01

Introduction

Specialize in the Prescription, Methodology and Bases for Strength Training in the physiotherapeutic field, from the hand of prestigious experts in the field with vast experience in the sector, who have deposited all their knowledge in the thorough and detailed development of this program of high scientific rigor.

A unique opportunity to specialize in a high-demand professional field.

A photograph showing a person in a white lab coat, likely a healthcare professional, examining a patient's back. The patient is lying down, and the professional's hands are visible, touching the patient's skin. The image is partially obscured by a large blue diagonal graphic element.

“

This Postgraduate Diploma 100% online and will enable you to combine your studies while increasing your knowledge in this field”

Strength training for athletes is a fundamental element in the prevention and treatment of chronic non-communicable diseases. Clinical training supervised by a physiotherapist decreases muscle weakness and injury risk, as it is an effective method to increase muscle mass and strength.

Any strength training process must necessarily be accompanied by a periodized strategy of neuromuscular assessment, which allows us to provide objective data about the subject's response, as well as the proposed method for achieving our goals.

One of the usual objectives when starting a physical training routine in physiotherapy is to work on or recover muscle strength. To this end, this workout should include progressive resistance exercises, in order to achieve optimal physical fitness and prevent injuries. In this Postgraduate Diploma the student will deepen in the Prescription, Methodology and Bases of Strength Training for Physiotherapists.

Students of this Postgraduate Diploma will have a differentiating qualification with respect to their professional colleagues, being able to work in all areas of sport as a specialist in Strength Training in the field of physiotherapy.

Each subject has real specialists in the field to provide the best theoretical training and all their extensive practical experience which makes this Postgraduate Diploma unique.

Thus, at TECH we have set out to create contents of the highest teaching and educational quality that will turn our students into successful professionals, following the highest quality standards in teaching at an international level. Therefore, we offer you this Postgraduate Diploma with extensive content that will help you reach the elite in physiotherapy. In addition, as it is an online Postgraduate Diploma, the student is not conditioned by fixed schedules or the need to move to another physical location, but can access the contents at any time of the day, balancing their work or personal life with their academic life.

This **Postgraduate Diploma in Prescription, Methodology and Bases for Strength Training** contains the most complete and up-to-date scientific program on the market. The most important features include:

- ♦ The development of numerous case studies presented by specialists in personal training
- ♦ The graphic, schematic and practical contents of the course are designed to provide all the essential information required for professional practice
- ♦ Exercises where the self-assessment process can be carried out to improve learning
- ♦ Algorithm-based interactive learning system for decision-making
- ♦ Special emphasis on innovative methodologies in physiotherapy
- ♦ Theoretical lessons, questions to the expert, debate forums on controversial topics, and individual reflection assignments
- ♦ Content that is accessible from any fixed or portable device with an Internet connection

Immerse yourself in the study of this Postgraduate Diploma of high scientific rigor and improve your skills in strength training for high performance sports"

“

This Postgraduate Diploma is the best investment you can make when selecting a refresher program, for two reasons: in addition to updating your knowledge as a personal trainer, you will obtain a certificate from TECH”

Its teaching staff includes professionals who contribute their work experience to this educational program, as well as renowned specialists from leading societies and prestigious universities.

The multimedia content, developed with the latest educational technology, will provide the professional with situated and contextual learning, i.e., a simulated environment that will provide immersive training programmed to train in real situations.

This program is designed around Problem-Based Learning, whereby the professional must try to solve the different professional practice situations that arise throughout the program. For this purpose, the professional will be assisted by an innovative interactive video system created by renowned experts in the subject.

Specialize and stand out in a sector with high demand for professionals”

Increase your knowledge in Prescription, Methodology and Basis for Strength Training with this high-level training”

02 Objectives

The main objective of this program is the development of theoretical and practical learning, so that the physiotherapist can master in a practical and rigorous way the Prescription, Methodology and Bases for Strength Training.

“

Our goal is to achieve academic excellence and help you achieve professional success. Don't hesitate any longer and join us”

General Objectives

- ♦ Delve into the knowledge based on the most current scientific evidence with full applicability in the practical field of strength training
- ♦ Master all the most advanced methods of strength training
- ♦ Apply with certainty the most current training methods to improve sports performance regarding strength
- ♦ Effectively master strength training for performance enhancement in time and mark sports as well as situational sports
- ♦ Master the principles governing exercise physiology, as well as biochemistry
- ♦ Delve into the principles that govern the Theory of Complex Dynamic Systems as they relate to strength training
- ♦ Successfully integrate strength training for the improvement of motor skills immersed in sport
- ♦ Successfully master all the knowledge acquired in the different modules in real practice

The Postgraduate Diploma allows training in simulated environments, which provide immersive learning programmed to train in real situations”

Specific Objectives

Module 1. Strength Training Prescription and Planning

- ◆ Specialize and interpret the key aspects of strength training
- ◆ In-depth knowledge of the different components of the load
- ◆ Delve into key aspects of load planning, periodization and monitoring
- ◆ Gain in-depth knowledge of the different session set-up schemes
- ◆ Manage the most common prescribing, monitoring and adjustment models

Module 2. Strength Training Methodology

- ◆ Gain in-depth knowledge of the different methodological proposals of strength training and their applicability to the field of practice
- ◆ Select the most appropriate methods for specific needs
- ◆ Recognize and safely apply the different methods proposed in the literature

Module 3. Theory of Strength Training and Basis for Structural Training

- ◆ Master the theoretical terms as far as strength training is concerned
- ◆ Master the theoretical terms as far as power training is concerned
- ◆ Master the methodological aspects of training for hypertrophic purposes
- ◆ Master the Physiological aspects of training for hypertrophic purposes

03

Course Management

Our teaching team has a wide prestige in the sector and are professionals with years of teaching experience who have joined forces to help you give a boost to your profession. For this reason, they have developed this Postgraduate Diploma with recent updates on the subject that will allow you to train and increase your skills in the field.

“

Learn from the best professionals and become a successful professional yourself”

Management

Dr. Rubina, Dardo

- CEO of Test and Training
- EDM Physical Training Coordinator
- Physical trainer of the EDM First Team
- Master's Degree in (ARD) COE
- EXOS CERTIFICATION
- Specialist in Strength Training for the Prevention of Injuries, Functional and Physical-Sports Rehabilitation
- Specialist in Strength Training Applied to Physical and Sports Performance
- Specialist in Applied Biomechanics and Functional Evaluation
- Certification in Weight Management and Physical Performance Technologies
- Postgraduate course in Physical Activity in Populations with Pathologies
- Postgraduate diploma in Injury Prevention and Rehabilitation
- Functional Assessment and Corrective Exercise Certificate
- Certificate in Functional Neurology
- Diploma in Advanced Studies (DEA) University of Castilla la Mancha
- PhD Candidate in (ARD)

Professors

Mr. Carbone, Leandro

- ♦ Degree in Physical Education
- ♦ Specialist in exercise physiology
- ♦ Msc Strength and Conditioning
- ♦ CSCS–NASCA, CISSN–ISSN
- ♦ Currently at Club The Strongest
- ♦ Collaborator with Olympic athletes

Mr. Masse, Juan

- ♦ Director of the Athlon Science Study Group
- ♦ Physical trainer for several professional soccer teams in South America, experienced teacher

04

Structure and Content

The structure of the contents has been designed by a team of professionals knowledgeable about the implications of training in daily practice, aware of the relevance of quality education in the field of physiotherapy; and committed to quality teaching through new educational technologies.

“

We have the most complete and up-to-date scientific program on the market. We want to provide you with the best program”

Module 1. Strength Training Prescription and Planning

- 1.1. Introduction and Definition of Concepts
 - 1.1.1. General Concepts
 - 1.1.1.1. Planning, Periodization, Prescription
 - 1.1.1.2. Qualities, Methods, Objectives
 - 1.1.1.3. Complexity, Risk and Uncertainty
 - 1.1.1.4. Complementary Pairs
- 1.2. Exercises
 - 1.2.1. General vs. Specific
 - 1.2.2. Simple vs. Complex
 - 1.2.3. Thrust vs. Ballistic
 - 1.2.4. Kinetics and Kinematics
 - 1.2.5. Basic Patterns
 - 1.2.6. Order, Emphasis and Importance
- 1.3. Variables in the Programming
 - 1.3.1. Intensity
 - 1.3.2. Effort
 - 1.3.3. Intension
 - 1.3.4. Volume
 - 1.3.5. Density
 - 1.3.6. Weight
 - 1.3.7. Dose
- 1.4. Periodization Structure
 - 1.4.1. Microcycle
 - 1.4.2. Mesocycle
 - 1.4.3. Macrocycle
 - 1.4.4. Olympic Cycles
- 1.5. Structure of the Sessions
 - 1.5.1. Hemispheres
 - 1.5.2. Entries
 - 1.5.3. Weider
 - 1.5.4. Patterns
 - 1.5.5. Muscle

- 1.6. Prescription
 - 1.6.1. Load-Effort Tables
 - 1.6.2. Based on %
 - 1.6.3. Based on Subjective Variables
 - 1.6.4. Based on Speed (VBT)
 - 1.6.5. Others
- 1.7. Prediction and Monitoring
 - 1.7.1. Speed-Based Training
 - 1.7.2. Areas of Repetition
 - 1.7.3. Load Areas
 - 1.7.4. Time and Reps
- 1.8. Plan
 - 1.8.1. Series– Repetition Schemes
 - 1.8.1.1. Plateau
 - 1.8.1.2. Step
 - 1.8.1.3. Waves
 - 1.8.1.4. Steps
 - 1.8.1.5. Pyramids
 - 1.8.1.6. *Light-Heavy*
 - 1.8.1.7. *Cluster*
 - 1.8.1.8. *Rest-Pause*
 - 1.8.2. Vertical Planning
 - 1.8.3. Horizontal Planning
 - 1.8.4. Classifications and Models
 - 1.8.4.1. Constant
 - 1.8.4.2. Lineal
 - 1.8.4.3. Reverse Linear
 - 1.8.4.4. Blocks
 - 1.8.4.5. Accumulation
 - 1.8.4.6. Undulating
 - 1.8.4.7. Reverse Undulating
 - 1.8.4.8. Volume-Intensity

- 1.9. Adaptation
 - 1.9.1. Dose-Response Model
 - 1.9.2. Robust-Optimal
 - 1.9.3. Fitness-Fatigue
 - 1.9.4. Micro Doses
- 1.10. Assessments and Adjustments
 - 1.10.1. Self-Regulated Load
 - 1.10.2. Adjustments Based on VBT
 - 1.10.3. Based on RIR and RPE
 - 1.10.4. Based on Percentages
 - 1.10.5. Negative Pathway

Module 2. Strength Training Methodology

- 2.1. Methods of Training From *Powerlifting*
 - 2.1.2. Functional Isometrics
 - 2.1.3. Forced Repetitions
 - 2.1.4. Eccentrics in Competition Exercises
 - 2.1.5. Main Characteristics of the Most Commonly Used Methods in *Powerlifting*
- 2.2. Methods of Training from Weightlifting
 - 2.2.1. Bulgarian Method
 - 2.2.2. Russian Method
 - 2.2.3. Origin of the Popular Methodologies in the School of Olympic Lifting
 - 2.2.4. Differences Between the Bulgarian and Russian Concepts
- 2.3. Zatsiorsky's Methods
 - 2.3.1. Maximum Effort Method (ME)
 - 2.3.2. Repeated Effort Method (RE)
 - 2.3.3. Dynamic Effort Method (DE)
 - 2.3.4. Load Components and Main Features of the Zatsiorsky Methods
 - 2.3.5. Interpretation and Differences of Mechanical Variables (Force, Power and Speed) Revealed Between ME, RE and DE and Their Internal Response (PSE)

- 2.4. Pyramidal Methods
 - 2.4.1. Classic Ascending
 - 2.4.2. Classic Descending
 - 2.4.3. Double
 - 2.4.4. Skewed Pyramid
 - 2.4.5. Truncated Pyramid
 - 2.4.6. Flat or Stable Pyramid
 - 2.4.7. Load Components (Volume and Intensity) of the Different Proposals of the Pyramidal Method
- 2.5. Training Methods From Bodybuilding
 - 2.5.1. Superseries
 - 2.5.2. Triseries
 - 2.5.3. Compound Series
 - 2.5.4. Giant Series
 - 2.5.5. Congestive Series
 - 2.5.6. *Wave-Like Loading*
 - 2.5.7. *ACT (Anti-Catabolic Training)*
 - 2.5.8. *Bulk*
 - 2.5.9. *Cluster*
 - 2.5.10. 10x10 Satziorsky
 - 2.5.11. *Heavy Duty*
 - 2.5.12. Ladder
 - 2.5.13. Characteristics and Load Components of the Different Methodological Proposals of Training Systems Coming From Bodybuilding
- 2.6. Methods from Sports Training
 - 2.6.1. Plyometry
 - 2.6.2. *Circuit Training*
 - 2.6.3. *Cluster Training*
 - 2.6.4. Contrast
 - 2.6.5. Main Characteristics of Strength Training Methods Derived from Sports Training
- 2.7. Methods from Unconventional Training and *CrossFit*
 - 2.7.1. EMOM (Every Minute on the Minute)
 - 2.7.2. Tabata
 - 2.7.3. AMRAP (As Many Reps as Possible)
 - 2.7.4. *For Time*
 - 2.7.5. Main Characteristics of Strength Training Methods Derived *from CrossFit Training*
- 2.8. Speed-Based Training (VBT)
 - 2.8.1. Theoretical Foundation
 - 2.8.2. Practical Considerations
 - 2.8.3. Own Data
- 2.9. The Isometric Method
 - 2.9.1. Concepts and Physiological Fundamentals of Isometric Stresses
 - 2.9.2. Yuri Verkhoshanski Proposal
- 2.10. Methodology of *Repeat Power Ability (RPA)* From Alex Natera
 - 2.10.1. Theoretical Basis
 - 2.10.2. Practical Applications
 - 2.10.3. Published Data vs. Own Data
- 2.11. Training Methodology Proposed by Fran Bosch
 - 2.11.1. Theoretical Basis
 - 2.11.2. Practical Applications
 - 2.11.3. Published Data vs. Own Data
- 2.12. Cal Dietz and Matt Van Dyke's Three-Phase Methodology
 - 2.12.1. Theoretical Basis
 - 2.13.2. Practical Applications
- 2.13. New Trends in Quasi-Isometric Eccentric Training
 - 2.13.1. Neurophysiological Rationale and Analysis of Mechanical Responses Using Position Transducers and Force Platforms for Each Strength Training Approach

Module 3. Theory of Strength Training and Basis for Structural Training

- 3.1. Strength, its Conceptualization and Terminology
 - 3.1.1. Strength from Mechanics
 - 3.1.2. Strength from Physiology
 - 3.1.3. Concept of Strength Deficit
 - 3.1.4. Concept of Applied Strength
 - 3.1.5. Concept of Useful Strength
 - 3.1.6. Terminology of Strength Training
 - 3.1.6.1. Maximum Strength Training
 - 3.1.6.2. Explosive Strength
 - 3.1.6.3. Elastic Explosive Strength
 - 3.1.6.4. Reflective Elastic Explosive Strength
 - 3.1.6.5. Ballistic Strength
 - 3.1.6.6. Rapid Force
 - 3.1.6.7. Explosive Power
 - 3.1.6.8. Speed Strength
 - 3.1.6.9. Resistance Training
- 3.2. Concepts Connected to Power I
 - 3.2.1. Definition of Power
 - 3.2.1.1. Conceptual Aspects of Power
 - 3.2.1.2. Importance of Power in the Context of Sports Performance
 - 3.2.1.3. Clarification of Power-Related Terminology
 - 3.2.2. Factors Contributing to Peak Power Development
 - 3.2.3. Structural Aspects Conditioning Power Production
 - 3.2.3.1. Muscle Hypertrophy
 - 3.2.3.2. Muscle Structure
 - 3.2.3.3. Ratio of Fast and Slow Fibers in a Cross Section
 - 3.2.3.4. Muscle Length and its Effect on Muscle Contraction
 - 3.2.3.5. Quantity and Characteristics of Elastic Components
- 3.2.4. Neural Aspects Conditioning Power Production
 - 3.2.4.1. Action Potential
 - 3.2.4.2. Speed of Motor Unit Recruitment
 - 3.2.4.3. Muscle Coordination
 - 3.2.4.4. Intermuscular Coordination
 - 3.2.4.5. Previous Muscle Status (PAP)
 - 3.2.4.6. Neuromuscular Reflex Mechanisms and Their Incidence
- 3.3. Concepts Connected to Power II
 - 3.3.1. Theoretical Aspects for Understanding the Strength–Time Curve
 - 3.3.1.1. Strength Impulse
 - 3.3.1.2. Phases of the Strength–Time Curve
 - 3.3.1.3. Phases of Acceleration in the Strength–Time Curve
 - 3.3.1.4. Maximum Acceleration Area of the Strength–Time Curve
 - 3.3.1.5. Deceleration Phase of the Strength–Time Curve
 - 3.3.2. Theoretical Aspects for Understanding Power Curves
 - 3.3.2.1. Power–Time Curve
 - 3.3.2.2. Power–Displacement Curve
 - 3.3.2.3. Optimal Workload for Maximum Energy Development
- 3.4. Relating Concepts of Strength and their Connection to Sports Performance
 - 3.4.1. Objective of Strength Training
 - 3.4.2. Relationship of Power to the Training Cycle or Phase
 - 3.4.3. Connection of Maximum Force and Power
 - 3.4.4. Connection Between Power and the Improvement of Athletic Performance
 - 3.4.5. Connection Between Strength and Sports Performance
 - 3.4.6. Relationship between Strength and Speed
 - 3.4.7. Relationship between Strength and Jumps
 - 3.4.8. Relationship between Strength and Changes in Direction
 - 3.4.9. Relationship between Strength and Other Aspects of Sports Performance
 - 3.4.9.1. Maximum Strength and Its Effects on Training

- 3.5. Neuromuscular System (Hypertrophic Training)
 - 3.5.1. Structure and Function
 - 3.5.2. Motor Unit
 - 3.5.3. Sliding Theory
 - 3.5.4. Types of Fiber
 - 3.5.5. Types of Contraction
- 3.6. Neuromuscular System Responses and Adaptations (Hypertrophic Training)
 - 3.6.1. Nerve Impulse Adaptations
 - 3.6.2. Muscle Activation Adaptations
 - 3.6.3. Motor unit Synchronization Adaptations
 - 3.6.4. Adaptations in Antagonist Coactivation
 - 3.6.5. Adaptations in Doublets
 - 3.6.6. Muscle Preactivation
 - 3.6.7. Muscle *Stiffness*
 - 3.6.8. Reflexes
 - 3.6.9. Internal Models of Motor Engrams
 - 3.6.10. Muscle Tone
 - 3.6.11. Action Potential Speed
- 3.7. Hypertrophy
 - 3.7.1. Introduction
 - 3.7.1.1. Parallel and Serial Hypertrophy
 - 3.7.1.2. Sarcoplasmic Hypertrophy
 - 3.7.2. Satellite Cells
 - 3.7.3. Hyperplasia
- 3.8. Mechanisms that Induce Hypertrophy
 - 3.8.1. Hypertrophy-Inducing Mechanism: Mechanical Stress
 - 3.8.2. Hypertrophy-Inducing Mechanism: Metabolic Stress
 - 3.8.3. Hypertrophy-Inducing Mechanism: Muscle Damage

- 3.9. Variables for Hypertrophy Training Programming
 - 3.9.1. Volume
 - 3.9.2. Intensity
 - 3.9.3. Frequency (F)
 - 3.9.4. Weight
 - 3.9.5. Density
 - 3.9.6. Selecting Exercises
 - 3.9.7. Order in the Execution of Exercises
 - 3.9.8. Type of Muscle Action
 - 3.9.9. Duration of Rest Intervals
 - 3.9.10. Duration of Repetitions
 - 3.9.11. Range of Movement
- 3.10. Main Factors Affecting Hypertrophic Development at the Highest Level
 - 3.10.1. Genetics
 - 3.10.2. Age
 - 3.10.3. Sex
 - 3.10.4. Training Status

“

A unique, key, and decisive program to boost your professional development”

05 Methodology

This academic program offers students a different way of learning. Our methodology uses a cyclical learning approach: **Relearning**.

This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the **New England Journal of Medicine** have considered it to be one of the most effective.

“

Discover Relearning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization"

At TECH we use the Case Method

What should a professional do in a given situation? Throughout the program, students will face multiple simulated clinical cases, based on real patients, in which they will have to do research, establish hypotheses, and ultimately resolve the situation. There is an abundance of scientific evidence on the effectiveness of the method. Physiotherapists/kinesiologists learn better, faster, and more sustainably over time.

With TECH you will experience a way of learning that is shaking the foundations of traditional universities around the world.

According to Dr. Gervas, the clinical case is the annotated presentation of a patient, or group of patients, which becomes a "case", an example or model that illustrates some peculiar clinical component, either because of its teaching power or because of its uniqueness or rarity. It is essential that the case is based on current professional life, trying to recreate the real conditions of professional physiotherapy practice.

“

Did you know that this method was developed in 1912, at Harvard, for law students? The case method consisted of presenting students with real-life, complex situations for them to make decisions and justify their decisions on how to solve them. In 1924, Harvard adopted it as a standard teaching method”

The effectiveness of the method is justified by four fundamental achievements:

1. Physiotherapists/kinesiologists who follow this method not only grasp concepts, but also develop their mental capacity, by evaluating real situations and applying their knowledge.
2. The learning process has a clear focus on practical skills that allow the physiotherapist/kinesiologist to better integrate into the real world.
3. Ideas and concepts are understood more efficiently, given that the example situations are based on real-life.
4. Students like to feel that the effort they put into their studies is worthwhile. This then translates into a greater interest in learning and more time dedicated to working on the course.

Relearning Methodology

At TECH we enhance the case method with the best 100% online teaching methodology available: Relearning.

This university is the first in the world to combine the study of clinical cases with a 100% online learning system based on repetition, combining a minimum of 8 different elements in each lesson, a real revolution with respect to the mere study and analysis of cases.

The physiotherapist/kinesiologist will learn through real cases and by solving complex situations in simulated learning environments. These simulations are developed using state-of-the-art software to facilitate immersive learning.

At the forefront of world teaching, the Relearning method has managed to improve the overall satisfaction levels of professionals who complete their studies, with respect to the quality indicators of the best online university (Columbia University).

With this methodology we trained more than 65,000 physiotherapists/kinesiologists with unprecedented success in all clinical specialties, regardless of the workload. Our pedagogical methodology is developed in a highly competitive environment, with a university student body with a strong socioeconomic profile and an average age of 43.5 years old.

Relearning will allow you to learn with less effort and better performance, involving you more in your training, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation for success.

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

The overall score obtained by our learning system is 8.01, according to the highest international standards.

This program offers the best educational material, prepared with professionals in mind:

Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is really specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

Physiotherapy Techniques and Procedures on Video

TECH brings students closer to the latest techniques, the latest educational advances and to the forefront of current Physiotherapy techniques and procedures. All of this in direct contact with students and explained in detail so as to aid their assimilation and understanding. And best of all, you can watch them as many times as you want.

Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This unique multimedia content presentation training system was awarded by Microsoft as a "European Success Story".

Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

Expert-Led Case Studies and Case Analysis

Effective learning ought to be contextual. Therefore, TECH presents real cases in which the expert will guide students, focusing on and solving the different situations: a clear and direct way to achieve the highest degree of understanding.

Testing & Retesting

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises, so that they can see how they are achieving their goals.

Classes

There is scientific evidence on the usefulness of learning by observing experts. The system known as Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

Quick Action Guides

TECH offers the most relevant contents of the course in the form of worksheets or quick action guides. A synthetic, practical, and effective way to help students progress in their learning.

06

Certificate

This Postgraduate Diploma in Prescription, Methodology and Basis for Strength Training guarantees students, in addition to the most rigorous and up-to-date education, access to a Postgraduate Diploma issued by TECH Technological University.

“

Successfully complete this program and receive your university qualification without having to travel or fill out laborious paperwork”

This **Postgraduate Certificate in Prescription, Methodology and Bases for Strength Training** contains the most complete and up-to-date scientific program on the market.

After the student has passed the assessments, they will receive their corresponding **Postgraduate Certificate**, issued by **TECH Technological University** via tracked delivery*.

The certificate issued by TECH Technological University will reflect the qualification obtained in the Postgraduate Certificate, and meets the requirements commonly demanded by labor exchanges, competitive examinations, and professional career evaluation committees.

Title: **Postgraduate Certificate in Prescription, Methodology and Basis for Strength Training**

Official N° of Hours: **450 h.**

Endorsed by the NBA

*Apostille Convention. In the event that the student wishes to have their paper certificate issued with an apostille, TECH EDUCATION will make the necessary arrangements to obtain it, at an additional cost.
