Introduction

Occupational and Organizational Psychology has become a fundamental discipline in today's workplace, where companies seek to improve the efficiency, productivity and well-being of their employees. In that sense, this eminently practical program in Occupational and Organizational Psychology at TECH offers a unique opportunity to acquire up-to-date skills and knowledge in this field. During a 3-week internship in a recognized clinical center, participants will have the opportunity to work with tutors who are experts in the field, learn the latest techniques and theories, and apply them in real situations. So for those who want to excel in their career and improve the quality of life in the workplace, this is the ideal program.

“

Strengthen your CV with an Internship Program in Occupational and Organizational Psychology that will allow you to stand out in the job market”

Nowadays, Occupational and Organizational Psychology has become a fundamental discipline in the success of any company. This branch of psychology is in charge of studying human behavior in the workplace, ranging from personnel selection and assessment, to talent management and team building, as well as improving the work environment and conflict resolution.

Occupational and Organizational Psychology has evolved considerably in recent decades, with the incorporation of new techniques and technologies that allow a more effective and efficient intervention in the workplace. For example, the application of artificial intelligence and process automation allows for greater precision in personnel selection and talent management, while data analysis and the use of advanced statistical techniques allow for a more objective evaluation of employee performance.

TECH's Internship Program in Occupational and Organizational Psychology is a unique opportunity to acquire up-to-date skills and knowledge in this field. During a 3-week internship in a recognized clinical center, participants will have the opportunity to work with tutors who are experts in the field, learn the latest techniques and theories, and apply them in real situations. In addition, TECH carefully selects the centers available for the practical training, thereby guaranteeing access to a prestigious clinical environment and application of the latest technological advances and theories in the area.

TECH's Internship Program in Occupational and Organizational Psychology will enable participants to excel in their careers and improve the quality of life of employees in the workplace. Therefore, for the professional seeking to update their skills and knowledge in the area, this program is a valuable option.

02

- ♦ Learn and apply leadership and team management techniques
- ♦ Learn to develop training and development programs for employees
- ♦ Identify and analyze the main trends and challenges of the current labor market
- ♦ Develop organizational change management skills
- ♦ Understand the importance of Diversity and Inclusion in the work environment
- ♦ Learn to design and implement continuous improvement and quality programs in the workplace

04

Educational Plan

The Internship Program in Occupational and Organizational Psychology offers an enriching experience in a prestigious center. For three weeks, from Monday to Friday, students will work consecutive 8-hour days alongside a specialist, allowing them to experience first-hand the daily life of a demanding and rigorous work environment. The internship includes the opportunity to work with real cases and apply the most innovative procedures in each situation, which will result in the improvement of professional skills and competences, key to success in the area of Occupational and Organizational Psychology.

In this completely practical Internship Program, the activities are aimed at developing and perfecting the skills necessary to provide psychological attention in areas and conditions that require highly qualified professionals, and are oriented towards specific expertise for practicing the activity, in a safe environment for the patient and with highly professional performance.

A unique opportunity to learn in an innovative hospital, where the quality of its professionals and the availability of the most advanced technological resources will be at the student's disposal. This approach represents a new way of understanding and integrating health processes and makes the center an ideal setting for the acquisition of professional competences.

The practical education will be carried out with the active participation of the student performing the activities and procedures of each area of competence (learning to learn and learning to do), with the accompaniment and guidance of teachers and other fellow trainees that facilitate teamwork and multidisciplinary integration as transversal competencies for psychology praxis (learning to be and learning to relate).

The procedures described below will be the basis of the practical part of the program, and their implementation will be subject to the center's own availability and workload, the proposed activities being the following:

Module	Practical Activity
Group Psychology	Observe Group Behavior in an organization
	Analyze the level of cohesion and conflict among group members
	Design and apply intervention techniques to improve group dynamics
	Evaluate the efficacy of the techniques applied in the group
Occupational Psychology	Conduct personnel selection interviews
	Planning and carrying out performance assessment processes
	Advise in human resources decision making
	Identify and propose improvements in the work environment of the organization
Coaching	Interview coachees to learn about their goals and needs
	Design and implement individualized coaching sessions
	Evaluating the coachee's progress and adapting the coaching process according to their needs
	Give feedback to the clients on their performance and evolution
Application of different types of Psychology	Perform psychological assessments in the work environment
	Design training and education programs for the workers of an organization
	Advise on the management of diversity and inclusion in the workplace
	Apply psychological intervention techniques for the prevention and treatment of work-related stress
Social and Community Intervention	Identify the needs of a community or social group
	Designing and implementing social and community intervention programs
	Assess the effectiveness of the programs implemented and make the necessary modifications
	Work in collaboration with other professionals and organizations to achieve a positive social impact

General Conditions

Civil Liability Insurance

This institution's main concern is to guarantee the safety of the trainees and other collaborating agents involved in the internship process at the company. Among the measures dedicated to achieve this is the response to any incident that may occur during the entire teaching-learning process.

To this end, this entity commits to purchasing a civil liability insurance policy to cover any eventuality that may arise during the course of the internship at the center.

This liability policy for interns will have broad coverage and will be taken out prior to the start of the Internship Program period. That way professionals will not have to worry in case of having to face an unexpected situation and will be covered until the end of the internship program at the center.

General Conditions of the Internship Program

The general terms and conditions of the internship agreement for the program are as follows:

1. TUTOR: During the Internship Program, students will be assigned with two tutors who will accompany them throughout the process, answering any doubts and questions that may arise. On the one hand, there will be a professional tutor belonging to the internship center who will have the purpose of guiding and supporting the student at all times. On the other hand, they will also be assigned with an academic tutor, whose mission will be to coordinate and help the students during the whole process, solving doubts and facilitating everything they may need. In this way, the student will be accompanied and will be able to discuss any doubts that may arise, both clinical and academic.

2. DURATION: The internship program will have a duration of three continuous weeks, in 8-hour days, 5 days a week. The days of attendance and the schedule will be the responsibility of the center and the professional will be informed well in advance so that they can make the appropriate arrangements.

3. ABSENCE: If the students does not show up on the start date of the Internship Program, they will lose the right to it, without the possibility of reimbursement or change of dates. Absence for more than two days from the internship, without justification or a medical reason, will result in the professional's withdrawal from the internship, therefore, automatic termination of the internship. Any problems that may arise during the course of the internship must be urgently reported to the academic tutor.

4. CERTIFICATION: Professionals who pass the Internship Program will receive a certificate accrediting their stay at the center.

5. EMPLOYMENT RELATIONSHIP: The Internship Program shall not constitute an employment relationship of any kind.

6. PRIOR EDUCATION: Some centers may require a certificate of prior education for the Internship Program. In these cases, it will be necessary to submit it to the TECH internship department so that the assignment of the chosen center can be confirmed.

7. DOES NOT INCLUDE: The Internship Program will not include any element not described in the present conditions. Therefore, it does not include accommodation, transportation to the city where the internship takes place, visas or any other items not listed.

However, students may consult with their academic tutor for any questions or recommendations in this regard. The academic tutor will provide the student with all the necessary information to facilitate the procedures in any case.
