tech 06 | Introduction

Physiotherapists working in neurological rehabilitation should specialize in the treatment of Neurodegenerative Diseases in order to help affected individuals improve symptoms, relieve pain, improve functional capacity, slow down the disabling process of the disease, and stimulate independence and physical functions, as physiotherapy has proven to be effective in alleviating the consequences of neurodegenerative diseases.

Thanks to this academic program, students will learn about degenerative nerve diseases, so that they will be able to identify the different symptoms and syndromes according to the affacted region. As a result, they will learn to identify the clinical manifestations that will help them to understand their implications for the patient and for the therapeutic approach. Likewise, they will acquire the ability to assess neurodevelopment from ontogenesis and will be given the tools required to detect warning signs and, as a result, be able to make an early diagnosis, with special emphasis on the care of children.

Additionally, nervous system neoplasms and tumors will be studied in a specific way, teaching the professional how to identify symptoms according to the affected areas. This way, treatment will be programmed according to both the clinical stage and the variety of clinical manifestations detected: acquired brain damage, spinal cord injury, peripheral neuropathies, etc.

In short, TECH Global University has set out to create contents of the highest teaching and educational quality that will turn students into successful professionals, following the highest quality standards in teaching at an international level. For this reason, TECH Global University presents this program with comprehensive content that will help you become a leading neurological physiotherapist.

This **Postgraduate Diploma in Neurodegenerative Diseases, in Childhood and Tumors** contains the most complete and up-to-date scientific program on the market. The most important features include:

- Practical case studies presented by specialists in Neurological Physiotherapy
- The graphic, schematic and practical contents of the course are designed to provide all the essential information required for professional practice.
- Exercises where the self-assessment process can be carried out to improve learning.
- * Algorithm-based interactive learning system for decisionmaking.
- * Special emphasis on innovative methodologies in Neurological Physiotherapy
- Theoretical lessons, questions to the expert, debate forums on controversial topics, and individual reflection assignments
- Content that is accessible from any fixed or portable device with an Internet connection

Immerse yourself in the study of this high-level Postgraduate Diploma and improve your skills in therapies for people with degenerative diseases"

This Postgraduate Diploma is the best investment you can make when selecting of a refresher program for two reasons: in addition to updating your knowledge in Neurological Physiotherapy, you will obtain a qualification from one of the leading online universities in the world: TECH Global University"

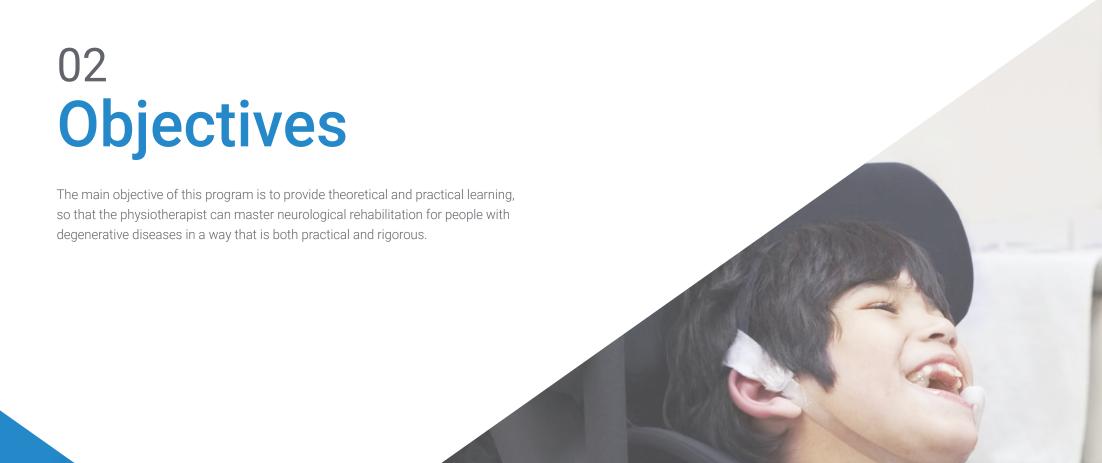

Its teaching staff includes professionals belonging to the field of physiotherapy, who bring to this teaching the experience of their work, in addition to recognized specialists from leading societies and prestigious universities.

Its multimedia content, developed with the latest educational technology, will provide the professional with situated and contextual learning, i.e. a simulated environment that will provide an immersive education programmed to train in real situations.

The design of this program focuses on Problem-Based Learning, whereby the physiotherapist must try to solve the different professional practice situations that arise throughout program. For this purpose, the professional will be assisted by an innovative interactive video system created by renowned and experienced experts in Neurological Physiotherapy in Neurodegenerative Diseases, in Childhood and Tumors.

This Postgraduate Diploma offers training in simulated environments, which provides an immersive learning experience designed to train for real-life situations.

This 100% online Postgraduate Diploma will allow you to balance your studies with your professional work while increasing your knowledge in this field.

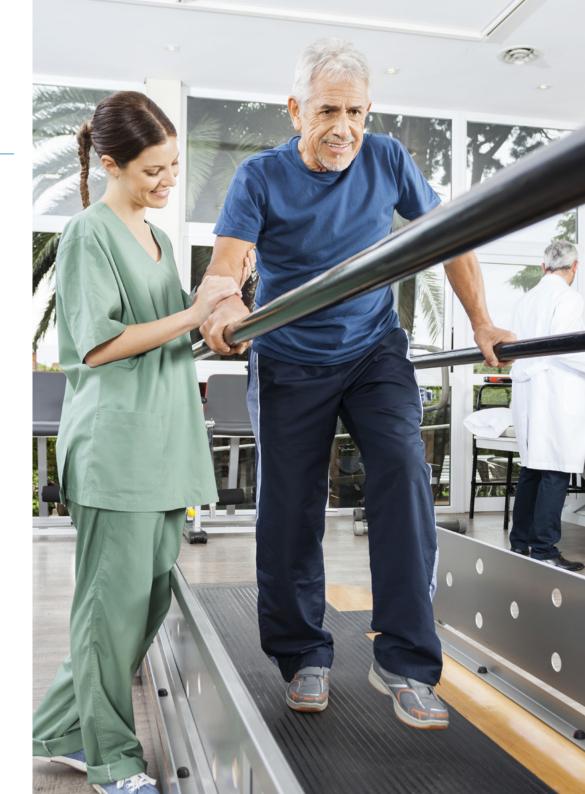

tech 10 | Objectives

General Objectives

- Acquire new knowledge in neuroscience applied to neurodegenerative diseases
- Promote a critical attitude that favors clinical practice based on the most recent scientific evidence and clinical reasoning
- Motivate physiotherapists to specialize in the field of neurological physiotherapy
- Provide comprehensive treatment plans

Specific Objectives

Module 1. Introduction to Neurodegenerative Diseases

- Gain in-depth knowledge of the major neurodegenerative diseases and syndromes and their characteristics
- Apply patient examination and assessment through clinical cases
- Analyze the scales and assessment tests through a systematic review
- Acquire in-depth knowledge of the different methods and concepts used by neurological physiotherapists
- Gain a deep understanding of the different therapeutic tools used by other professionals on the team
- * Study the writing model for physiotherapy reports and their correct drafting

Module 2. Neurodegenerative Diseases in Childhood

- Assess the prognosis for recovery from neurological damage as a function of age by means of a normative neurodevelopment review
- Assess pediatric age for its specific and age-specific characteristics
- Develop the different specific approach models for pediatric physiotherapy
- Gain in-depth understanding of the implication of the educational and family environment in child rehabilitation

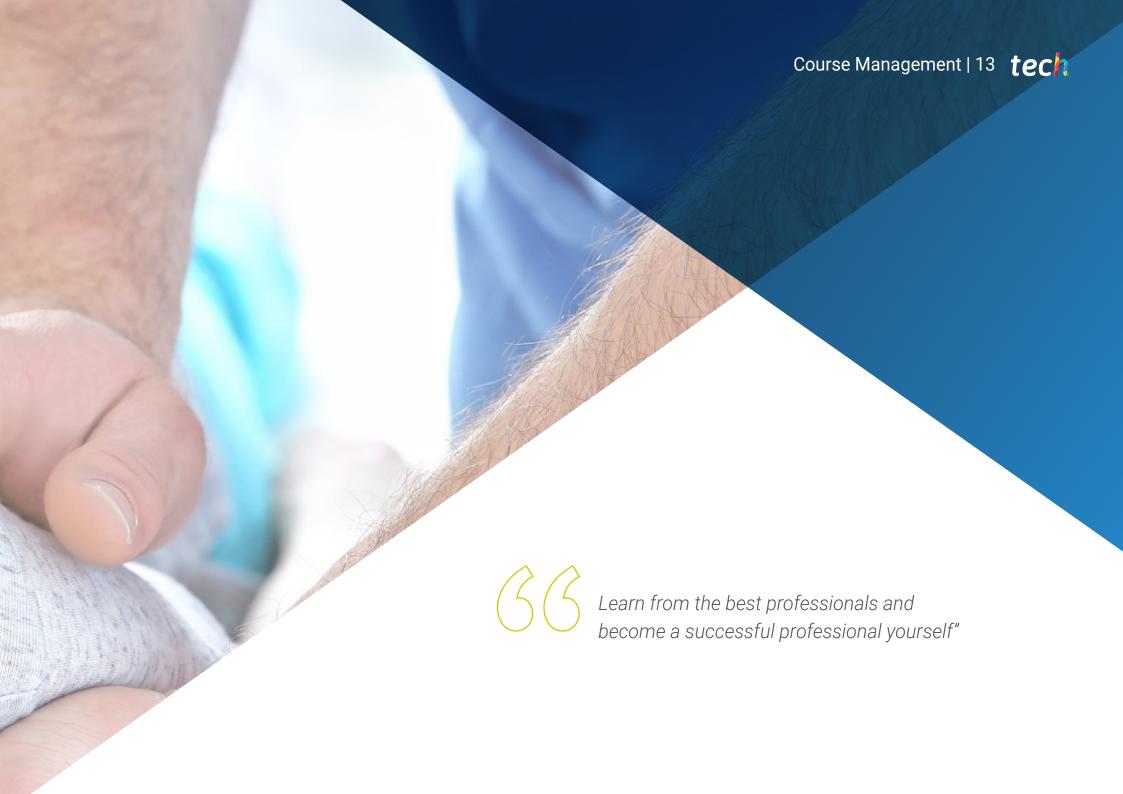

Module 3. Neoplasms or Nervous System Tumors

- Delve into the anatomical and functional bases of the nervous system involved in affected areas
- Detect the different symptoms and clinical manifestations
- Associate and discern other pathologies previously studied: clinical manifestations, diagnostic imaging, examination, treatment, etc
- Detect pain and discover the different ways to approach it
- Specialize physiotherapists in applying physiotherapy techniques adapted to the therapeutic possibilities (radiotherapy, chemotherapy, surgery) and to the specific injuries detected (motor, sensory, cognitive sequelae)

Specific training in Neurological Physiotherapy will allow great advances in people with degenerative diseases"

tech 14 | Course Management

Management

Mr. Pérez Redondo, José María

- · Physiotherapeut im klinischen Krankenhaus San Carlos
- · Betreuer im Bereich Rehabilitation im Hospital de la Fuenfría
- · Betreuer im Bereich Rehabilitation im Krankenhaus Fuenlabrada
- Beauftragter für Rehabilitation im Universitätskrankenhaus Puerta de Hierro
- · Ausschuss für Schlaganfall am Universitätskrankenhaus Puerta de Hierro-Majadahonda
- · Brusttumorausschuss am Universitätskrankenhaus von Fuenlabrada
- · Mitbegründer der Physiotherapiepraxis Pérez y Silveria Fisioterapeutas
- · Lehrbeauftragter an der Universität Complutense von Madrid
- · Spezialist für Neurologie und Neurochirurgie bei akuten und kritischen Patienten
- Hochschulabschluss in Physiotherapie an der Europäischen Universität von Madrid Masterstudiengang in fortgeschrittener manueller Therapie an der Universität Complutense von Madrid
- · Diplom in Physiotherapie an der Schule für Physiotherapie, Podologie und Krankenpflege an der Universität Complutense von Madrid

Professors

Dr. Palacios Sandra

- Physiotherapeutin am Provinzialen Rehabilitationsinstitut des Allgemeinen Universitätskrankenhauses Gregorio Marañón
- * Spezialistin für Neuro und Form: Neurologische Rehabilitation des erwachsenen Patienten
- Promotion in Gesundheit, Behinderung, Abhängigkeit und Wohlfahrt an der Universität von León
- * Hochschulabschluss in Physiotherapie an der Universität von León
- Masterstudiengang in neurologischer Physiotherapie für den erwachsenen Patienten an der Europäischen Universität von Madrid
- Fortgeschrittenenkurs über das Bobath-Konzept, Erkennung und Behandlung von Erwachsenen mit neurologischen Störungen

Ms. Casanueva Pérez, Carolina

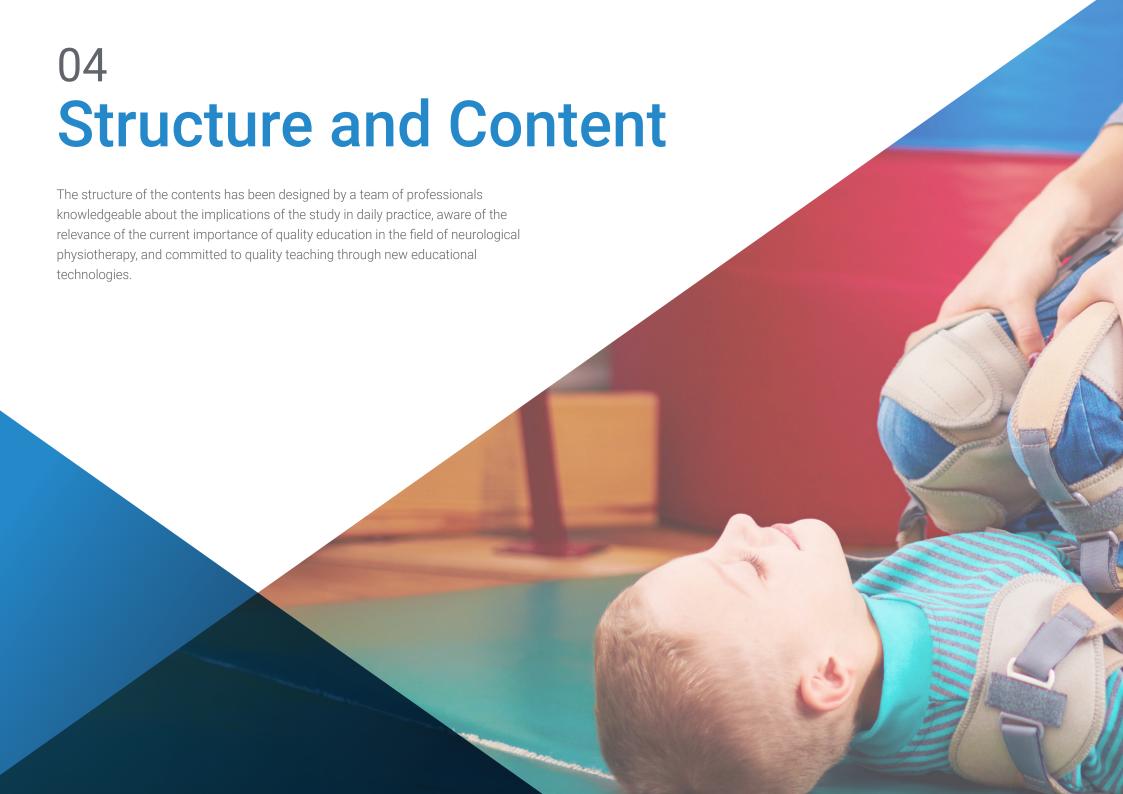

- Physiotherapeutin in der Abteilung für Neonatologie und Pädiatrie im Krankenhaus und Pädiatrische Bereichsphysiotherapeutin des Klinischen Krankenhauses San Carlos
- Mitverfasserin von Physiotherapieprotokollen im Klinischen Krankenhaus San Carlos
- Neurologische Physiotherapeutin im Zentrum für Behinderte
- Physiotherapeutin an der UCM
- Zertifikat in Osteopathie von der EOM
- Universitätsexperte in Sportphysiotherapie an der UCM
- Universitätsexperte in Fortgeschrittene Manuelle Therapie an der UCM
- Universitätsexperte in Neurologische Physiotherapie an der UCM

Course Management | 15 tech

Ms. Hermida Rama, Josefa

- * Physiotherapeutin in der Rehabilitationsabteilung des Krankenhauses San Carlos
- * Assoziierte Dozentin für klinische Praktika an der Fakultät für Krankenpflege, Physiotherapie und Podologie
- Hochschulabschluss in Physiotherapie an der Fakultät für Krankenpflege, Physiotherapie und Podologie der UCM
- Expertin für neurologische Physiotherapie. E.U. Krankenpflege, Physiotherapie und Podologie an der UCM
- Fortgeschrittener Grundkurs für die Wiederherstellung der Funktion von Arm und Hand bei erwachsenen Neurologiepatienten nach dem Bobath-Konzept

tech 18 | Structure and Content

Module 1. Introduction to Neurodegenerative Diseases

- 1.1. Introduction
 - 1.1.1. Definition
 - 1.1.2. Classification
 - 1.1.3. Epidemiology
- 1.2. Clinical/Symptoms
 - 1.2.1. Symptoms
 - 1.2.2. Signs
- 1.3. Diagnostic Imaging
 - 1.3.1. Structural
 - 1.3.2. Functional Criteria
- 1.4. Neurological Assessment Scales
- 1.5. Neurological Examination
 - 1.5.1. Cranial Nerves, Pathological Reflexes
 - 1.5.2. Tone, Sensitivity, Osteotendinous Reflexes
 - 1.5.3. Manipulation, Coordination, Balance and Gait
- 1.6. Digital Physiotherapy and Reporting
 - 1.6.1. Telephysiotherapy
 - 1.6.2. Scheduled Consultation via ICT
 - 1.6.3. Writing a Physiotherapy Report
 - 1.6.4. Interpretation of Medical Information
- 1.7. Multidisciplinary Team
 - 1.7.1. Doctor
 - 1.7.2. Occupational Therapist
 - 1.7.3. Speech therapist
 - 1.7.4. Neuropsychologist
 - 1.7.5. Orthopedic Technician
- 1.8. Physiotherapy Approach
 - 1.8.1. Movement Facilitation Techniques
 - 1.8.2. Neurodynamics
 - 1.8.3. Hydrotherapy
 - 1.8.4. Therapeutic Exercise
 - 1.8.5. Robotics and Virtual Reality

- 1.9. Patient Complications
 - 1.9.1. Pain
 - 1.9.2. Cardio-Respiratory System
 - 1.9.3. Musculoskeletal Complications
- 1.10. Patient, Caregiver and Family Information and Counseling

Module 2. Neurodegenerative Diseases in Childhood

- 2.1. Introduction
 - 2.1.1. Classification
 - 2.1.2. Epidemiology
- 2.2. Neurodevelopment
 - 2.2.1. Emergencies
 - 2.2.2. Infantile
- 2.3. Early Prevention and Detection
- 2.4. White Matter Diseases
- 2.5. Gray Matter Diseases
- 2.6. Other Progressive Neurological Diseases
- 2.7. Assessment
 - 2.7.1. Clinical manifestations
 - 2.7.2. Neurological Examination
- 2.8. Physiotherapeutic Treatments
 - 2.8.1. Physiotherapeutic Interventions
 - 2.8.2. Support Products
- 2.9. Treatment
 - 2.9.1. Doctor
 - 2.9.2. Occupational Therapy, Speech Therapy and Neuropsychology
- 2.10. Readaptation
 - 2.10.1. Social Aspects
 - 2.10.2. Family Care

Structure and Content | 19 tech

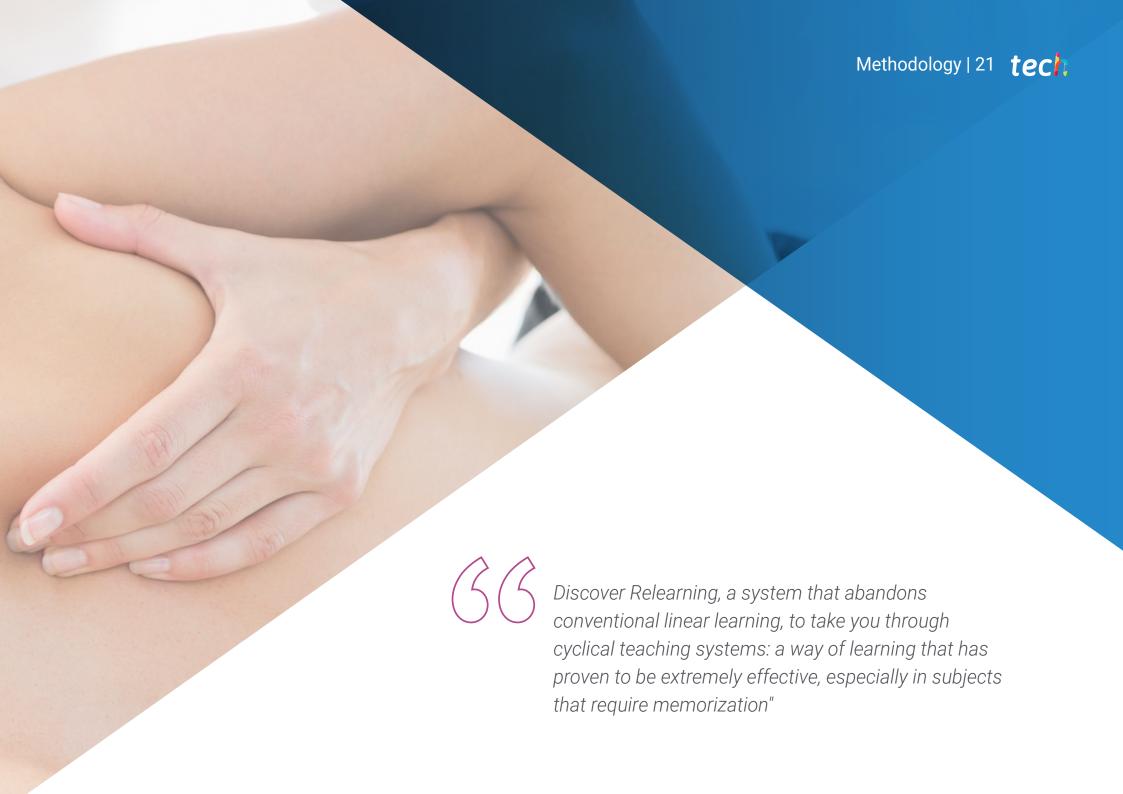

Module 3. Neoplasms or Nervous System Tumors

- 3.1. Introduction
 - 3.1.1. Anatomy
 - 3.1.2. Physiology
 - 3.1.3. Classification
- 3.2. Epidemiology
- 3.3. Etiology
 - 3.3.1. Transmission Mode
 - 3.3.2. Frequency
 - 3.3.3. Age of Onset
- 3.4. Evolution
- 3.5. Prognostic Factors
- 3.6. Evaluation/Diagnosis
 - 3.6.1. Clinical Manifestations
 - 3.6.2. Diagnostic Imaging
 - 3.6.3. Neurological Examination
 - 3.6.4. Neurological Assessment Scales
- 3.7. Treatment
 - 3.7.1. Medical-surgical Treatments
 - 3.7.2. Physiotherapy
 - 3.7.3. Occupational Therapy, Speech Therapy and Neuropsychology
- 3.8. Orthopedics
 - 3.8.1. Support Products
 - 3.8.2. Orthoses
- 3.9. Readaptation
 - 3.9.1. Social Aspects/Support
 - 3.9.2. Comprehensive Care for Patients, Families and Caregivers
- 3.10. Early Prevention and Detection

This academic program offers students a different way of learning. Our methodology uses a cyclical learning approach: **Relearning.**

This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the **New England Journal of Medicine** have considered it to be one of the most effective.

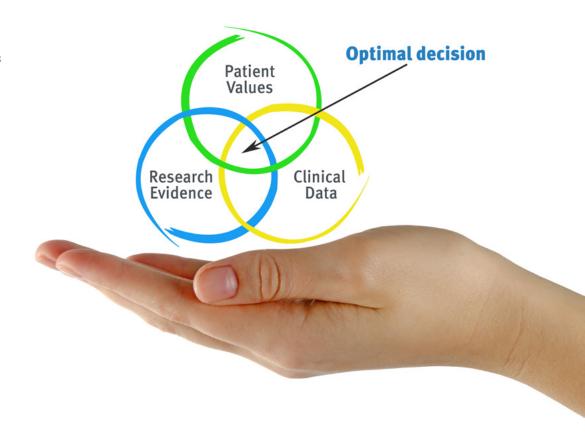

tech 22 | Methodology

At TECH we use the Case Method

What should a professional do in a given situation? Throughout the program, students will face multiple simulated clinical cases, based on real patients, in which they will have to do research, establish hypotheses, and ultimately resolve the situation. There is an abundance of scientific evidence on the effectiveness of the method. Physiotherapists/kinesiologists learn better, faster, and more sustainably over time.

With TECH you will experience a way of learning that is shaking the foundations of traditional universities around the world.

According to Dr. Gérvas, the clinical case is the annotated presentation of a patient, or group of patients, which becomes a "case", an example or model that illustrates some peculiar clinical component, either because of its teaching power or because of its uniqueness or rarity. It is essential that the case is based on current professional life, trying to recreate the real conditions of professional physiotherapy practice.

Did you know that this method was developed in 1912, at Harvard, for law students? The case method consisted of presenting students with real-life, complex situations for them to make decisions and justify their decisions on how to solve them. In 1924, Harvard adopted it as a standard teaching method"

The effectiveness of the method is justified by four fundamental achievements:

- 1. Physiotherapists/kinesiologists who follow this method not only grasp concepts, but also develop their mental capacity, by evaluating real situations and applying their knowledge.
- 2. The learning process has a clear focus on practical skills that allow the physiotherapist/kinesiologist to better integrate into the real world.
- 3. Ideas and concepts are understood more efficiently, given that the example situations are based on real-life.
- **4.** Students like to feel that the effort they put into their studies is worthwhile. This then translates into a greater interest in learning and more time dedicated to working on the course.

Relearning Methodology

At TECH we enhance the case method with the best 100% online teaching methodology available: Relearning.

This university is the first in the world to combine the study of clinical cases with a 100% online learning system based on repetition, combining a minimum of 8 different elements in each lesson, a real revolution with respect to the mere study and analysis of cases.

The physiotherapist/kinesiologist will learn through real cases and by solving complex situations in simulated learning environments. These simulations are developed using state-of-the-art software to facilitate immersive learning.

Methodology | 25 tech

At the forefront of world teaching, the Relearning method has managed to improve the overall satisfaction levels of professionals who complete their studies, with respect to the quality indicators of the best online university (Columbia University).

With this methodology we trained more than 65,000 physiotherapists/kinesiologists with unprecedented success in all clinical specialties, regardless of the workload. Our pedagogical methodology is developed in a highly competitive environment, with a university student body with a strong socioeconomic profile and an average age of 43.5 years old.

Relearning will allow you to learn with less effort and better performance, involving you more in your training, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation for success.

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

The overall score obtained by our learning system is 8.01, according to the highest international standards.

tech 26 | Methodology

This program offers the best educational material, prepared with professionals in mind:

Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is really specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

Physiotherapy Techniques and Procedures on Video

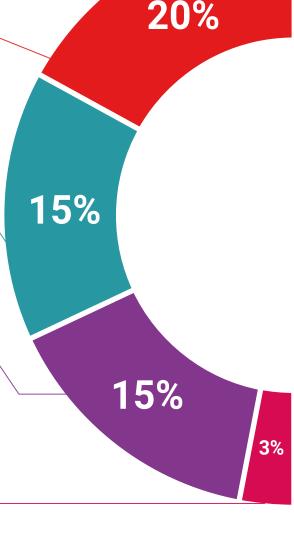

TECH brings students closer to the latest techniques, the latest educational advances and to the forefront of current Physiotherapy techniques and procedures. All of this in direct contact with students and explained in detail so as to aid their assimilation and understanding. And best of all, you can watch them as many times as you want.

Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This unique multimedia content presentation training system was awarded by Microsoft as a "European Success Story".

Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

Effective learning ought to be contextual. Therefore, TECH presents real cases in which the expert will guide students, focusing on and solving the different situations: a clear and direct way to achieve the highest degree of understanding.

Testing & Retesting

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises, so that they can see how they are achieving their goals.

Classes

There is scientific evidence on the usefulness of learning by observing experts.

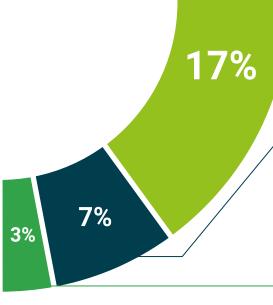

The system known as Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

Quick Action Guides

TECH offers the most relevant contents of the course in the form of worksheets or quick action guides. A synthetic, practical, and effective way to help students progress in their learning.

20%

tech 30 | Certificate

This private qualification will allow you to obtain a **Postgraduate Diploma in Neurological Physiotherapy in Neurodegenerative Diseases, in Childhood and Tumors** endorsed by **TECH Global University**, the world's largest online university.

TECH Global University is an official European University publicly recognized by the Government of Andorra (*official bulletin*). Andorra is part of the European Higher Education Area (EHEA) since 2003. The EHEA is an initiative promoted by the European Union that aims to organize the international training framework and harmonize the higher education systems of the member countries of this space. The project promotes common values, the implementation of collaborative tools and strengthening its quality assurance mechanisms to enhance collaboration and mobility among students, researchers and academics.

This **TECH Global University** private qualification is a European program of continuing education and professional updating that guarantees the acquisition of competencies in its area of knowledge, providing a high curricular value to the student who completes the program.

Title: Postgraduate Diploma in Neurological Physiotherapy in Neurodegenerative Diseases, in Childhood and Tumors

Modality: online

Duration: 6 months

Accreditation: 18 ECTS

This is a private qualification of \$40 hours of duration equivalent to 18 ECTS, with a start date of dd/mm/yyyy and an end date of dd/mm/yyyy.

TECH Global University is a university officially recognized by the Government of Andorra on the 31st of January of 2024, which belongs to the European Higher Education Area (EHEA).

In Andorra la Vella, on the 28th of February of 2024
