01

Introduction

Thousands of years ago, in the times of the Chinese and Egyptian civilizations, there were already rules regulating sports activities. With the advent of the modern Olympic Games at the end of the 19th century, federations began to be built and competitions began to be held that required regulation to ensure the safety and fairness of the game. For this reason, sports law was created as a set of legal rules that regulate all activities carried out by a natural person or sports entity. In this sense, physiotherapists who wish to take their careers a step further must be aware of these types of regulations to ensure the proper performance of the organization they preside over.

“

Learn in a simulated environment the management and legal aspects derived from the organization of sports events”

Sport has become a multifaceted, multidisciplinary and transversal phenomenon, which requires a series of regulations at all levels. This becomes even more acute with the advent of the modern era, where the development of an event as important as the Olympic Games must have the same rules to facilitate the understanding of the participants and the fairness of the results.

For this reason, a program focused on introducing students to Sports Law has been developed. In this way, the professional who wishes to be in charge of a sports institution will have a perfect understanding of the regulations of these entities and the legal aspects related to the organization of a sports event.

Furthermore, it is a 100% online Postgraduate Certificate that provides students with comfortable study and ease, wherever and whenever they want it. All you need is a device with internet access to take your career one step further. A modality according to the current times with all the guarantees to position the engineer in a highly demanded sector.

This **Postgraduate Certificate in Introduction to Sports Law** contains the most complete and up-to-date scientific program on the market. The most important features of the program include:

- ♦ The development of numerous practical case studies presented by specialists in Introduction to Sports Law
- ♦ The graphic, schematic and practical contents of the course are designed to provide all the essential information required for professional practice
- ♦ Exercises where the self-assessment process can be carried out to improve learning.
- ♦ Algorithm-based interactive learning system for decision-making
- ♦ Special emphasis on innovative methodologies in personal training
- ♦ Theoretical lessons, questions to the expert, debate forums on controversial topics, and individual reflection assignments
- ♦ Content that is accessible from any fixed or portable device with an Internet connection

Take your career to another level and become a sports manager who knows the legal standards of the facility over which you preside"

“

This Postgraduate Certificate will become an essential tool for professionals who want to achieve success in the world of sports performance”

The program’s teaching staff includes professionals from the sector who contribute their work experience to this program, as well as renowned specialists from leading societies and prestigious universities.

The multimedia content, developed with the latest educational technology, will provide the professional with situated and contextual learning, i.e., a simulated environment that will provide immersive training programmed to train in real situations.

This program is designed around Problem-Based Learning, whereby the professional must try to solve the different professional practice situations that arise throughout the program. For this purpose, the student will be assisted by an innovative interactive video system created by renowned and experienced experts.

The most up-to-date academic program, taught by extraordinary teachers experienced in the world of sports and academia.

Enhance your leadership skills within a sports organization.

02 Objectives

The program of this Postgraduate Certificate in Introduction to Sports Law has been developed to meet a series of general and specific objectives that will help students achieve their professional goals. Accordingly, the student will learn all the details that are indispensable to become a successful sports manager, understanding in turn the rules related to these organizations. In this way, academic excellence is guaranteed, which is essential to comply with the professional profile required by the different Sports Entities at an international level.

“

Count on a program that will allow you to enhance your professional profile by enabling you to understand sports regulations”

General Objectives

- Provide knowledge about the environment and the sports market
- Train professionals prepared to work in the sports industry
- Become a successful sports manager
- Train managers, leaders and future administrators of sports entities
- Gain knowledge about the global market, with practical experiences of the professionals who are part of the faculty

04

Structure and Content

In order to develop the maximum capabilities of the professionals, a program with a dynamic, didactic and up-to-date structure has been designed to meet a series of demands at the labor level. With each class, the student will understand the regulations related to sports facilities, as well as legal aspects involving civil and criminal liability. In this way, future graduates will have the confidence of having all the knowledge that will allow them to perform well in their professional environment.

“

The program of this Postgraduate Certificate will not only help you in the management of a sports center, but it will also give you the confidence you need to make important decisions"

Module 1. Introduction to Sports Law and Management

- 1.1. The Sports Environment
 - 1.1.1. Historical Background of Sports Law
- 1.2. Regulations Related with Sports Facilities
- 1.3. Sports Contracts: Outline of the Sports Contractual Structure
- 1.4. Sports Intermediation
- 1.5. Governance in Sports Entities

“

It is your moment to stand out in a labor field that demands excellence from its professionals every day"

05 Methodology

This academic program offers students a different way of learning. Our methodology uses a cyclical learning approach: **Relearning**.

This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the **New England Journal of Medicine** have considered it to be one of the most effective.

“

Discover Relearning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization"

At TECH we use the Case Method

What should a professional do in a given situation? Throughout the program, students will face multiple simulated clinical cases, based on real patients, in which they will have to do research, establish hypotheses, and ultimately resolve the situation. There is an abundance of scientific evidence on the effectiveness of the method. Physiotherapists/kinesiologists learn better, faster, and more sustainably over time.

With TECH you will experience a way of learning that is shaking the foundations of traditional universities around the world.

According to Dr. Gérvas, the clinical case is the annotated presentation of a patient, or group of patients, which becomes a "case", an example or model that illustrates some peculiar clinical component, either because of its teaching power or because of its uniqueness or rarity. It is essential that the case is based on current professional life, trying to recreate the real conditions of professional physiotherapy practice.

“

Did you know that this method was developed in 1912, at Harvard, for law students? The case method consisted of presenting students with real-life, complex situations for them to make decisions and justify their decisions on how to solve them. In 1924, Harvard adopted it as a standard teaching method”

The effectiveness of the method is justified by four fundamental achievements:

1. Physiotherapists/kinesiologists who follow this method not only grasp concepts, but also develop their mental capacity, by evaluating real situations and applying their knowledge.
2. The learning process has a clear focus on practical skills that allow the physiotherapist/kinesiologist to better integrate into the real world.
3. Ideas and concepts are understood more efficiently, given that the example situations are based on real-life.
4. Students like to feel that the effort they put into their studies is worthwhile. This then translates into a greater interest in learning and more time dedicated to working on the course.

Relearning Methodology

At TECH we enhance the case method with the best 100% online teaching methodology available: Relearning.

This university is the first in the world to combine the study of clinical cases with a 100% online learning system based on repetition, combining a minimum of 8 different elements in each lesson, a real revolution with respect to the mere study and analysis of cases.

The physiotherapist/kinesiologist will learn through real cases and by solving complex situations in simulated learning environments. These simulations are developed using state-of-the-art software to facilitate immersive learning.

At the forefront of world teaching, the Relearning method has managed to improve the overall satisfaction levels of professionals who complete their studies, with respect to the quality indicators of the best online university (Columbia University).

With this methodology we trained more than 65,000 physiotherapists/kinesiologists with unprecedented success in all clinical specialties, regardless of the workload. Our pedagogical methodology is developed in a highly competitive environment, with a university student body with a strong socioeconomic profile and an average age of 43.5 years old.

Relearning will allow you to learn with less effort and better performance, involving you more in your training, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation for success.

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

The overall score obtained by our learning system is 8.01, according to the highest international standards.

This program offers the best educational material, prepared with professionals in mind:

Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is really specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

Physiotherapy Techniques and Procedures on Video

TECH brings students closer to the latest techniques, the latest educational advances and to the forefront of current Physiotherapy techniques and procedures. All of this in direct contact with students and explained in detail so as to aid their assimilation and understanding. And best of all, you can watch them as many times as you want.

Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This unique multimedia content presentation training system was awarded by Microsoft as a "European Success Story".

Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

Expert-Led Case Studies and Case Analysis

Effective learning ought to be contextual. Therefore, TECH presents real cases in which the expert will guide students, focusing on and solving the different situations: a clear and direct way to achieve the highest degree of understanding.

Testing & Retesting

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises, so that they can see how they are achieving their goals.

Classes

There is scientific evidence on the usefulness of learning by observing experts. The system known as Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

Quick Action Guides

TECH offers the most relevant contents of the course in the form of worksheets or quick action guides. A synthetic, practical, and effective way to help students progress in their learning.

06 Certificate

The Postgraduate Certificate in Introduction to Sports Law guarantees students, in addition to the most rigorous and up-to-date education, access to a Postgraduate Certificate issued by TECH Technological University.

“

Successfully complete this program and receive your university qualification without having to travel or fill out laborious paperwork"

This **Postgraduate Certificate in Introduction to Sports Law** contains the most complete and up-to-date scientific program on the market.

After the student has passed the assessments, they will receive their corresponding **Postgraduate Certificate** issued by **TECH Technological University** via tracked delivery*.

The certificate issued by TECH Technological University will reflect the qualification obtained in the Postgraduate Certificate, and meets the requirements commonly demanded by labor exchanges, competitive examinations and professional career evaluation committees.
