01

Introduction

This program will develop the advantages of working in the aquatic environment with the pediatric patient. Key elements such as play, water as a sensory medium and the family will be addressed to exemplify and provide quality treatment proposals. Upon completion, the student will be able to take into account remarkable elements for adherence to quality treatment.

“

Physiotherapists at the highest level must update their knowledge with training courses such as this one, where they will find the main novelties in the field”

Water is a medium that, due to its characteristics, offers the opportunity to work in a more favorable environment. Its properties suggest a very broad field of action, and there are many patients who can benefit from this work methodology. Patients describe the sensation of being able to perform elements of work that, out of the water, seem more complex to perform.

The aquatic environment offers an interesting variability in our proposals, but it is necessary to master the characteristics of the environment to know how to use it and not to oversaturate and overstimulate the patient. This Postgraduate Certificate offers a wide knowledge of the key elements, studying these aspects in depth to be able to successfully develop a program of Pediatric Patients in the Aquatic Environment.

The teachers who will develop the content of this Postgraduate Certificate are active professional experts who introduce the aquatic environment in the development of their recovery and prevention programs. This is why they will be able to guide, through the proposal of different clinical cases, to exemplify the aspects that provide quality work in the water.

A unique opportunity to specialize in a booming sector with this high-level education.

This **Postgraduate Certificate in Approach to Pediatric Patients in the Aquatic Environment** contains the most complete and up-to-date scientific program on the market. The most important features include:

- ◆ The development of case studies presented by experts in Pediatric Patients in the Aquatic Environment Approach
- ◆ The graphic, schematic, and practical contents with which they are created, provide scientific and practical information on the disciplines that are essential for professional development
- ◆ New developments on Management of Pediatric Patients in the Aquatic Environment
- ◆ Practical exercises where self-assessment can be used to improve learning
- ◆ Special emphasis on innovative methodologies in Pediatric Patients in the Aquatic Environment Approach
- ◆ Theoretical lessons, questions to the expert, debate forums on controversial topics, and individual reflection assignments
- ◆ Content that is accessible from any fixed or portable device with an internet connection

If you want to improve your daily practice, do not hesitate to broaden your knowledge through this Postgraduate Certificate in Approach to Pediatric Patients in the Aquatic Environment"

“

This Postgraduate Certificate is the best investment you can make in the selection of a refresher program for two reasons: in addition to updating your knowledge in Approach to Pediatric Patients in the Aquatic Environment, you will obtain a Postgraduate Certificate from TECH Technological University"

Its teaching staff includes professionals belonging to the field of Pediatric Patients in the Aquatic Environment, who share their work experience in this education, as well as renowned specialists from prestigious societies and universities.

Its multimedia content, developed with the latest educational technology, will allow physiotherapists situated and contextual learning, i.e. a simulated environment that will provide immersive training programmed to train for real situations.

This program is designed around Problem-Based Learning, whereby the professional must try to solve the different professional practice situations that arise throughout the program. For this, the physical therapist specialized in Pediatric Patient Approach in the Aquatic World will have the help of an innovative system of interactive videos made by recognized and experienced experts in the field of Pediatric Patient Approach in the Aquatic World.

Use the best educational methodology to continue your education in the field of Approach to Pediatric Patients in the Aquatic Environment.

This 100% online Postgraduate Certificate will allow you to combine your studies with your professional work while increasing your knowledge in this field.

02 Objectives

The Postgraduate Certificate in Approach to Pediatric Patients in the Aquatic Environment is oriented to facilitate the performance of the highest-level professional dedicated to Physiotherapy with the latest advances and newest treatments in the sector.

“

Become one of the best physical therapists specialized in Approach to Pediatric Patients in the Aquatic Environment, you cannot miss the opportunity to study this Postgraduate Certificate with TECH"

General Objectives

- ◆ Favor the specialization of the Approach to Pediatric Patients in the Aquatic Environment
- ◆ Describe the basics of working in the aquatic environment
- ◆ Establish the necessary assessment for the correct development of the programs and their subsequent reevaluation
- ◆ Design sessions for Approach to Pediatric Patients in the Aquatic Environment taking into account the characteristics of the different types of users

Specific Objectives

- ◆ Describe the evolutionary stages of the child
- ◆ List the benefits of working in the aquatic environment for the pediatric population
- ◆ Show the different communication strategies used in the aquatic environment
- ◆ Detail the aquatic familiarization process to work on anxiety and the fear of water
- ◆ Explain family involvement in treatment in the aquatic environment
- ◆ Identify play as a key element in the treatment of pediatric patients in the aquatic environment
- ◆ Detail the key elements for the development of the pediatric aquatic session

03

Course Management

The program includes in its teaching staff reference Postgraduate Diplomas in Approach to Pediatric Patients in the Aquatic Environment, who pour into this education the experience of their work. Additionally, other recognized experts participate in its design and preparation, completing the program in an interdisciplinary manner.

“

Leading professionals in the field have come together to teach you the latest advances in the treatment of Approach to Pediatric Patients in the Aquatic Environment”

Management

Dr Mur, Esther

- ◆ PhD. In Physical Activity and Sport Sciences from the University of Barcelona
- ◆ Official Master's Degree in Physical Activity and Sport at INEFC Barcelona, Universidad de Barcelona
- ◆ Graduate in Physical Activity and Sport Sciences from INEFC of Barcelona
- ◆ Postgraduate Certificate in Physiotherapy from the Blanquerna University School of Nursing and Physiotherapy (Ramon Llull University)
- ◆ Physiotherapist on staff at the CEM Marítim (Thalassotherapy center) of the Claror Foundation
- ◆ Coordinator of the "Aquatic Physiotherapy-UFAE" working group of the College of Physiotherapists of Catalonia
- ◆ Lecturer at the School of Health Sciences Tecnocampus Mataró-Maresme Foundation (Pompeu Fabra University)

Professors

Dr Ochoa, Zara

- ◆ Physiotherapist specializing in aquatic therapy
- ◆ Postgraduate in Preventive Psychomotor Intervention. University of Vic
- ◆ Diploma in Physiotherapy; Universidad de Vic
- ◆ Baccalaureate (health science); San Benito Ikastola
- ◆ E.S.O, San Benito Ikastola (Lazkao)

04

Structure and Content

The structure of the contents has been designed by the best professionals of the sector in Approach to Pediatric Patients in the Aquatic Environment, with a wide trajectory and recognized prestige in the profession, endorsed by the volume of cases reviewed, studied and diagnosed, and with a wide mastery of the new technologies applied to orthopedics.

“

This Postgraduate Certificate in Approach to Pediatric Patients in the Aquatic Environment contains the most complete and up-to-date scientific program on the market"

Module 1. Approach to the Pediatric Patient in the Aquatic Environment

- 1.1. Child Development
 - 1.1.1. Evolutionary Stages
- 1.2. Benefits of Aquatic Physiotherapy in Children
 - 1.2.1. Early Stimulation
- 1.3. In-Water Communication
 - 1.3.1. Verbal Communication
 - 1.3.2. Non-Verbal Communication
- 1.4. Fear of Water
 - 1.4.1. Familiarization with the Aquatic Environment
 - 1.4.2. Mastery of the Medium
- 1.5. The Family and the Aquatic Environment
 - 1.5.1. Integration of the Family Unit
- 1.6. Aquatic Game
 - 1.6.1. Classification
 - 1.6.2. Advantages of the Use of the Aquatic Game
- 1.7. The Motor Story
- 1.8. Indications for the Aquatic Physiotherapy Session
 - 1.8.1. General Recommendations for Starting Aquatic Physical Therapy
- 1.9. Session Structure
 - 1.9.1. Parts of the Session
 - 1.9.2. Work Objectives
- 1.10. Water as a Sensory Medium

“

*This will be a key step to
advance your career”*

05

Methodology

This academic program offers students a different way of learning. Our methodology uses a cyclical learning approach: **Relearning**.

This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the **New England Journal of Medicine** have considered it to be one of the most effective.

“ Discover Relearning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization”

At TECH we use the Case Method

What should a professional do in a given situation? Throughout the program, students will face multiple simulated clinical cases, based on real patients, in which they will have to do research, establish hypotheses, and ultimately resolve the situation. There is an abundance of scientific evidence on the effectiveness of the method. Physiotherapists/kinesiologists learn better, faster, and more sustainably over time.

With TECH you will experience a way of learning that is shaking the foundations of traditional universities around the world.

According to Dr. Gérvas, the clinical case is the annotated presentation of a patient, or group of patients, which becomes a "case", an example or model that illustrates some peculiar clinical component, either because of its teaching power or because of its uniqueness or rarity. It is essential that the case is based on current professional life, trying to recreate the real conditions of professional physiotherapy practice.

“

Did you know that this method was developed in 1912, at Harvard, for law students? The case method consisted of presenting students with real-life, complex situations for them to make decisions and justify their decisions on how to solve them. In 1924, Harvard adopted it as a standard teaching method”

The effectiveness of the method is justified by four fundamental achievements:

1. Physiotherapists/kinesiologists who follow this method not only grasp concepts, but also develop their mental capacity, by evaluating real situations and applying their knowledge.
2. The learning process has a clear focus on practical skills that allow the physiotherapist/kinesiologist to better integrate into the real world.
3. Ideas and concepts are understood more efficiently, given that the example situations are based on real-life.
4. Students like to feel that the effort they put into their studies is worthwhile. This then translates into a greater interest in learning and more time dedicated to working on the course.

Relearning Methodology

At TECH we enhance the case method with the best 100% online teaching methodology available: Relearning.

This university is the first in the world to combine the study of clinical cases with a 100% online learning system based on repetition, combining a minimum of 8 different elements in each lesson, a real revolution with respect to the mere study and analysis of cases.

The physiotherapist/kinesiologist will learn through real cases and by solving complex situations in simulated learning environments. These simulations are developed using state-of-the-art software to facilitate immersive learning.

At the forefront of world teaching, the Relearning method has managed to improve the overall satisfaction levels of professionals who complete their studies, with respect to the quality indicators of the best online university (Columbia University).

With this methodology we trained more than 65,000 physiotherapists/kinesiologists with unprecedented success in all clinical specialties, regardless of the workload. Our pedagogical methodology is developed in a highly competitive environment, with a university student body with a strong socioeconomic profile and an average age of 43.5 years old.

Relearning will allow you to learn with less effort and better performance, involving you more in your training, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation for success.

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

The overall score obtained by our learning system is 8.01, according to the highest international standards.

This program offers the best educational material, prepared with professionals in mind:

Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is really specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

Physiotherapy Techniques and Procedures on Video

TECH brings students closer to the latest techniques, the latest educational advances and to the forefront of current Physiotherapy techniques and procedures. All of this in direct contact with students and explained in detail so as to aid their assimilation and understanding. And best of all, you can watch them as many times as you want.

Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This unique multimedia content presentation training system was awarded by Microsoft as a "European Success Story".

Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

Expert-Led Case Studies and Case Analysis

Effective learning ought to be contextual. Therefore, TECH presents real cases in which the expert will guide students, focusing on and solving the different situations: a clear and direct way to achieve the highest degree of understanding.

Testing & Retesting

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises, so that they can see how they are achieving their goals.

Classes

There is scientific evidence on the usefulness of learning by observing experts. The system known as Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

Quick Action Guides

TECH offers the most relevant contents of the course in the form of worksheets or quick action guides. A synthetic, practical, and effective way to help students progress in their learning.

06

Certificate

The Postgraduate Certificate in Approach to Pediatric Patients in the Aquatic Environment guarantees students, in addition to the most rigorous and up-to-date education, access to a Postgraduate Certificate issued by TECH Technological University.

“

Successfully complete this program and receive your university qualification without having to travel or fill out laborious paperwork”

This **Postgraduate Certificate in Approach to Pediatric Patients in the Aquatic Environment** contains the most complete and up-to-date scientific program on the market.

After the student has passed the assessments, they will receive their corresponding **Postgraduate Certificate** issued by **TECH Technological University** via tracked delivery*.

The certificate issued by **TECH Technological University** will reflect the qualification obtained in the **Postgraduate Certificate**, and meets the requirements commonly demanded by labor exchanges, competitive examinations and professional career evaluation committees.

Title: **Postgraduate Certificate in Approach to Pediatric Patients in the Aquatic Environment**

Official N° of hours: **150 h.**

Endorsed by the NBA

*Apostille Convention. In the event that the student wishes to have their paper certificate issued with an apostille, TECH EDUCATION will make the necessary arrangements to obtain it, at an additional cost.
