Introduction

It is becoming increasingly common to find students who have completed their programs without having completed an internship. Consequently, today there are millions of professionals who are highly qualified, from an academic point of view, to perform their professional practice, but who encounter a lot of obstacles when they want to enter the labor market. For this reason, this institution considers it important to offer them the opportunity to improve their skills and abilities actively and hand in hand with professionals in the sector. Therefore, the idea of launching this program in which, during 120 hours, the student will work directly with experts with extensive experience in the management of clinical cases of children and adolescents with different psychological pathologies.

Through this professional practice, you will have access to psychotherapeutic environments with international prestige where the most updated tools and protocols for the evaluation and diagnosis of behavioral pathologies in children and adolescents are applied"

The different disciplines that make up the scientific and assistance branch of Clinical Child and Adolescent Psychology are in full expansion. This is due to the fact that this academic branch has more and more profound resources and techniques to determine behavioral and eating disorders in children and adolescents. These advances have made it possible for fewer and fewer pathologies to remain unidentified in the early stages of the disease and, at the same time, has facilitated the innovation of treatments and therapeutic intervention solutions for the most complex cases. In this context, the sector is calling for increasingly qualified experts who, from health care institutions, can put their knowledge to the benefit of the proper care of patients.

For this reason, TECH has designed this 100% practical academic program, where the student will develop various skills such as the correct execution of questionnaires and interviews as an assessment exercise of real cases. In this way, the graduate will have access to the possibility of acquiring a broad experience that will help them to perfect their skills in the practice of psychology. Additionally, they will be able to actively participate in daily consultations, getting to know closely how to deal with patients and expanding their knowledge of the most appropriate techniques and protocols in each case. In this way, you will be able to contextualize and expand your knowledge through your own professional development.

During the course of this Internship Program, the graduate will have the support of a tutor specialized in the area who will ensure that the practical experience is as enriching as possible for his career. At the end of the period, the specialist will be able to add this professional experience to their resume, which will act as a distinctive feature in any personnel selection process.

02

Why Study an Internship Program?

Clinical Child and Adolescent Psychology is a discipline that has grown considerably in a very short period of time. Intervention techniques and methodologies have evolved based on numerous scientific researches. The updating of this care sector requires experts with excellent practical training and, for this reason, TECH offers its students an innovative mode of study. During an intensive 3-week stay, the student will acquire the most sought-after skills in this area of work, under the specialized guidance of the most prestigious professionals.

This study program in Clinical Child and Adolescent Psychology will update your mastery of the main techniques for the evaluation and diagnosis of pathologies such as stress and ADHD in children and adolescents"

1. Updating from the latest technology available

Thanks to this study program, the student will be able to handle updated protocols for the evaluation and diagnosis of the psychopathological condition of children and adolescents. Additionally, they will apply the most innovative instruments and techniques to extract truthful information about the patient, their family and educational context.

2. Gaining In-Depth Knowledge from the Experience of Top Specialists

Throughout this Internship Program, the student will have a direct exchange with professionals of distinguished prestige. These specialists will help them to be updated on the most current work dynamics for this health care discipline. Therefore, upon completion of the program, the student will be prepared for different first level job positions.

3. Entering Top-notch psychotherapeutic environments

TECH maintains close ties with leading psychotherapeutic centers around the world. Particularly, it has coordinated this Internship Program with several prestigious institutions that have renowned specialists and apply the most up-to-date assessment protocols. Therefore, the student will have the opportunity to develop practical skills from the very first educational moment.

4. Putting the acquired knowledge into daily practice from the very first moment

The academic market does not offer enough pedagogical solutions for those specialists who wish to update their knowledge in Clinical Child and Adolescent Psychology in a practical way. For this reason, this 3-week on-site stay breaks with this scheme and, at the same time, makes it possible that students can combine their studies with other responsibilities or interests. or interests.

5. Expanding the Boundaries of Knowledge

This Internship Program can take your students beyond their usual academic comfort zone and confront them with international contexts of professional development. This is possible thanks to TECH, the world's largest online educational institution, extending to other geographical latitudes through a wide network of agreements.

You will have full practical immersion at the center of your choice"

06

General Conditions

Civil Liability Insurance

This institution's main concern is to guarantee the safety of the trainees and other collaborating agents involved in the internship process at the company. Among the measures dedicated to achieve this is the response to any incident that may occur during the entire teaching-learning process.

To this end, this entity commits to purchasing a civil liability insurance policy to cover any eventuality that may arise during the course of the internship at the center.

This liability policy for interns will have broad coverage and will be taken out prior to the start of the Internship Program period. That way professionals will not have to worry in case of having to face an unexpected situation and will be covered until the end of the internship program at the center.

General Conditions of the Internship Program

The general terms and conditions of the internship program agreement shall be as follows:

- 1. TUTOR:** During the Internship Program, students will be assigned with two tutors who will accompany them throughout the process, answering any doubts and questions that may arise. On the one hand, there will be a professional tutor belonging to the internship center who will have the purpose of guiding and supporting the student at all times. On the other hand, they will also be assigned with an academic tutor, whose mission will be to coordinate and help the students during the whole process, solving doubts and facilitating everything they may need. In this way, the student will be accompanied and will be able to discuss any doubts that may arise, both clinical and academic.
- 2. DURATION:** The internship program will have a duration of three continuous weeks, in 8-hour days, 5 days a week. The days of attendance and the schedule will be the responsibility of the center and the professional will be informed well in advance so that they can make the appropriate arrangements.
- 3. ABSENCE:** If the students does not show up on the start date of the Internship Program, they will lose the right to it, without the possibility of reimbursement or change of dates. Absence for more than two days from the internship, without justification or a medical reason, will result in the professional's withdrawal from the internship, therefore, automatic termination of the internship. Any problems that may arise during the course of the internship must be urgently reported to the academic tutor.
- 4. CERTIFICATION:** Professionals who pass the Internship Program will receive a certificate accrediting their stay at the center.
- 5. EMPLOYMENT RELATIONSHIP:** The Internship Program shall not constitute an employment relationship of any kind.
- 6. PRIOR EDUCATION:** Some centers may require a certificate of prior education for the Internship Program. In these cases, it will be necessary to submit it to the TECH internship department so that the assignment of the chosen center can be confirmed.
- 7. DOES NOT INCLUDE:** The Internship Program will not include any element not described in the present conditions. Therefore, it does not include accommodation, transportation to the city where the internship takes place, visas or any other items not listed. However, students may consult with their academic tutor for any questions or recommendations in this regard. The academic tutor will provide the student with all the necessary information to facilitate the procedures in any case.

07 Certificate

This **Hybrid Professional Master's Degree in Clinical Child and Adolescent Psychology** contains the most complete and up-to-date program on the professional and educational field.

After the student has passed the assessments, they will receive their corresponding Hybrid Professional Master's Degree diploma issued by TECH Technological University via tracked delivery*.
