01 Introduction

In recent years, orthopedic pathologies in children, such as scoliosis, flatfoot, clubfoot, among others, have experienced significant advances, which have allowed a more accurate and earlier diagnosis, as well as a more effective and less invasive treatment, which improves the quality of life of patients. Physiotherapists play a fundamental role in the treatment of these pathologies, so it is essential that they have specialized training in pediatric orthopedics. For this reason, this 3-week program is born, which will lead students to enhance their skills in the application of the most innovative techniques and specific therapeutic procedures in this type of patients. All this, in a prestigious clinical center and surrounded by the top experts.

An Internship Program where you will get in only 3 weeks a real update of skills in Pediatric Orthopedics"

Pediatric Orthopedics has become a fundamental discipline in modern physiotherapy. It is therefore necessary for professionals to be qualified for the care of a wide variety of pathologies in the pediatric population, from postural problems to the most complex musculoskeletal conditions.

This is why TECH has decided to design this Internship Program in Pediatric Orthopedics, which offers physiotherapists the opportunity to update their skills and qualifications in this field, together with the best specialists who are part of the clinical center, where this updating process will take place.

Therefore, during the three weeks of the program, the students will have the opportunity to live a unique experience that will allow them to apply the most innovative techniques and therapeutic procedures in the treatment of orthopedic pathologies in children. Without a doubt, it is an ideal opportunity for a complete update in a unique health environment, which will allow the graduate to be aware of the most recent advances in working methods, as well as in the techniques and technological devices used in various clinical situations.

02

Why Study an Internship Program?

Nowadays, knowledge and training are critical to success in any field. In the case of physiotherapists, TECH's Internship Program in Pediatric Orthopedics is essential due to the increasing demand for physiotherapy services for children with orthopedic disorders. Study and gain hands-on experience in this field will allow physiotherapists to improve their clinical skills and learn the most advanced techniques to help their pediatric patients. In addition, Internship Program at a recognized clinical center alongside expert tutors for three weeks will provide a unique and invaluable experience for professional development.

Delve into a unique hands-on experience and boost your technical skills in the management of orthopedic pediatric patients"

1. Updating from the Latest Technology Available

In this Internship Program, physiotherapists will be able to acquire practical experience in a state-of-the-art clinical environment and have access to the latest technology in this field. This will allow them to update and apply the latest techniques and advances in their professional practice in pediatric orthodontics, improving the quality of care and the effectiveness of the treatments they provide to their patients.

2. Gaining In-depth Knowledge from the Experience of Top Specialists

TECH has selected distinguished specialized centers in Pediatric Orthopedics. In this way, the professional is guaranteed to have access to a truly effective practice, since they will not only be in an incomparable environment, but they will also be able to verify the work methods of real experts who will guide them during this 3-week process.

3. Entering First-Class Clinical Environments

TECH carefully selects the clinical centers that are available for the Internship Program. This ensures that the specialists will have an outstanding clinical environment in this field, where they will be able to experience first-hand the daily dynamics in a rigorous, demanding and meticulous environment in the work of patient care in their homes.

4. Putting the acquired knowledge into daily practice from the very first moment

With this educational model of practical updating, physiotherapists can be updated on the latest techniques and advances in Pediatric Orthopedics in only 3 weeks. The most important thing is that they will be able to apply this knowledge directly in their clinical practice with children, from the first moment and taught by an excellent team of experts with a consolidated trajectory in this field.

5. Expanding the Boundaries of Knowledge

TECH offers the possibility of completing the Internship Program in centers of recognized prestige not only nationally, but also internationally. In this way, the physiotherapist will be able to broaden their vision and update their knowledge with the best experts working in first level health centers. It is a unique opportunity that only TECH, the world's largest online university is able to provide.

You will have full practical immersion at the center of your choice"

03 Objectives

Thanks to this Internship Program, students in this program will be involved in actions focused on perfecting a wide variety of treatment techniques and specific exercises to improve mobility and function in children with orthopedic problems. A process that will allow you to successfully manage from the simplest clinical cases to the most complex clinical situations. Always following the procedures and methods used by the experts working in the clinical center where you will stay.

General Objectives

- Apply the principles and techniques of Pediatric Orthopedics for the treatment and rehabilitation of musculoskeletal pathologies in children
- Acquire skills to evaluate and diagnose orthopedic pathologies in children and design specific and effective treatment plans for each case
- Apply specific physiotherapy techniques to improve the functionality of the upper and lower extremities in children with orthopedic pathologies

Hone your skills to treat pediatric orthopedic patients by applying the latest manual techniques, therapeutic exercise, and orthopedic devices”

Specific Objectives

- Evaluate and diagnose orthopedic pathologies in children by performing physical tests and clinical evaluation
- Design and implement specific treatment plans for each orthopedic pathology in children
- Apply specific physiotherapy techniques to improve the functionality of the upper and lower extremities in children
- Understand and apply preventive measures to avoid orthopedic injuries in children
- Evaluate walking and balance in children with orthopedic disorders
- Design and apply training programs to improve walking and balance in children with orthopedic disorders
- Evaluate and treat children with scoliosis and other spinal deformities
- Understand and apply orthotic and prosthetic techniques in children with orthopedic limitations
- Understand the importance of postoperative rehabilitation in children with orthopedic surgery
- Evaluate and treat children with cerebral palsy and other orthopedic-related neuromuscular disorders

Apply specific physiotherapy techniques to improve the functionality of the limbs in children with orthopedic pathologies in a first class environment”

04

Educational Plan

The Internship Program for Pediatric Orthopedics includes a three-week stay in a prestigious center, where students will work together with a team of experienced physiotherapists. During the Monday through Friday sessions, which last eight consecutive hours, you will be able to observe real cases and apply the most innovative therapeutic techniques, adapting them to each pathology. In addition, you will have access to the latest devices, which will allow you to improve your skills in the care of orthopedic patients.

In this completely practical Internship Program, the activities are aimed at developing and perfecting the skills necessary to provide healthcare in areas and conditions that require highly qualified professionals, and are oriented towards specific expertise for practicing the activity, in a safe environment for the patient and with highly professional performance.

In this way, this program provides the option of expanding professional skills through work in an advanced healthcare context, with a focus on real-time monitoring of patients' health status. This innovative and unified perspective of healthcare processes makes this center of excellence an ideal place for the development of professional skills. Moreover, this program represents an excellent opportunity to experiment in an environment that fosters innovation and the use of technology in health care.

The practical education will be carried out with the active participation of the student performing the activities and procedures of each area of competence (learning to learn and learning to do), with the support and guidance of teachers and other fellow students that facilitate teamwork and multidisciplinary integration as transversal competencies for the praxis of physiotherapy (learning to be and learning to relate).

The procedures described below will form the basis of the practical part of the internship, and their implementation is subject to both the suitability of the patients and the availability of the center and its workload, with the proposed activities being as follows:

You will learn firsthand the reality of work in the area, in a demanding and rewarding environment"

Module	Practical Activity
Assessment and Diagnosis	Perform knee joint range of motion assessment in patients with congenital dislocation of the knee
	Practice assessment of gait in patients with infantile cerebral palsy
	Conduct postural and alignment assessment in patients with adolescent idiopathic scoliosis
Planning of therapeutic training	Plan a training program to improve patellofemoral stability in patients with patellofemoral instability
	Design an exercise program to improve muscle strength in patients with Duchenne muscular dystrophy
	Plan an exercise routine to correct crouched gait in patients with infantile cerebral palsy
Implementation of therapeutic training	Teach the patient with myelomeningocele trunk-strengthening exercises to improve postural stability
	Develop an occupational therapy program to improve functionality in patients with osteochondritis dissecans of the talus in patients with osteochondritis dissecans of the talus
	Teach patients with hyperkyphosis stretching exercises to improve posture and reduce back pain
Follow-up and adaptation of therapeutic training	Evaluate the progression of the training program in patients with osteogenesis imperfecta and make the necessary adjustments
	Follow up the exercise program in patients with anterior tuberosity pullout fracture and adapt it according to their progress
	Evaluate the effectiveness of the treatment in patients with septic arthritis and modify it if necessary

05

Where Can I Do the Internship Program?

TECH has carefully selected the places where physiotherapists will carry out their Internship Program in the field of Pediatric Orthopedics. These spaces are characterized by a team of high quality specialists, advanced facilities and the use of the most effective diagnostic and therapeutic techniques in this field. A high-level environment that will allow graduates to enhance their skills by working with highly trained and experienced professionals.

TECH offers you a unique opportunity to update your knowledge in Pediatric Orthopedics in a first class healthcare environment"

The student will be able to do this program at the following centers:

Physiotherapy

Hospital Maternidad HM Belén

Country: Spain City: La Coruña

Address: R. Filantropía, 3, 15011, A Coruña

Network of private clinics, hospitals and specialized centers distributed throughout Spain.

Related internship programs:

- Update in Assisted Reproduction
- Hospitals and Health Services Management

Physiotherapy

Hospital HM Rosaleda

Country: Spain City: La Coruña

Address: Rúa de Santiago León de Caracas, 1, 15701, Santiago de Compostela, A Coruña

Network of private clinics, hospitals and specialized centers distributed throughout Spain.

Make the most of this opportunity to surround yourself with expert professionals and learn from their work methodology"

06

General Conditions

Civil Liability Insurance

This institution's main concern is to guarantee the safety of the trainees and other collaborating agents involved in the internship process at the company. Among the measures dedicated to achieve this is the response to any incident that may occur during the entire teaching-learning process.

To this end, this entity commits to purchasing a civil liability insurance policy to cover any eventuality that may arise during the course of the internship at the center.

This liability policy for interns will have broad coverage and will be taken out prior to the start of the practical training period. That way professionals will not have to worry in case of having to face an unexpected situation and will be covered until the end of the internship program at the center.

General Conditions of the Internship Program

The general terms and conditions of the internship agreement for the program are as follows:

1. TUTOR: During the Internship Program, students will be assigned with two tutors who will accompany them throughout the process, answering any doubts and questions that may arise. On the one hand, there will be a professional tutor belonging to the internship center who will have the purpose of guiding and supporting the student at all times. On the other hand, they will also be assigned with an academic tutor, whose mission will be to coordinate and help the students during the whole process, solving doubts and facilitating everything they may need. In this way, the student will be accompanied and will be able to discuss any doubts that may arise, both clinical and academic.

2. DURATION: The internship program will have a duration of three continuous weeks, in 8-hour days, 5 days a week. The days of attendance and the schedule will be the responsibility of the center and the professional will be informed well in advance so that they can make the appropriate arrangements.

3. ABSENCE: If the students does not show up on the start date of the Internship Program, they will lose the right to it, without the possibility of reimbursement or change of dates. Absence for more than two days from the internship, without justification or a medical reason, will result in the professional's withdrawal from the internship, therefore, automatic termination of the internship. Any problems that may arise during the course of the internship must be urgently reported to the academic tutor.

4. CERTIFICATION: Professionals who pass the Internship Program will receive a certificate accrediting their stay at the center.

5. EMPLOYMENT RELATIONSHIP: The Internship Program shall not constitute an employment relationship of any kind.

6. PRIOR EDUCATION: Some centers may require a certificate of prior education for the Internship Program. In these cases, it will be necessary to submit it to the TECH internship department so that the assignment of the chosen center can be confirmed.

7. DOES NOT INCLUDE: The Internship Program will not include any element not described in the present conditions. Therefore, it does not include accommodation, transportation to the city where the internship takes place, visas or any other items not listed

However, students may consult with their academic tutor for any questions or recommendations in this regard. The academic tutor will provide the student with all the necessary information to facilitate the procedures in any case.

07 Certificate

This program will allow you to obtain your **Internship Program diploma in Pediatric Orthopedics** endorsed by **TECH Global University**, the world's largest online university.

TECH Global University is an official European University publicly recognized by the Government of Andorra ([official bulletin](#)). Andorra is part of the European Higher Education Area (EHEA) since 2003. The EHEA is an initiative promoted by the European Union that aims to organize the international training framework and harmonize the higher education systems of the member countries of this space. The project promotes common values, the implementation of collaborative tools and strengthening its quality assurance mechanisms to enhance collaboration and mobility among students, researchers and academics.

This **TECH Global University** title is a European program of continuing education and professional updating that guarantees the acquisition of competencies in its area of knowledge, providing a high curricular value to the student who completes the program.

Title: **Internship Program in Pediatric Orthopedics**

Duration: **3 weeks**

Attendance: **Monday to Friday, 8-hour consecutive shifts**

Accreditation: **5 ECTS**
