01

Introduction

Learn the latest techniques and developments in Infectious Disease Nosology and develop your skills as a pharmacist by deepening your understanding of the role of the infectologist. You will have the best teachers, experts with extensive experience in the field, and the most up-to-date educational resources. A unique opportunity to prepare yourself with a quality program, from the comfort of your home, thanks to its online modality.

“

With this Postgraduate Certificate, you have the opportunity to update your knowledge in a comfortable way and without renouncing the highest scientific standards, to incorporate the latest advances in the approach to infectious pathology in your daily pharmaceutical practice”

Infectious diseases remain the leading cause of mortality and disability (loss of productive life years) in the world. In 2016, of the total 56.4 million deaths worldwide, 33% were due to infectious diseases, 30% to cardiovascular diseases and 10% to cancer. The fight against disease will have two simultaneous fronts: infectious diseases and chronic non-communicable diseases.

These factors, interacting with each other, have conditioned that we should not consider any part of the planet reasonably isolated from the rest, nor impossible the appearance, reappearance or dissemination of imported or apparently eradicated infectious diseases in our environment.

The complex international epidemiological situation so far this century, exemplified by the deliberate release of *Bacillus anthracis* spores as a weapon of bioterrorism to cause pulmonary anthrax in victims who inhaled them, the emergence of West Nile virus as a pathogen in the United States, the epidemic of Severe Acute Respiratory Syndrome (SARS), the zoonotic spread of monkeypox in the United States, the threat of pandemic influenza, the Ebola epidemic in Africa, the emergence of yellow fever cases in Angola, coupled with the re-emergence of dengue and cholera, the emergence of new arboviruses in the Americas region, The emergence of new arboviruses in the Americas, such as Chikungunya and more recently Zika, together with morbidity from other endemic infectious diseases, such as HIV/AIDS, leptospirosis, tuberculosis, community-acquired pneumonia and the increase in antibiotic resistance with the development of multidrug-resistant bacteria, all of which highlight the unprecedented need to improve the process of training and development of human capital in order to increase the competence and performance of all the personnel necessary to face the challenges involved in controlling and dealing with biological, hospital and public health emergencies that guarantee the quality and safety of health care for the population in any part of the world.

This **Postgraduate Certificate in Nosology of Infectious Diseases and Role of the Infectologist** contains the most complete and up-to-date scientific program on the market. The most important features of the program include:

- ◆ Clinical cases presented by experts in Nosology of Infectious Diseases and Role of the Infectologist
- ◆ The graphic, schematic, and practical contents with which they are created provide scientific and practical information on the disciplines that are essential for professional practice
- ◆ New developments on Nosology of Infectious Diseases and Role of the Infectologist
- ◆ Practical exercises where self-assessment can be used to improve learning
- ◆ An algorithm-based interactive learning system for decision-making in the clinical situations presented throughout the course
- ◆ Theoretical lessons, questions to the expert, debate forums on controversial topics, and individual reflection assignments
- ◆ Content that is accessible from any fixed or portable device with an Internet connection

Increase your skills as a pharmacist and learn everything you need to know about Nosology of Infectious Diseases and Role of the Infectologist"

“

This Postgraduate Certificate is the best investment you can make in a qualification for two reasons: you will obtain a Postgraduate Certificate and you will acquire the best and most up-to-date qualification in Nosology of Infectious Diseases and Role of the Infectologist "

Its faculty is made up of prestigious and renowned professionals, with a long history in health care, teaching and research, who have worked in many countries on several continents, developing a professional and teaching experience that they deliver in an extraordinary way in this Postgraduate Certificate.

The methodological design of this Postgraduate Certificate, developed by a multidisciplinary team of e-learning experts, integrates the latest advances in educational technology for the creation of numerous educational multimedia tools that allow the professional, based primarily on the problem-based learning method, to address real problems in their daily clinical practice, which will allow them to advance by acquiring knowledge and developing skills that will impact their future professional work.

It should be noted that each of the contents generated, as well as the videos, self-tests, clinical cases and modular exams have been thoroughly reviewed, updated and integrated by the professors and the team of experts that make up the working group, in order to facilitate the learning process in a didactic way that will allow the objectives of the teaching program to be achieved.

Seize the moment and gain up-to-date knowledge on infectious disease management. This is the opportunity your career has been waiting for.

Don't miss the opportunity and get up to date on advances in the treatment of the infections to incorporate them into your daily medical practice.

02

Objectives

The fundamental purpose of the educational program is to specialize and improve the pharmacist to achieve a deep theoretical mastery of the latest and most current scientific knowledge in the area of clinical infectious diseases, as well as the development of skills that allow them to approach the complex process of health and infectious diseases in individuals and communities more comfortably and safely in practice.

HI

“

This program will generate a sense of confidence in the performance of pharmacy practice, which will help you grow personally and professionally”

General Objective

- ♦ Update or deepen your knowledge and develop your skills for daily clinical practice in healthcare, teaching or research roles in the field of infectious diseases in order to provide individual or group population care that allows for the improvement of health indicators
- ♦ Improve the pharmaceutical and health care of patients with infectious diseases, based on comprehensive care, the application of the clinical epidemiological method and the correct use of antimicrobials in accordance with the most up-to-date scientific evidence

Specific Objectives

- ♦ Develop skills to implement prophylactic plans for the prevention of these diseases.
- ♦ Assess and interpret the epidemiological characteristics and conditions of the continents that favour the emergence and development of infectious diseases
- ♦ Explain the complex interrelationships between infections and different types of immunosuppression
- ♦ Describe the main elements that favor occupational accidents and the transmission of blood-borne pathogens

“

Improve the care of your patients by taking advantage of the program offered by the Postgraduate Certificate in Nosology of Infectious Diseases and Role of the Infectologist”

03

Course Management

This academic program includes the most specialized teaching staff in the current educational market. They are specialists selected by TECH to develop the whole syllabus. In this way, starting from their own existence and the latest evidence, they have designed the most up-to-date content that provides a guarantee of quality in such a relevant subject.

“

TECH offers the most specialized teaching staff in the field of study. Enroll now and enjoy the quality you deserve”

International Guest Director

Dr. Jatin Vyas is a prestigious physician specializing in Microbial Infectious Pathologies and Fungal Immunology. His work philosophy is based on providing holistic care to his patients, with an empathetic approach to pain management. Likewise, his work, code of ethics and values have been recognized on multiple occasions in the form of awards, including the Kass Award for “Clinical Excellence in Infectious Diseases”.

It should be noted that, after completing his residency in Anesthesiology at Case Western Reserve University in Cleveland, he obtained a fellowship in Interventional Pain Management from the University of Iowa. In line with this, he has combined this work with his role as a Research Scientist, focusing on immune responses to pathogenic fungi. In this sense, he has published a wide production of specialized articles in areas such as viral elimination and evolution of SARS-CoV-2, differentiation of functional airway microfold cells or epithelial defects of the respiratory tract associated with the TAT3 mutation in Job’s Syndrome. On the other hand, he has been in charge of leading multiple research projects focused on infectious conditions and innovative treatments. Likewise, he has contributed significantly to the understanding and management of several contagious bacterial diseases.

In his commitment to clinical excellence, he regularly participates in the most renowned scientific congresses and medical symposia worldwide. He shares his extensive experience and knowledge on subjects such as antibiotic resistance, the adaptation mechanisms of pathogenic fungi or the most cutting-edge therapies to combat different viral infections. Thanks to this, Dr. Jatin Vyas has contributed cutting-edge strategies to raise awareness of these conditions in both the healthcare community and society at large.

Dr. Vyas, Jatin

- Director of Internal Medicine at Massachusetts General Hospital, United States
- Researcher funded by the National Institutes of Health of the United States Government
- Research Fellow in Interventional Pain Management at the University of Iowa
- Research Fellow in Chemistry at the Welch Foundation, California
- Residency in Anesthesiology at Case Western Reserve University, Cleveland, Ohio
- Doctorate in Medicine, University of Arkansas
- Bachelor of Science in Forensic Science
- Board Certification in Infectious Diseases by the American Board of Internal Medicine
- Board Certification in Internal Medicine by the American Board of Internal Medicine

Thanks to TECH, you will be able to learn with the best professionals in the world"

04

Structure and Content

The teaching program has been created by a group of professors and professionals in pharmacy and medicine, from various medical specialties, with extensive research and teaching experience in several countries in Africa, Central and South America, interested in integrating the latest and most current scientific knowledge of clinical infectious diseases and antimicrobial therapeutics, to ensure training and professional development to improve the daily clinical practice of professionals who care for patients or populations with infectious diseases.

“

This Postgraduate Certificate in Nosology of Infectious Diseases and Role of the Infectologist contains the most complete and up-to-date scientific program on the market”

Module 1. General Elements of Infectious Diseases

- 1.1. General and Basic Concepts of the Infectious Health-Illness Process
 - 1.1.1. The Stages of the Infectious Process
 - 1.1.2. The Systemic Inflammatory Response
 - 1.1.3. Sepsis
 - 1.1.4. Complications of Sepsis
- 1.2. Most Common Signs and Symptoms in Patients with Infectious Diseases
 - 1.2.1. Local Signs and Symptoms of Sepsis
 - 1.2.2. Systemic Signs and Symptoms of Sepsis
- 1.3. Main Infectious Syndromes
 - 1.3.1. Systemic Syndromes
 - 1.3.2. Local Syndromes
- 1.4. Fever of Unknown Origin (FUO)
 - 1.4.1. Classis FUO
 - 1.4.2. Nosocomial FUO
 - 1.4.3. FUO in an Immunosuppressed Patient
 - 1.4.4. FUO in HIV Infections
- 1.5. Fever and Rash
 - 1.5.1. Types of Rashes
 - 1.5.2. Main Infectious Agents Which Produce Rashes
- 1.6. Fever and Adenomegaly
 - 1.6.1. Characteristics of Infectious Adenomegalies
 - 1.6.2. Infections and Localized Adenomegalies
 - 1.6.3. Infections and Generalized Adenomegalies
- 1.7. Sexually Transmitted Infections (STI)
 - 1.7.1. Epidemiology of the STI
 - 1.7.2. Main Agents in Sexual Transmission
 - 1.7.3. Syndromic Approach to STIs
- 1.8. Septic Shock
 - 1.8.1. Epidemiology
 - 1.8.2. Pathophysiology
 - 1.8.3. Clinical Manifestations and Differential Masks from the Other Types of Shock
 - 1.8.4. Diagnosis and Evaluation of the Severity and Complications
 - 1.8.5. Therapeutic Behavior

Module 2. The Role of Infectologists in Health Services

- 2.1. Infectology and its Importance in Medical Care Within Any Specialist Field
 - 2.1.1. The Universal Nature of Infectious Pathology in Medical Specialties
 - 2.1.2. Mastering Antibiotic Treatment
- 2.2. Skills and Abilities of an Infectologist
 - 2.2.1. Skills of an Infectologist
 - 2.2.2. Abilities of an Infectologist
- 2.3. The Role of Infectologists in Health Teams
 - 2.3.1. Functions of Infectologists in Health Teams in the Different Levels of the Health System
- 2.4. Infectious Disease Consultation
 - 2.4.1. Functions of an Infectologist's Consultation
 - 2.4.2. Pathologies to be Consulted
- 2.5. Scientific Update of the Infectologist's Medical Knowledge and the Future Challenges of Infectology
 - 2.5.1. Self-Training
 - 2.5.2. Training and Professional Achievement
 - 2.5.3. Future Challenges for Infectology: The Emergence of New Diseases
Antimicrobial Resistance The Development of Vaccines and Antibiotics

“

A unique, key, and decisive program to boost your professional development”

05

Methodology

This academic program offers students a different way of learning. Our methodology uses a cyclical learning approach: **Relearning**.

This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the **New England Journal of Medicine** have considered it to be one of the most effective.

“

Discover Relearning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization"

At TECH we use the Case Method

What should a professional do in a given situation? Throughout the program, students will be confronted with multiple simulated clinical cases based on real patients, in which they will have to investigate, establish hypotheses and ultimately, resolve the situation. There is an abundance of scientific evidence on the effectiveness of the method. Pharmacists learn better, more quickly and more sustainably over time.

With TECH you will experience a way of learning that is shaking the foundations of traditional universities around the world.

According to Dr. Gérvas, the clinical case is the annotated presentation of a patient, or group of patients, which becomes a "case", an example or model that illustrates some peculiar clinical component, either because of its teaching power or because of its uniqueness or rarity. It is essential that the case is based on current professional life, attempting to recreate the actual conditions in a pharmacist's professional practice.

“

Did you know that this method was developed in 1912, at Harvard, for law students? The case method consisted of presenting students with real-life, complex situations for them to make decisions and justify their decisions on how to solve them. In 1924, Harvard adopted it as a standard teaching method”

The effectiveness of the method is justified by four fundamental achievements:

1. Pharmacists who follow this method not only grasp concepts, but also develop their mental capacity, by evaluating real situations and applying their knowledge.
2. Learning is solidly translated into practical skills that allow the student to better integrate into the real world.
3. Ideas and concepts are understood more efficiently, given that the example situations are based on real-life.
4. Students like to feel that the effort they put into their studies is worthwhile. This then translates into a greater interest in learning and more time dedicated to working on the course.

Relearning Methodology

At TECH we enhance the case method with the best 100% online teaching methodology available: Relearning.

Our University is the first in the world to combine the study of clinical cases with a 100% online learning system based on repetition, combining a minimum of 8 different elements in each lesson, which represent a real revolution with respect to simply studying and analyzing cases.

Pharmacists will learn through real cases and by solving complex situations in simulated learning environments. These simulations are developed using state-of-the-art software to facilitate immersive learning.

At the forefront of world teaching, the Relearning method has managed to improve the overall satisfaction levels of professionals who complete their studies, with respect to the quality indicators of the best online university (Columbia University).

With this methodology, more than 115,000 pharmacists have been trained with unprecedented success in all clinical specialties, regardless of the surgical load. This pedagogical methodology is developed in a highly demanding environment, with a university student body with a high socioeconomic profile and an average age of 43.5 years.

Relearning will allow you to learn with less effort and better performance, involving you more in your specialization, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation to success.

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

The overall score obtained by TECH's learning system is 8.01, according to the highest international standards.

This program offers the best educational material, prepared with professionals in mind:

Study Material

All teaching material is created specifically for the course by specialist pharmacists who will be teaching the course, so that the didactic development is highly specific and accurate.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

Video Techniques and Procedures

TECH introduces students to the latest techniques, to the latest educational advances, to the forefront of current pharmaceutical care procedures. All of this, first hand, and explained and detailed with precision to contribute to assimilation and a better understanding. And best of all, you can watch them as many times as you want.

Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This unique multimedia content presentation training system was awarded by Microsoft as a "European Success Story".

Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

Expert-Led Case Studies and Case Analysis

Effective learning ought to be contextual. Therefore, we will present you with real case developments in which the expert will guide you through focusing on and solving the different situations: a clear and direct way to achieve the highest degree of understanding.

Testing & Retesting

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises, so that they can see how they are achieving their goals.

Classes

There is scientific evidence on the usefulness of learning by observing experts. The system known as Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

Quick Action Guides

TECH offers the most relevant contents of the course in the form of worksheets or quick action guides. A synthetic, practical, and effective way to help students progress in their learning.

06

Certificate

The Postgraduate Certificate in Nosology of Infectious Diseases and Role of the Infectologist guarantees students, in addition to the most rigorous and up-to-date education, access to a Postgraduate Certificate issued by TECH Global University.

“

Successfully complete this program and receive your university qualification without having to travel or fill out laborious paperwork”

This program will allow you to obtain your **Postgraduate Certificate in Nosology of Infectious Diseases and Role of the Infectologist** endorsed by **TECH Global University**, the world's largest online university.

TECH Global University is an official European University publicly recognized by the Government of Andorra ([official bulletin](#)). Andorra is part of the European Higher Education Area (EHEA) since 2003. The EHEA is an initiative promoted by the European Union that aims to organize the international training framework and harmonize the higher education systems of the member countries of this space. The project promotes common values, the implementation of collaborative tools and strengthening its quality assurance mechanisms to enhance collaboration and mobility among students, researchers and academics.

This **TECH Global University** title is a European program of continuing education and professional updating that guarantees the acquisition of competencies in its area of knowledge, providing a high curricular value to the student who completes the program.

Title: **Postgraduate Certificate in Nosology of Infectious Diseases and Role of the Infectologist**

Modality: **online**

Duration: **6 weeks**

Accreditation: **8 ECTS**

*Apostille Convention. In the event that the student wishes to have their paper diploma issued with an apostille, TECH Global University will make the necessary arrangements to obtain it, at an additional cost.
