01

Introduction

The Pharmacy Office, due to its health and commercial characteristics, requires that its management incorporates specific aspects to achieve the best results at all levels. This program offers Pharmacy professionals the necessary tools in the economic and management areas to develop the activity with the necessary solvency in the most practical fields, also incorporating the specific vision of the Client/Patient and their particular needs.

“

A high-performance program that will give you a significant boost in the practice of your profession”

Among the specific needs that a Pharmacy Office has, the relationship with the client/patient is that needs more specific attention, which is why this Postgraduate Diploma is presented in response to the need for up-to-date information in this area. At this time, this is in response to, among other things, the growth of the profession and the demand for pharmacies in the public sector, which makes this up-to-date program an opportunity for pharmacy professionals in administrative and management positions.

The professional's knowledge should no longer be limited to mastering pharmacology and the pharmacist's knowledge in terms of healthcare, but requires skills that position them in the business landscape in a stable and competitive manner.

In this sense, the economic field is another that will be addressed extensively in this Postgraduate Diploma.

Through a study method of proven efficiency, you will be able to acquire skills in the areas of leadership and management, and in the essential areas of business development.

This **Postgraduate Diploma in Pharmacy Office Management and Administration: Responsible, Economic and Client/Patient Management** contains the most complete and up-to-date scientific program on the market. The main features are:

- ◆ Practical case studies presented by experts
- ◆ The graphic, schematic, and practical contents with which they are created provide scientific and practical information on the disciplines that are essential for professional practice
- ◆ Latest innovations in the sector
- ◆ Practical exercises where self-assessment can be used to improve learning
- ◆ Emphasis on innovative methodologies
- ◆ Theoretical lessons, questions to the expert, debate forums on controversial topics, and individual reflection assignments
- ◆ Content that is accessible from any fixed or portable device with an Internet connection

This program in Pharmacy Office Management and Administration: Responsible, Economic and Client/Patient Management will give you the most complete and up-to-date information on the reality of the sector, and new techniques and ways of working”

“

A program designed to be optimal in all its aspects, taking into account a global criterion of excellence”

Its teaching staff includes expert professionals who contribute their work experience to this training program, as well as renowned specialists from leading societies and prestigious universities.

The multimedia content, developed with the latest educational technology, will provide the professional with situated and contextual learning, i.e., a simulated environment that will provide an immersive training experience designed to train for real-life situations.

This program is designed around Problem-Based Learning, whereby the professional must try to solve the different professional practice situations that arise throughout the program. For this purpose, specialists will be assisted by an innovative, interactive video system created by renowned and experienced experts in the field Pharmacy Offices.

A very complete and up-to-date Postgraduate Diploma that will allow you to study without a problem of fitting it into your daily life.

Make the most of the opportunity and improve your skills to allow you to act more efficiently and confidently in the areas of Management and Administration in Pharmacy.

02 Objectives

The objective of this comprehensive program is to accompany and encourage students in a process of professional growth that will allow them to reach another level of performance. With the most interesting and up-to-date knowledge of the moment in a program intensively focused on practice.

“

The main objective of this program is to help you acquire the competencies required to propel your professional practice to the highest level of quality”

General Objectives

- ◆ Acquire the knowledge and techniques that are essential to take on and organize the organizational responsibilities of a Pharmacy Office
- ◆ Learn about responsible management
- ◆ Learning about the client/patient in all its aspects

Realistic goals that will turn into immediate job advancements"

Specific Objectives

Module 1. The Responsible Management of the Pharmacy Office

- ◆ Learn about the role of Community Pharmacy
- ◆ Study health promotion techniques from Community Pharmacy
- ◆ Learn how to implement good practices in Community Pharmacy
- ◆ Learn about the proper use of medicines and medical devices
- ◆ Learn about professional secrecy
- ◆ Analyze corporate social liability applied to Pharmacy Offices
- ◆ Learn how to organize a Pharmacy Office

Module 2. Economic-Financial Management of the Pharmacy Office

- ◆ Analyze the fundamentals of pharmacy management
- ◆ Learning how to use financial and economic ratios in pharmacy
- ◆ Know how to manage inventories

Module 3. Client/Patient Management

- ◆ Analyze communication with the client/patient
- ◆ Recognize client segmentation
- ◆ Learn about consumer psychology
- ◆ Learn how to carry out customer loyalty programs

03

Course Management

This Postgraduate Diploma is an opportunity to learn from the best, with a teaching staff made up of professionals in the sector who will contribute their theoretical and practical knowledge to take you to the highest level of education in this field. With the latest and most effective teaching methods on the online teaching market.

“

An unparalleled opportunity to learn and grow professionally, hand in hand with the best specialists in this field”

Management

Ms. Aunió Lavarías, María Eugenia

04

Structure and Content

A compendium of knowledge created to give the pharmacist the opportunity to catch up or incorporate the most advanced knowledge in Pharmacy Office Management and Administration in the current panorama. With the confidence and solvency of the largest online university in the world.

“

A comprehensive teaching program, structured in well-developed teaching units, oriented towards efficient and swift learning that is compatible with your personal and professional life"

Module 1. The Responsible Management of the Pharmacy Office

- 1.1. The Role of Community Pharmacy. Scope of Action of the Community Pharmacist Organization
- 1.2. Analysis of the Community Pharmacy Environment
- 1.3. Promoting Health From the Community Pharmacy
- 1.4. Implementation of Good Practices in Community Pharmacy
- 1.5. Rational Use of Medicines in Pharmacy Offices
- 1.6. Training and Information for the Proper Use of Medicines and Medical Devices
- 1.7. Professional Secrecy Moral Basis for Pharmaceutical Confidentiality and Professional Secrecy
- 1.8. Concept and Functions of Codes of Ethics. Responsibly Performing Professional Skills. Unfair Competition
- 1.9. Corporate Social Liability Applied to the Pharmacy Office. Respect for the Environment and Waste Management
- 1.10. Organization of a Pharmacy Office

Module 2. Economic-Financial Management of the Pharmacy Office

- 2.1. Fundamentals of Pharmacy Management
- 2.2. Management Processes in Pharmacy
- 2.3. Analysis of Financial and Economic Ratios in Pharmacy
- 2.4. Inventory Management

Module 3. Client/Patient Management

- 3.1. Pharmacy as a Space for Health Management
- 3.2. Communication to Approach the Client-Patient Pairing
- 3.3. Client Segmentation
- 3.4. Consumer Psychology and Behavior
- 3.5. Professional Liability, Management Motor
- 3.6. Regular and New Clients
- 3.7. Customer Loyalty Programs
- 3.8. Customer Service

“

A unique, key, and decisive educational experience to boost your professional development”

05

Methodology

This academic program offers students a different way of learning. Our methodology uses a cyclical learning approach: **Relearning**.

This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the **New England Journal of Medicine** have considered it to be one of the most effective.

“

Discover Relearning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization"

At TECH we use the Case Method

What should a professional do in a given situation? Throughout the program, students will be confronted with multiple simulated clinical cases based on real patients, in which they will have to investigate, establish hypotheses and ultimately, resolve the situation. There is an abundance of scientific evidence on the effectiveness of the method. Pharmacists learn better, more quickly and more sustainably over time.

With TECH you will experience a way of learning that is shaking the foundations of traditional universities around the world.

According to Dr. Gervas, the clinical case is the annotated presentation of a patient, or group of patients, which becomes a "case", an example or model that illustrates some peculiar clinical component, either because of its teaching power or because of its uniqueness or rarity. It is essential that the case is based on current professional life, attempting to recreate the actual conditions in a pharmacist's professional practice.

“

Did you know that this method was developed in 1912, at Harvard, for law students? The case method consisted of presenting students with real-life, complex situations for them to make decisions and justify their decisions on how to solve them. In 1924, Harvard adopted it as a standard teaching method”

The effectiveness of the method is justified by four fundamental achievements:

1. Pharmacists who follow this method not only grasp concepts, but also develop their mental capacity, by evaluating real situations and applying their knowledge.
2. Learning is solidly translated into practical skills that allow the student to better integrate into the real world.
3. Ideas and concepts are understood more efficiently, given that the example situations are based on real-life.
4. Students like to feel that the effort they put into their studies is worthwhile. This then translates into a greater interest in learning and more time dedicated to working on the course.

Relearning Methodology

At TECH we enhance the case method with the best 100% online teaching methodology available: Relearning.

Our University is the first in the world to combine the study of clinical cases with a 100% online learning system based on repetition, combining a minimum of 8 different elements in each lesson, which represent a real revolution with respect to simply studying and analyzing cases.

Pharmacists will learn through real cases and by solving complex situations in simulated learning environments. These simulations are developed using state-of-the-art software to facilitate immersive learning.

At the forefront of world teaching, the Relearning method has managed to improve the overall satisfaction levels of professionals who complete their studies, with respect to the quality indicators of the best online university (Columbia University).

With this methodology, more than 115,000 pharmacists have been trained with unprecedented success in all clinical specialties, regardless of the surgical load. This pedagogical methodology is developed in a highly demanding environment, with a university student body with a high socioeconomic profile and an average age of 43.5 years.

Relearning will allow you to learn with less effort and better performance, involving you more in your specialization, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation to success.

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

The overall score obtained by TECH's learning system is 8.01, according to the highest international standards.

This program offers the best educational material, prepared with professionals in mind:

Study Material

All teaching material is created specifically for the course by specialist pharmacists who will be teaching the course, so that the didactic development is highly specific and accurate.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

Video Techniques and Procedures

TECH introduces students to the latest techniques, to the latest educational advances, to the forefront of current pharmaceutical care procedures. All of this, first hand, and explained and detailed with precision to contribute to assimilation and a better understanding. And best of all, you can watch them as many times as you want.

Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

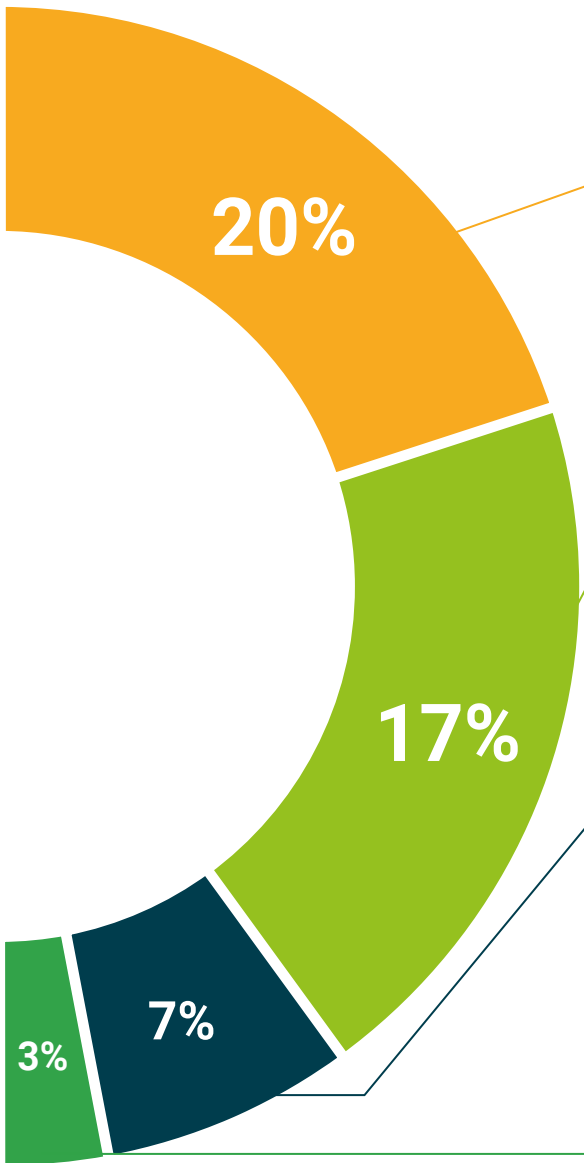

This unique multimedia content presentation training system was awarded by Microsoft as a "European Success Story".

Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

Expert-Led Case Studies and Case Analysis

Effective learning ought to be contextual. Therefore, we will present you with real case developments in which the expert will guide you through focusing on and solving the different situations: a clear and direct way to achieve the highest degree of understanding.

Testing & Retesting

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises, so that they can see how they are achieving their goals.

Classes

There is scientific evidence on the usefulness of learning by observing experts. The system known as Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

Quick Action Guides

TECH offers the most relevant contents of the course in the form of worksheets or quick action guides. A synthetic, practical, and effective way to help students progress in their learning.

06

Certificate

This Postgraduate Diploma in Pharmacy Office Management and Administration: Responsible, Economic and Client/Patient Management guarantees students, in addition to the most rigorous and up-to-date education, access to a Postgraduate Diploma issued by TECH Technological University.

“

Successfully complete this program and receive your university qualification without having to travel or fill out laborious paperwork”

This **Postgraduate Diploma in Pharmacy Office Management and Administration: Responsible, Economic and Client/Patient Management** contains the most complete and up-to-date scientific program on the market.

After the student has passed the assessments, they will receive their corresponding **Postgraduate Diploma** issued by **TECH Technological University** via tracked delivery*.

The certificate issued by **TECH Technological University** will reflect the qualification obtained in the Postgraduate Diploma, and meets the requirements commonly demanded by labor exchanges, competitive examinations, and professional career evaluation committees.

Title: **This Postgraduate Diploma in Pharmacy Office Management and Administration: Responsible, Economic and Client/Patient Management**

Official N° of hours: **450 h.**
