01

Introduction

Pediatric neurodegenerative diseases are rare. However, they cause gradual deterioration that can lead to irreversible damage to the brain and, therefore, to the loss of motor functions. In these cases, the performance of the physiotherapist is essential to improve the quality of life of these children. As a result, TECH wants to offer them the best and most comprehensive academic program.

“

TECH offers you the most up-to-date information on Neurological Physiotherapy in Pediatric Neurodegenerative Diseases”

The objective of this TECH Postgraduate Certificate in Neurological Physiotherapy in Pediatric Neurodegenerative Diseases is to offer exceptional education to professionals in this field, so that they acquire advanced training that allows them to obtain professional success, achieving a substantial improvement in the health of children with neurodegenerative diseases

In this Postgraduate Certificate, the student will acquire the ability to assess neurodevelopment from ontogenesis. To this end, the necessary tools will be provided to detect symptoms and, as a result, make an early diagnosis. This way, the child will be assessed specifically and the physiotherapist will be taught how to set short-term goals and, therefore, develop a treatment plan based on scientific evidence. As a result, the student will be updated on the latest advances in research in detection and treatment. Additionally, the support of new technologies in the treatment is particularly interesting and will be analyzed in detail

The teaching staff of this Postgraduate Certificate is composed of specialists in the areas of intervention of each pathology, from prestigious health centers and universities, sensitized to continuous quality learning based on scientific evidence to offer a holistic approach to the patient with neurodegenerative disease, and committed to quality teaching through new educational technologies. Learning is done through real cases, guided by an expert, and continuous evaluation through assessment and self-assessment activities and exercises

In short, TECH has set out to create contents of the highest teaching and educational quality that will turn students into successful professionals, following the highest quality standards in teaching at an international level. Therefore, TECH presents this program with comprehensive content that will help them become elite neurological physiotherapists

This **Postgraduate Certificate in Neurological Physiotherapy in Pediatric Neurodegenerative Diseases** contains the most complete and up-to-date scientific program on the market. The most important features include:

- ◆ Practical case studies presented by specialists in Neurological Physiotherapy
- ◆ The graphic, schematic and practical contents of the course are designed to provide all the essential information required for professional practice
- ◆ Exercises where the self-assessment process can be carried out to improve learning
- ◆ Algorithm-based interactive learning system for decision-making
- ◆ Special emphasis on innovative methodologies in Neurological Physiotherapy
- ◆ Theoretical lessons, questions to the expert, debate forums on controversial topics, and individual reflection assignments
- ◆ Content that is accessible from any fixed or portable device with an Internet connection

Immerse yourself in the study of this high-level Postgraduate Certificate and improve your skills in therapies for people with degenerative diseases"

“

This Postgraduate Certificate is the best investment you can make in the selection of a refresher program for two reasons: in addition to updating your knowledge in Neurological Physiotherapy, you will obtain a qualification from one of the leading online universities in the world: TECH”

It includes, in its teaching staff, professionals belonging to the field of physiotherapy, who pour into this program the experience of their work, in addition to recognized specialists of reference societies and prestigious universities.

The multimedia content, developed with the latest educational technology, will provide the professional with situated and contextual learning, i.e., a simulated environment that will provide an immersive training program designed to train in real situations.

This program is designed around Problem-Based Learning, whereby the physiotherapist must try to solve the different professional practice situations that arise throughout the program. For this purpose, the professional will be assisted by an innovative interactive video system created by renowned and experienced experts in Neurological Physiotherapy in Pediatric Neurodegenerative Diseases.

This Postgraduate Certificate allows training in simulated environments, which provide immersive learning programmed to train for real situations.

A 100% online program will allow you to balance your studies with your professional work while increasing your knowledge in this field.

02 Objectives

The main objective of this program is to provide theoretical and practical learning, so that the physiotherapist can master neurological rehabilitation for people with degenerative diseases in a way that is both practical and rigorous.

“

*Our goal is to achieve academic excellence
and help you achieve professional success.
Don't hesitate any longer and join us”*

General Objectives

- ◆ Acquire new knowledge in neuroscience applied to neurodegenerative diseases
- ◆ Promote a critical attitude that favors clinical practice based on the most recent scientific evidence and clinical reasoning
- ◆ Motivate physiotherapists to specialize in the field of neurological physiotherapy
- ◆ Develop comprehensive treatment plans

“

Specific learning in Neurological Physiotherapy will allow great advances in people with degenerative diseases”

Specific Objectives

- ◆ Assess the prognosis for recovery from neurological damage as a function of age by means of a normative neurodevelopment review
- ◆ Assess pediatric age for its specific and age-specific characteristics
- ◆ Develop the different specific approach models for pediatric physiotherapy
- ◆ Gain in-depth understanding of the implication of the educational and family environment in child rehabilitation

03

Course Management

The teaching staff, experts in neurological physiotherapy, have extensive prestige in the field and are professionals with years of teaching experience who have come together to help you give your profession a boost. To this end, they have developed this program with recent updates in the field that will allow you to train and increase your skills in this sector.

“ Learn from the best professionals and become a successful professional yourself”

Management

Mr. Pérez Redondo, José María

- ♦ Physiotherapist specialized in Neurology and Neurosurgery in acute and critical patients
- ♦ Degree in Physiotherapy from the European University of Madrid
- ♦ Diploma in Physiotherapy from the School of Physiotherapy, Podiatry and Nursing at the Complutense University of Madrid
- ♦ 5 levels of the Postgraduate Specialization Course in Osteopathic Manual Physical Therapy, organized by the Department of Human Anatomy and Embryology, Faculty of Medicine, University of Alcalá de Henares
- ♦ Course on Radiology and Imaging Techniques for Physiotherapists and Occupational Therapists, organized by Fuenlabrada Hospital
- ♦ Neurodynamic Mobilization Course for Physiotherapists, organized by Fuenlabrada Hospital
- ♦ Course on Functional Re-education in Parkinson's Disease, organized by the Federation of Health and Social and Health Sectors of Comisiones Obreras
- ♦ President of the Scientific Committee for the II National Conference on Myofascial Pain and Dry Needling

Professors

Ms. Casanueva Pérez, Carolina

- ◆ Physiotherapist in the Neonatology and Pediatrics Unit in Hospitalization, and physiotherapist in the pediatric area at the San Carlos Clinical Hospital. Since 2005
- ◆ Physiotherapist. UCM.
- ◆ CO in Osteopathy EOM
- ◆ Expert Certificate in Sport Physiotherapy UCM.
- ◆ Expert Certificate in Advanced Manual Therapy UCM.
- ◆ Expert Certificate in Neurological Physiotherapy UCM.
- ◆ Co-author of physical therapy protocols HCSC

04

Structure and Content

The structure of the contents has been designed by a team of professionals knowledgeable about the implications of training in daily practice, aware of the relevance of the current importance of quality education in the field of neurological physiotherapy, and committed to quality teaching through new educational technologies.

“

We have the most complete and up-to-date scientific program in the market. We want to offer you the best learning"

Module 1. Neurodegenerative Diseases in Childhood

- 1.1. Introduction
 - 1.1.1. Classification
 - 1.1.2. Epidemiology
- 1.2. Neurodevelopment
 - 1.2.1. Pediatric
 - 1.2.2. Infantile
- 1.3. Early Prevention and Detection
- 1.4. White Matter Diseases
- 1.5. Gray Matter Diseases
- 1.6. Other Progressive Neurological Diseases
- 1.7. Assessment
 - 1.7.1. Clinical Manifestations
 - 1.7.2. Neurological Examination
- 1.8. Physiotherapeutic Treatments
 - 1.8.1. Physiotherapeutic Interventions
 - 1.8.2. Support Products
- 1.9. Treatment
 - 1.9.1. Doctor
 - 1.9.2. Occupational Therapy, Speech Therapy and Neuropsychology
- 1.10. Readaptation
 - 1.10.1. Social Aspects
 - 1.10.2. Family Care

“

A unique, key, and decisive training experience to boost your professional development”

05

Methodology

This academic program offers students a different way of learning. Our methodology uses a cyclical learning approach: **Relearning**.

This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the **New England Journal of Medicine** have considered it to be one of the most effective.

“

Discover Relearning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization"

At TECH we use the Case Method

What should a professional do in a given situation? Throughout the program, students will face multiple simulated clinical cases, based on real patients, in which they will have to do research, establish hypotheses, and ultimately resolve the situation. There is an abundance of scientific evidence on the effectiveness of the method. Physiotherapists/kinesiologists learn better, faster, and more sustainably over time.

With TECH you will experience a way of learning that is shaking the foundations of traditional universities around the world.

According to Dr. Gérvas, the clinical case is the annotated presentation of a patient, or group of patients, which becomes a "case", an example or model that illustrates some peculiar clinical component, either because of its teaching power or because of its uniqueness or rarity. It is essential that the case is based on current professional life, trying to recreate the real conditions of professional physiotherapy practice.

“

Did you know that this method was developed in 1912, at Harvard, for law students? The case method consisted of presenting students with real-life, complex situations for them to make decisions and justify their decisions on how to solve them. In 1924, Harvard adopted it as a standard teaching method”

The effectiveness of the method is justified by four fundamental achievements:

1. Physiotherapists/kinesiologists who follow this method not only grasp concepts, but also develop their mental capacity, by evaluating real situations and applying their knowledge.
2. The learning process has a clear focus on practical skills that allow the physiotherapist/kinesiologist to better integrate into the real world.
3. Ideas and concepts are understood more efficiently, given that the example situations are based on real-life.
4. Students like to feel that the effort they put into their studies is worthwhile. This then translates into a greater interest in learning and more time dedicated to working on the course.

Relearning Methodology

At TECH we enhance the case method with the best 100% online teaching methodology available: Relearning.

This university is the first in the world to combine the study of clinical cases with a 100% online learning system based on repetition, combining a minimum of 8 different elements in each lesson, a real revolution with respect to the mere study and analysis of cases.

The physiotherapist/kinesiologist will learn through real cases and by solving complex situations in simulated learning environments. These simulations are developed using state-of-the-art software to facilitate immersive learning.

At the forefront of world teaching, the Relearning method has managed to improve the overall satisfaction levels of professionals who complete their studies, with respect to the quality indicators of the best online university (Columbia University).

With this methodology we trained more than 65,000 physiotherapists/kinesiologists with unprecedented success in all clinical specialties, regardless of the workload. Our pedagogical methodology is developed in a highly competitive environment, with a university student body with a strong socioeconomic profile and an average age of 43.5 years old.

Relearning will allow you to learn with less effort and better performance, involving you more in your training, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation for success.

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

The overall score obtained by our learning system is 8.01, according to the highest international standards.

This program offers the best educational material, prepared with professionals in mind:

Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is really specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

Physiotherapy Techniques and Procedures on Video

TECH brings students closer to the latest techniques, the latest educational advances and to the forefront of current Physiotherapy techniques and procedures. All of this in direct contact with students and explained in detail so as to aid their assimilation and understanding. And best of all, you can watch them as many times as you want.

Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This unique multimedia content presentation training system was awarded by Microsoft as a "European Success Story".

Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

Expert-Led Case Studies and Case Analysis

Effective learning ought to be contextual. Therefore, TECH presents real cases in which the expert will guide students, focusing on and solving the different situations: a clear and direct way to achieve the highest degree of understanding.

Testing & Retesting

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises, so that they can see how they are achieving their goals.

Classes

There is scientific evidence on the usefulness of learning by observing experts. The system known as Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

Quick Action Guides

TECH offers the most relevant contents of the course in the form of worksheets or quick action guides. A synthetic, practical, and effective way to help students progress in their learning.

06 Certificate

The Postgraduate Certificate in Neurological Physiotherapy in Pediatric Neurodegenerative Diseases guarantees students, in addition to the most rigorous and up-to-date education, access to a Postgraduate Certificate issued by TECH Technological University.

“

Successfully complete this program and receive your university qualification without having to travel or fill out laborious paperwork"

This **Postgraduate Certificate in Pediatric Neurodegenerative Diseases** contains the most complete and up-to-date scientific program on the market.

After the student has passed the assessments, they will receive their corresponding **Postgraduate Certificate** issued by **TECH Technological University** via tracked delivery*.

The certificate issued by **TECH Technological University** will reflect the qualification obtained in the Postgraduate Certificate, and meets the requirements commonly demanded by labor exchanges, competitive examinations and professional career evaluation committees.

Title: **Postgraduate Certificate in Neurological Physiotherapy in Pediatric Neurodegenerative Diseases**

Official N° of Hours: **150 h.**

*Apostille Convention. In the event that the student wishes to have their paper certificate issued with an apostille, TECH EDUCATION will make the necessary arrangements to obtain it, at an additional cost.
