Introduction

Emergency Psychology is a discipline that deals with the prevention of mental problems that may be caused by trauma. Therefore, the early psychological care provided by these psychologists contributes to minimize the possibilities of suffering from Anxiety and Depression disorders in people who are in this situation, ensuring in this way their quality of life. Therefore, professionals with broad and updated skills in this area are in great demand by health institutions to preserve the mental well-being of individuals. Consequently, TECH has created this program, which will offer you an internship program of 3 weeks in a prestigious medical center for you to acquire cutting-edge assessment and intervention techniques in these contexts.

“

Master the cutting-edge techniques of psychological intervention with people who have lost family members in an accident or natural disaster through this Internship Program"

Traumatic events can have a significant negative impact on people's Mental Health, leading to problems such as Post Traumatic Stress Disorder, Depression or Anxiety. In this line, the psychological care provided by professionals trained in Emergency Psychology is essential to help individuals recover emotionally after a delicate situation, such as a war, a natural disaster or an accident. Given the relevance of this figure to ensure the mental wellbeing of human beings, it is important to have the most updated and qualified experts in the field.

For this reason, TECH has opted to design this program, which will provide the student with the most advanced skills in the field of Emergency Psychology, in order to respond effectively to this professional demand. Throughout 120 hours, you will be integrated into an excellent work team within a high-level hospital center. Within this prestigious clinical environment, you will master the techniques to control stress in a high-risk context or manage intervention strategies with people who have been victims of a delicate situation. Likewise, he will be prepared to provide state-of-the-art care to individuals who have experienced the loss of a close family member.

During this internship, the student will be accompanied at all times by a specially selected tutor. This professional will be responsible for ensuring optimal learning, satisfactorily resolving any doubts that may arise during the clinical experience.

02

Why Study an Internship Program?

In many professional areas, practical experience is a decisive factor in achieving outstanding success. In the field of emergency psychology, it is not enough to have theoretical knowledge of the latest advances, but it is essential to know how to apply them in the work context. To address this need, TECH has designed this program, which gives students the opportunity to participate in a state-of-the-art clinical setting for 3 weeks. In this program, under the supervision of experts in the field, students will be able to acquire practical skills that will allow them to advance their career in the field of Mental Health.

This academic institution gives you the opportunity to enjoy an internship program of 3 weeks in a first level hospital center"

1. Updating from the latest technology available

In recent years, the field of Emergency Psychology has undergone an important evolution from assessment methods and intervention techniques with patients in critical situations. For this reason, TECH has created this Internship Program, with the goal of facilitating the acquisition of these cutting-edge skills.

2. Gaining In-Depth Knowledge from the Experience of Top Specialists

Through this program, students will have the opportunity to work in collaboration with a team of leading experts in the field of Emergency Psychology, who will provide them with an updated set of skills in this area. Additionally, each student will have a mentor who will offer personalized guidance.

3. Entering Top-notch Professional Environments

TECH applies a rigorous selection process to choose the centers where the Internship Program will take place, in order to ensure that students can update their knowledge in a first class clinical environment. In this way, they will have the opportunity to work with highly demanding teams of high professional quality.

4. Putting the acquired knowledge into daily practice from the very first moment

Nowadays, it is common to find educational programs that do not meet the daily needs of professionals, offering theoretical contents with no application in the real environment. For this reason, TECH has designed a program with an innovative pedagogical approach, focused on the completion of internships, allowing students to strengthen their skills in a high-level clinical environment.

5. Expanding the Boundaries of Knowledge

TECH offers its students the possibility of completing the Internship Program in renowned hospital centers, so that they can learn from experts from extensive experience in Emergency Psychology. This opportunity is exclusive to this educational institution and represents a unique experience for the students.

You will have full practical immersion at the center of your choice"

03

Objectives

The premise of the Internship Program in Emergency Psychology designed by TECH is to provide students with the most advanced and cutting-edge skills in the field. During the hospital stay, students will handle psychological first aid techniques, deepen in the prevention and management of stress in extreme situations or master the strategies of group therapy. The acquisition of these skills will be preserved by following these general and specific objectives.

General Conditions

Civil Liability Insurance

This institution's main concern is to guarantee the safety of the trainees and other collaborating agents involved in the internship process at the company. Among the measures dedicated to achieve this is the response to any incident that may occur during the entire teaching-learning process.

To this end, this entity commits to purchasing a civil liability insurance policy to cover any eventuality that may arise during the course of the internship at the center.

This liability policy for interns will have broad coverage and will be taken out prior to the start of the practical training period. That way professionals will not have to worry in case of having to face an unexpected situation and will be covered until the end of the internship program at the center.

General Conditions of the Internship Program

The general terms and conditions of the internship agreement for the program are as follows:

1. TUTOR: During the Internship Program, students will be assigned with two tutors who will accompany them throughout the process, answering any doubts and questions that may arise. On the one hand, there will be a professional tutor belonging to the internship center who will have the purpose of guiding and supporting the student at all times. On the other hand, they will also be assigned with an academic tutor, whose mission will be to coordinate and help the students during the whole process, solving doubts and facilitating everything they may need. In this way, the student will be accompanied and will be able to discuss any doubts that may arise, both clinical and academic.

2. DURATION: The internship program will have a duration of three continuous weeks, in 8-hour days, 5 days a week. The days of attendance and the schedule will be the responsibility of the center and the professional will be informed well in advance so that they can make the appropriate arrangements.

3. ABSENCE: If the students does not show up on the start date of the Internship Program, they will lose the right to it, without the possibility of reimbursement or change of dates. Absence for more than two days from the internship, without justification or a medical reason, will result in the professional's withdrawal from the internship, therefore, automatic termination of the internship. Any problems that may arise during the course of the internship must be urgently reported to the academic tutor.

4. CERTIFICATION: Professionals who pass the Internship Program will receive a certificate accrediting their stay at the center.

5. EMPLOYMENT RELATIONSHIP: The Internship Program shall not constitute an employment relationship of any kind.

6. PRIOR EDUCATION: Some centers may require a certificate of prior education for the Internship Program. In these cases, it will be necessary to submit it to the TECH internship department so that the assignment of the chosen center can be confirmed.

7. DOES NOT INCLUDE: The Internship Program will not include any element not described in the present conditions. Therefore, it does not include accommodation, transportation to the city where the internship takes place, visas or any other items not listed.

However, students may consult with their academic tutor for any questions or recommendations in this regard. The academic tutor will provide the student with all the necessary information to facilitate the procedures in any case.

07 Certificate

This **Internship Program in Emergency Psychology** contains the most complete and up-to-date program on the professional and academic scene.

After the student has passed the evaluations, they will receive their corresponding TECH Internship Program issued by TECH Technological University via tracked delivery.

The certificate issued by TECH will reflect the grade obtained in the test.
