tech 06 | Introduction

The resolution of a problem that arises during the last stages of labor should come as quickly as possible, reducing as much as possible the time between the onset of the complication and its solution. This guarantees a good obstetric and neonatal outcome, for which the level of updating of nurses in this field is key, as the methods of intervention and early diagnosis are continually being renewed.

TECH has created this Postgraduate Certificate to compile, precisely, the most modern protocols for obstetric emergencies in the final phase of labor. The teaching team in charge of the program has also made sure to include its own practical vision, with the most effective techniques used in the most demanding clinical settings.

As the work of nurses is precisely one that is constantly changing and demanding, all the contents of this Postgraduate Certificate have been created in a 100% online format. This means that both face-to-face classes and fixed schedules have been eliminated, giving you the freedom to download the entire syllabus and study it at your own pace, without having to sacrifice personal or work responsibilities.

This Postgraduate Certificate in Obstetric Emergencies in Delivery for Nursing contains the most complete and up-to-date scientific program on the market. The most important features include:

- The examination of practical cases presented by experts in Emergencies Obstetric and Neonatal
- The graphic, schematic, and practical contents with which they are created, provide scientific and practical information on the disciplines that are essential for professional practice
- Practical exercises where self-assessment can be used to improve learning
- Its special emphasis on innovative methodologies
- Theoretical lessons, questions to the expert, debate forums on controversial topics, and individual reflection assignments
- Content that is accessible from any fixed or portable device with an Internet connection

Update your knowledge with the latest advances in first, second and third level maneuvers in situations of shoulder dystocia"

Incorporate into your daily work methodology the most relevant developments in diagnosis and action against placental accreta and uterine inversion"

The program's teaching staff includes professionals from the sector who contribute their work experience to this educational program, as well as renowned specialists from leading societies and prestigious universities.

The multimedia content, developed with the latest educational technology, will provide the professional with situated and contextual learning, i.e., a simulated environment that will provide immersive education programmed to learn in real situations.

The design of this program focuses on problem-based learning, through which the professional must try to solve the different professional practice situations that arise during the academic year. For this purpose, the students will be assisted by an innovative interactive video system created by renowned and experienced experts.

You will be able to download all the contents from the comfort of your tablet or smartphone of choice, being able to study whenever you want.

You will have access to the most advanced technological resources of the largest online institution in the world.

tech 10 | Objectives

General Objectives

- Detect the different obstetric emergencies during pregnancy, delivery and postpartum as early as possible in order to apply the latest treatments and achieve a satisfactory obstetric outcome, thereby reducing maternal-fetal morbidity and mortality
- Be able to provide specialist care for each urgent obstetric pathology
- Acquire skills for emergency neonatal care when the obstetric pathology involves mother and fetus

Specific Objectives

- Recognize and initiate timely management of urgent situations that may occur during the third stage of labor and delivery
- Identify and know how to perform the obstetric maneuvers indicated to solve each urgent situation during the third stage of labor and delivery
- Demonstrate midwifery skills to deal with these situations

The didactic material will be useful to you even after you have finished the Postgraduate Certificate, as it is a high quality reference guide"

Management

Ms. Fernández López-Mingo, Raquel Desirée

- Midwife at Gregorio Marañón General University Hospital and San Rafael Hospital
- Midwife at the Cerro Almodovar Health Center in Madrid
- Graduate in Nursing at the Complutense University of Madrid
- EIR of Obstetrics and Gynecology, Gregorio Marañón General University Hospital
- Professional Master's Degree in from Integration in Care and Clinical Problem Solving in Nursing, University of Alcalá de Henares

Dr. Muñoz Serrano, María del Carmen

- Midwife at the University del Sureste Hospital, in Arganda del Rey, and the HLA Moncloa Hospital in Madrid
- Midwife in the Infanta Sofía Hospital in in San Sebastián de los Reyes
- Midwife at VITHAS Pardo Aravaca
- Midwife at HM\Nueva University Hospital
- Midwife at Gregorio Marañón Hospital
- Degree in Nursing from the University of Granada
- EIR Anesthesiology Gynecology, Gregorio Marañón General University Hospital
- Professional Master's Degree in from Integration in Care and Clinical Problem Solving in Nursing, University of Alcalá de Henares
- Postgraduate Diploma in Gynecologic, Obstetric and Neonatal Emergencies at the Catholic University of Avila

tech 18 | Structure and Content

Module 1. Obstetrical Emergencies during the Delivery and Afterbirth

- 1.1. Shoulder Dystocia
 - 1.1.1. Risk Factors
 - 1.1.2. First, Second and Third Level Maneuvers
 - 1.1.3. Effects on the Fetus
- 1.2. Instrumental Delivery
 - 1.2.1. Types of Instrumental Delivery
- 1.3. Emergency Cesarean
 - 1.3.1. Indication for Urgent Cesarean Section
 - 1.3.2. Preparation of the Pregnant Woman for Urgent Cesarean Section
 - 1.3.3. Analgesia in Emergency Cesarean Section
- 1.4. Special Situations during Delivery
 - 1.4.1. Preterm Delivery
 - 1.4.2. Twin Delivery
- 1.5. Hemorrhage Associated with Delivery and Early Postpartum
 - 1.5.1. Etiology and Risk Factors
 - 1.5.2. Classification
 - 1.5.3. Diagnosis and Quantification of Hemorrhage
- 1.6. Uterine Atony and Coagulation Disturbances in Hemorrhage Associated with Delivery and Early Postpartum
 - 1.6.1. Uterine Atony
 - 1.6.1.1. Medical Treatment
 - 1.6.1.2. Surgical Management
 - 1.6.2. Coagulation Alterations
- 1.7. Trauma to the Birth Canal
 - 1.7.1. Cervico-Vaginal and Perineal Trauma

Structure and Content | 19 tech

- 1.8. Retention of Placenta or Ovarian Adnexa
 - 1.8.1. Retention of Placenta or Ovarian Adnexa
 - 1.8.1.1. Diagnosis
 - 1.8.1.2. Etiology and Risk Factors
 - 1.8.1.3. Delivery Maneuvers
 - 1.8.1.4. Performance and Treatment
 - 1.8.1.5. Umbilical Cord Breakage
- 1.9. Placental Accreta and Uterine Inversion
 - 1.9.1. Placenta Accrete
 - 1.9.1.1. Diagnosis
 - 1.9.1.2. Etiology
 - 1.9.1.3. Treatment
 - 1.9.2. Uterine Inversion
 - 1.9.2.1. Diagnosis
 - 1.9.2.2. Degrees of Uterine Inversion
 - 1.9.2.3. Performance and Maneuvers
- 1.10. Uterine Rupture
 - 1.10.1. Classification (Dehiscence and Tearing)
 - 1.10.2. Diagnosis
 - 1.10.3. Treatment

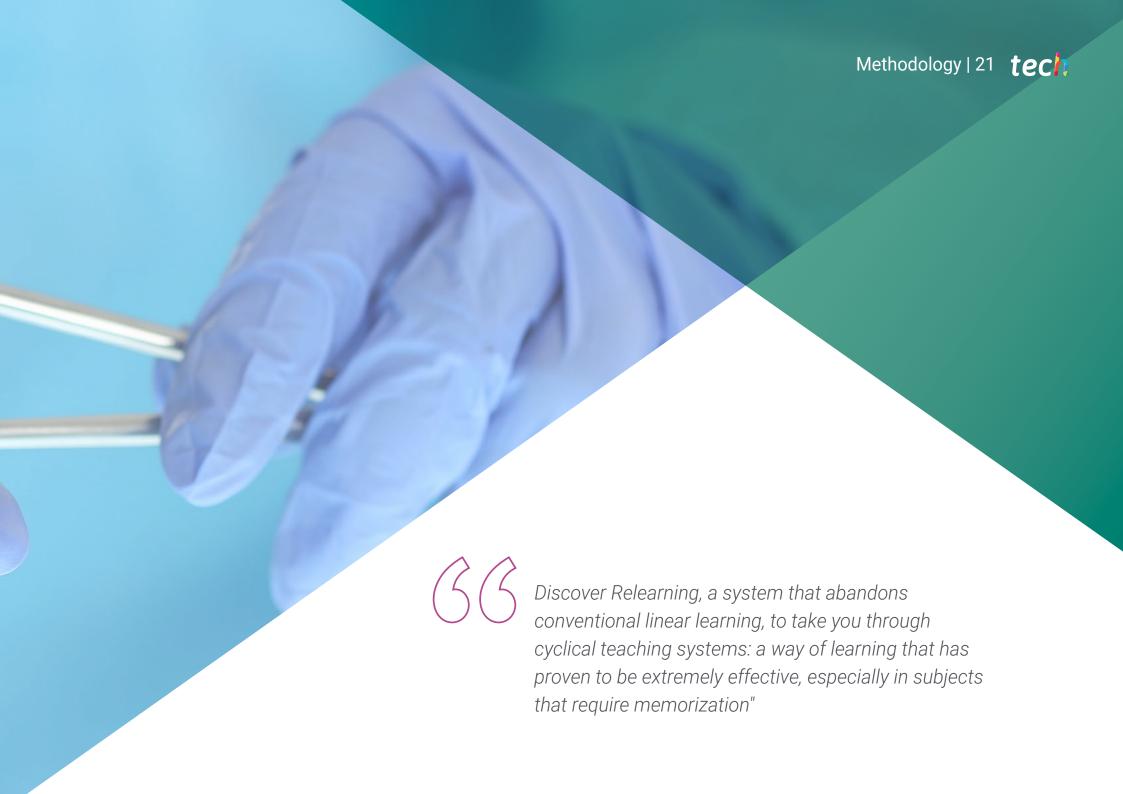

The multiple supplemental readings provided for each topic will help you delve even deeper into common emergencies during delivery"

This academic program offers students a different way of learning. Our methodology uses a cyclical learning approach: **Relearning.**

This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the **New England Journal of Medicine** have considered it to be one of the most effective.

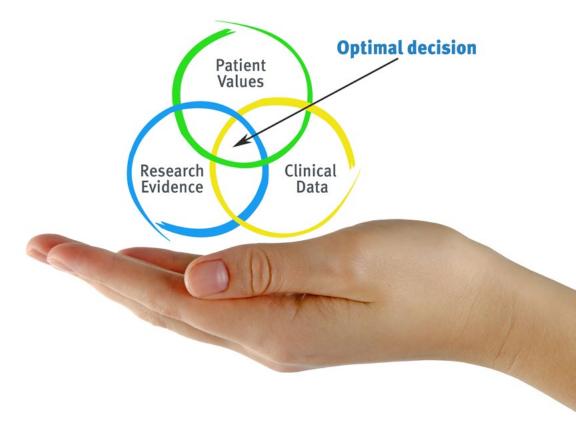

tech 22 | Methodology

At TECH Nursing School we use the Case Method

In a given situation, what should a professional do? Throughout the program, students will face multiple simulated clinical cases, based on real patients, in which they will have to do research, establish hypotheses, and ultimately resolve the situation. There is an abundance of scientific evidence on the effectiveness of the method. Nurses learn better, faster, and more sustainably over time.

With TECH, nurses can experience a learning methodology that is shaking the foundations of traditional universities around the world.

According to Dr. Gérvas, the clinical case is the annotated presentation of a patient, or group of patients, which becomes a "case", an example or model that illustrates some peculiar clinical component, either because of its teaching power or because of its uniqueness or rarity. It is essential that the case is based on current professional life, in an attempt to recreate the real conditions in professional nursing practice.

Did you know that this method was developed in 1912, at Harvard, for law students? The case method consisted of presenting students with real-life, complex situations for them to make decisions and justify their decisions on how to solve them. In 1924, Harvard adopted it as a standard teaching method"

The effectiveness of the method is justified by four fundamental achievements:

- Nurses who follow this method not only grasp concepts, but also develop their mental capacity, by evaluating real situations and applying their knowledge.
- 2. The learning process has a clear focus on practical skills that allow the nursing professional to better integrate knowledge acquisition into the hospital setting or primary care.
- 3. Ideas and concepts are understood more efficiently, given that the example situations are based on real-life.
- 4. Students like to feel that the effort they put into their studies is worthwhile. This then translates into a greater interest in learning and more time dedicated to working on the course.

Relearning Methodology

At TECH we enhance the case method with the best 100% online teaching methodology available: Relearning.

This university is the first in the world to combine case studies with a 100% online learning system based on repetition combining a minimum of 8 different elements in each lesson, which is a real revolution compared to the simple study and analysis of cases.

The nurse will learn through real cases and by solving complex situations in simulated learning environments.

These simulations are developed using state-of-the-art software to facilitate immersive learning.

Methodology | 25 tech

At the forefront of world teaching, the Relearning method has managed to improve the overall satisfaction levels of professionals who complete their studies, with respect to the quality indicators of the best online university (Columbia University).

With this methodology we have trained more than 175,000 nurses with unprecedented success in all specialities regardless of practical workload. Our pedagogical methodology is developed in a highly competitive environment, with a university student body with a strong socioeconomic profile and an average age of 43.5 years old.

Relearning will allow you to learn with less effort and better performance, involving you more in your specialization, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation to success.

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

The overall score obtained by TECH's learning system is 8.01, according to the highest international standards.

This program offers the best educational material, prepared with professionals in mind:

Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is really specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

Nursing Techniques and Procedures on Video

We introduce you to the latest techniques, to the latest educational advances, to the forefront of current medical techniques. All of this in direct contact with students and explained in detail so as to aid their assimilation and understanding. And best of all, you can watch them as many times as you want.

Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive educational system for presenting multimedia content was awarded by Microsoft as a "European Success Story".

Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

Testing & Retesting

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises, so that they can see how they are achieving their goals.

Classes

There is scientific evidence suggesting that observing third-party experts can be useful.

Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

Quick Action Guides

TECH offers the most relevant contents of the course in the form of worksheets or quick action guides. A synthetic, practical, and effective way to help students progress in their learning.

tech 30 | Certificate

This **Postgraduate Certificate in Obstetric Emergencies in Delivery for Nursing** contains the most complete and up-to-date scientific on the market.

After the student has passed the assessments, they will receive their corresponding **Postgaduate Certificate** issued by **TECH Technological University** via tracked delivery*.

The certificate issued by **TECH Technological University** will reflect the qualification obtained in the Postgraduate Certificate, and meets the requirements commonly demanded by labor exchanges, competitive examinations, and professional career evaluation committees.

Title: Postgraduate Certificate in Obstetric Emergencies in Delivery for Nursing Official N° of Hours: **150 h.**

^{*}Apostille Convention. In the event that the student wishes to have their paper certificate issued with an apostille, TECH EDUCATION will make the necessary arrangements to obtain it, at an additional cost.
