“

The most complete training in Pregnancy with Hypertensive, Endocrine and Oncologic Conditions. Main Diagnostic and Treatment Methods for Nursing, from the entire educational market: a wide and complete Postgraduate Certificate, unique in its specialty”

Pathology in Pregnancy is one of the basic pillars of obstetrics and research. Many protocols have changed radically in recent years due to technological advances and new study results, so the student will be able to incorporate the most up to date knowledge with better results to his or her healthcare work.

As nursing practitioners, we work on a daily basis with pregnant women who suffer from some type of pathology, whether or not derived from Pregnancy, and trained is sometimes scarce during residency.

More and more maternity wards have a specific pathological Pregnancy ward, and some nurses have not had a rotation during the two years of the specialty, so I believe that this master's degree can serve to provide comprehensive training with scientific rigor to perform work based on the best scientific evidence.

“*Become a highly qualified practitioner with this unique Postgraduate Certificate in Pregnancy with Hypertensive, Endocrine and Oncologic Conditions. Principal Diagnostic and Treatment Methods for Nursing*”

This **Postgraduate Certificate in Pregnant with Hypertensive, Endocrine and Oncologic Conditions. Main Diagnostic and Treatment Methods for Nursing** offers you the characteristics of a Postgraduate Certificate of high scientific, teaching and technological level. These are some of its most notable features:

- ◆ The latest technology in online teaching software
- ◆ A highly visual teaching system, supported by graphic and schematic contents that are easy to assimilate and understand
- ◆ Practical cases presented by practising experts
- ◆ State-of-the-art interactive video systems.
- ◆ Teaching supported by telepractice
- ◆ Continuous updating and recycling systems
- ◆ Autonomous learning: full compatibility with other occupations
- ◆ Practical exercises for self-evaluation and learning verification
- ◆ Support groups and educational synergies: questions to the expert, debate and knowledge forums.
- ◆ Communication with the teacher and individual reflection work
- ◆ Content that is accessible from any fixed or portable device with an Internet connection
- ◆ Supplementary documentation databases are permanently available, even after the Postgraduate Certificate

Get a complete and adequate qualification in Postgraduate Certificate in Pregnancy with Hypertensive, Endocrine and Oncologic Conditions. Main Diagnostic and Treatment Methods for Nursing, with this highly effective Postgraduate Diploma and open new paths to your professional progress"

Our teaching staff is made up of professionals from different fields related to this specialty. In this way, we ensure that we provide you with the training update we are aiming for. A multidisciplinary team of professionals trained and experienced in different environments, who will cover the theoretical knowledge in an efficient way, but, above all, will put the practical knowledge derived from their own experience at the service of the course: one of the differential qualities of this course.

This mastery of the subject is complemented by the effectiveness of the methodological design of this Postgraduate Certificate in Pregnancy with Hypertensive, Endocrine and Oncologic Conditions. Principal Diagnostic and Treatment Methods for Nursing, Developed by a multidisciplinary team of Postgraduate Diploma e-learning experts integrates the latest advances in educational technology. This way, you will be able to study with a range of comfortable and versatile multimedia tools that will give you the operability you need in your training.

The design of this program is based on Problem-Based Learning: an approach that conceives learning as a highly practical process. To achieve this remotely, we will use telepractice: with the help of an innovative interactive video system, and learning from an expert, you will be able to acquire the knowledge as if you were actually dealing with the scenario you are learning about. A concept that will allow you to integrate and fix learning in a more realistic and permanent way.

A Postgraduate Certificate that will enable you to face the most complex situations with the expertise of a high-level practitioner.

The experience of specialized professionals who will contribute to the course with university their expertise, will make this training a unique opportunity for professional growth.

02 Objectives

Our objective is to train highly qualified professionals for work experience. An objective that is complemented, moreover, in a global manner, by promoting human development that lays the foundations for a better society. This objective is focused on helping medical professionals reach a much higher level of expertise and control. A goal that, in just six months, you will be able to achieve with a highly intensive and precise course.

“

If your goal is to reorient your skills towards new paths of success and development, this is the Postgraduate Certificate for you: a training that aspires to excellence”

General Objectives

- The student will learn in depth about the hypertensive pathology of Pregnancy, as well as the most serious complications derived from it
- Training will also be provided in endocrine pathology, with emphasis on those that most affect pregnancy: diabetes and thyroid pathology.
- The main gynecological cancers in pregnancy will be studied

A way of training and professional growth that will also provide you with greater competitiveness in the "job market"

Specific Objectives

- ◆ Know everything related to preeclampsia, the new protocols for prediction, prevention, treatment and diagnosis
- ◆ Learn about the management of the severe complications of preeclampsia, which are per se obstetric emergencies, so professionals must be equipped with the best and most updated knowledge
- ◆ Get up to speed on the management of diabetes, since nurses are the competent professionals to carry out an adequate follow-up during pregnancy, delivery and the postpartum period of patients and neonates of diabetic mothers
- ◆ Have an in-depth knowledge of gynecological-oncological issues in pregnant women, as more and more patients are suffering from these pathologies, and for whom it is essential to follow protocols based on the best evidence

03

Course Management

For our course to be of the highest quality, we are proud to work with a teaching staff of the highest level, chosen for their proven track record. Professionals from different areas and fields of expertise that make up a complete, multidisciplinary team. A unique opportunity to learn from the best.

“

Learn from leading practitioners, the latest advances in procedures in the field of Pregnancy with Hypertensive, Endocrine and Oncologic Conditions. Principal Diagnostic and Treatment Methods for Nursing”

Management

Ms. Hernando Orejudo, Isabel

- ♦ Nurse from the Autonomous University of Madrid. Midwife in Hospital in San Carlos Clinical Hospital

Professors

Ms. Hernández Lachehab, Sonia

- ♦ Midwife. Currently a nurse at SAR Meco

Mr. Márquez Espinar, Gumersindo

- ♦ Midwife and podiatrist. Currently a midwife at Hospital San Carlos

Ms. De Miguel González, María José

- ♦ Midwife. Currently a midwife at Hospital San Carlos

Ms. De la Torre Arandilla, Ana

- ♦ Midwife. Currently a midwife at the University Hospital Puerta de Hierro and Hospital la Milagrosa.

“

An impressive teaching staff, made up of active professionals, will be in charge of accompanying you throughout your training: a unique opportunity not to be missed"

04

Structure and Content

The contents of this Postgraduate Certificate have been developed by the different experts of this Postgraduate Certificate with a clear purpose: to ensure that our students acquire each and every one of the necessary skills to become true experts in this field.

A complete and well-structured program that will take you to the highest standards of quality and success.

“

A comprehensive teaching program, structured in well-developed teaching units, oriented towards learning that is compatible with your personal and professional life"

Module 1. Endocrine Problems during Pregnancy. Gynecologic Cancer and Pregnancy. Hypertensive States of Pregnancy

- 1.1. Thyroid Pathology and Gestation
 - 1.1.1. Hypothyroidism
 - 1.1.1.1. Diagnosis
 - 1.1.1.2. Clinical Symptoms
 - 1.1.1.3. Etiology
 - 1.1.1.4. Clinical Management
 - 1.1.2. Hyperthyroidism and Thyrotoxicosis
 - 1.1.2.1. Diagnosis
 - 1.1.2.2. Clinical Symptoms
 - 1.1.2.3. Etiology
 - 1.1.2.4. Clinical Management
 - 1.1.3. Treatment during Gestation
 - 1.1.4. Effects on the Fetus
- 1.2. Diabetes Mellitus and Pregnancy
 - 1.2.1. Pregestational Management.
 - 1.2.2. Gestational Screening.
 - 1.2.3. Criteria for the Termination of Pregnancy
 - 1.2.4. Considerations during Labor
 - 1.2.5. Newborn from a Mother with Diabetes Mellitus
- 1.3. Gestational Diabetes.
 - 1.3.1. Concept
 - 1.3.2. Risk factors
 - 1.3.3. Diagnosis and Screening Protocol
 - 1.3.4. Gestational Screening.
 - 1.3.5. Criteria for the Termination of Pregnancy
 - 1.3.6. Clinical Management during Labor and Post-partum
 - 1.3.7. Newborn from a Mother with Gestational Diabetes

- 1.4. Obesity and Pregnancy
 - 1.4.1. Definition and Classification of Obesity
 - 1.4.2. Impact of Obesity on Gestation
 - 1.4.3. Impact of Gestation on Obesity
 - 1.4.4. Obese Women and the Postpartum Period
- 1.5. Breast Cancer and Pregnancy
 - 1.5.1. Concept and Epidemiology
 - 1.5.2. Diagnosis
 - 1.5.3. Treatment
 - 1.5.4. Prognosis
- 1.6. Cervical Cancer and Pregnancy
 - 1.6.1. Concept and Epidemiology
 - 1.6.2. Cytology in Gestation
 - 1.6.3. Colposcopy in Gestation
 - 1.6.4. Diagnosis and Treatment
- 1.7. Ovarian Cancer and Pregnancy
 - 1.7.1. Concept and Epidemiology
 - 1.7.2. Clinical Symptoms
 - 1.7.3. Diagnosis
 - 1.7.4. Treatment
- 1.8. Hypertensive States of Pregnancy (I)
 - 1.8.1. Concept
 - 1.8.2. Classification of Hypertension in Pregnancy
 - 1.8.3. Determination of the Degree of Severity
 - 1.8.4. Prediction and Prevention
 - 1.8.5. Treatment and Clinical Management
 - 1.8.6. Criteria for the Termination of Pregnancy
- 1.9. Hypertensive states of Pregnancy (II)
 - 1.9.1. Eclampsia.
 - 1.9.1.1. Diagnosis
 - 1.9.1.2. Clinical Management and Treatment
 - 1.9.4. Hellp's Syndrome.
 - 1.9.4.1. Diagnosis
 - 1.9.4.2. Clinical Management and Treatment
 - 1.9.7. Subsequent Follow-up of Pregnant Women with Hypertension Problems.
- 1.10. Antepartum Fetal Death
 - 1.10.1. Concept
 - 1.10.2. Classification
 - 1.10.3. Etiological Factors
 - 1.10.4. Diagnosis
 - 1.10.5. Clinical and Psychological Management (covered in module 10)
 - 1.10.6. Follow-up Genetic Counseling

A unique, key, and decisive training experience to boost your professional development”

05

Methodology

Esta capacitación te ofrece una forma diferente de aprender. Nuestra metodología se desarrolla a través de un modo de aprendizaje de forma cíclica: ***el Relearning***. Este sistema de enseñanza es utilizado en las facultades de medicina más prestigiosas del mundo y se ha considerado uno de los más eficaces por publicaciones de gran relevancia como el ***New England Journal of Medicine***.

“

Descubre el Relearning, un sistema que abandona el aprendizaje lineal convencional, para llevarte a través de sistemas cíclicos de enseñanza: una forma de aprender que ha demostrado su enorme eficacia, especialmente en las materias que requieren memorización”

En TECH Nursing School empleamos el Método del caso

Ante una determinada situación clínica, ¿qué haría usted? A lo largo del programa, usted se enfrentará a múltiples casos clínicos simulados, basados en pacientes reales en los que deberá investigar, establecer hipótesis y, finalmente, resolver la situación. Existe abundante evidencia científica sobre la eficacia del método. Las enfermeras aprenden mejor, más rápido y de manera más sostenible en el tiempo.

Con TECH el enfermero experimenta una forma de aprender que está moviendo los cimientos de las Universidades tradicionales de todo el mundo.

Según el Dr. Gérvas, el caso clínico es la presentación comentada de un paciente, o grupo de pacientes, que se convierte en «caso», en un ejemplo o modelo que ilustra algún componente clínico peculiar, bien por su poder docente, bien por su singularidad o rareza. Es esencial que el caso se apoye en la vida profesional actual, intentando recrear los condicionantes reales en la práctica profesional de la enfermería.

“

Did you know that this method was developed in 1912 at Harvard for law students? The case method consisted of presenting students with real-life, complex situations for them to make decisions and justify their decisions on how to solve them. In 1924, Harvard adopted it as a standard teaching method"

La eficacia del método se justifica con cuatro logros fundamentales:

1. Los enfermeros que siguen este método no solo consiguen la asimilación de conceptos, sino un desarrollo de su capacidad mental mediante ejercicios de evaluación de situaciones reales y aplicación de conocimientos.
2. El aprendizaje se concreta de una manera sólida, en capacidades prácticas, que permiten al profesional de la enfermería una mejor integración del conocimiento en el ámbito hospitalario o de atención primaria.
3. Se consigue una asimilación más sencilla y eficiente de las ideas y conceptos, gracias al planteamiento de situaciones que han surgido de la realidad.
4. La sensación de eficiencia del esfuerzo invertido se convierte en un estímulo muy importante para el alumnado, que se traduce en un interés mayor en los aprendizajes y un incremento del tiempo dedicado a trabajar en el programa universitario.

Relearning Methodology

En TECH potenciamos el método del caso de Harvard con la mejor metodología de enseñanza 100 % online del momento: el Relearning.

Nuestra Universidad es la primera en el mundo que combina el estudio de casos clínicos con un sistema de aprendizaje 100% online basado en la reiteración, que combina un mínimo de 8 elementos diferentes en cada lección, y que suponen una auténtica revolución con respecto al simple estudio y análisis de casos.

El enfermero aprenderá mediante casos reales y resolución de situaciones complejas en entornos simulados de aprendizaje. Estos simulacros están desarrollados a partir de software de última generación que permiten facilitar el aprendizaje inmersivo.

Situado a la vanguardia pedagógica mundial, el método Relearning ha conseguido mejorar los niveles de satisfacción global de los profesionales que finalizan sus estudios, con respecto a los indicadores de calidad de la mejor universidad online en habla hispana (Universidad de Columbia).

Con esta metodología hemos capacitado a más de 175.000 enfermeros con un éxito sin precedentes, en todas las especialidades con independencia de la carga práctica. Nuestra metodología pedagógica está desarrollada en entorno de máxima exigencia, con un alumnado universitario de un perfil socioeconómico alto y una media de edad de 43,5 años.

El relearning te permitirá aprender con menos esfuerzo y más rendimiento, implicándote más en tu especialización, desarrollando el espíritu crítico, la defensa de argumentos y el contraste de opiniones: una ecuación directa al éxito.

En nuestro programa, el aprendizaje no es un proceso lineal, sino que sucede en espiral (aprendemos, desaprendemos, olvidamos y reaprendemos). Por eso, combinamos cada uno de estos elementos de forma concéntrica.

La puntuación global que obtiene nuestro sistema de aprendizaje es de 8.01, con arreglo a los más altos estándares internacionales.
