Introduction

Sexually transmitted diseases and their serious health implications affect millions of people around the world. The speed at which these diseases can be acquired, as well as the methods to prevent them, are information of great interest to the public. In this scenario, the role of the health professional is key, since their knowledge is capable of transmitting sex education much more effectively. In view of this reality, this program is born, which provides the nursing professional with the necessary update in this area. All through a 100% online academic format, with high quality multimedia content and taught by professionals specialized in Sexology.

“

A 100% online and flexible Postgraduate Diploma that will give you the update you are looking for on Human Sexuality and Sexual Health”

The proximity of the nursing professional to the patient is decisive and appropriate to be able to transfer affective sexual information in order to improve the quality of the patient's health and prevent sexually transmitted diseases. At the same time, their care work is key in accompanying those who present fertility problems or decide to voluntarily terminate a pregnancy.

In addition, given the still latent misinformation among the population regarding sexuality and the need to address new approaches to gender perception, it is necessary to have health professionals with up-to-date knowledge. For this reason, TECH has created this 100% online university qualification that provides the most advanced and innovative syllabus on Human Sexuality and Sexual Health.

A program that provides a global vision of this field through high quality multimedia content. In this way, the graduate will enter into an academic journey that will lead them to delve into the evolution of Sexology, the implementation of prevention and health promotion programs and assisted reproduction treatments and their legal context in different countries. This information will allow the nurse to disseminate it through existing communication channels and the tools provided in this program.

Furthermore, this up-to-date approach will be much more effective thanks to the Relearning method used by TECH, which allows students to advance through the syllabus in a natural way and to consolidate key concepts. In addition, this system reduces the long hours of memorization, making this university qualification much more attractive.

Nurses are, therefore, upon an excellent opportunity to study a 100% online and flexible academic option. Students only need an electronic device (computer, tablet or cell phone) with an Internet connection to view the content hosted on the virtual campus. In addition, the absence of classes with fixed schedules will allow them to self-manage their study time and make a quality university qualification compatible with their daily responsibilities.

This **Postgraduate Diploma in Human Sexuality and Sexual Health for Nursing** contains the most complete and up-to-date Scientific program on the market.

Its most outstanding features are:

- ◆ The development of practical cases presented by experts in Psychology and Sexuality
- ◆ The graphic, schematic, and practical contents with which they are created, provide scientific and practical information on the disciplines that are essential for professional practice
- ◆ Practical exercises where self-assessment can be used to improve learning.

A program that provides you with the most effective strategies to carry out projects to promote sexual health”

05 Methodology

This academic program offers students a different way of learning. Our methodology uses a cyclical learning approach: **Relearning**.

This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the **New England Journal of Medicine** have considered it to be one of the most effective.

“

Discover Relearning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization"

At TECH Nursing School we use the Case Method

In a given situation, what should a professional do? Throughout the program, students will face multiple simulated clinical cases, based on real patients, in which they will have to do research, establish hypotheses, and ultimately resolve the situation. There is an abundance of scientific evidence on the effectiveness of the method. Nurses learn better, faster, and more sustainably over time.

With TECH, nurses can experience a learning methodology that is shaking the foundations of traditional universities around the world.

According to Dr. Gervas, the clinical case is the annotated presentation of a patient, or group of patients, which becomes a "case", an example or model that illustrates some peculiar clinical component, either because of its teaching power or because of its uniqueness or rarity. It is essential that the case is based on current professional life, in an attempt to recreate the real conditions in professional nursing practice.

“

Did you know that this method was developed in 1912, at Harvard, for law students? The case method consisted of presenting students with real-life, complex situations for them to make decisions and justify their decisions on how to solve them. In 1924, Harvard adopted it as a standard teaching method”

The effectiveness of the method is justified by four fundamental achievements:

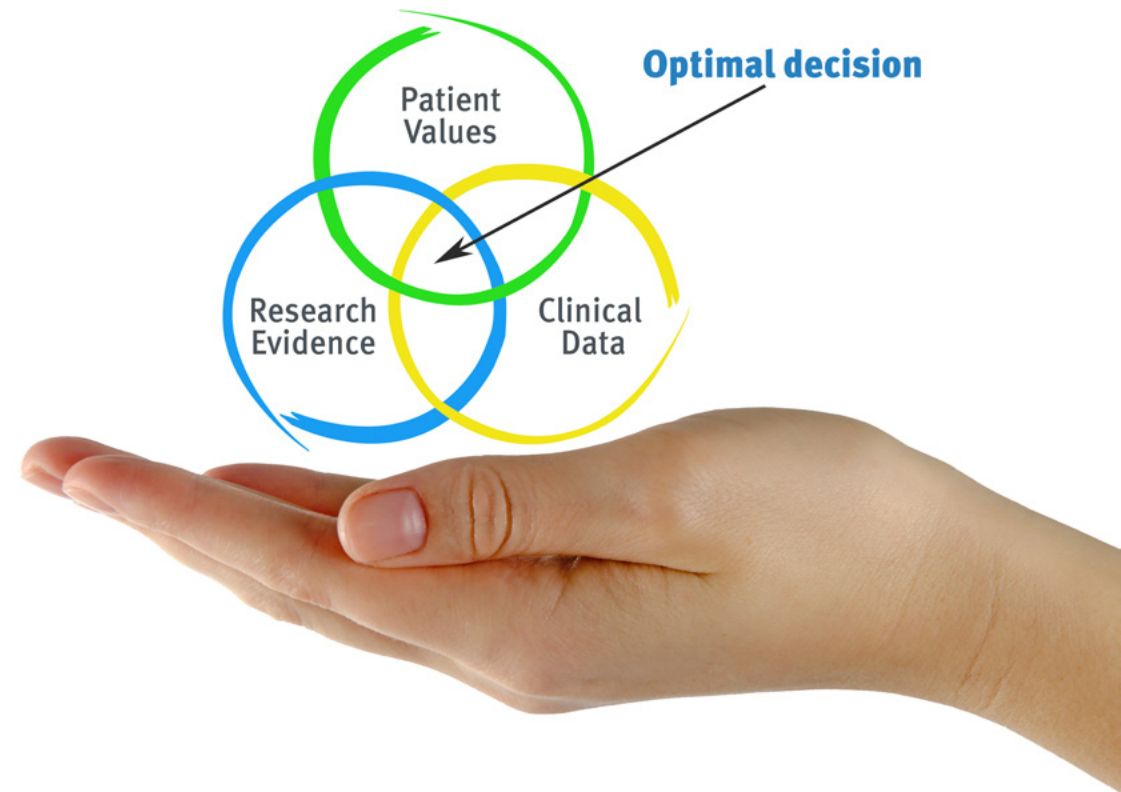

1. Nurses who follow this method not only grasp concepts, but also develop their mental capacity, by evaluating real situations and applying their knowledge.
2. The learning process has a clear focus on practical skills that allow the nursing professional to better integrate knowledge acquisition into the hospital setting or primary care.
3. Ideas and concepts are understood more efficiently, given that the example situations are based on real-life.
4. Students like to feel that the effort they put into their studies is worthwhile. This then translates into a greater interest in learning and more time dedicated to working on the course.

This program offers the best educational material, prepared with professionals in mind:

Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is really specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

Nursing Techniques and Procedures on Video

We introduce you to the latest techniques, to the latest educational advances, to the forefront of current medical techniques. All of this in direct contact with students and explained in detail so as to aid their assimilation and understanding. And best of all, you can watch them as many times as you want.

Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive educational system for presenting multimedia content was awarded by Microsoft as a "European Success Story".

Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

Expert-Led Case Studies and Case Analysis

Effective learning ought to be contextual. Therefore, TECH presents real cases in which the expert will guide students, focusing on and solving the different situations: a clear and direct way to achieve the highest degree of understanding.

Testing & Retesting

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises, so that they can see how they are achieving their goals.

Classes

There is scientific evidence suggesting that observing third-party experts can be useful.
Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

Quick Action Guides

TECH offers the most relevant contents of the course in the form of worksheets or quick action guides. A synthetic, practical, and effective way to help students progress in their learning.
