tech 06 | Introduction

Digestive system diseases are one of the main causes of hospital stays, preceded by cardiovascular diseases and tumors. Colon cancer has been observed as one of the most predominant causes of "malignant neoplasms" followed by tracheal, bronchial and lung tumors. Pancreatic diseases, cholelithiasis or cirrhosis of the liver are some of the diseases that cause the most hospital stays.

For this reason, a large number of hospitals and primary care services now have Digestive System Assistance Units (UAAD), with consultations and specialists dedicated exclusively to patients with digestive diseases.

"Specialist" nursing staff play an important role in the current process management system, encompassing all areas, from the hospital to primary care, as well as the different levels of promotion, prevention, treatment and rehabilitation.

In addition, health education for patients with digestive diseases is of vital importance, especially in programs for the prevention of viral hepatitis, early detection of cancer, alcoholism, prevention and treatment of eating disorders and self-care programs for chronic diseases. This education and promotion should be carried out by qualified nursing professionals who are experts in the field.

Day by day, the professionals who work in this specialism are required to have more training and preparation, as well as a higher level of competence. This calls for specialization focused on the digestive field, helping the nurse with expertise in digestive disease to achieve excellence in care.

This program is aimed at helping the nursing professional to identify the real needs of these patients, in order to be able to apply quality care based on the latest scientific evidence

This **Professional Master's Degree in Digestive System Nursing** contains the most complete and up-to-date scientific program on the market. The most important features include:

- Clinical cases presented by experts
- Its graphic, schematic and eminently practical contents, are designed to provide in-person scientific information on those medical disciplines that are essential for professional practice
- Diagnostic and therapeutic innovations in treating patients with digestive diseases
- Presentation of practical workshops on procedures diagnosis, and treatment techniques
- An algorithm-based interactive learning system for decision-making in the clinical situations presented throughout the course
- Includes theoretical lectures, questions to the expert, discussion forums on controversial issues and tasks for individual reflection
- Content that is accessible from any fixed or portable device with an internet connection

Update your knowledge in patient care in the digestive pathology service, improve the prognosis and reduce the recovery time and complications of patients"

Introduction | 07 tech

An exceptional opportunity to give your resume a boost with intensive and efficient training, while being fully compatible with your professional and personal life"

Its teaching staff includes nursing professionals of note, who contribute their work experience to this up-to-date program, in addition to other professionals specializing in the digestive system area.

Its multimedia content, developed with the latest educational technology, will allow the professional a contextual and relevant learning experience, i.e., a simulated environment that will provide immersive learning programmed to train for real situations.

This program is designed around Problem-Based Learning, whereby the nursing professional must try to solve the different professional practice situations that arise throughout the program. This will be done with the help of an innovative interactive video system developed by recognized experts in internal digestive pathology nursing care and with extensive teaching experience.

During the program, you will acquire practical experience, through simulated learning environments based on real situations and cases.

With the study of numerous clinical cases that will bring you as close as possible to the reality of Digestive System Nursing.

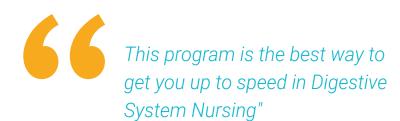

General Objective

• To update the professional in nursing procedures and interventions for the correct care of patients with digestive pathology

Specific Objectives

Module 1. Liver Disease

- Determine the causes, effects, treatments, psychosocial factors and nutritional needs of the different hepatic pathologies and establish the most appropriate care plan for each of them
- Describe the procedure for preparing a patient for liver transplantation
- Explain up-to-date patient care in the postoperative period after liver transplantation

Module 2. Inflammatory Bowel Disease

- Develop appropriate diets for patients with special needs such as Crohn's disease and ulcerative colitis
- Explain the follow-up and care required for patients with autoimmune digestive pathology such as Crohn's disease or ulcerative colitis
- Describe new advances and challenges in the diagnosis and treatment of inflammatory bowel diseases

Module 3. Pancreatic Disease

- Identify the possible causes of the origin of pancreatitis and ways to prevent it
- Develop a care plan tailored to the patient with pancreatitis or pancreatic neoplasia
- Identify the emotional and psychological alterations in a patient with pancreatic neoplasia

Module 4. Gastrointestinal Motility Disturbances

 Update the procedures for approaching patients with gastrointestinal motility disorders

Module 5. Digestive Hemorrhage

- Identify signs and symptoms to detect gastrointestinal bleeding, as well as its location
- · Outline the care of the patient with gastrointestinal bleeding

Module 6. Digestive Endoscopy

- Describe the preparation prior to exploratory and endoscopic tests for diagnostic purposes in digestive pathology
- Explain the different endoscopic techniques and placement of PEG probes, as well as pre- and post-procedure care
- Describe the procedure for probe insertion, gastric lavage, cleansing enemas and fecaloma removal
- List the equipment necessary for performing endoscopic tests and describe its maintenance and care

Module 7. Ostomies

- Classify the types of ostomies and describe the different types of care they require
- Define a multidisciplinary education plan for ostomized patients in order to allow their autonomy and increase their quality of life
- Identify possible warning signs in relation to the ostomy and its functioning
- Identify emotional and psychological alterations in the ostomized patient

Module 8. Other Digestive Nursing Techniques

- Describe colorectal cancer screening protocols and programs and strategies to prevent colorectal cancer
- Define the role of nursing in interventional radiology tests such as ERCP

Module 9. Digestive Feeding Ostomies

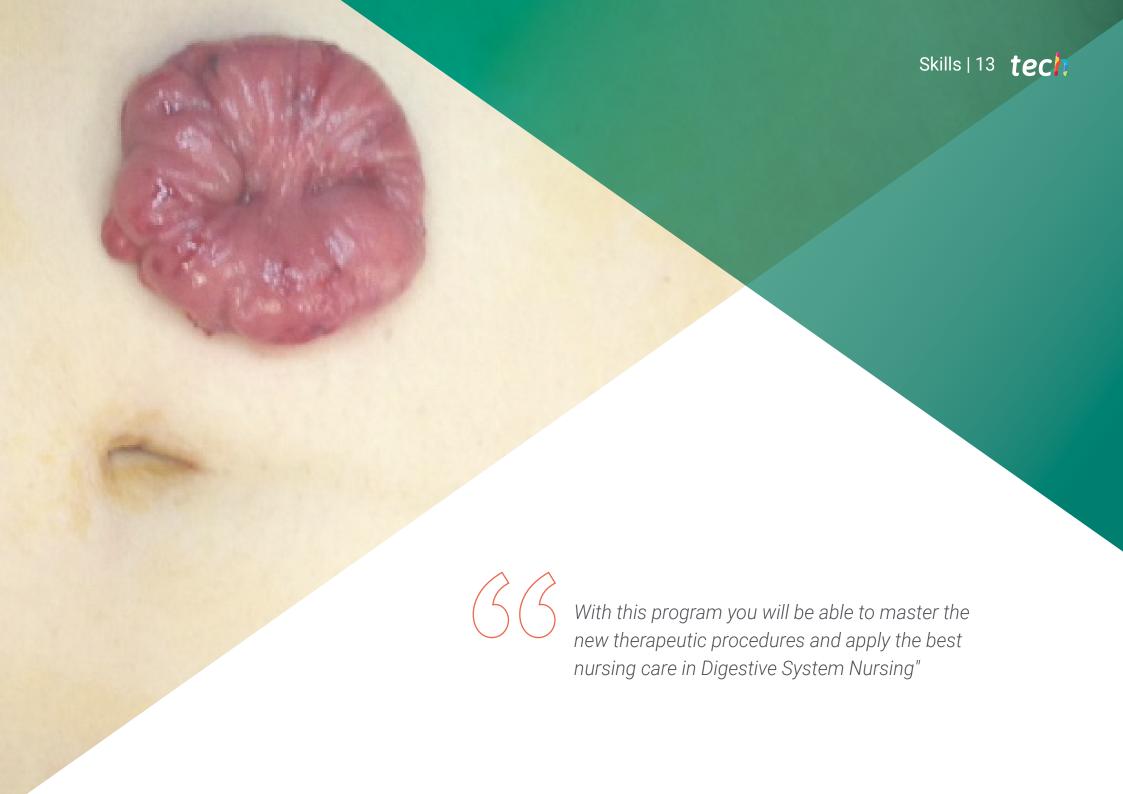

- Manage theoretical knowledge and skills that support nursing work in the care of patients with digestive feeding ostomies
- Identify the main care after ostomy surgery and constantly check the catheter
- Analyze the types of food that pass through the probe

Module 10. Advanced Digestive, Endocrinology and Nutrition Practice

- Identify the possible food that pass through the probe
- Develop an action plan that allows for patient comfort during recovery without removal of the catheter

03 **Skills**

After passing the assessments of the program, the professional will have acquired the professional skills required for quality, up-to-date practice based on the most recent scientific evidence.

tech 14 | Skills

General Skills

- Provide quality care in any of the areas of Digestive System Nursing
- Apply new techniques and intervention protocols derived from the latest advances in this area of work
- Recognize the basic and particular features of the different therapeutic situations in which nursing staff work in Digestive System Nursing

Take advantage of this opportunity and take the next step to get up to date on the latest developments in Digestive System Nursing"

Specific Skills

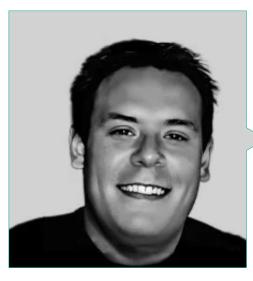

- Establish an appropriate care plan for liver pathologies
- Prepare the patient for liver transplantation
- Create personalized diets for patients with Crohn's disease and ulcerative colitis
- To carry out a prevention plan against pancreatitis
- Create a specific care plan for patients with pancreatitis or neoplasia of the pancreas
- Intervene in the case of patients with emotional disturbances due to severe digestive disease
- Recognize the symptoms of gastrointestinal bleeding
- Locate the source of gastrointestinal bleeding
- Preparing the patient for endoscopic exploratory tests
- Explain the complete endoscopic process
- Care and maintenance of test material of the Digestive System Service
- Follow nursing intervention protocols for ERCPs
- Indicate the care required for a colostomy
- Educate the colostomized patient
- Recognize the warning signs in ostomies
- Help the ostomized patient with their emotional state

tech 18 | Course Management

Management

Mr. García Sola, Guillermo

- Degree in Nursing from the University of Alicante
- President of the Spanish Association of Digestive Pathology Nurses
- Master's Degree in Nursing Sciences
- University Expert in Nursing Services Management for UNED
- Master's Degree in School Nursing from the University of Barcelona (IL3)
- Specialist Certificate in Nursing Services Management EVES
- Member of the Board of Directors of the Spanish Association of Digestive Pathology Nursing (AEEPD)
- Member of the Board of Directors of the Spanish Society of School Nursing (SCE3)

Professors

Ms. Ibáñez Zafon, Inés Ana

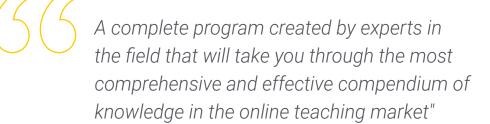

- Diploma in Nursing
- Del Mar Hospital, Barcelona

Mr. Molina Ribera, Juan

- Diploma in Nursing
- Ostomy Specialist
- San Juan Health District Alicante

22 | Structure and Content

Module 1. Liver disease

- 1.1. Cirrhotic Patient
- 1.2. Viral Hepatitis
- 1.3. Hepatocellular Carcinoma
- 1.4. Liver Transplant

Module 2. Inflammatory Bowel Disease

- 2.1. Crohn's Disease
- 2.2. Ulcerative Colitis
- 2.3. New Developments and Challenges

Module 3. Pancreatic Disease

- 3.1. Pancreatitis
- 3.2. Pancreatic Neo

Module 4. Gastrointestinal Motility Disturbances

- 4.1. Gastric Motility
- 4.2. Small Intestine Motility
- 4.3. Large Intestine Motility and Defecation Reflex
- 4.4. Diagnostic Tests
- 4.5. Care of the Patient with Gastrointestinal Motility Disturbance
- 4.6. Care Plan

Module 5. Digestive Hemorrhage

- 5.1. Upper Gastrointestinal Bleeding
- 5.2. Lower Gastrointestinal Bleeding
- 5.3. Causes, Effects
- 5.4. Emergency Response
- 5.5. Pharmacological and Endoscopic Treatments
- 5.6. Psychosocial Aspects
- 5.7. Nutritional Needs
- 5.8. Nursing Care Plan

Module 6. Digestive Endoscopy

- 6.1. Gastroscopy
- 6.2. Colonoscopy
- 6.3. ERCP
- 6.4. Esophageal Prosthesis Placement
- 6.5. TIPS
- 6.6. Treatment of Pancreatic Necrosis and Pseudocysts by Endoscopy
- 6.7. Endoscopic Treatment of the Cirrhotic Patient
- 6.8. Placement of PEG Probes
- 6.9. Importance of Colorectal Cancer Screening

Module 7. Ostomies

- 7.1. Causes
- 7.2. Digestive Surgery
- 7.3. Types of Ostomies
- 7.4. Psychosocial Aspects
- 7.5. Nutritional Needs
- 7.6. Care Patient Empowerment
- 7.7. Care plan

Module 8. Other Digestive Nursing Techniques

- 8.1. Correct Identification of Stool Types
- 8.2. Insertion of Orogastric, Nasogastric, Nasoduodenal and Nasojejunal tubes
- 8.3. Gastric Lavage
- 8.4. Cleaning Enemas
- 8.5. Fecaloma Removal

- 9.1. Anatomical and Physiological Aspects of the Digestive Tract
- 9.2. Diseases and Pathologies of the Digestive System
- 9.3. Other Pathologies Related to Digestive Feeding Ostomies
- 9.4. Types of Digestive Feeding Ostomies
- 9.5. Unique Characteristics
- 9.6. Early Complications
- 9.7. Late Complications
- 9.8. Nursing Care
- 9.9. Feeding Techniques
- 9.10. Types of Devices and Their Characteristics

Module 10. Advanced Digestive, Endocrinology and Nutrition Practice

- 10.1. Semiology and Examination of the Digestive Tract
- 10.2. Special Nasogastric Probes
- 10.3. Advanced Management of Enteral Nutrition
- 10.4. Advanced Management of Parenteral Nutrition
- 10.5. Advanced Diet Therapy
- 10.6. Diabetic Education
- 10.7. Ostomies
- 10.8. Advanced Practice Nursing in Digestive Surgery
- 10.9. Nursing Competencies in Digestive System Diagnostic Tests
- 10.10. Advanced Practice in Oral Health

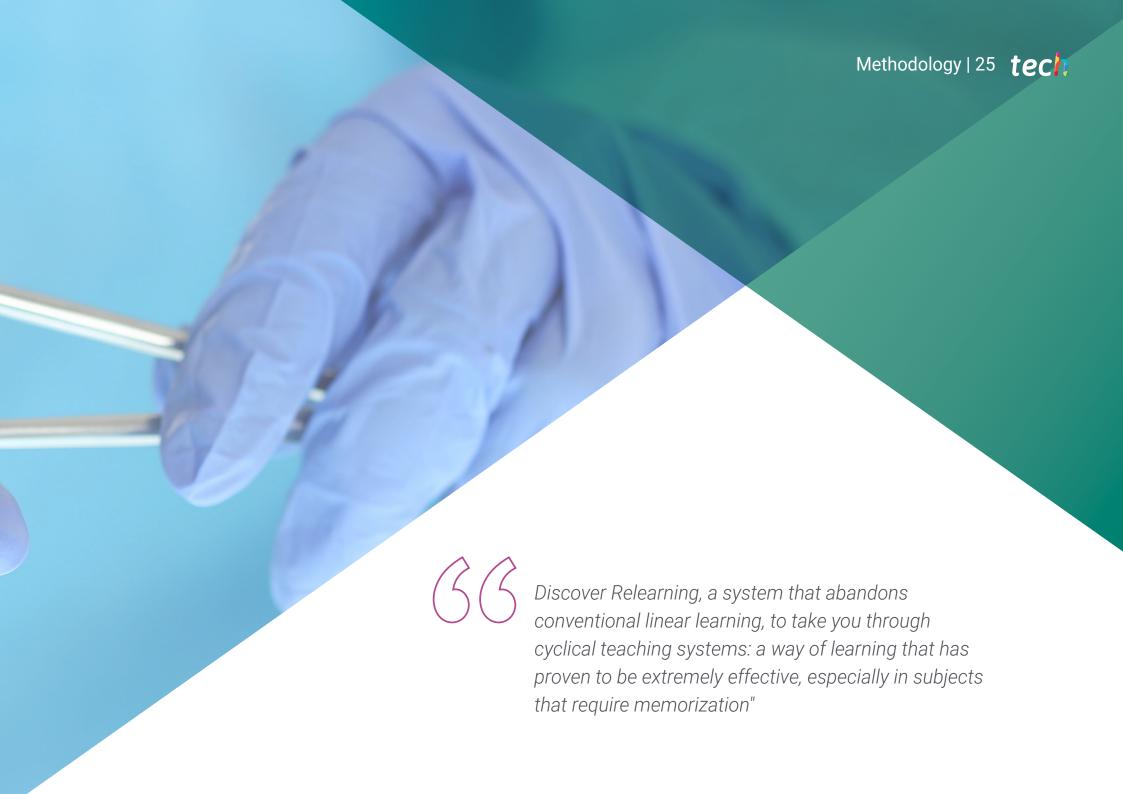

An incomparable professional and personal growth experience that will put you at the forefront of your profession"

This academic program offers students a different way of learning. Our methodology uses a cyclical learning approach: **Relearning.**

This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the **New England Journal of Medicine** have considered it to be one of the most effective.

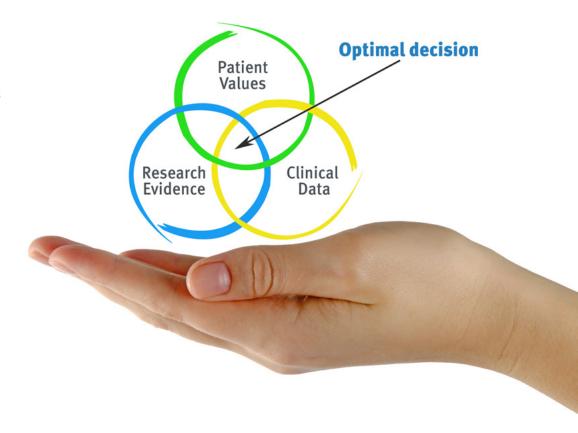

tech 26 | Methodology

At TECH Nursing School we use the Case Method

In a given situation, what should a professional do? Throughout the program, students will face multiple simulated clinical cases, based on real patients, in which they will have to do research, establish hypotheses, and ultimately resolve the situation. There is an abundance of scientific evidence on the effectiveness of the method. Nurses learn better, faster, and more sustainably over time.

With TECH, nurses can experience a learning methodology that is shaking the foundations of traditional universities around the world.

According to Dr. Gérvas, the clinical case is the annotated presentation of a patient, or group of patients, which becomes a "case", an example or model that illustrates some peculiar clinical component, either because of its teaching power or because of its uniqueness or rarity. It is essential that the case is based on current professional life, in an attempt to recreate the real conditions in professional nursing practice.

Did you know that this method was developed in 1912, at Harvard, for law students? The case method consisted of presenting students with real-life, complex situations for them to make decisions and justify their decisions on how to solve them. In 1924, Harvard adopted it as a standard teaching method"

The effectiveness of the method is justified by four fundamental achievements:

- Nurses who follow this method not only grasp concepts, but also develop their mental capacity, by evaluating real situations and applying their knowledge.
- 2. The learning process has a clear focus on practical skills that allow the nursing professional to better integrate knowledge acquisition into the hospital setting or primary care.
- 3. Ideas and concepts are understood more efficiently, given that the example situations are based on real-life.
- 4. Students like to feel that the effort they put into their studies is worthwhile. This then translates into a greater interest in learning and more time dedicated to working on the course.

Relearning Methodology

At TECH we enhance the case method with the best 100% online teaching methodology available: Relearning.

This university is the first in the world to combine case studies with a 100% online learning system based on repetition combining a minimum of 8 different elements in each lesson, which is a real revolution compared to the simple study and analysis of cases.

The nurse will learn through real cases and by solving complex situations in simulated learning environments.

These simulations are developed using state-of-the-art software to facilitate immersive learning.

Methodology | 29 tech

At the forefront of world teaching, the Relearning method has managed to improve the overall satisfaction levels of professionals who complete their studies, with respect to the quality indicators of the best online university (Columbia University).

With this methodology we have trained more than 175,000 nurses with unprecedented success in all specialities regardless of practical workload. Our pedagogical methodology is developed in a highly competitive environment, with a university student body with a strong socioeconomic profile and an average age of 43.5 years old.

Relearning will allow you to learn with less effort and better performance, involving you more in your specialization, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation to success.

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

The overall score obtained by TECH's learning system is 8.01, according to the highest international standards.

This program offers the best educational material, prepared with professionals in mind:

Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is really specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

Nursing Techniques and Procedures on Video

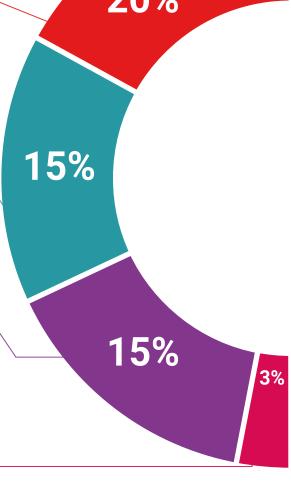

We introduce you to the latest techniques, to the latest educational advances, to the forefront of current medical techniques. All of this in direct contact with students and explained in detail so as to aid their assimilation and understanding. And best of all, you can watch them as many times as you want.

Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive educational system for presenting multimedia content was awarded by Microsoft as a "European Success Story".

Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

Expert-Led Case Studies and Case Analysis

Effective learning ought to be contextual. Therefore, TECH presents real cases in which the expert will guide students, focusing on and solving the different situations: a clear and direct way to achieve the highest degree of understanding.

Testing & Retesting

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises, so that they can see how they are achieving their goals.

Classes

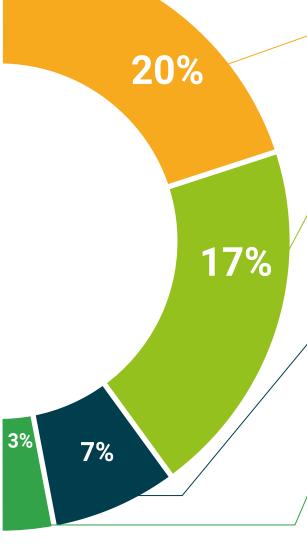

There is scientific evidence suggesting that observing third-party experts can be useful.

Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

Quick Action Guides

TECH offers the most relevant contents of the course in the form of worksheets or quick action guides. A synthetic, practical, and effective way to help students progress in their learning.

tech 34 | Certificate

This private qualification will allow you to obtain a **Professional Master's Degree diploma in Digestive System Nursing** endorsed by **TECH Global University**, the world's largest online university.

TECH Global University is an official European University publicly recognized by the Government of Andorra (*official bulletin*). Andorra is part of the European Higher Education Area (EHEA) since 2003. The EHEA is an initiative promoted by the European Union that aims to organize the international training framework and harmonize the higher education systems of the member countries of this space. The project promotes common values, the implementation of collaborative tools and strengthening its quality assurance mechanisms to enhance collaboration and mobility among students, researchers and academics.

This **TECH Global University** private qualification is a European program of continuing education and professional updating that guarantees the acquisition of competencies in its area of knowledge, providing a high curricular value to the student who completes the program.
