01

Introduction

Cardiac etiology emergencies are the most frequently treated pathologies by emergency nursing professionals in primary care, where swift and accurate action can reduce mortality and complications. This program offers medical professionals the opportunity to obtain a practical update on the information and monitoring protocols required to treat emergencies. It is a 100% online program that compiles up-to-date information and audiovisual material to nurture the professional's mind for the challenges ahead.

“

This program in cardiac emergencies contains the most complete syllabus in the sector, where you will find a complete compendium of information”

Primary care represents the gateway to the health system, sometimes receiving patients with potentially serious conditions that require immediate and complex action, generally with limited resources, which makes the role played by nursing a crucial one.

This Postgraduate Certificate in Nursing in Cardiac Emergencies in Primary Care is a complete program that includes comprehensive systematized action plans for cardiac emergencies that nursing professionals must face in their daily clinical practice, helping them to make prompt and accurate decisions in these situations with the support to the latest scientific evidence and the experience of renowned professionals in primary care.

This Postgraduate Certificate is designed for nursing professionals to acquire the update they need to undertake quality care in cardiovascular and respiratory emergencies in the context of primary health care.

It is a 100% online program that includes audiovisual material, self-knowledge exercises and complementary readings. A very complete informative program that will take the professional's mind to the limit so they acquire new concepts that will allow them to delve into the world of cardiac emergencies.

This **Postgraduate Certificate in Nursing in Cardiac Emergencies in Primary Care** contains the most complete and up-to-date scientific program on the market. The most important features include:

- ♦ Practical cases presented by experts in emergencies in primary care
- ♦ The graphic, schematic, and practical contents with which they are created provide scientific and practical information on the disciplines that are essential for professional practice
- ♦ The latest in emergencies in primary care
- ♦ Practical exercises where self-assessment can be used to improve learning
- ♦ Emphasis on innovative methodologies in emergencies in primary care
- ♦ Theoretical lessons, questions to the expert, debate forums on controversial topics, and individual reflection assignments
- ♦ Content that is accessible from any fixed or portable device with an Internet connection

Update your knowledge with the Postgraduate Certificate in Nursing in Cardiac Emergencies in Primary Care in a practical way that is adapted to your needs"

“

This Postgraduate Certificate is the best investment you can make when selecting a refresher program for two reasons: in addition to updating your knowledge of cardiac emergencies in primary care, you will obtain a qualification from TECH Technological University”

The teaching staff includes professionals from the field of nursing, who bring their experience to this training program, as well as renowned specialists from leading communities and prestigious universities.

The multimedia content, developed with the latest educational technology, will provide the professional with situated and contextual learning, i.e., a simulated environment that will provide an immersive education experience designed to prepare students for real-life situations.

This program is designed around Problem-Based Learning, whereby students must try to solve the different professional practice situations that arise throughout the program. To that end, they will be assisted by an innovative, interactive video system created by renowned and extensively experienced experts in emergencies in primary care.

This course allows education in simulated environments, which provide immersive learning programmed to prepare for real situations.

It includes clinical cases to bring the program's degree as close as possible to the reality of care in Nursing.

02 Objectives

The main objective this program pursues is to deliver theoretical and practical learning, so our nursing students can rigorously master the practical approach to patients in emergency situations in primary healthcare.

“

This refresher program will generate a sense of confidence when practising nursing, which will help you grow both personally and professionally”

General objective

- ♦ Update the procedures for dealing with cardiac emergencies faced by nursing professionals in their daily clinical practice, helping them to make agile and accurate decisions

Take the step to get up to date on the latest developments in nursing in cardiac emergencies in primary care”

Specific objectives

- ◆ Identify the symptoms of the different types of high-risk syncope
- ◆ Define the different conditions that cause chest pain and apply the appropriate protocols in each case
- ◆ Recognize the different signs and symptoms typical of ischemic heart disease
- ◆ Adequate use of the comprehensive action plan with regard to The Heart Attack Code
- ◆ Apply the specific procedures in Acute Coronary Syndrome and assess the possibility of prehospital fibrinolysis
- ◆ Identify the signs and symptoms of patients who come to the primary care center with pericarditis
- ◆ Resolve a hypertensive emergency situation using the updated procedure of care

03

Course Management

This program includes highly regarded health professionals in the field of emergency care in its teaching staff, who bring the experience of their work to this training. Renowned specialists, members of prestigious national and international scientific communities, are also involved in designing and preparing the program.

“

Learn the latest advances in nursing procedures for cardiac emergencies in primary health care from leading professionals”

International Guest Director

As **National Director of Clinical Innovation** at US Acute Care Solutions, Jesse M. Pines, M.D., is one of the most recognized figures in the **Emergency Medicine and Healthcare Services** field. In fact, his accomplishments include the creation and execution of the first governmental alternative payment model (ED EQUIP, in Maryland) to reduce the total cost of care. In addition, he leads the development and implementation of Telemedicine programs covering a wide variety of specialties, including the ER, Psychiatry and Intensive Care Units, among others.

His extensive experience in **medical leadership**, large database study design and Big Data research has led him to publish over 350 peer-reviewed articles and writing seven books in these areas. His work has been recognized internationally in various reputable media outlets, including TIME Magazine, the Wall Street Journal and Slate Magazine.

His more than two decades of experience have earned him several leadership positions at George Washington University. Among them, he was the **Director** of the Center for Health Innovation and Research, also leading the Research Fellowship program and the Center for Healthcare Quality.

Therefore, throughout his career, Dr. Jesse M. Pines has received multiple awards, both for the articles he has published and for his own work and contribution to the **field of Emergency Medicine**. He is also the **President of the working group on New Models of Professional Practice of the American College of Emergency Physicians (ACEP)**, holding various positions in the ACEP itself as well as in the Society for Academic Emergency Medicine and the American Academy of Emergency Medicine.

Dr. Pines, Jesse M.

- National Director of Clinical Innovation at US Acute Care Solutions, United States
- Emergency Physician at Allegheny Health Network
- Professor of Emergency Medicine at The George Washington University, USA
- Professor of Emergency Medicine at Drexel University
- Director of the Medical Research Fellowship Program at The George Washington University
- Director of the George Washington University Center for Health Research and Innovation
- M.D., Georgetown University
- Master of Business Administration from Georgetown University
- Master's Degree in Clinical Epidemiology from the University of Pennsylvania

Thanks to TECH you will be able to learn with the world's best professionals"

Dr. Maliszewski, Barbara

- Senior Director of Nursing at Johns Hopkins Hospital and Johns Hopkins Bayview Medical Center
- Deputy Director of Nursing at Johns Hopkins Bayview Medical Center, Department of Emergency Medicine and Critical Care Transport
- Nurse Practitioner at Johns Hopkins Bayview Medical Center, Department of Surgery
- Journal of Clinical Nursing Reviewer
- Master of Science in Nursing, Towson University
- Bachelor of Science in Nursing from the University of Maryland
- Emergency Nurses Association

“

Thanks to TECH you will be able to learn with the world's best professionals”

Management

Dr. Roig D'Cunha-Kamath, Francisco Vicente

- ◆ Degree in Medicine from the University of Valencia
- ◆ Specialist via MIR in Family and Community Medicine
- ◆ Assistant Physician of the Emergency Medicine Department at the Clinical University Hospital of Valencia
- ◆ Professor of Human Anatomy at the European University of Valencia
- ◆ Physician at the Valencia Health and Community Foundation
- ◆ Doctor for the ASCIRES group

Professors

Ms. Forés Rivas, Ana

- ◆ Nurse in the Intensive Care Unit at Dr. Peset University Hospital, Valencia

Dr. Brasó Aznar, José Vicente

- ◆ Hospital Emergency Physician
- ◆ Associate Professor of Emergency Medicine at the Faculty of Medicine of the University of Valencia
- ◆ Head of Department Emergency Medicine. Ribera University Hospital

04

Structure and Content

The content has been designed and structured by a team of professionals who understand the implications of education in daily nursing practice for cardiac emergencies in primary care, who are aware of the relevance of up-to-date education to treat infectious or oncologic patients, and who are committed to quality teaching using new educational technologies.

“

This Postgraduate Certificate in Nursing in Cardiac Emergencies in Primary Care is the most complete and up-to-date scientific program on the market”

Module 1. Cardiac Emergencies

- 1.1. Workshop: Reading and Interpreting an Electrocardiogram
- 1.2. Syncope
- 1.3. Acute Chest Pain
- 1.4. Acute Coronary Syndrome
 - 1.4.1. Non-ST-Elevation Acute Coronary Syndrome (NSTEMI)
 - 1.4.2. ST-Elevation Acute Coronary Syndrome (STEMI)
 - 1.4.3. The Heart Attack Code
- 1.5. Atrial Fibrillation
- 1.6. Hypertensive Crisis
- 1.7. Pericarditis
- 1.8. Heart Failure
- 1.9. Acute Pulmonary Edema
- 1.10. Shock
- 1.11. Positive Ventilation Workshop: Boussignac CPAP

“

A unique, key, and decisive educational experience to boost your professional development”

05 Methodology

This academic program offers students a different way of learning. Our methodology uses a cyclical learning approach: **Relearning**.

This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the **New England Journal of Medicine** have considered it to be one of the most effective.

“

Discover Relearning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization"

At TECH Nursing School we use the Case Method

In a given situation, what should a professional do? Throughout the program, students will face multiple simulated clinical cases, based on real patients, in which they will have to do research, establish hypotheses, and ultimately resolve the situation. There is an abundance of scientific evidence on the effectiveness of the method. Nurses learn better, faster, and more sustainably over time.

With TECH, nurses can experience a learning methodology that is shaking the foundations of traditional universities around the world.

According to Dr. Gervas, the clinical case is the annotated presentation of a patient, or group of patients, which becomes a "case", an example or model that illustrates some peculiar clinical component, either because of its teaching power or because of its uniqueness or rarity. It is essential that the case is based on current professional life, in an attempt to recreate the real conditions in professional nursing practice.

“

Did you know that this method was developed in 1912, at Harvard, for law students? The case method consisted of presenting students with real-life, complex situations for them to make decisions and justify their decisions on how to solve them. In 1924, Harvard adopted it as a standard teaching method”

The effectiveness of the method is justified by four fundamental achievements:

1. Nurses who follow this method not only grasp concepts, but also develop their mental capacity, by evaluating real situations and applying their knowledge.
2. The learning process has a clear focus on practical skills that allow the nursing professional to better integrate knowledge acquisition into the hospital setting or primary care.
3. Ideas and concepts are understood more efficiently, given that the example situations are based on real-life.
4. Students like to feel that the effort they put into their studies is worthwhile. This then translates into a greater interest in learning and more time dedicated to working on the course.

Relearning Methodology

At TECH we enhance the case method with the best 100% online teaching methodology available: Relearning.

This university is the first in the world to combine case studies with a 100% online learning system based on repetition combining a minimum of 8 different elements in each lesson, which is a real revolution compared to the simple study and analysis of cases.

The nurse will learn through real cases and by solving complex situations in simulated learning environments. These simulations are developed using state-of-the-art software to facilitate immersive learning.

At the forefront of world teaching, the Relearning method has managed to improve the overall satisfaction levels of professionals who complete their studies, with respect to the quality indicators of the best online university (Columbia University).

With this methodology we have trained more than 175,000 nurses with unprecedented success in all specialities regardless of practical workload. Our pedagogical methodology is developed in a highly competitive environment, with a university student body with a strong socioeconomic profile and an average age of 43.5 years old.

Relearning will allow you to learn with less effort and better performance, involving you more in your specialization, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation to success.

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

The overall score obtained by TECH's learning system is 8.01, according to the highest international standards.

This program offers the best educational material, prepared with professionals in mind:

Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is really specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

Nursing Techniques and Procedures on Video

We introduce you to the latest techniques, to the latest educational advances, to the forefront of current medical techniques. All of this in direct contact with students and explained in detail so as to aid their assimilation and understanding. And best of all, you can watch them as many times as you want.

Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive educational system for presenting multimedia content was awarded by Microsoft as a "European Success Story".

Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

Expert-Led Case Studies and Case Analysis

Effective learning ought to be contextual. Therefore, TECH presents real cases in which the expert will guide students, focusing on and solving the different situations: a clear and direct way to achieve the highest degree of understanding.

Testing & Retesting

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises, so that they can see how they are achieving their goals.

Classes

There is scientific evidence suggesting that observing third-party experts can be useful.
Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

Quick Action Guides

TECH offers the most relevant contents of the course in the form of worksheets or quick action guides. A synthetic, practical, and effective way to help students progress in their learning.

06

Certificate

The Postgraduate Certificate in Nursing in Cardiac Emergencies in Primary Care guarantees you, in addition to the most rigorous and up-to-date training, access to a Postgraduate Certificate issued by TECH Technological University.

“

*Successfully complete this program
and receive your university degree
without travel or laborious paperwork”*

This **Postgraduate Certificate in Nursing in Cardiac Emergencies in Primary Care** contains the most complete and up-to-date scientific program on the market.

After the student has passed the assessments, they will receive their corresponding **Postgraduate Certificate** issued by **TECH Technological University** via tracked delivery*.

The certificate issued by **TECH Technological University** will reflect the qualification obtained in the Postgraduate Certificate, and meets the requirements commonly demanded by labor exchanges, competitive examinations, and professional career evaluation committees.

Title: **Postgraduate Certificate in Nursing in Cardiac Emergencies in Primary Care**

Official N° of hours: **100 h.**

*Apostille Convention. In the event that the student wishes to have their paper certificate issued with an apostille, TECH EDUCATION will make the necessary arrangements to obtain it, at an additional cost.
