communities.

The multimedia content developed with the latest educational technology will provide the professional with situated and contextual learning, i.e., a simulated environment that will provide immersive training program to train in real situations.

The design of the program is based on Problem-Based Learning, by means of which the nursing professional must try to solve the different professional practice situations that arise throughout the course. For this reason, you will be assisted by an innovative, interactive video system created by renowned and experienced experts in the field of medical transport of a with extensive teaching experience.

This Postgraduate Certificate offers training in simulated environments, which provides an immersive learning experience designed to train for real-life situations.

It includes clinical cases to bring the program's degree as close as possible to the reality of care in Nursing.

tech 10 | Objectives

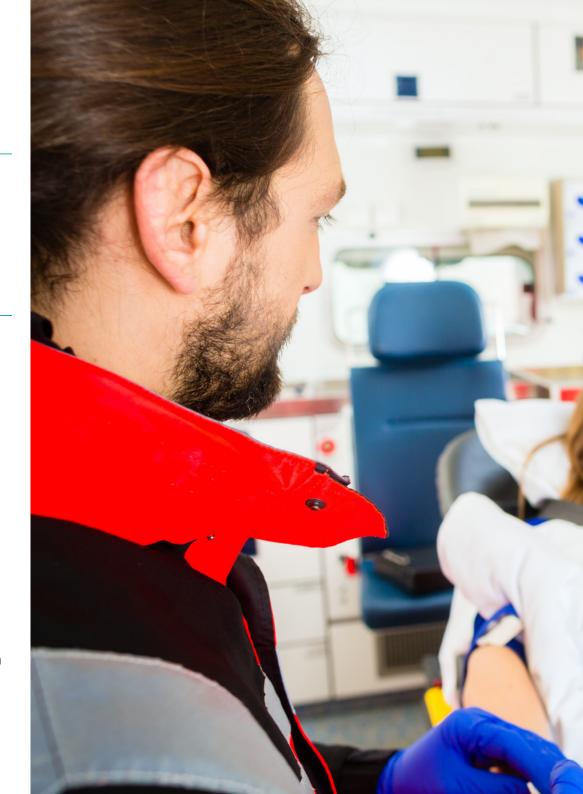

General Objective

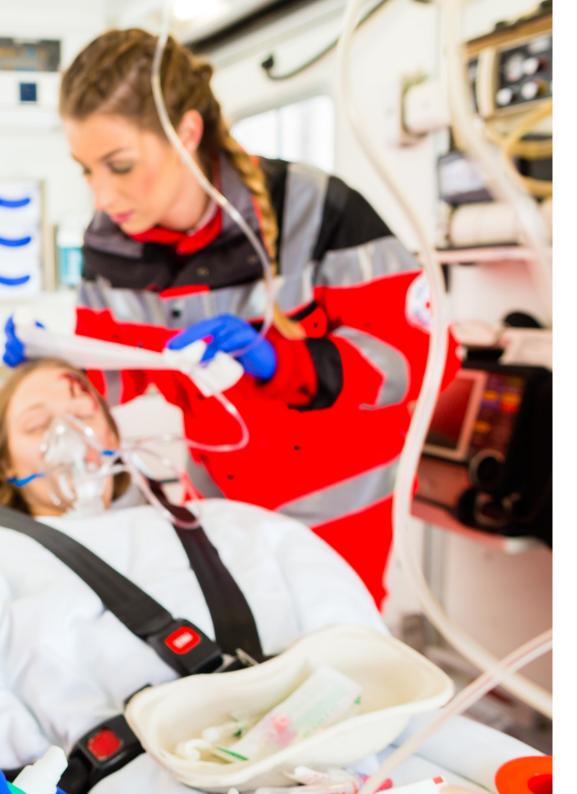

• Update the knowledge and skills required to organize emergency medical services and medical transport

Specific Objectives

- Identify the fundamentals of emergency health care.
- * Apply clinical and non-clinical professional skills in emergency and disaster medicine
- Use medical records in the emergency department and understand the most relevant legal and ethical aspects of health care in emergencies.
- Prioritize, organize and manage patient care in the most efficient way through triage
- Analyze knowledge on how emergency coordination centers work.
- Apply established criteria for selecting the most appropriate mode of medical transport
- Describe the main characteristics of medical transport, its pathophysiology and the different EMS transport options.
- Analyze the risk management of transport for patients and staff.
- Identify the equipment and the communication systems in an EMS.
- Describe the concept of continuity of care and hospital
- transfer
- Establish the criteria and guidelines for appropriate and efficient communication between the various agents involved in the emergency and critical patient care systems

Seize the opportunity and take the step to get up-to-date on the most important aspects of medical transport.

Directeur invité international

Dr. Fadi Salah Issa has become one of the world's leading experts in the field of **Emergency Medicine**. For more than 20 years he has developed a tireless work in this subspecialty of **Urgencies and Emergencies**.

A work that starts from his performance as an emergency physician at the King Faisal Specialist Hospital & Research Centre, where he implemented a new system and rapid care facility that reduced waiting times for patients. This allowed him to improve care and more efficiently handle complex cases of oncology, transplant patients and congenital diseases. Thanks to his deep interest in providing the best healthcare response to disaster situations, Salah Issa has turned his efforts to academia and research, promoting specialized and continuous education for medical professionals.

In this regard, he is the Director of Education for the Disaster Medicine Fellowship at the BIMC Medical Havard Medical School. A role that joins the co-supervision of the European Disaster Medicine Thesis Board at the University of Eastern Piedmont. His impact in this area has been positive, contributing to the better preparation of health workers. In addition, his concern for humanitarian work has led him to become involved in the World Association of Disaster and Emergency Medicine (WADEM), where he serves as chairman of the special interest group against terrorism.

In this line, his scientific studies also include his analysis of attacks on educational institutions, the prevention of post-traumatic stress and the promotion of the resilience of healthcare personnel in the face of COVID-19, anti-terrorist medicine and the analysis of variability in the training of expatriate pre-hospital providers in Bahrain.

Dr. Salah Issa, Fadi

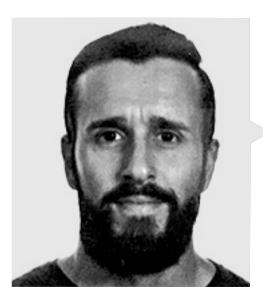

- · Emergency Physician specialized in Emergency Medicine
- Co-supervisor of the European Disaster Medicine Thesis Board at the University of Eastern Piedmont
- Director of Education for the BIMC Disaster Medicine Fellowship at Harvard Medical School BIMC Physicians
- Director of Disaster Preparedness Education Initiatives at Harvard Medical School BIDMC Physicians
- · Research Fellowship in Disaster Medicine at Harvard Medical School
- · Emergency Physician at King Faisal Especialist Hospital & Research Centre
- Team Leader and Emergency Physician at Armed Forces Hospitals-Southern Region, Khamis Mushayt, KSA
- Bachelor of Medicine and Surgery, University of Medicine and Pharmacology, Cariova, Romania
- Disaster Medicine and Emergency Management from Harvard Medical School Medical Doctors in BIDMC
- Master's Degree in Disaster Medicine from the University of Piemonte Orientale, Italy
- Chairman of the Counterterrorism Special Interest Group of the World Association of Disaster and Emergency Medicine (WADEM)
- · Fellow of the Academy of Harvard Medical School

Thanks to TECH, you will be able to learn with the best professionals in the world"

tech 16 | Direction de la formation

Guest Directors

Ruiz López, Daniel

- Nursing Supervisor in the Adult Emergency Department of the Hospital Universitario La Paz (Madrid).
- · Postgraduate Certificate in Nursing (D.U.E.), University School of Nursing, Cordoba.
- · Master's Degree in Nursing Management. Cardenal Herrera University.
- University Expert in Nursing in the Hospital Emergency Department. Cardenal Herrera University.
- · University Expert in Management Skills for Nursing. Cardenal Herrera University.
- · University Expert in Quality Management for Nursing. Cardenal Herrera University.
- · University Expert in Management and Services Supervision for Nursing. Cardenal Herrera University.
- University Expert in Direction and Management of Health Services for Nurses. Cardenal Herrera University.
- Training Course for Trainers and Auditors in Triage Manchester. Spanish Triaje Group.
- * Triaje System Training Course. Spanish Triaje Group.

Souto Novas, Ana Ma

- · Emergency Supervisor at La Paz University Hospital.
- University Diploma in Nursing from the Universidad Pontificia of Salamanca.
- * Master's Degree in Integration and Critical Problem Solving in Nursing from the University of Alcalá.
- Degree in Social and Cultural Anthropology from the Autonomous University of Madrid.
- · Advanced Training in Dialysis Techniques for Nurses.
- · University Expert in Accidents and Emergencies from the Complutense University of Madrid.
- * Training Course on Out-of-Hospital Emergencies from the Complutense University of Madrid.
- · University Expert in Management and Services Leadership for Nursing.
- Priority Triage in the Emergency Department. Manchester System.
- Training in Emergency Planning and Self-Protection.

Codirector

Roig D'Cunha-Kamath, Francisco Vicente

- Degree in Medicine from the University of Valencia
- Specialist via MIR in Family and Community Medicine
- · Assistant Physician of the Emergency Medicine Department at the Clinical University Hospital of Valencia.
- · Professor of Human Anatomy at the European University of Valencia.
- Physician at the Valencia Health and Community Foundation.
- · Doctor for the ASCIRES group

tech 18 | Direction de la formation

Professors

Gómez Lage, Laura

- * Adult Emergency Supervisor at La Paz University Hospital.
- * Degree in Nursing from the Complutense University of Madrid.
- University Expert in the Nursing Processes and Interventions of Pediatric Patients in Life Threatening Situations.
- University Expert in the Emotional Development and Upbringing of a Child.
- * Pharmacology Residency in Emergency Medicine.
- Nursing Basics in Emergencies.

Chamizo Alberto, Leticia

- * Nurse in the Emergency Services of H.U La Paz.
- * Diploma in Nursing from the Red Cross School, Autonomous University of Madrid.
- Expert in Out-of-Hospital Emergency Care at the School of Health Sciences, Complutense University, Madrid.
- * Qualifying certificate for Manchester Triage at HU La Paz.
- Basic Life Support and Advanced Life Support Course.
- Course on Initial care of the polytraumatized patient; Nursing action before the main traumatisms of a polytraumatized patient and Monitoring of the critical patient.

Vega Vega, Luis

- Nurse in the Emergency Services of HU La Paz
- * Degree in Nursing from the Red Cross School.
- Expert in out-of-hospital care and Master of Nursing in Emergency and Critical Care at the European University of Madrid.
- University Expert in Comprehensive Management of Adults in Infectious Diseases Care Processes.
- * Instructor of Basic Life Support and First Aid.
- Manchester Triage Enabling Course.
- Active member of the Red Cross ERIE Health Care.

Direction de la formation | 19 tech

Forés Rivas, Ana

- Member of the Intensive Care Unit of the Dr. Peset University Hospital.
- University Diploma in Nursing.
- Diploma in Corporate Nursing.
- Master's Degree in the Prevention and Treatment of Addictive Behaviors.
- Technical Specialist in a Laboratory.
- Certificate of Pedagogical Aptitude (CAP)
- * Health and Community Foundation. July 2006 May 2012 and June 2017 until present.

Dr. Brasó Aznar, José Vicente

- Hospital Emergency Physician
- Associate Professor of Emergency Medicine at the Faculty of Medicine of the University of Valencia.
- Head of Department Emergency Medicine. Ribera University Hospital.

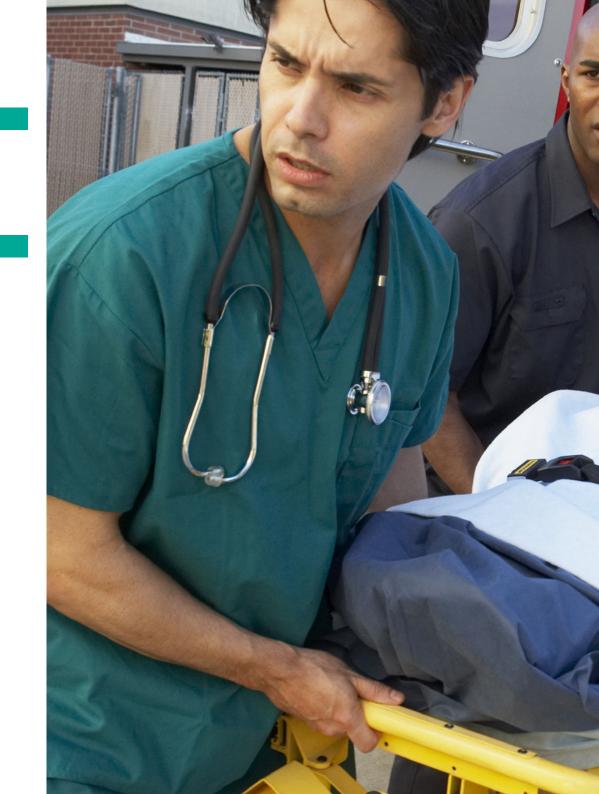

tech 22 | Structure and Content

Module 1. General aspects

- 1.1. Definitions and Concepts.
- 1.2. Comprehensive Study of Health Emergencies.
- 1.3. Functions of Emergency and Disaster Nursing
- 1.4. Bioethics in Emergencies and Disasters

Module 2. Emergency Services and Medical Transport.

- 2.1. Organization of Medical Emergency Systems
- 2.2. Coordination and Health Regulation.
- 2.3. Information and Record Systems.

A unique, key, and decisive training experience to boost your professional development"

This training provides you with a different way of learning. Our methodology uses a cyclical learning approach: **Re-learning**.

This teaching system is used in the most prestigious medical schools in the world, and major publications such as the **New England Journal of Medicine**have considered it to be one of the most effective.

tech 26 | Methodology

At TECH Nursing School we use the Case Method

In a given clinical situation, what would you do? Throughout the program, you will be presented with multiple simulated clinical cases based on real patients, where you will have to investigate, establish hypotheses and, finally, resolve the situation. There is abundant scientific evidence on the effectiveness of the method. Nurses learn better, faster, and more sustainably over time.

With TECH, nurses can experience a learning methodology that is shaking the foundations of traditional universities around the world.

According to Dr. Gérvas, the clinical case is the annotated presentation of a patient, or group of patients, which becomes a "case", an example or model that illustrates some peculiar clinical component, either because of its teaching power or because of its uniqueness or rarity. It is essential that the case is based on current professional life, in an attempt to recreate the real conditions in professional nursing practice.

Did you know that this method was developed in 1912 at Harvard for law students? The case method consisted of presenting students with real-life, complex situations for them to make decisions and justify their decisions on how to solve them. In 1924, Harvard adopted it as a standard teaching method"

The effectiveness of the method is justified by four fundamental achievements:

- Nurses who follow this method not only grasp concepts, but also develop their mental capacity by evaluating real situations and applying their knowledge.
- 2. The learning process has a clear focus on practical skills that allow the nursing professional to better integrate knowledge acquisition into the hospital setting or primary care.
- 3. Ideas and concepts are understood more efficiently, given that the example situations are based on real-life.
- **4.** Students like to feel that the effort they put into their studies is worthwhile. This then translates into a greater interest in learning and more time dedicated to working on the university program.

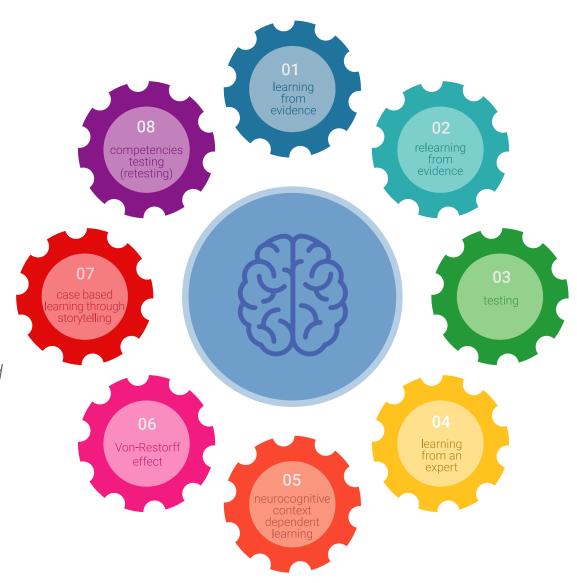

Re-Learning Methodology

At TECH we enhance the Harvard case method with the best 100% online teaching methodology available: Re-learning.

Our University is the first in the world to combine the study of clinical cases with a 100% online learning system based on repetition, combining a minimum of 8 different elements in each lesson, which represent a real revolution with respect to simply studying and analyzing cases.

The nurse will learn through real cases and by solving complex situations in simulated learning environments. These simulations are developed using state-of-the-art software to facilitate immersive learning.

Methodology | 29 tech

At the forefront of world teaching, the Re-learning method has managed to improve the overall satisfaction levels of professionals who complete their studies, with respect to the quality indicators of the best Spanish-speaking online university (Columbia University).

With this methodology we have trained more than 175,000 nurses with unprecedented success, in all specialties regardless of from the workload. All this in a highly demanding environment, where the students have a strong socio-economic profile and an average age of 43.5 years.

Re-learning will allow you to learn with less effort and better performance, involving you more in your specialization, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation to success.

In our program, learning is not a linear process, but rather a spiral (we learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

The overall score obtained by our learning system is 8.01, according to the highest international standards

tech 28 | Methodology

In this Postgraduate Certificate you will have access to the best educational material, prepared with you in mind:

Study Material

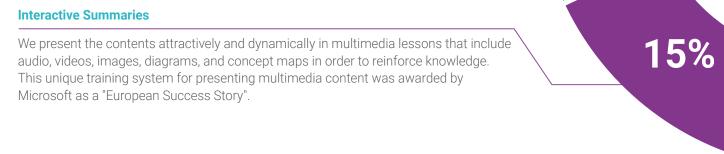

After a complex production process, we transform the best content into high-quality educational and audiovisual multimedia. We select the best syllabus and make it available to you. Everything you need to acquire in-depth knowledge of a discipline, from A to Z. Lessons written and chosen by specialists in each of the disciplines.

Surgical techniques and clinical procedures on video

We bring you closer to the newest techniques, to the latest scientific advances, to the forefront of nursing news. All this, in first person, with the maximum rigor, explained and detailed for your assimilation and understanding. And best of all, you can watch them as many times as you want.

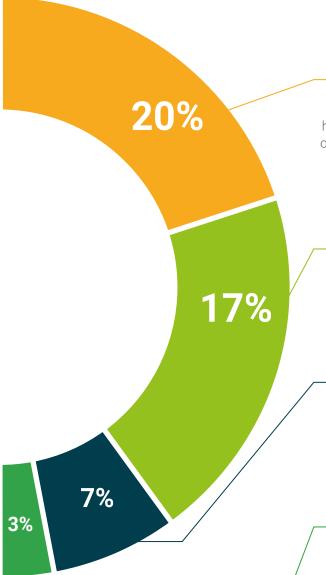

20%

15%

Additional Reading

Recent articles, consensus documents, international guides... in our virtual library you will have access to everything you need to complete your training.

Expert-Led Case Studies and Case Analysis

Through the narratives of expert professionals, it is possible to acquire a high degree of understanding of the most frequent problematic situations. The professional's healthcare practice is not alien to the context in which it takes place. If we want to train ourselves to improve our professional practice, this training must be situated within the context in which it takes place.

Testing & Re-testing

We periodically evaluate and re-evaluate your knowledge throughout this program through activities and evaluative exercises.

Classes

There is scientific evidence suggesting that observing third-party experts can be useful. Learning from an expert strengthens knowledge and recall, and generates confidence in our future difficult decisions

Quick Action Guides

One of the most important functions of our team is to select those contents considered essential and present them in the form of worksheets or quick action guides to facilitate their understanding.

tech 34 | Certificate

This **Postgraduate Certificate in Medical Transport for Nurses** contains the most complete and up-to-date scientific program on the market.

After students have passed the assessments, they will receive, by certified mail, their Postgraduate Certificate issued by TECH Technological University.

The certificate issued by **TECH Technological University** will express the qualification obtained in the **Postgraduate Certificate**, and will meet the requirements commonly demanded by labour exchanges, competitive examinations and professional career evaluation committees.
