tech 06 | Introduction

The Nursing Staff works in the care and attention of the pregnant woman ensuring basic care such as hygiene, comfort, psychological support and nutritional care, basic principles to ensure effective care. Thanks to the evolution of low-intervention childbirth advocated by the Ministry of Health and Social Policy, the different health professionals who work with the pregnant woman must provide adequate and effective care, reducing unnecessary interventions to a minimum and ensuring the privacy of the pregnant woman, as well as favoring newborn care such as cleaning, placing identification bracelets, etc., while in close contact with the mother, in order to favor the maternal-filial bond

The role of nursing in the evolution of the pregnant woman, the puerpera and her newborn is essential, provided by professionals dedicated directly to the care of the woman, as joint knowledge allows us to achieve care in favour of the recommendations on normal birth, as well as the latest standards developed in the Clinical Guide to Normal Birth published by the Ministry of Health and Social Policy this year.

This line of thought and action coincides with a strong change that has to take place in the relationship between health teams and the woman user, to move from a technical relationship to one in which the bioethical principle of autonomy and attention to the integrity of the person involved is prioritised. The aim is to comprehensively address the process that women face during childbirth and thus improve health outcomes for them and their babies. The Postgraduate Certificate is based on an institutional need to train health professionals involved in the process of pregnancy, childbirth and puerperium, on the objectives set by the Ministry of Health and Social Policy on the humanization of pregnancy and childbirth.

The general purpose of this training course is to train nursing professionals to meet the health needs of people with scientific rigor and the highest professional level. This training was created in response to multiple needs in the hospital environment for all professionals, both for those recently incorporated and those who have been providing their professional services for some time and who require constant updating in this very specific area of practice.

This **Postgraduate Certificate in Nursing Care during Childbirth** contains the most complete and up to date scientific program on the market. The most significant features of the Postgraduate Certificate are:

- Development of more than 75 clinical cases presented by experts in nursing care during childbirth. The graphic, schematic, and eminently practical contents with which they are created provide scientific and practical information on the disciplines that are essential for professional.
- Advances in nursing care and intervention in childbirth care
- It contains practical exercises where the self-evaluation process can be carried out to improve learning
- Algorithm-based interactive learning system for decision-making in the situations that are presented to the student.
- With special emphasis on evidence-based nursing and research methodologies in nursing care during childbirth.
- All of this will be complemented by theoretical lessons, questions to the expert, debate forums on controversial topics, and individual reflection assignments.
- Content that is accessible from any fixed or portable device with an Internet connection

Introduction | 07 tech

This Postgraduate Certificate may be the best investment you can make in the selection of a refresher program for two reasons: in addition to updating your knowledge in nursing care during childbirth, you will obtain a diploma issued by TECH Technological University"

It includes in its teaching staff professionals belonging to the field of nursing care during childbirth, who bring to this training the experience of their work, in addition to recognized specialists belonging to scientific societies of reference.

The multimedia content developed with the latest educational technology will provide the professional with situated and contextual learning, i.e., a simulated environment that will provide immersive training program to train in real situations.

The design of this program is based on problem-based learning, by means of which the nurse must try to solve the different professional practice situations that arise throughout the Postgraduate Certificate. For this, the nurse will be assisted by an innovative interactive video system developed by recognized experts in the field of nursing care during childbirth and with extensive teaching experience.

The Postgraduate Certificate allows training in simulated environments, which provide immersive learning programmed to train for real situations.

02 Objectives

The Postgraduate Certificate in Nursing Care during Childbirth is oriented to facilitate the nurse's performance in the care of all patients with obstetric problems or at risk of suffering them.

tech 10 | Objectives

General Objectives

- Acquire knowledge in the specifics of Obstetric Care
- Promote work strategies based on a comprehensive approach to the patient as a standard model for achieving excellent care
- Encourage the acquisition of technical skills and abilities, through a powerful audiovisual system, and the possibility of development through specific training.
- Encourage professional stimulation through continuing education and research

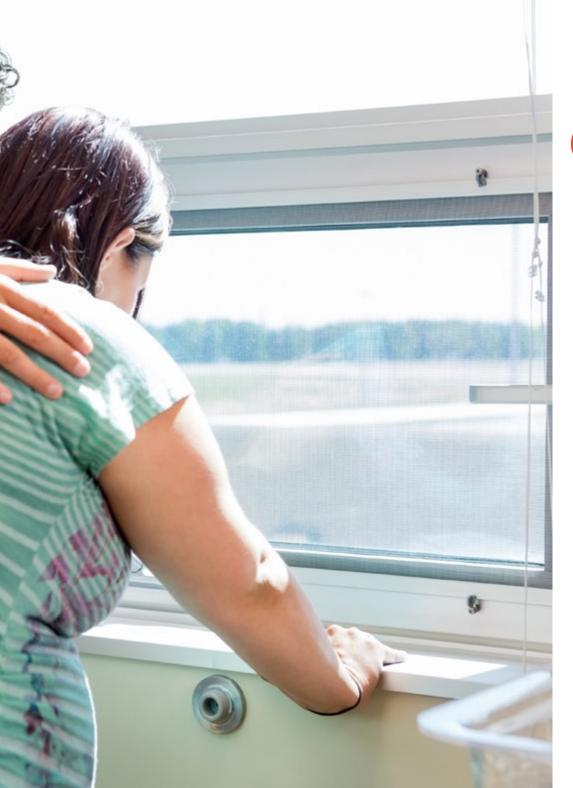

Specific Objectives

- Involve women in decision making throughout the process.
- Facilitate the access of the accompanying person at all times.

Make the most of the opportunity and take the step to get up to date on the latest developments in nursing care during childbirth.

tech 14 | Course Management

Management

Dr. Rodríguez Díaz, Luciano

- Matrón. Hospital Universitario de Ceuta
- Lecturer at the University Centre of Nursing of Ronda
- Lecturer in the Ceuta Midwifery Teaching Unit
- SEEUE obstetric-gynecologic emergencies group member.
- Responsible for Perinatal Health: Reproductive Sexual Health and Normal Childbirth of Ingesa
- Member of the Clinical Commission for Research and Continuing Education of the University Hospital of Ceuta.
- Full member of the Institute of Ceuta Studies.
- Member of the Editorial Board of the European Journal of Health Research.
- Doctor from the University of Granada

Dr. Vázquez Lara, Juana María

- Nurse of the 061 of Ceuta
- Ceuta Health Area Matron
- Head of Studies of the Ceuta Midwifery Teaching Unit.
- Professor of the Ceuta Midwifery Teaching Unit
- Coordinator of the SEEUE Obstetric-Gynecological Emergencies Group.
- PhD from the University of Granada

Professors

Andrés Núñez, Carmen Patricia

• Specialist in Obstetrics and Gynecology at the University Hospital of Ceuta.

Carrasco Racero, María Mercedes

• Nurse and Internship Coordinator at the University Center of Ronda.

De Dios Pérez, María Isabel

• Midwife at the Zaragoza University Hospital

Díaz Lozano, Paula

• Midwife at the Ceuta University Hospital

Gilart Cantizano, Patricia

• Specialized Care Midwife Campo de Gibraltar and Quirón Campo de Gibraltar

Llinás Prieto, Lucía

Nurse in Specialized Care Cadiz

Márquez Díaz, Antonio

 Matron at the Hospital Costa del Sol de Marbella and the Hospital Quirón Campo de Gibraltar

Mérida Téllez, Juanma

• Midwife Costa del Sol de Marbella Hospital

Mérida Yáñez, Beatriz

• Dr. Primary Care Midwife Extremadura

Muñoz Vela, Francisco Javier

• Midwife in Specialized Care at the Maternal-Children's Hospital of Malaga

Palomo Gómez, Rocío

• Ceuta Specialized Care Midwife

Revidiego Pérez, María Dolores

• Specialized Care Midwife Campo de Gibraltar and Quirón Campo de Gibraltar

Rivero Gutiérrez, Carmen

• Ceuta Specialized Care Midwife

Rodríguez Díaz, David

• Nurse at Nuestra Señora de Candelaria University Hospital

Vázquez Lara, Francisco José

• Degree in Biological Sciences

Vázquez Lara, María Dolores

• Campo de Gibraltar Primary Care Nurse

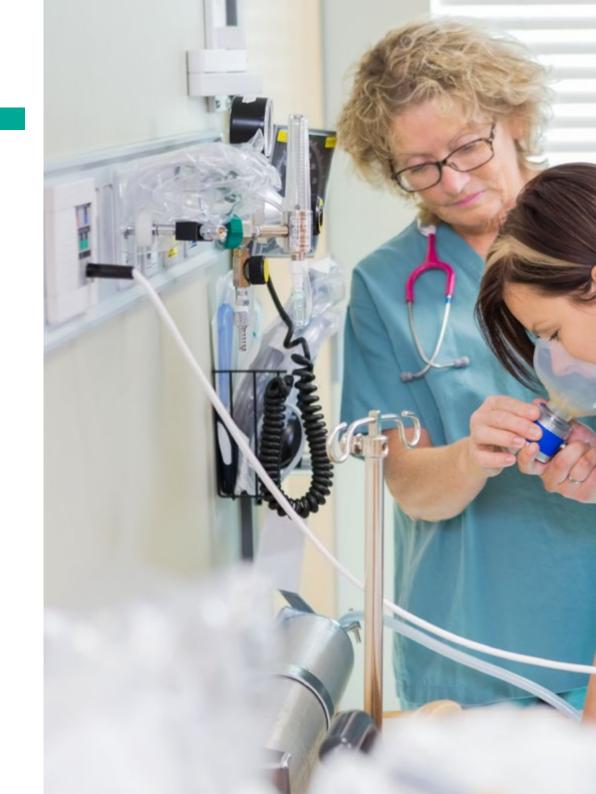

tech 18 | Structure and Content

Module 1. Assistance and Care of the Woman in Childbirth

- 1.1. Assessment and Care of Women
 - 1.1.1. Diagnosis of Childbirth
 - 1.1.2. The Partogram
 - 1.1.3. Assistance and Care of the Woman during Dilatation
 - 1.1.4. Assessment of the Evolution of Labor
 - 1.1.5. Assistance and Care of the Woman during Expulsion
 - 1.1.6. Episotomy and Episiorrhaphy
 - 1.1.7. Assistance and Care of Women in Childbirth
 - 1.1.8. Cord blood Collection and Donation (CSBD)
 - 1.1.9. Protocol for Delivery Assistance
- 1.2. Pain Relief in Labor. Physiology of Pain in Childbirth. Perception of Pain
 - 1.2.1. Physiology of Pain in Childbirth
 - 1.2.2. Characteristics of Pain during Childbirth
 - 1.2.3. Gate Theory
 - 1.2.4. Perception of Pain in Childbirth
 - 1.2.5. Non-pharmacological Techniques for Pain Relief in Childbirth
- 1.3. Normal Childbirth Care. Birth Plan
 - 1.3.1. Birth Plan
 - 1.3.2. Biomechanics of Childbirth
 - 1.3.3. Positions that Favor the Evolution of Labor
 - 1.3.4. Protocol for Normal Childbirth Assistance
- 1.4. Obstetric Analgesia and Anesthesia
 - 1.4.1. Nitrous Oxide
 - 1.4.2. Morphics
 - 1.4.3. Local anesthetics
 - 1.4.4. Pudendal Anesthesia
 - 1.4.5. Peridural Analgesia
 - 1.4.6. General Anesthesia
 - 1.4.7. Comparative Analysis of Cesarean Section Anesthesia Techniques

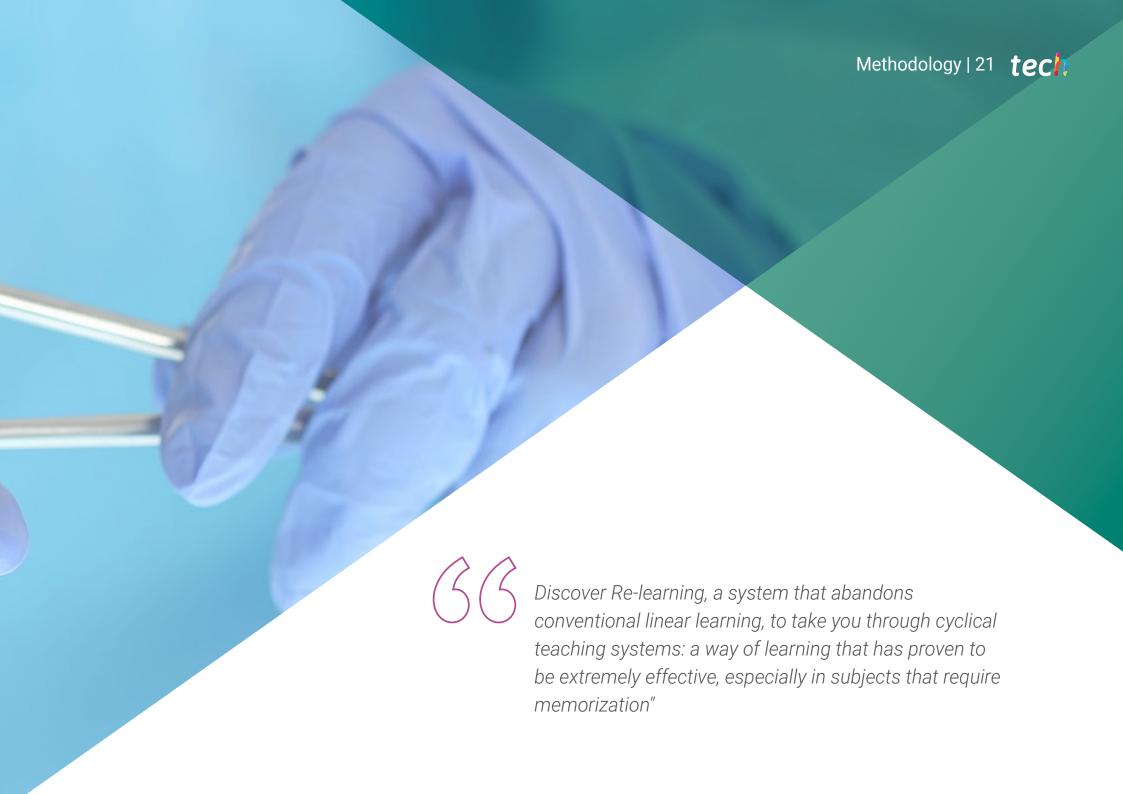

Structure and Content | 19 tech

- 1.5. Assistance to the Woman in Directed Childbirth
 - 1.5.1. Indications for Induction
 - 1.5.2. Elective Induction.
 - 1.5.3. Contraindications for Induction
 - 1.5.4. Risks for Induction
 - 1.5.5. Recommendations on Induction Information. Decision Making
 - 1.5.6. Methods to Induce
 - 1.5.7. Childbirth Stimulation
 - 1.5.8. Assistance and Care of Women
 - 1.5.9. Information
 - 1.5.10. Techniques and Movement Restriction
 - 1.5.11. Analgesia Surveillance
 - 1.5.12. Hydration and Intake
 - 1.5.13. Expulsion Positions
- 1.6. Psychological Aspects of the Mother during Childbirth
 - 1.6.1. Family Relationship. Family and Professional Support in Childbirth
 - 1.6.2. Psychological Factors during Dilation
 - 1.6.3. Psychological Factors in Expulsion
 - 1.6.4. Mother-child Interaction
 - 1.6.5. Facts on Early Skin-to-Skin Contact
- 1.7. Different Alternatives in Obstetric Care
 - 1.7.1. Hospital Delivery
 - 1.7.2. Birthing Centers
 - 1.7.3. Home Delivery
 - 1.7.4. Maternal and Perinatal Risk Assessment

A unique, key, and decisive Training experience to boost your professional development"

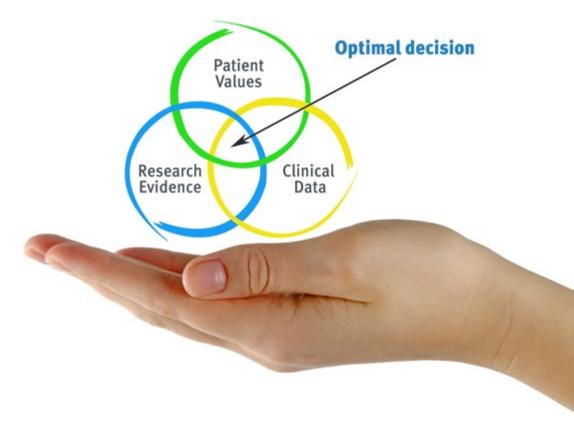

tech 22 | Methodology

At TECH Nursing School we use the Case Method

In a given clinical situation, what would you do? Throughout the program, you will be presented with multiple simulated clinical cases based on real patients, where you will have to investigate, establish hypotheses and, finally, resolve the situation. There is abundant scientific evidence on the effectiveness of the method. Nurses learn better, faster, and more sustainably over time.

With TECH, nurses can experience a learning methodology that is shaking the foundations of traditional universities around the world.

According to Dr. Gérvas, the clinical case is the annotated presentation of a patient, or group of patients, which becomes a "case", an example or model that illustrates some peculiar clinical component, either because of its teaching power or because of its uniqueness or rarity. It is essential that the case is based on current professional life, in an attempt to recreate the real conditions in professional nursing practice.

Did you know that this method was developed in 1912 at Harvard for law students? The case method consisted of presenting students with real-life, complex situations for them to make decisions and justify their decisions on how to solve them. In 1924, Harvard adopted it as a standard teaching method"

The effectiveness of the method is justified by four fundamental achievements:

- Nurses who follow this method not only grasp concepts, but also develop their mental capacity by evaluating real situations and applying their knowledge.
- 2. The learning process has a clear focus on practical skills that allow the nursing professional to better integrate knowledge acquisition into the hospital setting or primary care.
- 3. Ideas and concepts are understood more efficiently, given that the example situations are based on real-life.
- **4.** Students like to feel that the effort they put into their studies is worthwhile. This then translates into a greater interest in learning and more time dedicated to working on the university program.

Re-Learning Methodology

At TECH we enhance the Harvard case method with the best 100% online teaching methodology available: Re-learning.

Our University is the first in the world to combine the study of clinical cases with a 100% online learning system based on repetition, combining a minimum of 8 different elements in each lesson, which represent a real revolution with respect to simply studying and analyzing cases.

The nurse will learn through real cases and by solving complex situations in simulated learning environments.

These simulations are developed using state-of-the-art software to facilitate immersive learning.

Methodology | 25 tech

At the forefront of world teaching, the Re-learning method has managed to improve the overall satisfaction levels of professionals who complete their studies, with respect to the quality indicators of the best Spanish-speaking online university (Columbia University).

With this methodology we have trained more than 175,000 nurses with unprecedented success, in all specialties regardless of from the workload. All this in a highly demanding environment, where the students have a strong socio-economic profile and an average age of 43.5 years.

Re-learning will allow you to learn with less effort and better performance, involving you more in your specialization, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation to success.

In our program, learning is not a linear process, but rather a spiral (we learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

The overall score obtained by our learning system is 8.01, according to the highest international standards

In this program you will have access to the best educational material, prepared with you in mind:

Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is really specific and precise.

This content is then adapted in an audiovisual format that will create our way of working online, with the latest techniques that allow us to offer you high quality in all of the material that we provide you with.

Nursing Techniques and Procedures on Video

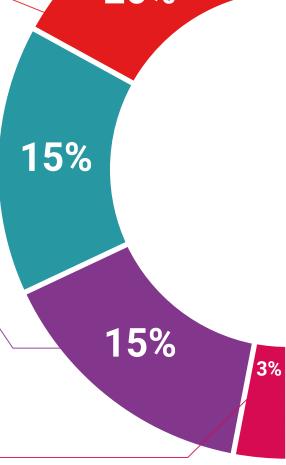

We introduce you to the latest techniques, to the latest educational advances, to the forefront of current nursing procedures and techniques. All this, in first person, with the maximum rigor, explained and detailed for your assimilation and understanding. And best of all, you can watch them as many times as you want.

Interactive Summaries

We present the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

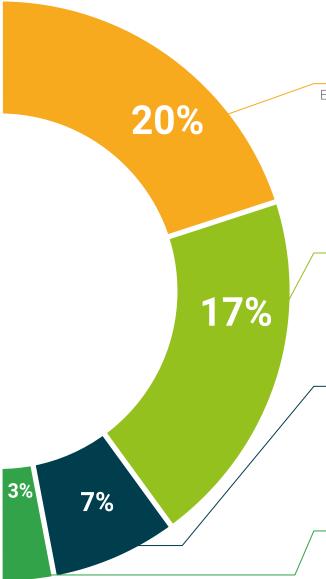

This unique multimedia content presentation training system was awarded by Microsoft as a "European Success Story".

Additional Reading

Recent articles, consensus documents, international guides. in our virtual library you will have access to everything you need to complete your training.

Postgraduate Diploma-Led Case Studies and Case Analysis

Effective learning ought to be contextual. That is why we will present you with real case developments in which the expert will guide you through the development of attention and the resolution of different situations: a clear and direct way to achieve the highest degree of understanding.

Testing & Re-testing

We periodically evaluate and re-evaluate your knowledge throughout the program, through assessment and self-assessment activities and exercises: so that you can see how you are achieving your goals.

Classes

There is scientific evidence suggesting that observing third-party experts can be useful.

Learning from an expert strengthens knowledge and memory, and generates confidence in our future difficult decisions.

Quick Action Guides

We offer you the most relevant contents of the course in the form of worksheets or quick action guides. A synthetic, practical, and effective way to help you progress in your learning.

tech 30 | Certificate

This **Postgraduate Certificate in Nursing Care During Childbirth** contains the most complete and up to date scientific program on the market.

After the student has passed the evaluations, they will receive by mail with acknowledgment of receipt their corresponding University Course Degree issued by **TECH Technological University**.

The certificate issued by **TECH Technological University** will express the qualification obtained in the Postgraduate Certificate, and meets the requirements commonly demanded by job exchanges, competitive examinations and professional careers evaluation committees.

Diploma: Postgraduate Certificate in Nursing Care during Childbirth

ECTS: 8

Nº Hours: 200

^{*}Apostille Convention. In the event that the student wishes to have their paper certificate issued with an apostille, TECH EDUCATION will make the necessary arrangements to obtain it, at an additional cost.
